### 3411—METAL CANS

This industry comprises establishments primarily engaged in manufacturing metal cans from purchased tinsplate, terneplate, blackplate, or enameled sheet metal. Establishments primarily engaged in the manufacture of composite cans made partly of metal and partly of nonmetallic materials (such as fiberboard) are excluded from this industry. For a detailed list of products of industry 3411, refer to table 6A, product codes 3411001 to 3411091.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Metal Cans Industry totaled \$2,075 million. This amount included shipments of metal cans (primary products) valued at \$1,960 million, shipments of other products (secondary products) valued at \$63 million, and miscellaneous receipts (mainly sales of products bought and resold), at \$52 million.

This industry's shipments of metal cans represented 97 percent of its total product shipments. The industry specialization ratio in 1958 was 98 percent. Secondary products shipped by this industry in 1963 included steel shipping pails (\$12 million).

Shipments of metal cans by this industry represented 98 percent of all shipments of these products (\$2,002 million) by all industries. In 1958 the coverage ratio was 99 percent. Other industries shipping metal cans (primary products) included industry 3491, Metal Barrels, Drums, and Pails, \$7 million.

The production index for the primary products of the industry increased to 123 in 1963 from the 1958 level of 113. The unit value index for 1963 was 122 compared to 117 in 1958. Both indexes were computed on a basis of 1954 = 100.

Detailed figures on the shipments of metal cans are collected on a monthly basis by the Bureau of the Census on Form M34D. Table 6A shows totals for the data collected in the monthly survey and in the census of manufactures for the same period. The differences are due to minor revisions in the reports for some companies. Both the census of manufactures data for industry 3411 and the monthly survey include data for "captive" production, that is, the production of cans for use by the producing company. Most of these "captive" establishments are part of food, petroleum, and paint companies.

The monthly survey data are reported in terms of base boxes of metal consumed in the manufacture of cans. Also reported separately are the base boxes of steel (tinplate) and aluminum consumed in the manufacture of cans. For 1963 the base boxes of steel (tinplate) have been converted to short tons by use of the factor 23.5 base boxes per short ton of steel. For 1958 the conversion factors which appear in the table below were applied to individual types of cans.

The weight of aluminum consumed in producing metal cans was reported separately and totaled 43,321 short tons in 1963. Aluminum was not a significant factor in the production of metal cans in 1958.

Certain of the larger companies operating establishments classified in industry 3411 also have establishments producing other types of metal containers as well as containers made of other materials and which are classified in other industries; for example: steel shipping barrels, drums, and pails in industry 3491, Metal Barrels, Drums, and Pails; paper and paperboard boxes, drums, etc., in Major Group 26, Paper and Allied Products.

Type of can	Base boxes per short ton of steel
Fruit and vegetable (including juice).....	21.4
Evaporated and condensed milk.....	25.0
Other dairy products.....	20.4
Meat (including poultry).....	21.7
Fish and seafood.....	23.0
Coffee.....	21.3
Lard and shortening.....	21.7
Soft drink.....	22.1
Beer.....	20.6
Pet food.....	24.0
Oil, open-top (1 quart and 5 quart).....	23.3
All other food (including soup and baby food cans).....	23.0
All other nonfood.....	21.2

#### 3421—CUTLERY

This industry comprises establishments primarily engaged in manufacturing cutlery. Establishments primarily engaged in manufacturing table cutlery made entirely of metal are classified in industry 3914; those manufacturing electric razors, in industry 3634; and those manufacturing hair clippers for human use, in industry 3999, and for animal use, in industry 3522. For a detailed list of products of industry 3421, refer to table 6A, product codes 3421111 to 3421251.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Cutlery Industry totaled \$283 million. This amount included shipments of cutlery (primary products) valued at \$246 million; shipments of other products (secondary products) valued at \$30 million; and miscellaneous receipts (mainly sales of products bought and resold) at \$7 million.

This industry's shipments of cutlery represented 89 percent of its total product shipments. The industry specialization ratio in 1958 was 93 percent.

Shipments of cutlery by this industry represented 97 percent of all shipments of these products (\$254 million) by all industries. In 1958 the coverage ratio was 98 percent. Another industry shipping cutlery (primary products) was industry 3423, Hand and Edge Tools, \$4 million.

#### 3423—HAND AND EDGE TOOLS, EXCEPT MACHINE TOOLS AND HAND SAWS

This industry comprises establishments primarily engaged in manufacturing files and other hand and edge tools for metalworking, woodworking, and general maintenance. Establishments primarily engaged in manufacturing saws are classified in industry 3425; and metal cutting dies and power driven hand tools, and attachments and accessories for machine tools in Major Group 35. For a detailed list of products of industry 3423, refer to table 6A, product codes 3423111 to 3423398.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Hand and Edge Tools Industry totaled \$566 million. This amount included shipments of hand and edge tools (primary products) valued at \$445 million, shipments of other products (secondary products) valued at \$69 million, and miscellaneous receipts (mainly sale of products bought and resold) at \$51 million.

This industry's shipments of hand and edge tools represented 87 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent. Secondary products shipped by this industry in 1963 included hand saws, sawblades, and saw accessories (\$6 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 51 percent of the total industry shipments are represented by plants specializing in mechanics' hand service tools; and 28 percent in files, rasps, and file accessories and other hand tools.

Shipments of hand and edge tools by this industry represented 84 percent of all shipments of these products (\$536 million) by all industries. In 1958 the coverage ratio was 85 percent. Other industries shipping hand and edge tools (primary products) included industry 3429, Hardware, N.E.C., \$4 million; and industry 3421, Cutlery, \$3 million.

#### 3425—HAND SAWS AND SAW BLADES

This industry comprises establishments primarily engaged in manufacturing hand saws and saw blades for hand and power driven saws. Establishments primarily engaged in manufacturing power driven sawing machines are classified in Major Group 35. For a

detailed list of products of industry 3425, refer to table 6A, product codes 3425011 to 3425049.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Hand Saws and Saw Blades Industry totaled \$103 million. This amount included shipments of hand saws and saw blades (primary products) valued at \$72 million; shipments of other products (secondary products) valued at \$20 million; and miscellaneous receipts at \$11 million.

This industry's shipments of hand saws and saw blades represented 78 percent of its total product shipments. The industry specialization ratio in 1958 was 82 percent.

Shipments of hand saws and saw blades by this industry in 1963 represented 85 percent of all shipments of these products (\$85 million) by all industries. In 1958 the coverage ratio was 90 percent.

The production index for the primary products of the industry increased to 89 in 1963 from the 1958 level of 88. The unit value index for 1963 was 148 compared to 134 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3429—HARDWARE, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing miscellaneous metal products usually termed "hardware" and not elsewhere classified. Establishments primarily engaged in manufacturing bolts and nuts are classified in industry 3452, nails and spikes in Major Group 33, cutlery in industry 3421, hand tools in industry 3423, and pole line and transmission hardware in Major Group 36. For a detailed list of products of industry 3429, refer to table 6A, product codes 3429111 to 3429598.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

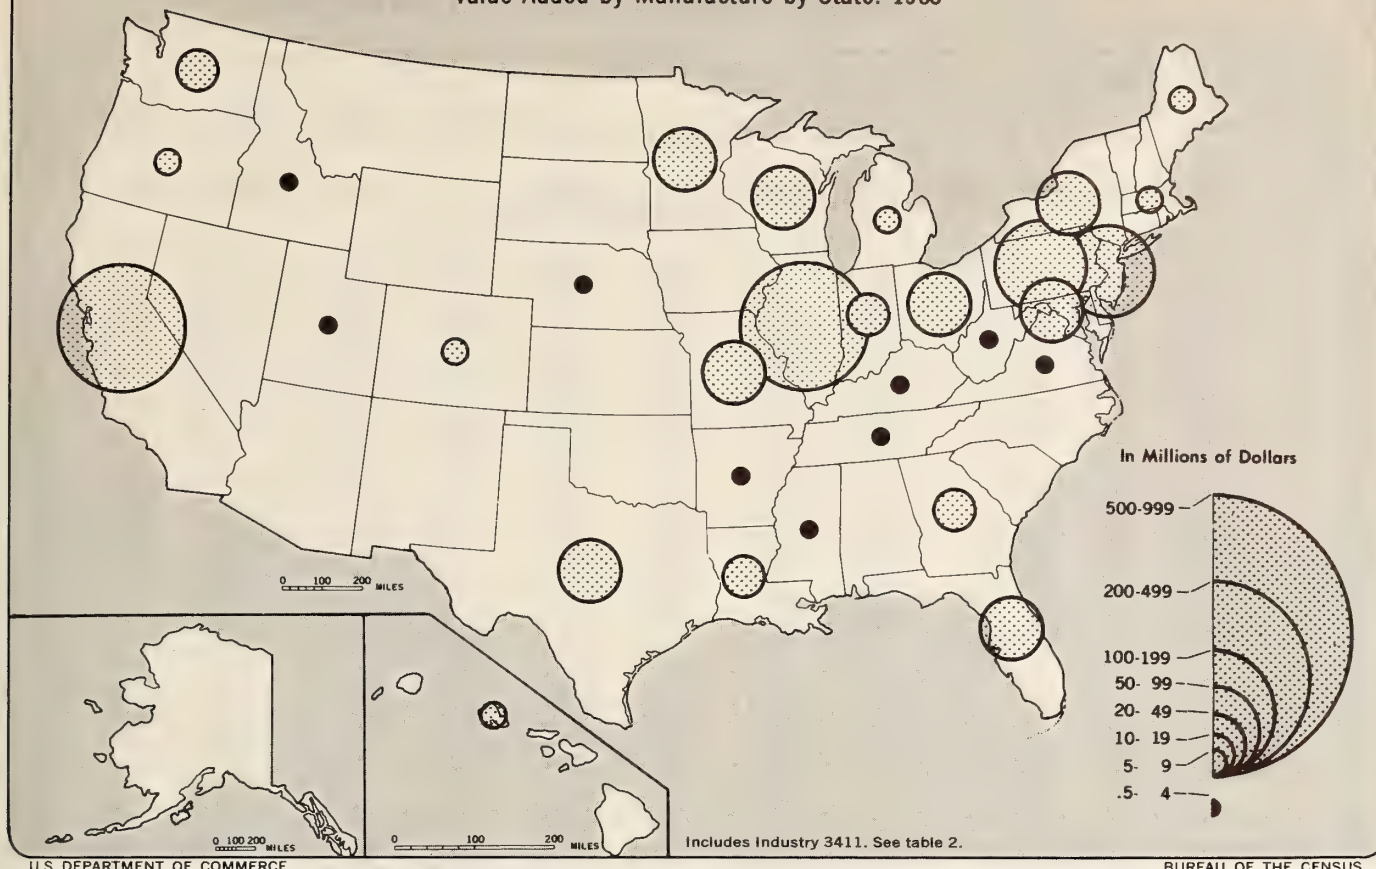

Value of shipments and other receipts of the Hardware, N.E.C., Industry totaled \$1,785 million. This amount included shipments of hardware, n.e.c., (primary products) valued at \$1,553 million; shipments of other products (secondary products) valued at \$158 million; and miscellaneous receipts (mainly sales of products bought and resold) at \$74 million.

This industry's shipments of hardware, n.e.c., represented 91 percent of its total product shipments. The industry specialization ratio in 1958 was 89 percent. Secondary products shipped by this industry in 1963 included fabricated metal products, n.e.c. (\$13 million), and job stampings, except automatic (\$8 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 48 percent of the total industry shipments are represented by plants specializing in transportation hardware, and 28 percent in builders' hardware.

Shipments of hardware, n.e.c., by this industry represented 93 percent of all shipments of these products (\$1,663 million) by all industries. In 1958 the coverage ratio was also 93 percent. Other industries shipping hardware, n.e.c., included industry 3461, Metal Stampings, \$13 million; industry 3537, Industrial Trucks and Tractors, \$6 million; and industry 3964, Needles, Pins, and Fasteners, \$6 million.

# **METAL CANS: SIC 341** Value Added by Manufacture by State: 1963

# **CUTLERY, HAND TOOLS, HARDWARE: SIC 342** Value Added by Manufacture by State: 1963

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing, or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>2</sup>Data for Alaska and Hawaii are excluded for 1958 and earlier years.

<sup>3</sup>Figures for 1958-1963 and 1929 and earlier years do not include dairymen's tinware.

<sup>4</sup>A number of small establishments were misclassified into industry 3411 that should have been included in other industries. This affects the total establishments and total company counts and the number of establishments in the smaller size classes for industry 3411, but has no appreciable effect on the employment, value of shipments and other statistics of this industry.

<sup>5</sup>The figures for 1939 are not entirely comparable with those for earlier years. Value added by manufacture for 1939 on a basis comparable with earlier years was \$123.6 million.

<sup>6</sup>Data for stamped tinware, other than tin cans, are excluded from the figures for 1925-1935.

<sup>7</sup>"Metal cans" was formerly a part of the discontinued industry "Tinsmithing, coppersmithing and sheet iron working." Separate figures for 1899 are, therefore, not available.

<sup>8</sup>No comparable data are available for earlier years.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State. SIC 3411, Metal Cans: New England—Maine, 2 (250-499); Massachusetts, 4 (250-499); Connecticut, 1 (1-19); East North Central—Ohio, 14 (2,115); Indiana, 4 (812); Michigan, 4 (159); West North Central—Minnesota, 5 (1,173); Missouri, 9 (2,500-4,999); Nebraska, 1 (250-499); Kansas, 1 (1-19); South Atlantic—Virginia, 2 (100-249); West Virginia, 3 (162); North Carolina, 1 (1-19); South Carolina, 1 (1-19); Georgia, 5 (619); East South Central—Kentucky, 1 (20-99); Tennessee, 6 (100-249); Mississippi, 1 (20-99); West South Central—Arkansas, 2 (100-249); Louisiana, 2 (1,000-2,499); Oklahoma, 2 (20-99); Mountain—Idaho, 3 (20-99); Utah, 3 (135); Pacific—Oregon, 7 (250-499); Hawaii, 4 (250-499). SIC 3421, Cutlery: New England—Massachusetts, 8 (2,350); Rhode Island, 4 (500-999); Connecticut, 12 (1,000-2,499); New Jersey, 25 (1,270); Pennsylvania, 8 (634); East North Central—Indiana, 3 (1-19); Illinois, 5 (113); Michigan, 8 (100-249); Wisconsin, 3 (131); West North Central—Minnesota, 3 (1-19); Iowa, 6 (20-99); Missouri, 2 (20-99); South Atlantic—Delaware, 1 (1-19); Maryland, 1 (1-19); Virginia, 2 (500-999); Florida, 3 (20-99); West South Central—Arkansas, 2 (100-249); Texas, 1 (1-19); Mountain—Montana, 1 (1-19); Colorado, 1 (100-249); Pacific—Washington, 1 (1-19); Oregon, 2 (1-19); California, 9 (126).

Footnotes continued on next page.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958—Continued

## Footnotes for Table 2—34A—Continued

SIC 3423, Hand and Edge Tools: New England—Maine, 9 (106); New Hampshire, 5 (100-249); Vermont, 5 (100-249); East North Central—Indiana, 25 (1,549); Wisconsin, 14 (540); West North Central—Missouri, 24 (961); Nebraska, 5 (100-249); Kansas, 6 (250-499); South Atlantic—Maryland, 2 (1-19); District of Columbia, 1 (1-19); Virginia, 3 (20-99); West Virginia, 4 (1,000-2,499); North Carolina, 5 (371); South Carolina, 1 (500-999); Georgia, 1 (1-19); Florida, 6 (20-99); East South Central—Kentucky, 4 (20-99); Tennessee, 3 (1-19); Alabama, 2 (1-19); Mississippi, 2 (20-99); West South Central—Arkansas, 6 (20-99); Oklahoma, 1 (1-19); Texas, 6 (100-249); Mountain—Colorado, 4 (100-249); Utah, 3 (20-99); Pacific—Washington, 5 (100-249); Oregon, 8 (141).

SIC 3425, Hand Saws and Saw Blades: New England—New Hampshire, 1 (20-99); Massachusetts, 5 (1,443); Connecticut, 5 (500-999); Middle Atlantic—New Jersey, 3 (20-99); Pennsylvania, 6 (279); East North Central—Indiana, 1 (20-99); Illinois, 5 (295); Michigan, 2 (100-249); West North Central—Minnesota, 1 (1-19); Missouri, 1 (100-249); South Atlantic—Maryland, 1 (1-19); Virginia, 1 (250-499); North Carolina, 3 (20-99); Georgia, 2 (20-99); East South Central—Kentucky, 3 (250-499); Alabama, 1 (20-99); Mississippi, 1 (500-999); West South Central—Arkansas, 1 (1-19); Texas, 1 (1-19); Pacific—Washington, 1 (1-19); Oregon, 2 (20-99); California, 7 (123).

SIC 3429, Hardware, N.E.C.: New England—Maine, 3 (265); Vermont, 1 (20-99); Rhode Island, 5 (100-249); West North Central—South Dakota, 3 (20-99); Nebraska, 1 (1-19); Kansas, 1 (1-19); South Atlantic—Maryland, 7 (20-99); District of Columbia, 2 (20-99); Virginia, 3 (624); West Virginia, 1 (20-99); South Carolina, 1 (250-499); Georgia, 3 (1-19); East South Central—Kentucky, 7 (252); Tennessee, 15 (2,460); Alabama, 3 (463); Mississippi, 4 (634); West South Central—Louisiana, 2 (100-249); Oklahoma, 6 (1-19); Mountain—Idaho, 1 (1-19); Wyoming, 1 (1-19); Arizona, 2 (1-19); Utah, 1 (1-19).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

<sup>3</sup>Excludes data for Alaska and Hawaii.

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left. n.e.c. Not elsewhere classified.

<sup>1</sup>Includes capital expenditures for plants under construction but not in operation of approximately \$2-\$5 million.<sup>2</sup>Includes capital expenditures for plants under construction but not in operation of approximately \$1-\$2 million.

TABLE 5A. **Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

34295 32	Trunk and luggage hardware, including locks.....	15,015	11,181
34295 52	Fireplace fixtures and equipment, including dampers and irons, and fire screens.....	16,377	12,059
34295 62	Hose fittings and couplings.....	63,120	54,396
34295 65	Refrigerator and stove hardware.....	21,595	27,298
34295 98	Other hardware, including saddlery and harness hardware, but excluding drapery hardware.....	61,504	53,572
34295 00	Other hardware, n.s.k.....	4,414	12,688
34290 00	Hardware, n.e.c., n.s.k.....	38,078	31,092

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>A base box is an area of 31,360 square inches, equivalent to 112 sheets, 14" x 20" in size.

<sup>2</sup>Data for Alaska and Hawaii are excluded.

<sup>3</sup>A metal can is defined as a single-walled container constructed wholly of tinplate, terneplate, blackplate, waste plate, aluminum sheet or impact extrusions (slugs) designed for packing products. This definition excludes steel pails, defined as single-walled shipping containers having capacities of 1-12 gallons inclusive that are cylindrically constructed of steel sheet of 29 gauge and heavier.

<sup>4</sup>The 1963 and 1958 figures represent, respectively, 4,621 and 4,762 thousand short tons of steel. The 1963 estimate is derived by use of the factor 23.5 base boxes per short ton of steel. The 1958 figure is derived by use of separate conversion factors for each type of can. These factors vary from 20.4 to 25.0 base boxes per short ton of steel depending on the type of can.

<sup>5</sup>Represents 43,321 short tons of aluminum.

<sup>6</sup>For 1963, represents shipments of 20,140 thousand units.

<sup>7</sup>For 1958, represents shipments of 15,872 thousand units valued at \$8,978 thousand; the remaining \$3,458 thousand had no quantity reported.

<sup>8</sup>Includes all types and sizes of solid-tooth circular saw blades for industrial and home workshop type circular saws as well as saw blades for portable power saws and for sawing attachments for portable hand tools.

<sup>9</sup>Includes only the value of motor vehicle hardware reported as such. It is likely that an indeterminate amount of motor vehicle hardware was reported as motor vehicle parts and classified accordingly in the Motor Vehicle and Parts Industry.

**TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Data for Alaska and Hawaii are excluded.

TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

970099	All other materials and components, parts, containers, and supplies consumed.....		(X)	291,804	(X)	243,300
976000	Materials, parts, containers, and supplies, n.s.k. <sup>2</sup> .....		(X)	44,121	(X)	58,627

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. Data are included in code 970099.  
 (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Data for Alaska and Hawaii are excluded.

<sup>2</sup>Data on the weight of aluminum consumed in the production of cans constructed wholly of metal are published in Current Industrial Reports Series M34D, "Metal Cans." The consumption total reported in the census also includes aluminum consumed in the production of secondary products.

<sup>3</sup>Material code 331013, carbon steel plates, is combined with material code 331019, all other carbon steel mill shapes and forms.

<sup>4</sup>Does not include castings or forgings produced and consumed in the same establishment.

<sup>5</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>6</sup>In 1963, 3,802 short tons of iron and steel forgings were produced and consumed in the same establishment. No comparable data are available for 1958.

<sup>7</sup>In 1963, there were, in addition, 2,748 short tons of iron castings and 2,216 thousand pounds of aluminum castings produced and consumed in the same establishment. Data for other types of castings produced and consumed in the same establishment in 1963 are not available. No data are available for 1958.

Driven by energy generated at establishment.....do....	3	2	6	-	3
Aggregate horsepower per 100 production workers.....	785	507	783	682	613

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)
			Total (number)	Payroll (\$1,000)	Total (number)	Man-hours (1,000)	Wages (\$1,000)

See footnotes at end of table.

TABLE 9. Establishments, and Production Workers for Selected Metalworking Operations: 1963—Continued

Footnotes for Table 9-34A

Note: Very small establishments were not requested to report their metalworking operations and in some instances a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production worker employment on the last line of the table below.

Item	3411	3421	3423	3425	3429
Total number of establishments in the industry.....	270	161	716	76	1,069
Number of establishments which reported one or more of the specified operations.....	184	79	303	39	513
Percent of industry production workers in these establishments.....	85-90	85-90	80-85	80-85	85-90
Number of establishments which reported "none" of the operations apply.....	49	10	35	5	53
Percent of industry production workers in these establishments.....	10-15	0-5	0-5	0-5	0-5
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	over 95	90-95	80-85	85-90	90-95

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of production workers in the specified operation. They are not based on total employment of the establishment.

## HEATING APPARATUS, EXCEPT ELECTRIC, AND PLUMBING FIXTURES

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3431—Enameled Iron and Metal Sanitary Ware
- 3432—Plumbing Fixture Fittings and Trim (Brass Goods)
- 3433—Heating Equipment, Except Electric

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3431—ENAMELED IRON AND METAL SANITARY WARE

This industry comprises establishments primarily engaged in manufacturing enameled iron, cast iron, or pressed metal sanitary ware. Establishments primarily engaged in manufacturing vitreous and semivitreous pottery sanitary ware are classified in industry 3261; and those manufacturing porcelain enameled kitchen, household, and hospital ware in industry 3461. For a detailed list of products of industry 3431, refer to table 6A, product codes 3431002 to 3431098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Metal Plumbing Fixtures Industry in 1963 totaled \$234 million. This amount included shipments of metal plumbing fixtures (primary products) valued at \$184 million, shipments of other products (secondary products) valued at \$34 million, and miscellaneous receipts (mainly resales) at \$16 million.

This industry's shipments of metal plumbing fixtures in 1963 represented 84 percent of its total product shipments. The industry specialization ratio in 1958 was also 84 percent. Secondary products shipped by this industry in 1963 consisted mainly of plumbing fixture fittings and trim (brass goods).

Shipments of metal plumbing fixtures by this industry in 1963 represented 91 percent of all shipments of these products (\$204 million) by all industries. In 1958 the coverage ratio was 92 percent. Another industry shipping metal plumbing fixtures included industry 3461, Metal Stampings, \$9.3 million.

The production index for the primary products of the industry increased to 136 in 1963 from the 1958 level of 104. The unit value index for 1963 was 72 compared to 83 in 1958. Both indexes were computed on a basis of 1954 = 100.

Industry 3431 includes establishments which fall into two significantly different categories, namely those producing cast iron plumbing fixtures and those producing metal fixtures of pressed metal. Accordingly, the manufacturing plants included in this industry involve different manufacturing processes depending upon the line of products produced. Those fixture plants producing cast iron fixtures include significant foundry operations while the pressed metal fixture plants are more closely allied to metal fabricating plants producing their product by forming processes (stamping, drawing, etc.).

The operations of the largest establishments in this industry cover the entire production process including the casting of the fixture, through the machining, finishing, and assembly operations. In general these processes are carried on at a single manufacturing plant. However, in a few instances the foundry operations were performed at separate locations and, accordingly, those separate foundries were classified in the foundry industries (SIC industries 3321, 3322, 3323, 3361, 3362 and 3369). In the latter case the plants classified in this industry would be limited to machining and finishing operations on castings received from their associated plants.

Certain of the companies operating plants classified in this industry also have establishments producing allied products classified in other industries. For example, the larger fixture manufacturers also have plants engaged in manufacturing fixture fittings and such allied products as vitreous china fixtures, kitchen cabinets, warm air furnaces, boilers and other consumer durable items in the plumbing and heating line.

As is shown in table 7, certain of the more important materials consumed by the industry are pig iron, and iron and steel scrap metal consumed in the foundry operations and steel mill shapes and forms. In addition, data are also shown for the quantity of iron castings produced and consumed within the plants classified in this industry.

Data on shipments of plumbing fixtures were collected by the Bureau of the Census on a quarterly basis on Form M34E. The detailed statistics shown in table 6A were taken from the quarterly survey.

#### 3432--PLUMBING FIXTURE FITTINGS AND TRIM (BRASS GOODS)

This industry comprises establishments primarily engaged in manufacturing plumbing fixture fittings and trim (brass goods). Establishments primarily engaged in the manufacture of steam or water line valves are classified in industry 3494. For a detailed list of products of industry 3432, refer to table 6A, product codes 3432001 to 3432098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Plumbing Fittings, Brass Goods, Industry in 1963 totaled \$334 million. This amount included shipments of plumbing fixture fittings and trim, brass goods (primary products) valued at \$274 million, shipments of other products (secondary products) valued at \$31 million, and miscellaneous receipts (mainly resales) at \$29 million.

This industry's shipments of plumbing fixture fittings and trim, brass goods, in 1963 represented 90 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent. Secondary products shipped by this industry in 1963 included metal valves for piping systems (except plumbing and heating valves) (\$3.2 million),

and plumbing and heating valves and specialties (except plumbers brass goods) (\$3.2 million).

Shipments of plumbing fixture fittings and trim, brass goods, by this industry in 1963 represented 83 percent of all shipments of these products (\$330 million) by all industries. In 1958 the coverage ratio was also 83 percent. Another industry shipping plumbing fixture fittings and trim, brass goods included industry 3494, Valves and Pipe Fittings, \$10.8 million.

The production index for the primary products of the industry increased to 167 in 1963 from the 1958 level of 123. The unit value index for 1963 was 93 compared to 99 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3433—HEATING EQUIPMENT, EXCEPT ELECTRIC

This industry comprises establishments primarily engaged in manufacturing heating equipment for all purposes other than power, including all gas, oil, and stoker coal fired equipment for the automatic utilization of gaseous, liquid, and solid fuels. Establishments primarily engaged in manufacturing electric stoves and ranges are classified in industry 3631; boiler shops primarily engaged in the production of industrial, power, and marine boilers in industry 3443; and industrial process furnaces and ovens in industry 3567. For a detailed list of products of industry 3433, refer to table 6A, product codes 3433110 to 3433698.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Heating Equipment, Except Electric, Industry in 1963 totaled \$1,020 million. This amount included shipments of heating equipment, except electric (primary products) valued at \$721 million, shipments of other products (secondary products) valued at \$226 million, and miscellaneous receipts of \$73 million.

This industry's shipments of heating equipment, except electric, in 1963 represented 76 percent of its total product shipments. The industry specialization ratio in 1958 was 81 percent. Secondary products shipped by this industry in 1963 included steel power boilers, parts and attachments (over 15 p.s.i. steam working pressure) (\$18.6 million), and heat transfer equipment (\$77.6 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent to this specialization is indicated in table 8. Approximately 22 percent of the total industry shipments are represented by plants specializing in product class 34332, Warm air furnaces (except floor and wall), except parts; and 30 percent in product class 34336, Other heating equipment (except electric) and parts for nonelectric heating equipment.

Shipments of heating equipment, except electric, by this industry in 1963 represented 81 percent of all shipments of these products (\$893 million) by all industries. In 1958 the coverage ratio was 80 percent. Another industry shipping heating equipment, except electric was industry 3585, Refrigeration Machinery, \$69.2 million.

The production index for the primary products of the industry increased to 116 in 1963 from the 1958 level of 103. The unit value index for 1963 was 105 compared to 110 in 1958. Both indexes were computed on a basis of 1954 = 100.

Inasmuch as the primary products of industry 3433 represent a wide and heterogeneous group of heating equipment products, the establishments in this industry are involved in

a variety of manufacturing processes. Many heating equipment plants are engaged in metal fabricating activities, namely, stamping and forming. In addition, a significant number of the establishments in the industry are engaged in foundry and plate fabricating activities.

Some of the companies operating plants classified in industry 3433 have establishments engaged in the production of allied products such as metal tanks, electric and nonelectric ranges, electric and nonelectric water heaters and other consumer durable items principally in the heating and cooking line.

The establishments of this industry vary greatly in the degree to which they manufacture the components used in the production of heating and cooking equipment. Some manufacturers produce practically all of the component parts and incorporate only such purchased parts as the motor, electrical controls, and blowers. Other manufacturers produce only a small part of the complete unit purchasing most of the components from other manufacturers and limiting their manufacturing activities to assembly operations.

Data are shown in table 6A for "oil burners sold separately." These statistics exclude the quantity and value of oil burners which were both produced and incorporated into other types of heating equipment in the same plant. In these instances the value of the boiler- or furnace-burner unit includes the value of the oil burner.

Data on shipments of domestic heating stoves, mechanical stokers, oil burners, and furnaces were collected during 1963 by the Bureau of the Census on Annual Form MA-34N, Heating and Cooking Equipment (Except Electric). The product data shown for 1963 in table 6A are from that source.

Data for unit ventilators, unit heaters, and parts for unit heaters and ventilators, and heat transfer coils were collected during 1963 by the Bureau of the Census on a quarterly basis on Form M35H, Fans and Blowers. The product data shown in table 6A were taken from the quarterly survey.

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification. Accordingly, the data for 1958-1963 are not comparable with those for earlier years.

<sup>3</sup>The two industries shown above were a single industry in 1957 and earlier years. They are shown combined so that historical data may be presented.

<sup>4</sup>No comparable figures are available for earlier years.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3431, Metal Plumbing Fixtures: New England—Massachusetts, 5 (20-99); Middle Atlantic—New York, 7 (20-99); New Jersey, 4 (557); East North Central—Michigan, 3 (500-999); Wisconsin, 3 (1,904); West North Central—Missouri, 1 (20-99); South Atlantic—Maryland, 3 (804); North Carolina, 1 (1-19); South Carolina, 1 (20-99); Georgia, 2 (20-99); Florida, 2 (1-19); East South Central—Kentucky, 2 (1,000-2,499); Tennessee, 2 (500-999); West South Central—Texas, 3 (226); Mountain—Colorado, 1 (1-19); Pacific—California, 14 (1,000-2,499).

SIC 3432, Plumbing Fittings, Brass Goods: New England—Massachusetts, 8 (100-249); Rhode Island, 2 (1-19); Middle Atlantic—New York, 35 (726); New Jersey, 5 (495); East North Central—Michigan, 16 (1,000-2,499); Wisconsin, 7 (482); West North Central—Minnesota, 2 (100-249); Iowa, 3 (174); Missouri, 5 (100-249); Kansas, 3 (20-99); South Atlantic—Delaware, 2 (250-499); Maryland, 2 (20-99); West Virginia, 2 (1,000-2,499); North Carolina, 1 (20-99); South Carolina, 2 (20-99); Georgia, 1 (100-249); Florida, 7 (20-45); East South Central—Kentucky, 2 (500-999); Alabama, 3 (20-99); West South Central—Arkansas, 1 (1-19); Texas, 7 (516); Mountain—Montana, 1 (1-19); Colorado, 2 (1-19); Pacific—Washington, 2 (1-19); Oregon, 1 (1-19); California, 47 (1,000-2,499); Hawaii, 1 (1-19).

SIC 3433, Heating Equipment, Except Electrical: New England—Maine, 2 (20-99); Vermont, 1 (1-19); Rhode Island, 7 (100-249); West North Central—Minnesota, 14 (250-499); Iowa, 5 (445); North Dakota, 1 (1-19); South Dakota, 2 (1-19); Nebraska, 2 (100-249); Kansas, 5 (1,174); South Atlantic—Maryland, 4 (100-249); Virginia, 6 (312); West Virginia, 1 (100-249); North Carolina, 4 (20-99); South Carolina, 1 (20-99); Georgia, 3 (441); Florida, 6 (20-99); East South Central—Kentucky, 6 (409); West South Central—Arkansas, 2 (250-499); Louisiana, 3 (1-19); Oklahoma, 3 (134); Mountain—Montana, 2 (1-19); Colorado, 2 (1-19); Arizona, 2 (1-19); Utah, 4 (20-99); Pacific—Washington, 12 (100-249); Oregon, 10 (20-99).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

TABLE 3. Detailed Statistics: 1963

Item	Metal plumbing fixtures (SIC 3431)	Plumbing fittings, brass goods (SIC 3432)	Heating equipment, except electric (SIC 3433)
Primary product specialization ratio <sup>1</sup> .....	.84	.90	.76
Coverage ratio <sup>2</sup> .....	.91	.83	.81

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

<sup>1</sup>Includes capital expenditures for plants under construction but not in operation which constitute \$1-\$2 million of the total for the industry.

TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B+C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)
		A	B	C	D	E	F	G	H	I
3431	Metal plumbing fixtures.....1963..	234,896	184,248	34,301	16,347	84	203,517	184,248	19,269	91

Note: See Introduction for an explanation of terms used.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k Not specified by kind.

<sup>1</sup>The quantity data for plumbing fixtures were obtained from Census Quarterly Survey M34E. In this survey it is necessary to combine certain metal fixtures with fixtures made of other materials such as vitreous china, concrete, etc. Accordingly the quantity data do not relate exactly to the value figures shown for enameled iron and metal plumbing fixtures.

<sup>2</sup>Differs from value of shipments of metal plumbing fixtures reported in the Census Quarterly Survey due to different methods of reporting values in the two surveys.

<sup>3</sup>The quantity data for vitreous china plumbing fixtures were obtained from the Census Quarterly Survey M34E. No separate quantity data for vitreous and semivitreous sinks, laundry trays, and other plumbing fixtures are available since these items were combined, in the quarterly survey, with similar items made of other materials.

<sup>4</sup>Represents vitreous china only. In addition, shipments of \$2,398 thousand and \$2,236 thousand were reported for 1963 and 1958, respectively, for plumbing fixtures made of glazed earthenware, concrete, and composition.

<sup>5</sup>For 1958, product codes 34320, 19, 29, 39, and 48 are included with product code 34320 98.

<sup>6</sup>Excludes furnace-burner and boiler-burner units, product codes 3433151, 59, 65, 31, 39, and 45. The total number of oil burners including such units is 563,227 in 1963 and 624,888 in 1958.

<sup>7</sup>Commercial and industrial burners are those with consumption rates of 6 gallon per hour or more.

<sup>8</sup>In 1958, the value of steam or hot water heating elements were included with the value for gas-fired unit heaters.

<sup>9</sup>Conversion stoker—a conversion stoker is a mechanical stoker which may be installed in any of the common types of furnaces or boilers.

<sup>10</sup>Integral unit—an integral unit consists of a boiler or furnace, an automatic coal-feeding mechanism, accessories, and usually a metal enclosure, the whole assembly having been designed as a complete, compact and coordinated heating unit.

<sup>11</sup>Parts for unit heaters and unit ventilators are included with other heating equipment, except electric, and parts for other heating equipment, except electric, code 3433698 for 1958.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Source: Current Industrial Reports Series M34N "Heating and Cooking Equipment."

TABLE 6D. **Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

TABLE 7A. Materials by Kind: 1963 and 1958—Continued

Footnotes for Table 7A--Continued

<sup>1</sup>Data are not available for castings produced and consumed in the same establishment except for iron castings which totaled 187,541 short tons in 1963 and 211,467 short tons in 1958.

<sup>2</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>3</sup>For 1963, data for aluminum and aluminum-base alloy, sheet, plate, and foil, are included with "All other aluminum mill shapes and forms."

<sup>4</sup>No data are available for castings produced and consumed in the same establishment.

<sup>5</sup>No data are available for 1963 on the quantities of electric motors and generators produced and consumed in the same establishment. In 1958, there were 119,909 units of code 362115, other fractional horsepower electric motors produced and consumed in the same establishment.

TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962

Item	Metal plumbing fixtures (SIC 3431)	Plumbing fittings, brass goods (SIC 3432)	Heating equipment, except electric (SIC 3433)

Prime movers, total.....do....	21	9	30
Driving generators.....do....	12	(Z)	3
Not driving generators.....do....	9	9	27
Electric motors, total.....do....	125	61	183
Driven by purchased energy.....do....	110	61	183
Driven by energy generated at establishment.....do....	14	-	-
Aggregate horsepower per 100 production workers.....	1,740	625	686

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

TABLE 9. Establishments, Production Workers, and Man-Hours for Selected Metalworking Operations: 1963—Continued

Footnotes for Table 9-34B

Note: Very small establishments were not requested to report their metalworking operations and in some instances a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production worker employment on the last line of the table below.

Item	INDUSTRY		
	3431	3432	3433
Total number of establishments in the industry.....	81	250	648
Number of establishments which reported one or more of the specified operations.....	34	115	305
Percent of industry production workers in these establishments.....	(85-90)	(80-85)	(75-80)
Number of establishments which reported "none" of the operations apply....	5	12	(X)
Percent of industry production workers in these establishments.....	(0-5)	(0-5)	(X)
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	(85-90)	(85-90)	(75-80)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## FABRICATED STRUCTURAL METAL PRODUCTS

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3441—Fabricated Structural Steel
- 3442—Metal Doors, Sash, Frames, Molding, and Trim
- 3443—Fabricated Plate Work (Boiler Shops)
- 3444—Sheet Metal Work
- 3446—Architectural and Ornamental Metal Work
- 3449—Miscellaneous Metal Work

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3441—FABRICATED STRUCTURAL STEEL

This industry comprises establishments primarily engaged in manufacturing fabricated iron and steel or other metal for structural purposes, for bridges, buildings, and sections for ships, boats, and barges. Establishments primarily engaged in manufacturing metal doors, sash, frames, molding, and trim are classified in industry 3442; and fabrication work done by construction contractors at the site of construction is classified in construction industries. For a detailed list of products of industry 3441, refer to table 6A, product codes 3441121 to 3441398.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Fabricated Structural Steel Industry in 1963 totaled \$1,916 million. This amount included shipments of fabricated structural steel (primary products) valued at \$1,432 million, shipments of other products (secondary products) valued at \$237 million, and miscellaneous receipts (mainly receipts for resales) at \$247 million.

This industry's shipments of fabricated structural steel in 1963 represented 86 percent of its total product shipments. The industry specialization ratio in 1958 was 87 percent. Secondary products shipped by this industry in 1963 included miscellaneous metal building materials (\$57 million) and ornamental and structural metal work (\$31 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 69 percent of the total industry shipments are represented by plants specializing in fabricated structural metal for buildings.

Shipments of fabricated structural steel by this industry in 1963 represented 89 percent of all shipments of these products (\$1,604 million) by all industries. In 1958 the coverage ratio was 91 percent. Other industries shipping fabricated structural steel included industry 3443, Boiler Shops, \$32 million; and industry 3444, Sheet Metal Work, \$12 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product class of industry 3441, other fabricated structural metal, 77 percent.

The production index for the primary products of the industry increased to 119 in 1963 from the 1958 level of 114. The unit value index for 1963 was 120 compared to 126 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3442—METAL DOORS, SASH, FRAMES, MOLDING, AND TRIM

This industry comprises establishments primarily engaged in manufacturing ferrous and nonferrous metal and metal covered doors and sash, window and door frames and screens, molding, and trim. For a detailed list of products of industry 3442, refer to table 6A, product codes 3442113 to 3442551.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Metal Doors, Sash and Trim Industry in 1963 totaled \$1,254 million. This amount included shipments of metal doors, sash and trim (primary products), valued at \$1,046 million, shipments of other products (secondary products) valued at \$136 million, and miscellaneous receipts (mainly receipts for resales) at \$72 million.

This industry's shipments of metal doors, sash, frames, and molding and trim in 1963 represented 88 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent. Secondary products shipped by this industry in 1963 included miscellaneous metal building materials (\$32 million) and sheet metal, roofing, drainage and siding equipment (\$16 million).

Shipments of metal doors, sash and trim by this industry in 1963 represented 94 percent of all shipments of these products (\$1,107 million) by all industries. In 1958 the coverage ratio was 93 percent. Other industries shipping metal doors, sash and trim included industry 3441, Fabricated Structural Metal, \$11 million; and industry 3449, Miscellaneous Metal Work, \$7 million.

The production index for the primary products of the industry increased to 158 in 1963 from the 1958 level of 146. The unit value index for 1963 was 94 compared to 99 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3443—FABRICATED PLATE WORK (BOILER SHOPS)

This industry comprises establishments primarily engaged in manufacturing power and marine boilers, pressure and nonpressure tanks, processing and storage vessels, heat exchangers, weldments and similar products, by the process of cutting, forming and joining metal plates, shapes, bars, sheet, pipe mill products and tubing to custom or standard design for factory or field assembly. Establishments primarily engaged in

manufacturing nonelectric heating apparatus other than power boilers are classified in industry 3433, and household cooking apparatus in industry 3631. For a detailed list of products of industry 3443, refer to table 6A, product codes 3443111 to 3443959.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Boiler Shops Industry in 1963 totaled \$1,623 million. This amount included shipments of boiler shop products (primary products), valued at \$1,311 million, shipments of other products (secondary products) valued at \$168 million, and miscellaneous receipts (largely receipts for resales) at \$144 million.

This industry's shipments of boiler shop products in 1963 represented 89 percent of its total product shipments. The industry specialization ratio in 1958 was also 89 percent. Secondary products shipped by this industry in 1963 included fabricated structural metal for buildings (\$21 million), and general industrial machinery and equipment, n.e.c. (\$12 million).

Shipments of boiler shop products by this industry in 1963 represented 83 percent of all shipments of these products (\$1,581 million) by all industries. In 1958 the coverage ratio was also 83 percent. Other industries shipping fabricated plate works (boiler shops) included industry 3441, Fabricated Structural Metal, \$45 million; and industry 3433, Nonelectric Heating Equipment, \$22 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3443, e.g., heat exchangers and steam condensers, 67 percent; fabricated steel plate, 73 percent; steel power boilers, parts and attachments, 93 percent; gas cylinders, 65 percent; metal tanks and vessels, custom fabricated and field erected, 97 percent.

#### 3444—SHEET METAL WORK

This industry comprises establishments primarily engaged in manufacturing sheet metal work for buildings (not including fabrication work done by construction contractors at the place of construction) and manufacturing sheet metal stovepipes, light tanks, etc. For a detailed list of products of industry 3444, refer to table 6A, product codes 344111 to 3444398.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Sheet Metal Work Industry in 1963 totaled \$1,304 million. This amount included shipments of sheet metal work (primary products) valued at \$1,031 million, shipments of other products (secondary products) valued at \$139 million, and miscellaneous receipts (mainly receipts for resales) at \$134 million.

This industry's shipments of sheet metal work in 1963 represented 88 percent of its total product shipments. The industry specialization ratio in 1958 was also 88 percent. Secondary products shipped by this industry in 1963 included fabricated structural metal for buildings (\$11 million) and metal tanks complete at factory (standard line, non-pressure) (\$9 million).

Shipments of sheet metal work by this industry in 1963 represented 78 percent of all shipments of these products (\$1,325 million) by all industries. In 1958 the coverage ratio was 82 percent. Other industries shipping sheet metal work included industry 3312, Blast Furnaces and Steel Mills, \$42 million; and industry 3442, Metal Doors, Sash and Trim, \$32 million. These shipment totals do not take into account the volume of

sheet metal work performed by nonmanufacturing establishments, for example, the production of heating and ventilating ducts by plumbing and heating contractors, the production of skylights by roofing contractors, etc.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3444, e.g., sheet metal roofing, siding, and drainage equipment, 62 percent.

#### 3446—ARCHITECTURAL AND ORNAMENTAL METAL WORK

This industry comprises establishments primarily engaged in manufacturing architectural and ornamental metal work of ferrous and nonferrous metals, such as stairs and staircases, open steel flooring (grating), fire escapes, grills, railings, and fences and gates except wire. Establishments primarily engaged in manufacturing prefabricated and portable metal buildings and parts, and miscellaneous metal work are classified in industry 3449. For a detailed list of products of industry 3446, refer to table 6A, product codes 3446011 to 3446041.

Both the code number and content for this industry for 1963 were changed from the classification system used in 1958. The composition of the industry as now constituted, compared with that under the classification system followed in the 1958 census, is that architectural and ornamental works which were formally included as part of industry 3449 now comprise this new industry.

Value of shipments and other receipts of the Structural Metal Work Industry in 1963 totaled \$269 million. This amount included shipments of architectural and ornamental metal work (primary products) valued at \$219 million, shipments of other products (secondary products) valued at \$36 million, and miscellaneous receipts (mainly receipts for resales) at \$14 million.

This industry's shipments of architectural and ornamental metal work in 1963 represented 86 percent of its total product shipments. Secondary products shipped by this industry in 1963 included fabricated steel plate (\$4 million) and other fabricated structural metal (\$2 million).

Shipments of architectural and ornamental metal work by this industry in 1963 represented 71 percent of all shipments of these products (\$306 million) by all industries. Other industries shipping architectural and ornamental metal work consisted mainly of industry 3441, Fabricated Structural Metal, \$31 million; and industry 3449, Miscellaneous Metal Work, N.E.C., \$17 million.

#### 3449—MISCELLANEOUS METAL WORK

This industry comprises establishments primarily engaged in manufacturing miscellaneous ferrous and nonferrous metal work, such as prefabricated and portable metal buildings and parts, metal plaster bases, fabricated bar joists and concrete reinforcing bars, and prefabricated exterior metal panels. For a detailed list of products of industry 3449, refer to table 6A, product codes 3449211 to 3449379.

The code number for this industry in the Standard Industrial Classification Manual is unchanged, but the content of the industry has been significantly changed from the classification system used in 1958. The change in the composition of the industry as now constituted, compared with that under the classification system followed in the 1958 census, results from the separation of architectural and ornamental work as a separate industry. Such establishments were previously part of this industry.

Value of shipments and other receipts of the Miscellaneous Metal Work Industry in 1963 totaled \$704 million. This amount included shipments of miscellaneous metal work (primary products) valued at \$542 million, shipments of other products (secondary products) valued at \$68 million, and miscellaneous receipts (mainly receipts for resales) at \$92 million.

This industry's shipments of miscellaneous metal work in 1963 represented 89 percent of its total product shipments. Secondary products shipped by this industry in 1963 included ornamental and structural metal work (\$17 million) and fabricated structural metal for buildings (\$10 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 63 percent of the total industry shipments are represented by plants specializing in product class 34493, miscellaneous metal building materials and curtain wall.

Shipments of miscellaneous metal work by this industry in 1963 represented 68 percent of all shipments of these products (\$793 million) by all industries. Other industries shipping miscellaneous metal work included industry 3312, blast furnaces and steel mills, \$90 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3449, prefabricated and portable metal buildings, 81 percent; 34493, miscellaneous metal building materials, 59 percent.

## STRUCTURAL METAL PRODUCTS: SIC 344

Value Added by Manufacture by State: 1963

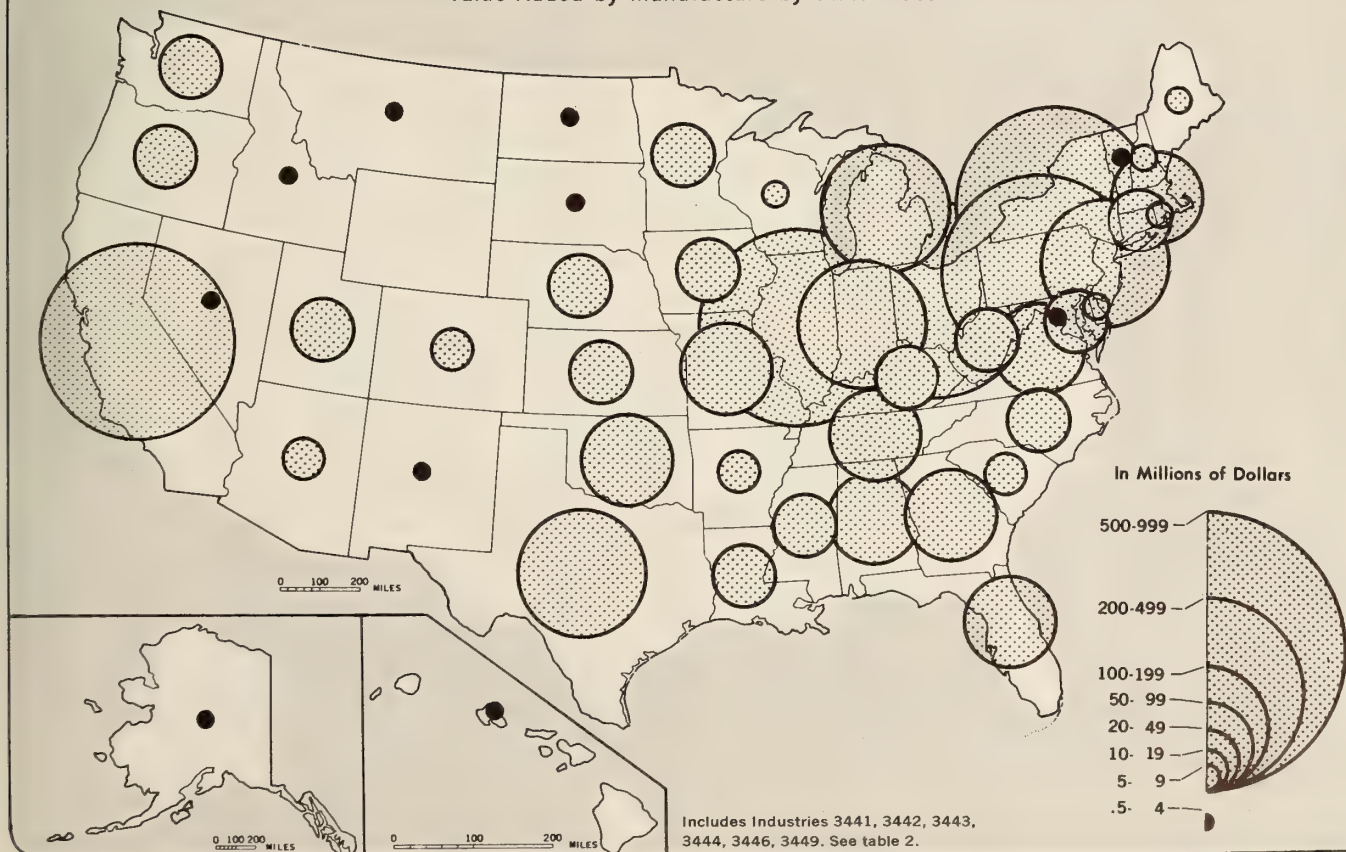

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted  (\$1,000)	Cost of materials  (\$1,000)	Value of shipments  (\$1,000)	Capital expend- itures, new  (\$1,000)	Spec- ial- ization ratio (per- cent)	Cov- erage ratio (per- cent)
		Total  (number)	With 20 employ- ees or more (number)	Total  (number)	Payroll  (\$1,000)	Total  (number)	Man-hours  (1,000)	Wages  (\$1,000)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1954 excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1954 excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Includes data for Alaska and Hawaii.

<sup>3</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification so that the industry is not comparable. The 1957 and earlier figures are on the old SIC definition of the industry.

<sup>4</sup>Excludes data for Alaska and Hawaii. Number of "All Employees" in these two States was between 100 and 249.

<sup>5</sup>The figures for 1947 have been revised for comparability with the figures for 1951-1958 by including data for establishments primarily engaged in the manufacture of "Metal storm doors and sash." Value added by manufacture for 1947 on a basis comparable with 1939, 1949 and 1950, which have not been revised, was \$117.6 million.

<sup>6</sup>The figures for 1939 are not entirely comparable with those for earlier years. Value added by manufacture for 1939 on a basis comparable with earlier years was \$29.2 million.

<sup>7</sup>"Boiler shop products" was formerly a part of the discontinued industry "Foundry and machine-shop products, n.e.c." Separate figures for earlier years are, therefore, not available.

<sup>8</sup>Data for Alaska and Hawaii are not included.

<sup>9</sup>Figures for 1929 and earlier years do not include data for sheetmetal dairymen's supplies, classified for these years in the discontinued industry "Dairymen's supplies, etc."

<sup>10</sup>"Sheetmetal work" was formerly a part of the discontinued industry "Tinsmithing, coppersmithing, and sheet iron working." Separate figures for 1899 are, therefore, not available.

<sup>11</sup>Industry 3446 was not a separate industry in the 1958 Census of Manufactures but was part of SIC 3449, Miscellaneous Metal Work, N.E.C. However, data were published in 1958 for plants classified in SIC 3449 specializing in the production of ornamental and structural metal work. This is the source of the separate data for industries 3446 and 3449. In like manner, data were published in 1954 for plants classified in SIC 3441 (1945 edition) specializing in those products now classified in industries 3446 and 3449.

<sup>12</sup>For 1963, a sizeable number of small establishments (under 20 employees) may have been misclassified in industry 3449, Miscellaneous Metal Work, because of insufficient product information. Although this has a significant effect on the number of establishments for this industry it has a very small effect on any of the other statistics, i.e., number of employees, salaries and wages, value added, etc. It is estimated that the effect on these principal statistics is less than 3 percent.

<sup>13</sup>Prior to 1963 "Architectural Metal Work" and "Miscellaneous Metal Work" constituted a single industry. Combined data for these two industries were obtained for 1958-1962.

(D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3441, Fabricated Structural Steel: New England—New Hampshire, 2 (20-99); Vermont, 3 (100-249); West North Central—North Dakota, 2 (100-249); South Dakota, 2 (100-249); South Atlantic—Delaware, 1 (1-19); District of Columbia, 2 (20-99); West Virginia, 9 (500-999); Mountain—Wyoming, 1 (1-19); New Mexico, 3 (20-99); Nevada, 3 (20-99); Pacific—Alaska, 1 (20-99); Hawaii, 4 (100-249).

SIC 3442, Metal Doors, Sash, and Trim: West North Central—North Dakota, 2 (1-19); South Dakota, 3 (1-19); South Atlantic—Delaware, 5 (20-99); District of Columbia, 3 (1-19); West Virginia, 10 (20-99); Mountain—Montana, 3 (1-19); Idaho, 2 (1-19); New Mexico, 1 (20-99); Arizona, 6 (20-99); Utah, 6 (100-249); Nevada, 2 (1-19); Pacific—Oregon, 15 (250-499); Alaska, 1 (1-19); Hawaii, 2 (20-99).

SIC 3443, Boiler shop products: New England—Maine, 3 (1-19); New Hampshire, 4 (20-99); Vermont, 1 (1-19); Rhode Island, 7 (20-99); West North Central—North Dakota, 1 (1-19); South Dakota, 4 (20-99); South Atlantic—District of Columbia, 1 (20-99); West Virginia, 4 (20-99); East South Central—Tennessee, 16 (4,080); Mississippi, 6 (1,118); Mountain—Montana, 2 (20-99); Idaho, 3 (110); Wyoming, 1 (1-19); New Mexico, 4 (20-99); Arizona, 2 (20-99); Nevada, 1 (1-19); Pacific—Washington, 24 (250-499); Alaska, 2 (1-19).

SIC 3444, Sheet Metal Work: New England—Maine, 7 (20-99); Vermont, 3 (20-99); West North Central—North Dakota, 3 (20-99); South Dakota, 7 (243); South Atlantic—Delaware, 3 (1-19); District of Columbia, 3 (184); South Carolina, 28 (137); Mountain—Montana, 7 (20-99); Idaho, 7 (20-99); Wyoming, 4 (20-99); New Mexico, 4 (20-99); Nevada, 1 (20-99); Pacific—Alaska, 3 (1-19); Hawaii, 3 (20-99).

SIC 3446, Architectural Metal Work: New England—Maine, 1 (1-19); New Hampshire, 3 (1-19); Vermont, 1 (1-19); Rhode Island, 6 (1-19); West North Central—Iowa, 13 (20-99); South Dakota, 1 (1-19); South Atlantic—Delaware, 6 (20-99); District of Columbia, 6 (20-99); West Virginia, 4 (1-19); North Carolina, 26 (20-99); East South Central—Tennessee, 29 (153); Mississippi, 6 (20-99); West South Central—Arkansas, 10 (20-99); Louisiana, 19 (20-99); Mountain—Montana, 2 (1-19); Idaho, 4 (1-19); New Mexico, 4 (1-19); Arizona, 7 (500-999); Nevada, 3 (20-99); Pacific—Washington, 21 (20-99); Oregon, 9 (20-99); Alaska, 1 (1-19); Hawaii, 1 (1-19).

SIC 3449, Miscellaneous Metal Work: New England—Maine, 1 (20-99); New Hampshire, 1 (1-19); Rhode Island, 3 (20-99); Connecticut, 4 (20-99); East North Central—Wisconsin, 6 (20-99); West North Central—Iowa, 5 (250-499); South Dakota, 1 (1-19); South Atlantic—Delaware, 1 (20-99); West Virginia, 3 (250-499); South Carolina, 8 (250-499); East South Central—Tennessee, 17 (329); Mississippi, 3 (20-99); Mountain—Idaho, 1 (1-19); New Mexico, 4 (20-99); Arizona, 6 (143); Utah, 2 (20-99); Nevada, 1 (20-99); Pacific—Washington, 10 (20-99); Hawaii, 1 (1-19).

<sup>2</sup>This State was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.<sup>3</sup>Comparable data for 1958 are not available because of revisions in the Standard Industrial Classifications (see text for description of this change).

Note: Detailed figures may not add to the totals because of independent rounding.

- Represents zero. (D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

<sup>1</sup>Includes capital expenditures of \$1-2 million for plants under construction but not in operation, the exact amount is withheld to avoid disclosing information for individual companies.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
						Col. B Col. B+C				Col. B Col. F
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	(percent)	(\$1,000)	(\$1,000)	(\$1,000)	(percent)

Note: See table 1, Explanation of terms, for primary product specialization and coverage ratios.

<sup>1</sup>Comparable data for 1958 are not available because of revisions in the Standard Industrial Classification (see text for description of this change).

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Prod. class code	Class of products and miscellaneous receipts	All industries	Fabricated structural metal (SIC 3441)	Metal doors, sash, and trim (SIC 3442)	Boiler shop products (SIC 3443)	Sheet metal work (SIC 3444)	Architectural metal work (SIC 3446)	Miscellaneous metal work, n.e.c. - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.  
(X) Not applicable.  
<sup>1</sup>Less than \$100 thousand.  
<sup>2</sup>Includes \$3,545 thousand produced in industry 3321, Gray Iron Foundries; and an amount between \$2 and \$5 million each produced in industry 3531, Construction Machinery; and industry 3535, Conveyors.  
<sup>3</sup>Includes an amount between \$2 and \$5 million each produced in industry 3491, Metal Barrels, Drums, and Pails; and industry 3642, Lighting Fixtures.  
<sup>4</sup>Includes an amount between \$5 and \$10 million produced in industry 3312, Blast Furnaces and Steel Mills; and amount between \$2 and \$5 million produced in industry 3461, Metal Stampings.  
<sup>5</sup>Includes \$2,914 thousand produced in industry 2431, Millwork Plants; and \$2,213 thousand produced in industry 2542, Metal Partitions and Fixtures.  
<sup>6</sup>Includes an amount between \$5 and \$10 million produced in industry 3352, Aluminum Rolling and Drawing.  
<sup>7</sup>Includes an amount between \$2 and \$5 million each produced in industry 3321, Gray Iron Foundries; industry 3519, Internal Combustion Engines; industry 3561, Pumps and Compressors; industry 3585, Refrigeration Machinery; and industry 3599, Miscellaneous Machinery; also an amount between \$5 and \$10 million produced in industry 3717, Motor Vehicles and Parts; and also an amount between \$10 and \$15 million produced in industry 3511, Steam Engines and Turbines.  
<sup>8</sup>Includes \$2,454 thousand produced in industry 3559, Special Industry Machines, N.E.C.; also an amount between \$2 and \$5 million each produced in industry 3461, Metal Stampings; industry 3523, Construction Machinery; and industry 3821, Mechanical Measuring Devices; also an amount between \$5 and \$10 million each produced in industry 3511, Steam Engines and Turbines.  
<sup>9</sup>Includes an amount between \$2 and \$5 million each produced in industry 1929, Ammunition, N.E.C.; and industry 3585, Refrigeration Machinery.  
<sup>10</sup>Includes an amount between \$2 and \$5 million each made in industry 3533, Oil Field Machinery; and industry 3351, Food Products Machinery.  
<sup>11</sup>Includes an amount between \$2 and \$5 million made in industry 3494, Valves and Pipe Fittings.  
<sup>12</sup>Includes \$34,360 thousand produced in industry 3552, Aluminum Rolling and Drawing; \$3,369 thousand produced in industry 3461, Metal Stampings; and also an amount between \$2 and \$5 million produced in industry 3497, Metal Foil and Leaf.  
<sup>13</sup>Includes \$2,240 thousand produced in industry 2542, Metal Partitions and Fixtures; \$5,402 thousand produced in industry 2591, Venetian Blinds and Shades; \$7,881 thousand produced in industry 3461, Metal Stampings; \$8,308 thousand produced in industry 3585, Refrigeration Machinery; and \$2,055 thousand produced in industry 3717, Motor Vehicles and Parts; also an amount between \$2 and \$5 million each produced in industry 3079, Plastic Products, N.E.C.; industry 3494, Valves and Pipe Fittings; industry 3576, Scales and Balances; and industry 3639, Household Appliances, N.E.C.; and also an amount between \$5 and \$10 million produced in industry 3822, Automatic Temperature Controls.  
<sup>14</sup>Includes \$2,283 thousand produced in industry 3662, Radio, TV Communication Equipment; and also an amount between \$2 and \$5 million produced in industry 3535, Conveyors; and industry 3564, Blowers and Fans.  
<sup>15</sup>Includes an amount between \$5 and \$10 million produced in industry 3352, Aluminum Rolling and Drawing; and also an amount between \$2 and \$5 million produced in industry 3729, Aircraft Equipment, N.E.C.  
<sup>16</sup>Includes an amount between \$2 and \$5 million each produced in industry 3531, Construction Machinery; and industry 3561, Pumps and Compressors.  
<sup>17</sup>Totals include specific product classes listed as "Other products" for which the symbol "D" appears in the table above.  
<sup>18</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 35361, Hoists; 35672, Fuel fired industrial furnaces and ovens; and 36425, Outdoor lighting equipment.  
<sup>19</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 25420, Metal partitions, shelving, lockers, and office and store fixtures; 29990, Products of petroleum and coal, n.e.c.; 35340, Elevators and moving stairways.  
<sup>20</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 19293, Ammunition, n.e.c.; 19990, Ordnance and accessories, n.e.c.; 34332, Warm air furnaces (except floor and wall) except parts; 34913, All other metal barrels, including beer barrels and fluid milk shipping containers; 34941, Metal valves for piping systems (except plumbing and heating valves); 35511, Dairy and milk products plant machinery and equipment, including dairy bottling machines; 35614, Air and gas-compressors, except refrigerator compressors; 37292, Guided missile components and subassemblies, n.e.c.; and 37422, Freight train cars, new.  
<sup>21</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 35641, Industrial fans and blowers; 35642, Dust collection, air purification equipment and air washers; 35673, High frequency induction and dielectric heating equipment and parts, attachments and components; and 35690, General industrial machinery, n.e.c.  
<sup>22</sup>Includes product class 36795, Other electronic components and accessories, n.e.c., including parts for electron tubes (except glass blanks), which totals more than \$2 million but is withheld to avoid disclosing individual company figures.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958	
			Quantity	Value (\$1,000)	Quantity	Value (\$1,000)
3441- --	FABRICATED STRUCTURAL STEEL, TOTAL.....	.....	(X)	1,603,982	(X)	1,602,126
34411 --	Fabricated structural metal for buildings.....	.....	(X)	984,049	(X)	930,399
34411 21	Iron and steel (for sale to other companies): <sup>1</sup>					
34411 25	Industrial.....	Short tons.....	996,877	306,883	899,069	267,802

34492 00	Prefabricated and portable metal buildings and parts, n.s.k....	.....	(X)	4,027	(X)	10,087
34493 --	Miscellaneous metal building materials.....	.....	(X)	506,500	(X)	407,502
	Metal plaster bases:					
34493 11	Expanded metal lath.....	1,000 sq. yds..	66,795	23,284	80,591	25,257
34493 32	Metal plaster base accessories.....	.....	(X)	31,866	(X)	27,210
34493 42	Fabricated bar joists.....	Short tons.....	380,952	89,348	296,874	69,475
34493 52	Fabricated concrete reinforcing bars.....	do.....	2,080,322	276,774	1,232,329	217,432
	Curtain wall:					
34493 73	Steel, including stainless.....	1,000 sq. ft...	14,001	10,095	23,687	24,300
34493 75	Aluminum.....	do.....	11,689	41,382		
34493 79	All other, including combination of metals.....	do.....	(NA)	13,384	(X)	43,828
34493 00	Miscellaneous metal building materials, n.s.k.....	.....	(X)	20,367		
34490 00	Miscellaneous metal work, n.s.k.....	.....	(X)	62,281	(X)	( <sup>23</sup> )

Note: Data for 1958 exclude Alaska and Hawaii.

-- Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. n.s.k. Not specified by kind.

(X) Not applicable.

<sup>1</sup>For some products value data only were reported by some establishments. In those instances where such values amounted to less than 10 percent of the total value of the product, an estimated quantity figure has been included in the total quantity for the product.

<sup>2</sup>In 1958 "Fabricated structural metal for bridges, not specified by kind" and "Other fabricated structural metal, not specified by kind" were combined with "Fabricated structural metal for buildings, not specified by kind."

<sup>3</sup>Does not include structural metal fabricated for own use by establishments building ships.

<sup>4</sup>In 1958, metal doors constructed of metals other than iron and steel or aluminum were included with those of aluminum construction when such were collected separately and with those of iron and steel and aluminum construction when such doors were treated as a single product.

<sup>5</sup>This quantity was valued at \$17,915 thousand. The remaining \$5,807 thousand was reported without quantity.

<sup>6</sup>This quantity was valued at \$17,609 thousand. The remaining \$6,914 thousand was reported without quantity.

<sup>7</sup>This quantity was valued at \$148,374 thousand. The remaining \$22,925 thousand was reported without quantity.

<sup>8</sup>This quantity was valued at \$111,156 thousand. The remaining \$12,196 thousand was reported without quantity.

<sup>9</sup>This quantity was valued at \$4,838 thousand. The remaining \$767 thousand was reported without quantity.

<sup>10</sup>This quantity was valued at \$33,833 thousand. The remaining \$7,476 thousand was reported without quantity.

<sup>11</sup>Data represent thousands of linear feet.

<sup>12</sup>The product class structure for this industry has been revised effective with 1963. Accordingly, totals for selected product classes differ from previously published figures.

<sup>13</sup>1958 data for products 3443200 and 3443400 are not, separately, comparable with data for 1963. The total for these two products is comparable.

<sup>14</sup>Data differ from related data published in Current Industrial Reports Series M34G, "Steel Power Boilers" because of the following factors:

(a) In survey M34G the data represent new orders whereas Census of Manufactures data represent shipments.

(b) In survey M34G the data relate to boilers of 100 square feet of heating surface and over whereas the Census of Manufactures includes those of under 100 square feet of heating surface.

<sup>15</sup>In 1958, marine boilers were not reported separately from stationary power boilers.

<sup>16</sup>In 1958, product code 3443700 is combined with product code 3443500.

<sup>17</sup>This quantity was valued at \$30,529 thousand. The remaining \$5,358 thousand represents value for which no quantity was reported.

<sup>18</sup>This quantity was valued at \$79,206 thousand. The remaining \$12,615 thousand represents value for which no quantity was reported.

<sup>19</sup>This quantity was valued at \$23,843 thousand. The remaining \$3,675 thousand represents value for which no quantity was reported.

<sup>20</sup>This quantity was valued at \$12,790 thousand. The remaining \$1,910 thousand represents value for which no quantity was reported.

<sup>21</sup>Metal siding of other than steel and aluminum, product code 3444119 is included with metal roofing of other than steel and aluminum, 3444115.

<sup>22</sup>In 1958, all sheet-metal work, not specified by kind, is included in product code 3444000.

<sup>23</sup>Because of the lack of sufficient product detail on the reports for small establishments in the 1958 Census of Manufactures it was not possible to effect a precise distinction between fabricated structural iron and steel, not specified by kind (3441000) and miscellaneous metal work, not specified by kind. Accordingly, the value of such shipments, \$130,111 thousand, are included in the data for SIC 3441.

TABLE 6B. **Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value
344	Structural metal products.....1963..	(1)	(1)
	.....1958..	(1)	(1)
3441	Fabricated structural steel.....1963..	119	120
	.....1958..	114	126
34411	Fabricated structural metal for buildings.....1963..	117	126
	.....1958..	110	124
34412	Fabricated structural metal for bridges.....1963..	98	109
	.....1958..	109	129
34413	Other fabricated structural metal.....1963..	126	109
	.....1958..	106	127
3442	Metal doors, sash, and trim <sup>1</sup> .....1963..	158	94
	.....1958..	146	99
34421	Metal doors and frames (except storm doors).....1963..	180	106
	.....1958..	125	102

(NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>The product class structure has been revised effective with 1963, accordingly, totals for selected product classes differ from previously published figures.

<sup>2</sup>This product class was previously included with product class 34435.

<sup>3</sup>Product classes 34438 and 34439 were previously a single product class 34436, Metal tanks and vessels, custom fabricated at the factory.

<sup>4</sup>This product class was previously identified as product class 34491.

<sup>5</sup>This 4 digit product class group previously included product class 34460, Architectural and ornamental metal work.

TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments	
	1963 <sup>1</sup>	1958		1963 <sup>1</sup>	1958		1963 <sup>1</sup>	1958

- Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. n.s.k. Not specified by kind.  
(X) Not applicable.

<sup>1</sup>Does not include castings produced and consumed in the same establishment.

<sup>2</sup>Includes values for those material items for which separate data could not be published without revealing the operations of individual companies.

The symbol, "D", appears for such items.

<sup>3</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" when separate figures for individual materials consumed were not requested, (b) total cost of materials reported for establishments which failed to report costs of individual materials on "standard forms," and (c) discrepancies between total cost of materials and detailed materials on reports for other establishments.

<sup>4</sup>In 1958, industry 3446 and 3449 were combined. Therefore the 1958 data in industry 3449 are comparable to the 1963 data for industry 3446 and industry 3449 combined.

**TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962**

Driven by purchased energy.....do....	507	193	673	251	249
Driven by energy generated at establishment.....do....	(Z)	-	4	1	(Z)
Aggregate horsepower per 100 production workers.....	975	533	1,434	578	887

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>Industry 3446 was part of industry 3449 in the year 1962.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Percent of industry production workers in these establishments.....	70-75	45-50	70-75	50-55	60-65	60-65
Number of establishments which reported that "none" of the operations apply.....	250	634	194	710	157	134
Percent of industry production workers in these establishments.....	1-5	10-15	1-5	10-15	15-20	10-15
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	75-80	60-65	75-80	60-65	75-80	70-75

(D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not, as in table 4, based on total employment in the establishment.

## SCREW MACHINE PRODUCTS, BOLTS, METAL STAMPINGS, AND METAL SERVICES

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3451—Screw Machine Products
- 3452—Bolts, Nuts, Rivets, and Washers
- 3461—Metal Stampings
- 3471—Electroplating, Plating, Polishing, Anodizing, and Coloring
- 3479—Coating, Engraving, and Allied Services, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3451—SCREW MACHINE PRODUCTS

This industry comprises establishments primarily engaged in manufacturing automatic or hand screw machine products from rod, bar, or tube stock of metal, fiber, plastics, or other materials. The products of this industry consist of a wide variety of unassembled parts and are usually manufactured on a job or order basis. Establishments primarily engaged in manufacturing standard bolts, nuts, rivets, screws, and other industrial fasteners on headers, threaders, and nut forming machines are classified in industry 3452. For a detailed list of products of industry 3451, refer to table 6A, product codes 3451012 to 3451098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Screw Machine Products Industry totaled \$589 million. This amount included shipments of screw machine products (primary products) valued at \$539 million, shipments of other products (secondary products) valued at \$19 million, and miscellaneous receipts at \$32 million.

This industry's shipments of screw machine products represented 97 percent of its total product shipments. The industry specialization ratio in 1958 was 94 percent. Secondary products shipped by this industry in 1963 included bolts, nuts, and other standard industrial fasteners (\$4.4 million), and headed products (produced by cold and hot heading) other than industrial fasteners (\$2.8 million).

Shipments of screw machine products by this industry represented 90 percent of all shipments of these products (\$599 million) by all industries. In 1958 the coverage ratio was 87 percent. Other industries shipping screw machine products included industry 3452, Bolts, Nuts, Rivets, and Washers, \$21.3 million; and industry 3717, Motor Vehicles and Parts, \$5.6 million.

Industry 3451 includes establishments producing a wide variety of items such as small machinery parts, etc., on hand operated and automatic screw machines from rod, bar, and tube stock and from castings and forgings. These products are produced almost entirely on a job or order basis. Included are screw machine departments or plants of companies primarily engaged in producing finished end products where such activities could be reported separately. However, in many instances captive screw machine operations were so integrated with other activities that separate reports were not obtained and the entire establishment was classified on the basis of its primary products.

As shown in table 7A, the principal materials consumed by the screw machine products industry are carbon steel bar stock and copper rod, bar, and mechanical wire. These materials, together with the other specific materials listed in table 7A accounted for 63 percent of the total cost of materials consumed by this industry.

#### 3452—BOLTS, NUTS, RIVETS, AND WASHERS

This industry comprises establishments primarily engaged in manufacturing bolts, nuts, screws, rivets, washers, formed and threaded wire goods, and special industrial fasteners. Rolling mills engaged in manufacturing similar products are classified in Major Group 33, and establishments primarily engaged in manufacturing screw machine products in industry 3451. For a detailed list of products of industry 3452, refer to table 6A, product codes 3452101 to 3452398.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Bolts, Nuts, Rivets, and Washers Industry totaled \$1,218 million. This amount included shipments of bolts, nuts, rivets, and washers (primary products) valued at \$1,058 million, shipments of other products (secondary products) valued at \$92 million, and miscellaneous receipts (mainly resales) at \$68 million.

This industry's shipments of bolts, nuts, rivets, and washers represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent. Secondary products shipped by this industry in 1963 included screw machine products (\$21.3 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 74 percent of the total industry shipments are represented by plants specializing in product class 34521, Bolts, nuts, and other standard industrial fasteners.

Shipments of bolts, nuts, rivets, and washers by this industry represented 90 percent of all shipments of these products (\$1,176 million) by all industries. In 1958 the coverage ratio was 87 percent.

Plants included in industry 3452 in general are engaged in the manufacture of bolts, nuts, screws, and rivets of standard types and sizes on heading, threading, and nut forming machines. These establishments may be also engaged in the production of special industrial fasteners which require special or added operations or the use of special tools and fixtures. These items include bolts, nuts, screws, etc., of nonstandard types and sizes and special fasteners made by stamping and other forming processes. To a lesser extent these plants manufacture standard type bolts, nuts, screws, etc., on automatic and hand operated screw machines.

The selected materials listed in table 7 accounted for 70 percent of the total cost of materials consumed by industry 3452 establishments. Carbon steel bars and wire, the two principal materials consumed, represented 41 percent of the cost of materials used by the bolt, nut, washer, and rivet industry.

The production index for the primary products of the industry increased to 137 in 1963 from the 1958 level of 99. The unit value index for 1963 was 124 compared to 123 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3461—METAL STAMPINGS

This industry comprises establishments primarily engaged in manufacturing metal stampings. These establishments generally operate on a job or order basis, manufacturing metal stampings for sale to others or for interplant transfer. Establishments which produce metal stampings for incorporation in end products produced in the same establishment are classified on the basis of the end products. For a detailed list of products of industry 3461, refer to table 6A, product codes 3461111 to 3461898.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Establishments in industry 3461 produce both job stampings and finished end products. Job stampings are made from materials owned by the stamping establishments as well as from materials owned by the customer and processed by the stamping establishments on a contract or commission basis. These stampings are mainly parts which are sold to manufacturers for incorporation into any of a wide variety of products such as refrigerators, agricultural machinery, radio, and television sets. Finished end products manufactured by establishments in this industry include cooking, kitchen, and hospital utensils (including domestic pressure cookers and porcelain enameled utensils), pails, ash cans, garbage cans, perforated metal products, metal commercial and home canning closures, as well as a large variety of miscellaneous items. Table 8 presents selected statistics for establishments classified according to their degree of specialization in the primary products of this industry.

Value of shipments and other receipts of the Metal Stampings Industry totaled \$2,679 million. This amount included shipments of metal stampings (primary products) valued at \$2,135 million, shipments of other products (secondary products) valued at \$410 million, and miscellaneous receipts (mainly resales) at \$134 million.

This industry's shipments of metal stampings represented 84 percent of its total product shipments. The industry specialization ratio in 1958 was 86 percent. Secondary products shipped by this industry in 1963 included special dies and tools, die sets, jigs, and fixtures (\$66 million), and other small household electric appliances (\$31 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent to this specialization is indicated in table 8. Approximately 27 percent of the total industry shipments are represented by plants specializing in product class 34612, Job stamping, except automotive; and 31 percent in product class 34613, Automotive job stampings.

Shipments of metal stampings by this industry represented 86 percent of all shipments of these products (\$2,484 million) by all industries. In 1958 the coverage ratio was 87 percent.

This coverage ratio measures only the coverage of this industry in terms of the total measurable output of metal stampings. This output is limited to the value of stampings

(including the specific stamped products which are classified as primary products of this industry) which were produced for sale or for interplant transfer by establishments classified in industry 3461 and by establishments in other industries where these products were produced as secondary products. However, no data are available on the value of stampings produced and used as component parts by establishments classified in other industries. Such a value, if it could be measured, might approximate or even exceed the total value of all stampings produced commercially or for interplant transfer. While no such value figure is available, table 9 for most of the industries within Major Groups 34, 35, 36, and 37, does show the importance of specific metalworking operations including "stamping, blanking, forming, and drawing." These data are based on the number of employees engaged in the operations listed.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3461, e.g., 34614, Stamped and spun hospital utensils and cooking and kitchen household utensils, aluminum, 99 percent; and 34618, Other stamped and pressed metal end products, 74 percent.

Industry 3461 includes the stamping departments of establishments primarily engaged in producing fabricated metal products where such stamping activities could be reported separately. However, where captive stamping operations were closely integrated with other activities, such as in the production of household appliances, farm equipment, motor vehicles, etc., separate reports were not obtained.

Plants in the Metal Stampings Industry commonly perform a number of auxiliary metalworking operations. As shown in table 9, a considerable number of establishments in this industry maintain tool and die departments and machine shops for the production of stamping and forming dies used in their metal fabricating operations.

The Bureau of the Census collects monthly data on commercial and home canning closures of metal which are primary products of industry 3461. These statistics are published in the Current Industrial Reports Series M34H, Closures for Glass Containers and Crowns. The census figures shown in table 6A differ slightly from the sum of the 1963 monthly data for metal closures because a few establishments not included in the monthly survey reported the manufacture of metal closures in the census. In other instances manufacturers covered by the monthly survey submitted revised annual data on their 1963 census reports. The monthly survey M34H also covers closures other than metal. Since these products, such as plastic caps and paper closures, are not primary products of industry 3461 they have been classified in other appropriate industries for the census.

#### 3471—ELECTROPLATING, PLATING, POLISHING, ANODIZING, AND COLORING

This industry comprises establishments primarily engaged in all types of electroplating, plating, anodizing, coloring, and finishing of metals and formed products for the trade. Most of the work done in this industry is done on materials owned by others.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Plating and Polishing Industry totaled \$518 million. This amount included shipments of electroplating, plating, and polishing (primary products) valued at \$502 million, shipments of other products (secondary products) valued at \$10 million, and miscellaneous receipts (mainly resales) at \$5 million.

#### 3479—COATING, ENGRAVING, AND ALLIED SERVICES, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in performing the following types of services on metals: (1) enameling, lacquering, and varnishing metal products

for the trade; (2) hot dip galvanizing of mill sheets, plates and bars, castings, and formed products fabricated of iron and steel; in hot dip coating such items with aluminum, lead, or zinc; in retinning cans and utensils; (3) in engraving, chasing and etching jewelry, silverware, notarial and other seals and other metal products for the trade and for job contracting for purposes other than printing; (4) and other metal services, n.e.c. Establishments primarily engaged in electroplating, plating, polishing, anodizing, coloring, and finishing of metals and formed products for the trade are classified in industry 3471; and those producing porcelain enameled products in industry 3461. For a detailed list of products of industry 3479, refer to table 6A, product codes 3479011 to 3479051.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Metal Coating, Engraving, Etc., Industry totaled \$322 million. This amount included shipments of coating, engraving, and allied services, n.e.c. (primary products) valued at \$286 million, shipments of other products (secondary products) valued at \$23 million, and miscellaneous receipts (mainly resales), at \$13 million.

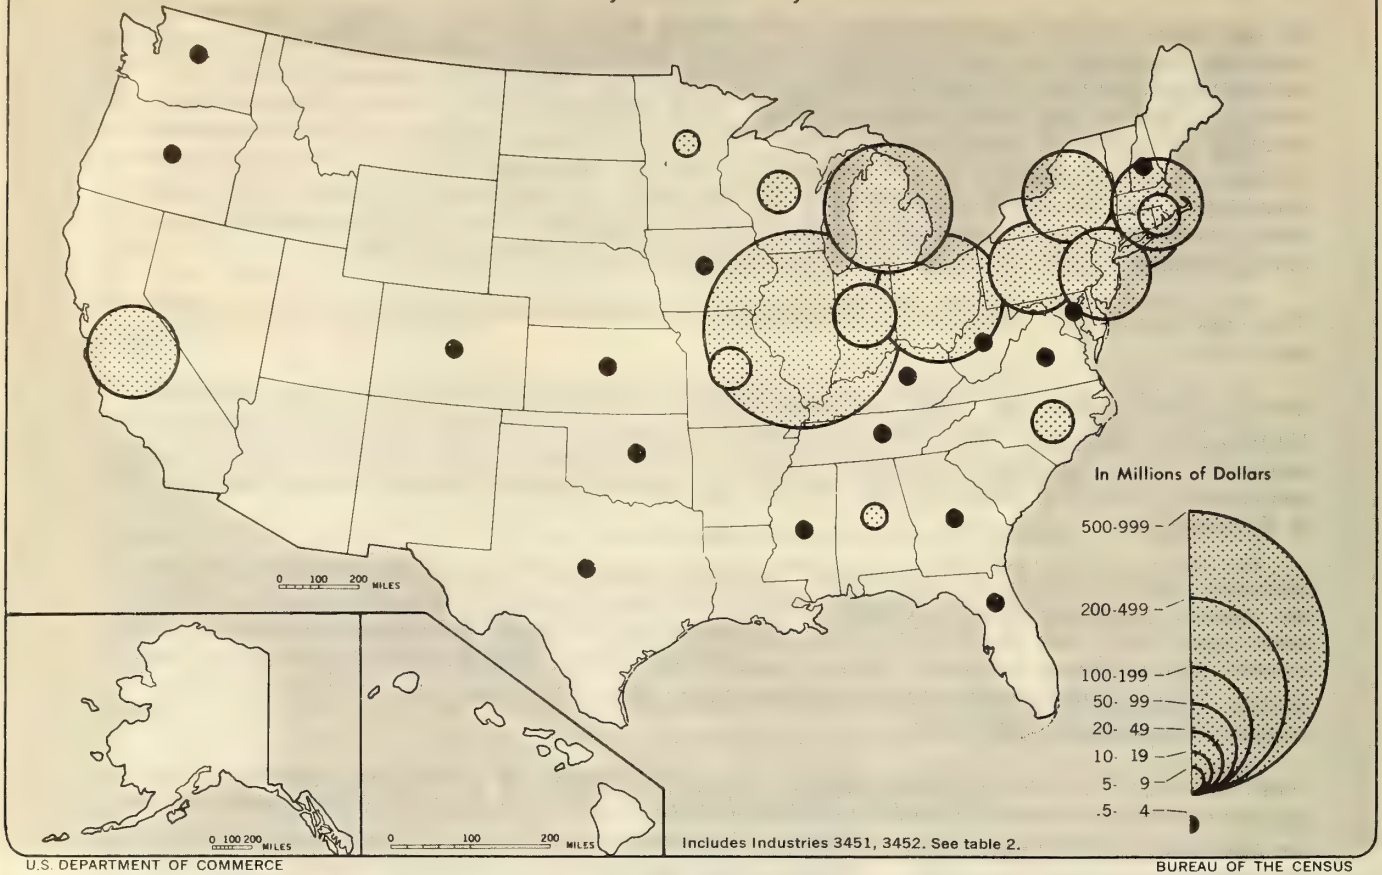

Industry 3479 includes establishments engaged primarily in enameling materials owned by others. Establishments primarily engaged in manufacturing vitreous-enameled products from their own materials are included in industry 3461. In addition, industry 3479 covers both vitreous and other types of enameling (such as baked enameling) whereas industry 3461 includes only vitreous-enameling establishments as well as those producing other types of metal stampings.

This industry includes establishments primarily engaged in galvanizing iron and steel sheets or formed products; in coating iron sheets or formed products with aluminum, lead, or zinc; and in retinning cans and utensils. Most of the work done in this industry is done on materials owned by others. Rolling mills engaged in galvanizing, tinning, and other coating are classified in industry 3312, Blast Furnaces and Steel Mills, and establishments primarily engaged in manufacturing galvanized steel wire from purchased metal rods or bars are classified in industry 3315, Steel Wire Drawing, Etc.

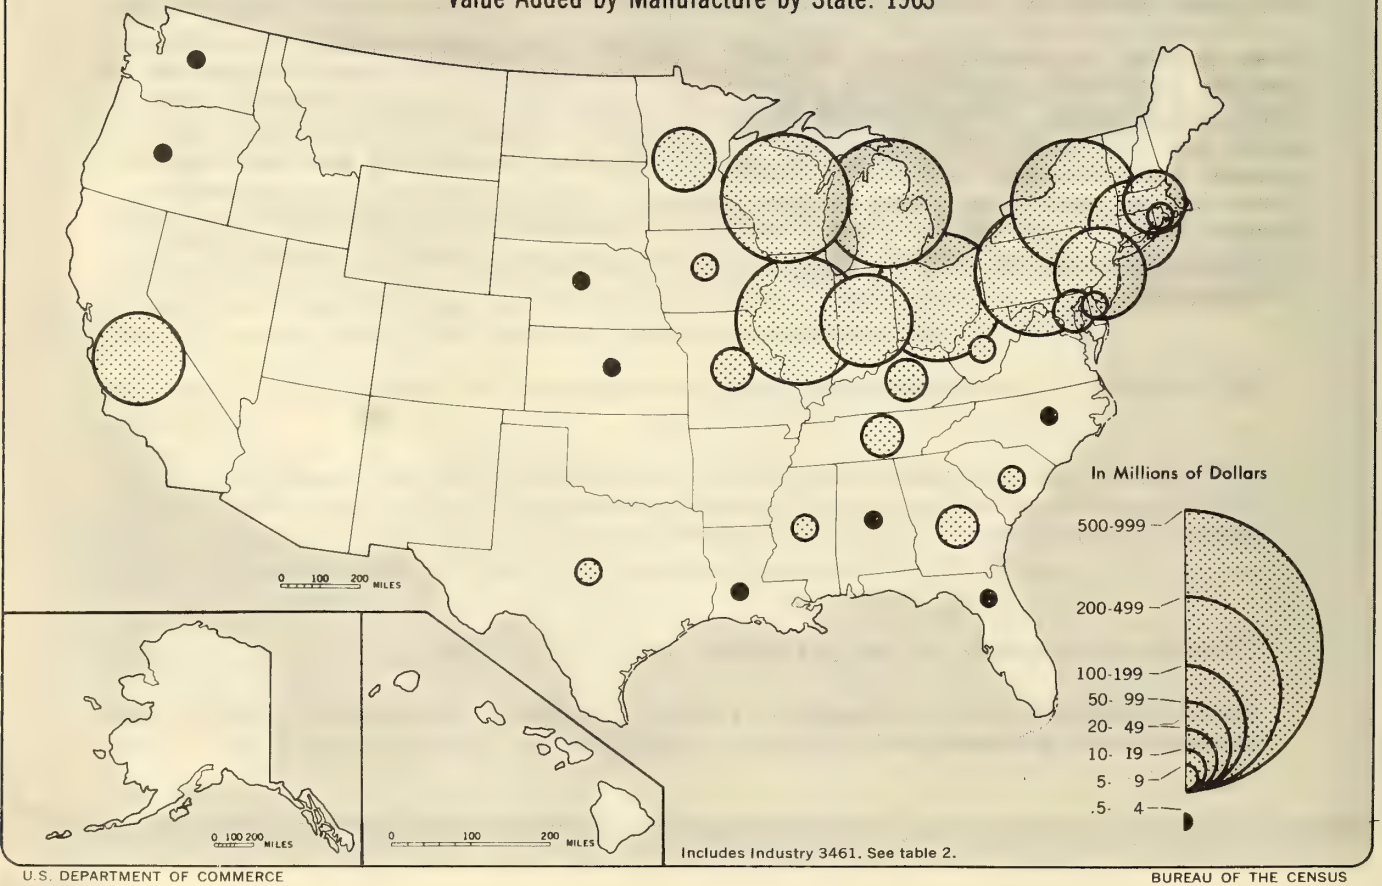

Also included are establishments primarily engaged in engraving, chasing, and etching jewelry, silverware, notarial seals, and other metal products for the trade, for purposes other than printing. Establishments primarily engaged in preparing metal lithographic plates and in printing from such media are classified in industry 2752, Printing, Lithographic; establishments primarily engaged in engraving and etching steel and copper plates and in using these plates to print stationery, visiting cards, etc., are included in industry 2753, Engraving and Plate Printing; and establishments primarily engaged in preparing photoengraved plates (halftones and line-cuts) are classified in industry 2793, Photoengraving.

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Footnotes continued on next page.

TABLE 1. General Statistics: 1963 and Earlier Years—Continued

## Footnotes for Table 1—34D—Continued

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>The figures for 1939 are not entirely comparable with those for earlier years. However, the figures for the "Bolts, nuts, washers, and rivets" and the "Screw machine products" industries have been combined so that figures can be shown for the period 1899-1958.

<sup>3</sup>No comparable figures are available prior to 1939.

<sup>4</sup>In this industry which contains a large number of very small establishments there is a possibility that some of these small establishments have been misclassified as to industry. This would not significantly affect the statistics other than the number of establishments.

<sup>5</sup>Relationships not meaningful because of the predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

<sup>6</sup>No comparable figures are available prior to 1937.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State. SIC 3451, Screw Machine Products: New England—Maine, 1 (1-19); New Hampshire, 4 (20-99); Vermont, 3 (20-99); Rhode Island, 43 (555); West North Central—Iowa, 7 (100-249); Nebraska, 3 (20-99); Kansas, 3 (20-99); South Atlantic—Maryland, 7 (100-249); West Virginia, 1 (20-99); North Carolina, 2 (1-19); South Carolina, 1 (1-19); Georgia, 4 (20-99); Florida, 14 (20-99); East South Central—Tennessee, 5 (100-249); Alabama, 2 (20-99); West South Central—Arkansas, 5 (20-99); Oklahoma, 2 (20-99); Texas, 12 (100-249); Mountain—Arizona, 5 (20-99); Pacific—Washington, 6 (20-99); Oregon, 4 (20-99).

SIC 3452, Bolts, Nuts, Rivets, and Washers: New England—New Hampshire, 3 (100-249); Vermont, 1 (1-19); Rhode Island, 11 (855); West North Central—Minnesota, 4 (250-499); Iowa, 1 (20-99); Kansas, 1 (1-19); South Atlantic—Delaware, 1 (1-19); Maryland, 2 (100-249); Virginia, 1 (100-249); North Carolina, 2 (100-249); Georgia, 1 (1-19); Florida, 4 (124); East South Central—Kentucky, 1 (100-249); Tennessee, 3 (1-19); Alabama, 6 (500-999); Mississippi, 2 (100-249); West South Central—Oklahoma, 5 (100-249); Texas, 11 (250-499); Mountain—Arizona, 1 (1-19); Pacific—Washington, 3 (20-99); Oregon, 1 (20-99).

SIC 3461, Metal Stampings: New England—Maine, 1 (20-99); New Hampshire, 4 (20-99); Vermont, 2 (1-19); West North Central—North Dakota, 2 (1-19); Nebraska, 5 (20-99); Kansas, 2 (100-249); South Atlantic—Delaware, 2 (250-499); Virginia, 1 (1-19); South Carolina, 4 (549); Florida, 11 (250-499); East South Central—Tennessee, 21 (1630); Mississippi, 7 (828); West South Central—Arkansas, 2 (20-99); Louisiana, 5 (316); Oklahoma, 6 (20-99); Mountain—Wyoming, 1 (20-99); Colorado, 7 (20-99); Arizona, 1 (1-19); Utah, 3 (20-99); Nevada, 1 (1-19); Pacific—Oregon, 13 (20-99).

SIC 3471, Plating and Polishing: New England—Maine, 1 (1-19); New Hampshire, 5 (20-99); Vermont, 3 (1-19); West North Central—Iowa, 16 (100-249); Nebraska, 1 (1-19); South Atlantic—Delaware, 2 (1-19); District of Columbia, 5 (20-99); West Virginia, 4 (20-99); South Carolina, 6 (100-249); Georgia, 12 (636); East South Central—Alabama, 16 (100-249); Mississippi, 3 (20-99); West South Central—Arkansas, 5 (100-249); Louisiana, 7 (20-99); Mountain—Montana, 1 (1-19); Idaho, 2 (1-19); New Mexico, 3 (1-19); Utah, 7 (20-99); Nevada, 2 (1-19); Pacific—Hawaii, 5 (20-99).

SIC 3479, Metal Coating, Engraving, Etc.: New England—Maine, 1 (1-19); New Hampshire, 1 (1-19); Connecticut, 29 (250-499); East North Central—Ohio, 76 (2124); Indiana, 12 (498); Wisconsin, 26 (449); West North Central—Iowa, 4 (20-99); Missouri, 33 (464); South Dakota, 1 (1-19); Nebraska, 3 (1-19); Kansas, 4 (1-19); South Atlantic—Delaware, 1 (20-99); Virginia, 5 (20-99); North Carolina, 4 (20-99); South Carolina, 2 (20-99); Georgia, 4 (177); East South Central—Alabama, 8 (100-249); Mississippi, 1 (1-19); West South Central—Arkansas, 1 (1-19); Louisiana, 8 (100-249); Mountain—Idaho, 1 (1-19); Wyoming, 1 (1-19); New Mexico, 1 (1-19); Arizona, 5 (1-19); Utah, 2 (1-19); Pacific—Washington, 15 (20-99); Oregon, 15 (20-99).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

Salaries and wages/Adjusted value added.....	.59	.53	.56	.60	.58

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>Relationship not meaningful because of the predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

<sup>3</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

<sup>1</sup>Includes capital expenditures of approximately \$1-\$2 million for plants under construction but not in operation.

TABLE 5A. **Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B+C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)
		A	B	C	D	E	F	G	H	I
3451	Screw machine products.....1963..	588,981	538,685	18,755	31,541	97	599,424	538,685	60,739	90

	1958..	359,116	<sup>1</sup> 349,686	4,419	5,011	( <sup>1</sup> )	( <sup>2</sup> )	349,686	( <sup>2</sup> )	( <sup>2</sup> )
3479	Metal coating, engraving, etc.....1963..	322,139	<sup>1</sup> 286,484	22,600	13,055	( <sup>1</sup> )	( <sup>3</sup> )	286,484	( <sup>3</sup> )	( <sup>3</sup> )
	1958..	196,389	<sup>1</sup> 184,050	8,930	3,409	( <sup>1</sup> )	( <sup>3</sup> )	184,050	( <sup>3</sup> )	( <sup>3</sup> )

NOTE: See Introduction for an explanation of terms used.

<sup>1</sup>Specialization ratio is not meaningful because of the predominance of receipts for contract and commission work on materials owned by others. Such receipts are treated as primary products for this industry.

<sup>2</sup>Data on receipts for plating and polishing are not available for establishments classified outside industry 3471.

<sup>3</sup>Data on receipts for metal coating and engraving, etc. are not available for establishments classified outside industry 3479.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

See footnotes at end of table.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958	
			Quantity	Value (\$1,000)	Quantity	Value (\$1,000)
34710-11	ELECTROPLATING, PLATING AND POLISHING <sup>7</sup> .....	.....	(X)	501,949	(X)	349,686
34790 --	METAL COATING AND ENGRAVING, N.E.C.....	.....	(X)	286,484	(X)	184,050
34790 11	Engraving on metal <sup>7</sup> .....	.....	(X)	37,456	(X)	184,050
34790 31	Galvanizing and other hot dip coating <sup>7</sup> .....	.....	(X)	52,569		
34790 51	Enameling, japanning, and lacquering <sup>7</sup> .....	.....	(X)	140,101		
34790 00	Metal coating and engraving, n.s.k. <sup>7</sup> .....	.....	(X)	56,358		

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Data are limited to vitreous-enameled products produced from materials owned by the producing company. Data do not include the value of receipts for enameling work done on materials owned by others (enameling of products for the trade).

<sup>2</sup>Data are limited to washing machine parts (sold separately).

<sup>3</sup>"Job stampings" are mainly parts which are sold to other manufacturers for incorporation into their own products. Job stampings may be made from materials owned by the establishment or from materials owned by the customer. These figures represent only those stampings made from materials owned by the establishment performing the stamping operation.

<sup>4</sup>Data represent electrical appliance stampings (except refrigeration and washing machines).

<sup>5</sup>Figures for 1963 and 1958 as reported on Monthly Survey M34H, "Closures for Containers", are as follows:

Product	Unit of measure	Quantity of shipments including interplant transfers	
		1963	1958
Metal commercial closures for glass containers:			
Aluminum screw thread and lug type.....	1,000 units...	1,913,304	1,973,869
Tin mill screw thread and lug type.....	...do.....	7,280,227	7,776,361
Vacuum types, aluminum and tin.....	...do.....	6,553,092	4,301,953
Other types, aluminum and tin mill.....	...do.....		600,916
Metal closures for metal and plastic containers.....	...do.....	1,103,215	(NA)
Crowns.....	1,000 gross...	315,771	306,765
Home canning closures for glass containers, total.....	...do.....	9,991	14,382
Tin mill products:			
Metal lids.....	...do.....	7,648	10,435
Metal screw bands.....	...do.....		3,005
Other home canning closures, including zinc screw caps and bands (one-piece), glass lids, shoulder seal jar rings, top seal jar rings and other type home canning closures.....	...do.....	2,343	942

(NA) Not available.

<sup>6</sup>For 1958 product code 3461849 is combined with product code 3461898.

<sup>7</sup>Value consists principally of receipts for work done on materials owned by others. The value represents only work done by establishments classified in the industry to which the product (service) is primary.

**TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value
345--	Screw machine products, bolts, etc.....1963..	( <sup>1</sup> )	( <sup>1</sup> )
	1958..	( <sup>1</sup> )	( <sup>1</sup> )
3451-	Screw machine products.....1963..	( <sup>1</sup> )	( <sup>1</sup> )
	1958..	( <sup>1</sup> )	( <sup>1</sup> )
3452-	Bolts, nuts, rivets, and washers <sup>2</sup> .....1963..	137	124
	1958..	99	123
34521	Standard industrial fasteners (bolts, nuts, screws, etc.).....1963..	118	124
	1958..	95	123
3461-	Metal stampings.....1963..	( <sup>1</sup> )	( <sup>1</sup> )
	1958..	( <sup>1</sup> )	( <sup>1</sup> )
34616	Metal commercial closures except crowns.....1963..	134	114
	1958..	124	111
34617	Metal crowns for glass and metal containers.....1963..	96	108
	1958..	94	110
347--	Metal services, n.e.c.....1963..	( <sup>3</sup> )	( <sup>3</sup> )
	1958..	( <sup>3</sup> )	( <sup>3</sup> )

n.e.c. Not elsewhere classified.

<sup>1</sup>Not shown because comparable quantity data were not obtained for a significant portion of these products.

<sup>2</sup>Adjusted to include special industrial fasteners (product class 34522) and headed products produced by cold and hot heading, other than industrial fasteners (product class 34523).

<sup>3</sup>Not applicable to these service industries--namely, plating and polishing (industry 3471) and metal coating, engraving, etc. (industry 3479).

TABLE 6C. **Product Classes—Value Shipped by All Manufacturing Establishments:**

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Data for product class 34523, Headed products (produced by cold and hot heading) other than industrial fasteners, are included with product class 34522, Special industrial fasteners (nonstandard).

<sup>3</sup>Represents only work done by establishments classified in the industry to which the product (service) is primary.

TABLE 6D. **Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

<sup>1</sup>In 1963 there were, in addition, 807 short tons of steel castings produced and consumed in the same establishment. Data for other types of castings produced and consumed in the same establishment for 1963 and for all types of castings in 1958 are not available.

<sup>2</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>3</sup>Does not include castings produced and consumed in the same establishment.

<sup>4</sup>In 1963 there were, in addition, 1,857 short tons of steel castings produced and consumed in the same establishment. Data for other types of castings produced and consumed in the same establishment for 1963 and for all types of castings in 1958 are not available.

Driven by energy generated at establishment.....do....	-	1	13	(Z)	1
Aggregate horsepower per 100 production workers.....	768	979	820	865	786

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Plate or structural fabrication.....	48	35	7	6	291	46	61	184
Stamping, blanking and forming of metals <sup>3</sup> .....	1,328	305	544	479	41,926	428	5,771	35,737
Painting, lacquering and enameling on metals.....	370	212	103	55	4,480	354	985	3,141

NOTE: Very small establishments were not requested to report their metal working operations, and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Industry		
	3451	3452	3461
Total number of establishments in the industry.....	1,874	573	2,574
Number of establishments which reported one or more of the specified operations.....	956	317	1,442
Percent of industry production workers in these establishments.....	80-85	75-80	80-85
Number of establishments which reported "none" of the operations apply.....	54	62	93
Percent of industry production workers in these establishments.....	0-5	5-10	0-5
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	85-90	80-85	80-85

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

<sup>2</sup>Industry 3451 is composed of establishments primarily engaged in producing screw machine products. However, only 860 of the 1,874 establishments classified in the industry reported such operations. Most of the remaining establishments in the industry, consisting of small plants with fewer than 5 employees, reported on "short-form" schedules which did not include a metalworking operations inquiry. In addition, there is evidence that some of the establishments with 5 to 20 employees did not answer this inquiry. Also, some establishments in this industry probably have no automatic screw machines but are limited to hand-operated screw machines.

<sup>3</sup>Since industry 3461 is composed of establishments primarily engaged in producing metal stampings, all establishments classified in the industry should have reported stamping, blanking and forming operations. However, only 1,328 of the 2,574 establishments classified in the industry reported such operations; 93 establishments reported no metalworking operations; and the remainder, consisting mainly of small plants with fewer than 5 employees reported on "short-form" schedules which did not include a metalworking operation inquiry. In addition, there is evidence that many of the establishments with 5 to 49 employees did not answer this inquiry.

## FABRICATED METAL PRODUCTS, N.E.C.

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3481—Miscellaneous Fabricated Wire Products
- 3491—Metal Shipping Barrels, Drums, Kegs, and Pails
- 3492—Safes and Vaults
- 3493—Steel Springs
- 3494—Valves and Pipe Fittings, Except Plumbers' Brass Goods
- 3496—Collapsible Tubes
- 3497—Metal Foil and Leaf
- 3498—Fabricated Pipe and Fabricated Pipe Fittings
- 3499—Fabricated Metal Products, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3481—MISCELLANEOUS FABRICATED WIRE PRODUCTS

This industry comprises establishments primarily engaged in manufacturing miscellaneous fabricated wire products from purchased wire. Rolling mills engaged in manufacturing wire products are classified in Major Group 33; establishments manufacturing nonferrous wire nails and spikes in industry 3399; those drawing and insulating nonferrous wire in industry 3357; and those assembling wire bedsprings or seats are classified in Major Group 25. For a detailed list of products of industry 3481, refer to table 6A, product codes 3481111 to 3481998.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Fabricated Wire Products, N.E.C., Industry in 1963 totaled \$1,031 million. This amount included shipments of fabricated wire products (primary products) valued at \$904 million, shipments of other products (secondary products) valued at \$71 million, and miscellaneous receipts (mainly receipts for sale of products bought and resold) at \$56 million.

This industry's shipments of fabricated wire products in 1963 represented 93 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent. Secondary products shipped by this industry in 1963 included steel springs (\$14 million) and metal stampings (\$6 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 15 percent of the total industry shipments are represented by plants specializing in precision mechanical springs; 22 percent in other wire springs; and 32 percent in other fabricated wire products.

Shipments of fabricated wire products, n.e.c., by this industry in 1963 represented 65 percent of all shipments of these products (\$1,399 million) by all industries. In 1958 the coverage ratio was 64 percent. Industry 3315, Steel Wire Drawing, Etc., shipped \$186 million of fabricated wire products.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3481, e.g., noninsulated ferrous wire rope, etc., 43 percent; precision mechanical springs, 86 percent; other wire springs, 87 percent; and fencing and fence gates, 46 percent.

The production index for the primary products of the industry decreased to 122 in 1963 from the 1958 level of 106. The unit value index for 1963 was 118 compared to 112 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3491—METAL SHIPPING BARRELS, DRUMS, KEGS, AND PAILS

This industry comprises establishments primarily engaged in manufacturing ferrous and nonferrous shipping barrels, drums, kegs, and pails. For a detailed list of products of industry 3491, refer to table 6A, product codes 3491111 to 3491331.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Metal Barrels, Drums, and Pails Industry in 1963 totaled \$303 million. This amount included shipments of metal barrels, drums, kegs, and pails (primary products) valued at \$275 million, shipments of other products (secondary products) valued at \$23 million, and miscellaneous receipts (mainly receipts for sale of products bought and resold) at \$6 million.

This industry's shipments of metal barrels, drums, kegs, and pails in 1963 represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was also 92 percent. Secondary products shipped by this industry in 1963 included metal cans (\$7 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 72 percent of the total industry shipments are represented by plants specializing in steel shipping barrels and drums.

Shipments of metal barrels, drums, kegs, and pails by this industry in 1963 represented 86 percent of all shipments of these products (\$318 million) by all industries. In 1958 the coverage ratio was also 86 percent. Other industries shipping metal barrels, drums, kegs, and pails included industry 3411, Metal Cans, \$11.7 million; and industry 3461, Metal Stampings, \$7.3 million.

The production index for the primary products of the industry increased to 110 in 1963 from the 1958 level of 102. The unit value index for 1963 was 132 compared to 121 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3492—SAFES AND VAULTS

This industry comprises establishments primarily engaged in manufacturing fire or burglary resistive steel safes and vaults (except concrete grave vaults—industry 3272, and metal grave vaults—industry 3988), and similar fire or burglary resistive products. For a detailed list of products of industry 3492, refer to table 6A, product codes 3492013 to 3492098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Safes and Vaults Industry in 1963 totaled \$78 million.

This industry's shipments of safes and vaults in 1963 represented 81 percent of its total product shipments. The industry specialization ratio in 1958 was 82 percent.

Shipments of safes and vaults by this industry in 1963 represented between 90 and 95 percent of all shipments of these products (\$59 million) by all industries. In 1958 the coverage ratio was 97 percent.

#### 3493—STEEL SPRINGS

This industry comprises establishments primarily engaged in manufacturing leaf springs, hot wound springs, and coiled flat springs. Establishments primarily engaged in manufacturing wire springs are classified in industry 3481, and rolling mills manufacturing steel springs in industry 3312. For a detailed list of products of industry 3493, refer to table 6A, product codes 3493011 to 3493098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Steel Springs Industry in 1963 totaled \$158 million. This amount included shipments of steel springs (primary products) valued at \$137 million, shipments of other products (secondary products) valued at \$14 million, and miscellaneous receipts at \$7 million.

This industry's shipments of steel springs in 1963 represented 91 percent of its total product shipments. The industry specialization ratio in 1958 was 81 percent. Secondary products shipped by this industry in 1963 included precision mechanical springs (\$7 million).

Shipments of steel springs by this industry in 1963 represented 67 percent of all shipments of these products (\$205 million) by all industries. In 1958 the coverage ratio was 69 percent. Other industries shipping steel springs included industry 3481, Fabricated Wire Products, N.E.C., \$16 million.

The production index for the primary products of the industry increased to 124 in 1963 from the 1958 level of 89. The unit value index for 1963 was 125 compared to 116 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3494—VALVES AND PIPE FITTINGS, EXCEPT PLUMBERS' BRASS GOODS

This industry comprises establishments primarily engaged in manufacturing valves for controlling the flow of liquids or gases in pipes and mains, and for machinery. Establishments primarily engaged in manufacturing faucets, spigots, and similar plumbers' brass goods and fittings are classified in industry 3432. For a detailed list of products of industry 3494, refer to table 6A, product codes 3494111 to 3494498.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Valves and Pipe Fittings Industry in 1963 totaled \$1,589 million. This amount included shipments of valves and pipe fittings (primary products) valued at \$1,300 million, shipments of other products (secondary products) valued at \$214 million, and miscellaneous receipts (mainly receipts for products bought and resold) at \$74 million.

This industry's shipments of valves and pipe fittings in 1963 represented 86 percent of its total product shipments. The industry specialization ratio in 1958 was 88 percent. Secondary products shipped by this industry in 1963 included aircraft engine parts and accessories (\$13 million) and other refrigeration and air-conditioning equipment (\$12 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 46 percent of the total industry shipments are represented by plants specializing in metal valves for piping systems and 31 percent in metal fittings and unions for piping systems.

Shipments of valves and pipe fittings by this industry in 1963 represented 85 percent of all shipments of these products (\$1,525 million) by all industries. In 1958 the coverage ratio was 88 percent. Other industries shipping valves and pipe fittings included industry 3561, Pumps and Compressors, \$34 million; and industry 3533, Oil Field Machinery, \$5 million.

The production index for the primary products of the industry increased to 129 in 1963 from the 1958 level of 104. The unit value index for 1963 was 127 compared to 125 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3496—COLLAPSIBLE TUBES

This industry comprises establishments primarily engaged in manufacturing collapsible tubes defined as cylindrical containers for viscous products, made of thin flexible metal, usually of tin, tin-lined lead, lead, lead-tin alloy, or aluminum, with integral shoulder and neck, provided with an appropriate size opening in the throat, and usually with a screw cap made of plastic material for closure over the neck. For a detailed list of products of industry 3496, refer to table 6A, product codes 3496011 to 3496029.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Collapsible Tubes Industry in 1963 totaled \$51 million. This amount included shipments of collapsible tubes (primary products) valued at \$44 million, shipments of other products (secondary products) valued at \$6 million, and miscellaneous receipts (mainly receipts for products bought and resold) at \$1 million.

This industry's shipments of collapsible tubes in 1963 represented 88 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent.

Shipments of collapsible tubes by this industry in 1963 represented 100 percent of all shipments of these products (\$44 million) by all industries. In 1958 the coverage ratio was also 100 percent.

The production index for the primary products of the industry increased to 115 in 1963 from the 1958 level of 98. The unit value index for 1963 was 112 compared to 111 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3497—METAL FOIL AND LEAF

This industry comprises establishments primarily engaged in manufacturing gold, silver, tin, and other metal foil (including converted metal foil) and leaf. Establishments primarily engaged in manufacturing plain aluminum foil are classified in industry 3352. For a detailed list of products of industry 3497, refer to table 6A, product codes 3497023 to 3497057.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Metal Foil and Leaf Industry in 1963 totaled \$181 million. This amount included shipments of metal foil and leaf (primary products) valued at \$147 million, shipments of other products (secondary products) valued at \$29 million, and miscellaneous receipts at \$5 million.

This industry's shipments of metal foil and leaf in 1963 represented 84 percent of its total product shipments. The industry specialization ratio in 1958 was 83 percent. Secondary products shipped by this industry in 1963 included miscellaneous gravure printing (\$4 million).

Shipments of metal foil and leaf by this industry in 1963 represented 45 percent of all shipments of these products (\$330 million) by all industries. In 1958 the coverage ratio was 52 percent. Other industries shipping metal foil and leaf consisted mainly of industry 3352, Aluminum Rolling and Drawing, \$135 million; and industry 2641, Paper Coating and Glazing, \$18 million.

The production index for the primary products of the industry increased to 177 in 1963 from the 1958 level of 84. The unit value index for 1963 was 131 compared to 128 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3498—FABRICATED PIPE AND FABRICATED PIPE FITTINGS

This industry comprises establishments primarily engaged in fabricating pipe and pipe fittings from purchased pipe, by cutting, threading, bending, etc. Establishments primarily engaged in manufacturing cast iron pipe and fittings, including cast and forged pipe fittings which have been machined and threaded, are classified in industry 3321; welded and heavy riveted pipe in industry 3317; and seamless steel pipe in industry 3317. Establishments primarily engaged in manufacturing products, such as bannisters, railings, and grilles from pipe are classified in industry 3446. For a detailed list of products of industry 3498, refer to table 6A, product codes 3498013 to 3498019.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Fabricated Pipe and Fittings Industry in 1963 totaled \$306 million. This amount included shipments of fabricated pipe and

fittings (primary products) valued at \$260 million, shipments of other products (secondary products) valued at \$21 million, and miscellaneous receipts (mainly receipts for products bought and resold) at \$25 million.

This industry's shipments of fabricated pipe and fittings in 1963 represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was 89 percent.

Shipments of fabricated pipe and fittings by this industry in 1963 represented 91 percent of all shipments of these products (\$287 million) by all industries. In 1958 the coverage ratio was 93 percent. Other industries shipping fabricated pipe and fittings (primary products) included industry 3494, Valves and Pipe Fittings, \$4 million; and industry 3499, Fabricated Metal Products, N.E.C., \$3 million.

#### 3499—FABRICATED METAL PRODUCTS, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing fabricated metal products, not elsewhere classified. Establishments primarily engaged in manufacturing advertising novelties are classified in industry 3993. For a detailed list of products of industry 3499, refer to table 6A, product codes 3499051 to 3499059.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Fabricated Metal Products, N.E.C., Industry in 1963 totaled \$573 million. This amount included shipments of fabricated metal products, n.e.c. (primary products) valued at \$469 million, shipments of other products (secondary products) valued at \$60 million, and miscellaneous receipts (mainly receipts for products bought and resold) at \$44 million.

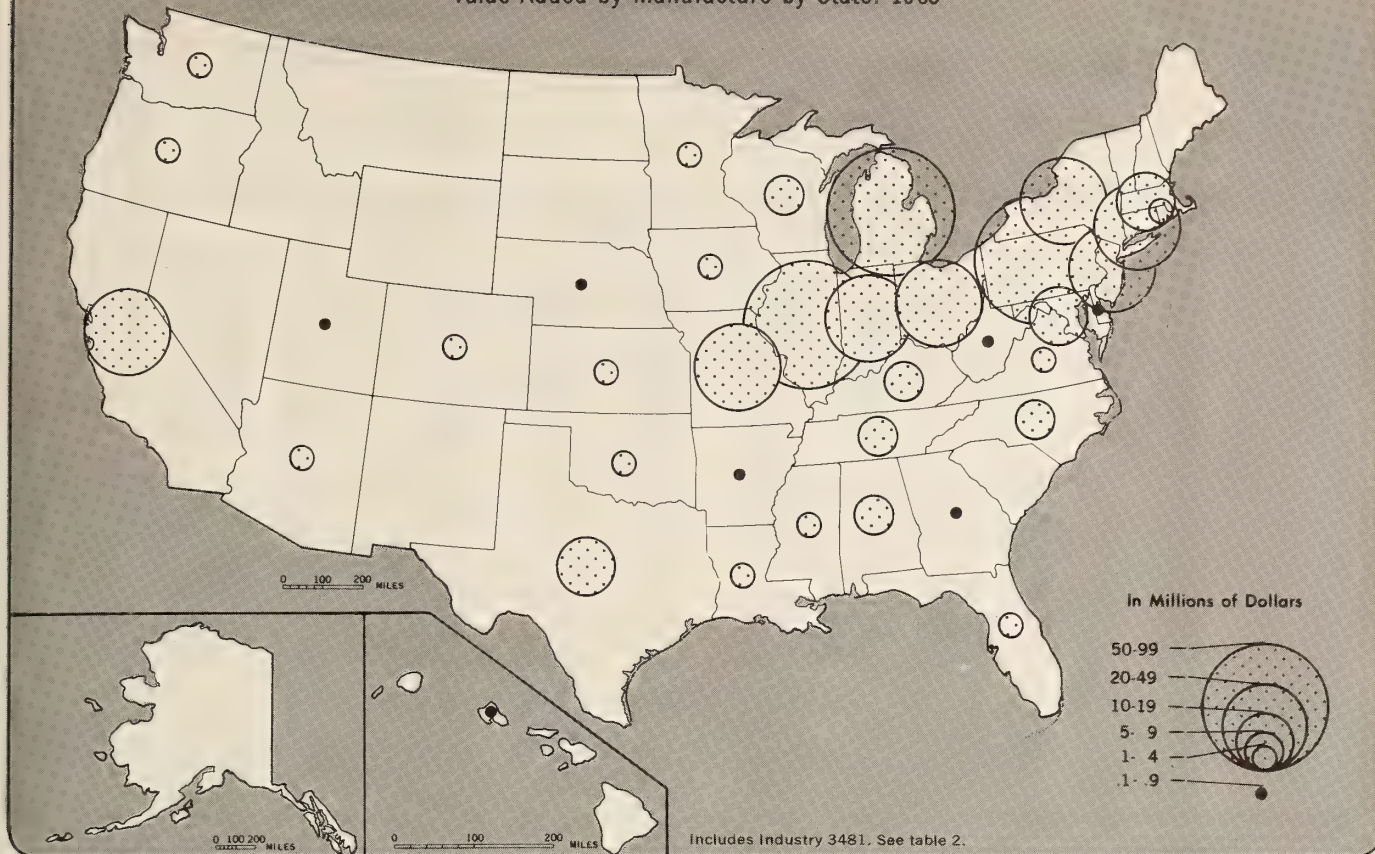

This industry's shipments of fabricated metal products in 1963 represented 89 percent of its total product shipments. The industry specialization ratio in 1958 was 88 percent. Secondary products shipped by this industry in 1963 included wood products, n.e.c. (\$3 million), job stampings, except automotive (\$2 million), and fabricated pipe and fittings (\$3 million).

Shipments of fabricated metal products, n.e.c., by this industry in 1963 represented 62 percent of all shipments of these products (\$753 million) by all industries. In 1958 the coverage ratio was also 62 percent. Other industries shipping fabricated metal products included industry 3429, Hardware, N.E.C., \$13 million; and industry 3461, Metal Stampings, \$12 million.

# FABRICATED WIRE PRODUCTS, N.E.C.: SIC 348

Value Added by Manufacture by State: 1963

# FABRICATED METAL PRODUCTS, N.E.C.: SIC 349

Value Added by Manufacture by State: 1963

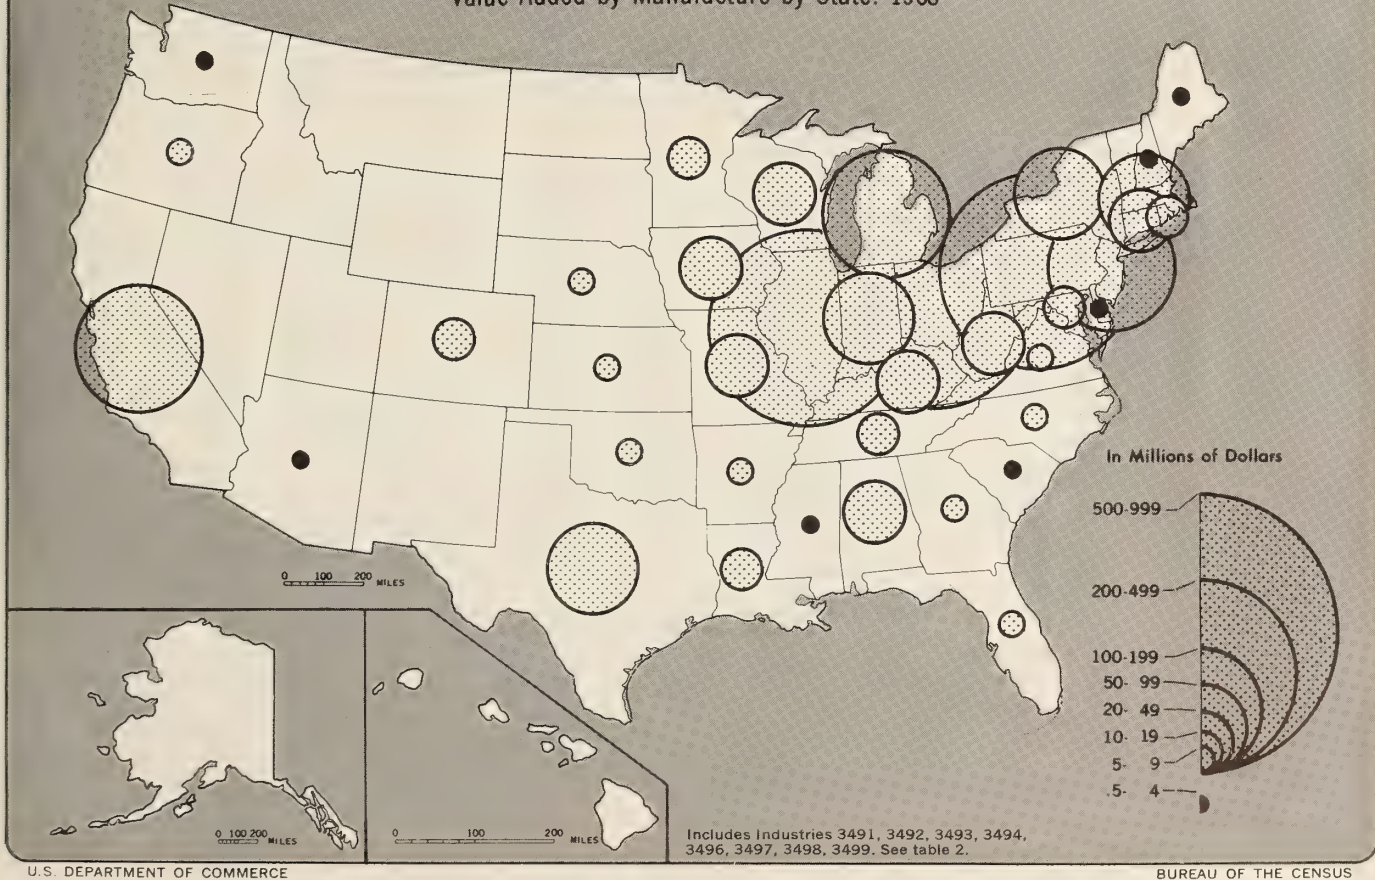

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expend- itures, new (\$1,000)	Spec- ializa- tion ratio (per- cent)	Cov- erage ratio (per- cent)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1954 excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1954 excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Data for Alaska and Hawaii are excluded for years prior to 1958.

<sup>3</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification, accordingly, the data for 1958-1963 are not comparable with those for earlier years.

<sup>4</sup>No separate figures are available for prior years.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958—Continued

Footnotes to Table 2-34E—Continued

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3481, Fabricated Wire Products, N.E.C.: New England—Maine, 2 (1-19); New Hampshire, 2 (1-19); Vermont, 2 (1-19); West North Central—North Dakota, 1 (1-19); Nebraska, 6 (20-99); South Atlantic—Delaware, 1 (20-99); Virginia, 3 (164); West Virginia, 1 (20-99); South Carolina, 2 (1-19); East South Central—Kentucky, 10 (500-999); Mississippi, 8 (250-499); West South Central—Arkansas, 4 (20-99); Louisiana, 5 (20-99); Mountain—New Mexico, 1 (1-19); Arizona, 11 (100-249); Utah, 4 (20-99); Pacific—Oregon, 17 (100-249); Hawaii, 2 (20-99).

SIC 3491, Metal Barrels, Drums, and Pails: New England—Massachusetts, 4 (20-99); Connecticut, 2 (20-99); East North Central—Indiana, 1 (100-249); Michigan, 4 (20-99); Wisconsin, 4 (100-249); West North Central—Minnesota, 2 (100-249); Iowa, 2 (20-99); Missouri, 2 (20-99); Kansas, 2 (100-249); South Atlantic—Maryland, 1 (20-99); West Virginia, 4 (20-99); South Carolina, 1 (1-19); Georgia, 4 (20-99); Florida, 2 (20-99); East South Central—Tennessee, 1 (20-99); Alabama, 5 (100-249); Mississippi, 2 (1-19); West South Central—Louisiana, 6 (500-999); Oklahoma, 2 (1-19); Mountain—Colorado, 2 (1-19); Pacific—Washington, 1 (1-19); Oregon, 1 (1-19).

SIC 3492, Safes and Vaults: New England—Connecticut, 1 (1-19); Middle Atlantic—New York, 3 (20-99); Pennsylvania, 1 (20-99); East North Central—Ohio, 9 (2,911); Indiana, 3 (100-249); Illinois, 2 (1-19); South Atlantic—Florida, 1 (1-19); West South Central—Texas, 2 (20-99); Pacific—California, 10 (179).

SIC 3493, Steel Springs: New England—Vermont, 1 (1-19); Massachusetts, 2 (20-99); Connecticut, 5 (20-99); Middle Atlantic—New Jersey, 1 (1-19); Pennsylvania, 14 (1,000-2,499); East North Central—Ohio, 7 (742); Indiana, 4 (574); West North Central—Minnesota, 1 (1-19); Iowa, 1 (20-99); Missouri, 3 (20-99); South Atlantic—North Carolina, 1 (1-19); Florida, 1 (1-19); East South Central—Mississippi, 1 (100-249); West South Central—Texas, 6 (101); Pacific—Washington, 3 (20-99); Oregon, 1 (20-99); Hawaii, 1 (1-19).

SIC 3494, Valves and Pipe Fittings: New England—Maine, 2 (20-99); New Hampshire, 1 (100-249); Rhode Island, 8 (1,000-2,400); West North Central—Minnesota, 5 (645); Nebraska, 2 (250-499); Kansas, 4 (100-249); South Atlantic—Delaware, 2 (100-249); Maryland, 2 (20-99); Virginia, 3 (154); West Virginia, 2 (250-499); North Carolina, 4 (250-499); Georgia, 2 (250-499); Florida, 9 (152); East South Central—Kentucky, 6 (2,037); Tennessee, 6 (1,220); West South Central—Arkansas, 8 (250-499); Louisiana, 2 (500-999); Mountain—Wyoming, 1 (1-19); Colorado, 6 (566); Arizona, 1 (1-19); Utah, 1 (20-99); Pacific—Washington, 4 (1-19); Oregon, 4 (100-249).

SIC 3496, Collapsible Tubes: New England—Rhode Island, 1 (20-99); Connecticut, 1 (500-999); Middle Atlantic—New York, 1 (1-19); New Jersey, 7 (1,000-2,499); Pennsylvania, 2 (250-499); East North Central—Ohio, 1 (1-19); Indiana, 1 (20-99); Illinois, 1 (100-249); Michigan, 2 (20-99); Wisconsin, 1 (1-19); West North Central—Iowa, 1 (20-99); South Atlantic—West Virginia, 1 (500-999); East South Central—Kentucky, 1 (100-249); West South Central—Arkansas, 1 (100-249); Pacific—California, 2 (20-99).

SIC 3497, Metal Foil and Leaf: New England—Vermont, 2 (20-99); Massachusetts, 3 (116); Middle Atlantic—New York, 13 (250-499); Pennsylvania, 2 (20-99); East North Central—Ohio, 3 (500-999); Indiana, 1 (100-249); Illinois, 8 (577); West North Central—Missouri, 1 (250-499); South Atlantic—Maryland, 1 (20-99); Virginia, 2 (500-999); North Carolina, 1 (20-99); East South Central—Kentucky, 4 (500-999); West South Central—Texas, 1 (1-19); Pacific—Washington, 1 (1-19); California, 7 (500-999).

SIC 3498, Fabricated Pipes and Fittings: New England—Maine, 2 (20-99); Rhode Island, 1 (20-99); Connecticut, 8 (100-249); East North Central—Indiana, 6 (231); Wisconsin, 11 (247); West North Central—Minnesota, 1 (20-99); Iowa, 1 (1-19); Nebraska, 1 (1-19); Kansas, 2 (20-99); South Atlantic—Delaware, 2 (100-249); Maryland, 2 (20-99); Virginia, 2 (1-19); West Virginia, 1 (250-499); North Carolina, 4 (202); South Carolina, 1 (20-99); Georgia, 2 (20-99); East South Central—Tennessee, 2 (20-99); Alabama, 1 (20-99); Mississippi, 3 (1-19); West South Central—Louisiana, 2 (1-19); Oklahoma, 3 (20-99); Mountain—Colorado, 1 (20-99); New Mexico, 1 (1-19); Arizona, 1 (1-19); Pacific—Washington, 5 (20-99); Oregon, 6 (250-499).

SIC 3499, Fabricated Metal Products, N.E.C.: New England—Maine, 2 (20-99); New Hampshire, 3 (20-99); Vermont, 1 (1-19); West North Central—Missouri, 9 (814); North Dakota, 1 (1-19); South Dakota, 2 (1-19); Nebraska, 3 (1-19); Kansas, 12 (20-99); South Atlantic—District of Columbia, 1 (1-19); Virginia, 9 (20-99); West Virginia, 5 (163); North Carolina, 6 (122); South Carolina, 6 (100-249); East South Central—Tennessee, 5 (20-99); Alabama, 5 (20-99); Mississippi, 1 (1-19); West South Central—Arkansas, 7 (318); Oklahoma, 12 (120); Mountain—Montana, 2 (1-19); Idaho, 1 (1-19); Wyoming, 2 (1-19); New Mexico, 1 (1-19); Arizona, 6 (100-249); Utah, 3 (1-19); Nevada, 2 (1-19); Pacific—Washington, 9 (20-99); Oregon, 12 (20-99); Hawaii, 1 (1-19).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

TABLE 3. Detailed Statistics: 1963

Item	Fabricated wire products, n.e.c. (SIC 3481)	Metal barrels, drums, and pails (SIC 3491)	Safes and vaults (SIC 3492)	Steel springs / (SIC 3493)	Valves and pipe fittings (SIC 3494)	Collapsible tubes (SIC 3496)	Metal foil and leaf (SIC 3497)	Fabricated pipe and fittings (SIC 3498)	Fabricated metal products, n.e.c. (SIC 3499)

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. (See Introduction for an explanation of terms used.)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

TABLE 4. Selected Statistics, by Employment Size of Establishments: 1963

Item	Establishments, total	Establishments with an average of—									
		1 to 4 employees	5 to 9 employees	10 to 19 employees	20 to 49 employees	50 to 99 employees	100 to 249 employees	250 to 499 employees	500 to 999 employees	1,000 to 2,499 employees	2,500 employees and over

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

n.e.c. Not elsewhere classified.

<sup>1</sup>Includes capital expenditures for plants under construction but not in operation which constitute \$500-\$1,000 thousand of the total for the size class.<sup>2</sup>Includes capital expenditures for plants under construction but not in operation which constitute \$2-\$5 million of the total for the size class.

TABLE 5A. **Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)

NOTE: See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>Included in this industry are selected fabricated wire products (see footnotes 3,7,10, and 12 in table 5B) which are also primary to industry 3315, Steel Wire Drawing, Etc. A coverage ratio computed on the basis of including both industries to which these products are primary would total 79 percent; 65 percent by industry 3481 and 14 percent by industry 3315. The remaining 21 percent was shipped by establishments in other industries, including industry 3312, Blast Furnaces and Steel Mills, and industry 3357, Nonferrous Wire Drawing, Etc.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Includes values for those industries for which separate data could not be published without revealing the operations of individual companies.

<sup>2</sup>Includes total for product class 33151, Noninsulated ferrous wire rope, cable, and strand, produced from wire drawn in the same establishment, which is primary to industry 3315.

<sup>3</sup>Includes shipments totaling over \$2 million for industry 3352, Aluminum Rolling and Drawing, which is withheld to avoid disclosing individual company figures.

<sup>4</sup>Includes shipments totaling over \$2 million which is withheld to avoid disclosing individual company figures for industry 3315, Steel Wire Drawing, Etc., and industry 3316, Cold Finishing of Steel Shapes.

<sup>5</sup>Includes shipments totaling over \$2 million which is withheld to avoid disclosing individual company figures for industry 3315, Steel Wire Drawing, etc., and industry 3429, Hardware, N.E.C.

<sup>6</sup>Includes total for product class 33157, Wire cloth and other woven wire products, made in wire drawing plants which is primary to industry 3315.

<sup>7</sup>Includes shipments totaling over \$2 million which is withheld to avoid disclosing individual company figures for industry 3357, Nonferrous Wire Drawing, Etc., and industry 3548, Metal Working Machinery, N.E.C.

<sup>8</sup>Includes total for product class 33575, Nonferrous wire cloth and other woven wire products, made in nonferrous wire drawing plants which is primary to industry 3357.

<sup>9</sup>Includes \$2 million shipped by industry 3442, Metal Doors, Sash, and Trim.

<sup>10</sup>Includes total for product class 33156, Fencing and fence gates, made in wire drawing plants which is primary to industry 3315.

<sup>11</sup>Includes total for product class 33159, Other fabricated ferrous wire products, except springs made in wire drawing plants which is primary to industry 3315.

<sup>12</sup>Includes \$2 million shipped by industry 3441, Fabricated Structural Steel; \$6 million shipped by industry 3449, Miscellaneous Metal Work, N.E.C.; and \$3 million shipped by industry 3461, Metal Stampings. In addition shipments of over \$2 million were reported by industry 2541, Metal Household Furniture, and industry 3554, Paper Industries Machinery, which are withheld to avoid disclosing individual company figures.

<sup>13</sup>Includes \$11.7 million shipped by industry 3411, Metal Cans and \$7.3 million shipped by industry 3461, Metal Stampings.

<sup>14</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3461, Metal Stampings, and 3639, Household Appliances, N.E.C.

<sup>15</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3461, Metal Stampings and 3729, Aircraft Equipment, N.E.C.

<sup>16</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 26551, Paperboard and other fiber drums, and 34412, Fabricated structural iron and steel for bridges.

<sup>17</sup>Includes \$15.8 million shipped by industry 3481, Fabricated Wire Products, N.E.C. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3391, Iron and Steel Forgings, and 3717, Motor Vehicles and Parts.

Footnotes continued on next page.

**TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry:  
1963—Continued**

Footnotes for Table 5B--34E--Continued

<sup>18</sup>Includes \$3.2 million shipped by industry 3432, Plumbing Fittings, Brass Goods. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3392, Nonferrous Forgings; 3433, Heating Equipment, Except Electric; 3443, Boiler Shop Products; 3511, Steam Engines and Turbines; 3599, Miscellaneous Machinery; and 3717, Motor Vehicles and Parts.

<sup>19</sup>Includes \$3.2 million shipped by industry 3432, Plumbing Fittings, Brass Goods, and \$4.0 million shipped by industry 3433, Heating Equipment, Except Electric; and industry 3561, Pumps and Compressors had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies.

<sup>20</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 33911, Drop, upset and press steel forgings (closed die) forgings; 33919, Open die or smith forgings (open frame hammer or press); 33920, Nonferrous forgings; 34443, Other sheet metal work; 35227, Lawn mowers and parts; 35323, All other mining machinery (complete units); 35332, Other oil and gas-field drilling machinery and equipment; 35483, Acetylene welding and cutting apparatus; 35612, Hydraulic fluid power pumps and motors; 35641, Industrial fans and blowers; 35851, Heat transfer equipment; 35860, Measuring and dispensing pumps; 36220, General industry power circuit devices and controls; 36441, Pole line and transmission hardware; 36795, Other electronic components and accessories, n.e.c., including parts for electronic tubes (except glass blanks); and 37175, Parts and accessories for passenger cars, trucks, and busses, shipped to motor vehicle manufacturers.

<sup>21</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 2643, Bags, Except Textile Bags; and 3356, Rolling and Drawing, N.E.C.

<sup>22</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 26416, Other coated and processed paper, except wrappers; 26432, Specialty bags and liners; 26510, Folding paperboard boxes and cartons, except ice cream, butter, margarine, frozen food, etc.; and 34441, Sheet, metal roofing and siding, and roof drainage equipment.

<sup>23</sup>In addition, the following industries had shipment which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 2911, Petroleum Refining; 3533, Oil Field Machinery; and 3599, Miscellaneous Machinery.

<sup>24</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 34944, Other metal valves and fittings, except plumbers' brass goods and fittings; and 35690, General industrial machinery, n.e.c.

<sup>25</sup>Includes \$4.1 million shipped by industry 2499, Wood Products, N.E.C.; \$4.1 million shipped by industry 2514, Metal Household Furniture; \$3.7 million shipped by industry 2542, Metal Partitions and Fixtures; \$2.1 million shipped by industry 3423, Hand and Edge Tools; \$2.2 million shipped by industry 3442, Metal Doors, Sash, and Trim; \$2.9 million shipped by industry 3443, Boiler Shop Products; \$6.0 million shipped by industry 3494, Valves and Pipe Fittings; \$3.8 million shipped by industry 3559, Special Industry Machines, N.E.C.; \$4.8 million shipped by industry 3585, Refrigeration Machinery; \$4.4 million shipped by industry 3644, Noncurrent Carrying Devices; \$3.2 million shipped by industry 3717, Motor Vehicles and Parts; and \$6.6 million shipped by industry 3729, Aircraft Equipment, N.E.C. In addition the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 2515, Mattresses and Bedsprings; 2641, Paper Coating and Glazing; 3321, Gray Iron Foundries; 3323, Steel Foundries; 3425, Hand Saws and Saw Blades; 3522, Farm Machinery and Equipment; 3531, Construction Machinery; 3552, Textile Machinery; 3562, Ball and Roller Bearings; 3631, Household Cooking Equipment; 3639, Household Appliances, N.E.C.; 3642, Lighting Fixtures; 3643, Current Carrying Devices; 3742, Railroad and Street Cars; and 3843, Dental Equipment and Supplies.

<sup>26</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 25144, Other metal household furniture; 35451, Small cutting tools for machine tools and metal working machinery; 35690, General industrial machinery, n.e.c.; and 39142, Flatware.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958	
			Quantity	Value (\$1,000)	Quantity	Value (\$1,000)

34990 00	Fabricated metal products, n.e.c., n.s.k.....	.....	(X)	86,732		

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>This quantity was valued at \$61,700 thousand. The remaining \$14,844 thousand was reported without quantity.

<sup>2</sup>This quantity was valued at \$10,428 thousand. The remaining \$3,254 thousand was reported without quantity.

<sup>3</sup>This quantity was valued at \$2,916 thousand. The remaining \$473 thousand was reported without quantity.

<sup>4</sup>For 1958, data for product code 3481519, Nonferrous metal insect wire screening, other than copper and copper-base alloy, and aluminum, are included with product code 3481498, Other wire cloth and woven wire products.

<sup>5</sup>For 1958, data for product code 3481400, Wire cloth and woven wire products, not specified by kind, include data for product code 3481500, Nonferrous wire cloth and other woven nonferrous wire products, not specified by kind.

<sup>6</sup>This quantity was valued at \$5,599 thousand. The remaining \$1,435 thousand was reported without quantity.

<sup>7</sup>Steel shipping packages, kegs, and pails are defined as single-walled shipping containers with a range of capacity from 1 to 12 gallons inclusive, constructed of steel sheet of 29 gauge and heavier. This definition does not include tin cans (packers' cans, general line cans, and beer cans), terneplate oil containers, fluid milk shipping containers, ice cream cans, gas cylinders, beer barrels, reconditioned barrels and drums, or containers not commercially usable in the transportation of commodities.

<sup>8</sup>Steel shipping barrels and drums are defined as single-walled cylindrical or bilged shipping containers, with a range of capacity from 12 to 132 gallons, constructed of steel. This definition does not include tin cans (packers' cans, general line cans, and beer cans), terneplate oil containers, high and low pressure gas steel cylinders, fluid milk shipping containers, ice cream cans, or containers not commercially usable in the transportation of commodities.

<sup>9</sup>Safes and chests are shown as fire-resistive or burglary-resistive, depending on the primary purpose for which they are built.

<sup>10</sup>More detailed data are available in Current Industrial Reports Series M26F, "Converted Flexible Packaging Products". There are inconsistencies in classification in these two surveys. These differences will be resolved in the 1964 report in the M26F series.

<sup>11</sup>In 1958 these data are limited to laminated foil made from purchased aluminum foil.

<sup>12</sup>More detailed data on converted aluminum foil are available in Current Industrial Reports Series M34P, "Aluminum Foil Converted". That report contains data on poundages of aluminum foil converted by end use. However, it is not possible to precisely compare the data in this industry with data in the annual Current Industrial Report. Some of the products for which aluminum foil consumption is reported in the annual survey are produced for use by the same company to package a commodity. In such cases, the converted aluminum foil product is not included in this industry but is included as a portion of the value of the packaged commodity.

<sup>13</sup>Data for product code 3497034 included with product code 3497036.

TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958

Product code	Product and year	Indexes (1954 = 100)		Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value			Production	Unit value
348--	Fabricated wire products, n.e.c. <sup>1</sup> .....1963..	122	118	3491-	Fabricated metal products, n.e.c.—Con.		
	.....1958..	106	112		Metal barrels, drums, and pails.....1963..	110	132
					.....1958..	102	121
3481-	Fabricated wire products, n.e.c. <sup>1</sup> .....1963..	122	118	34911	Steel shipping pails (12 gallon capacity and under).....1963..	127	125
	.....1958..	106	112		.....1958..	116	126
34811	Noninsulated ferrous wire rope, cable, and strand.....1963..	136	110	34912	Steel shipping barrels and drums (over 12 gallon capacity).....1963..	98	136
	.....1958..	110	106		.....1958..	95	119
34812	Precision mechanical springs.....1963..	100	152	3493-	Steel springs.....1963..	124	125
	.....1958..	85	131		.....1958..	89	116
34813	Other wire springs.....1963..	117	106	3494-	Valves and pipe fittings (except plumbers' brass goods and fittings) <sup>3</sup> .....1963..	129	127
	.....1958..	98	100		.....1958..	104	125
34814	Ferrous wire cloth and other woven ferrous wire products.....1963..	90	104	34941	Metal valves for piping systems (except plumbing and heating valves).....1963..	113	140
	.....1958..	113	107		.....1958..	98	136
34815	Nonferrous wire cloth and other woven nonferrous wire products....1963..	189	102	34942	Metal fittings and unions for piping systems.....1963..	118	111
	.....1958..	113	107		.....1958..	105	111

349--	Fabricated metal products, n.e.c.....1963..	(2)	(2)	3497-	Metal foil and leaf (except plain aluminum foil).....1963..	177	131
	.....1958..	(2)	(2)		.....1958..	84	128

n.e.c. Not elsewhere classified.

<sup>1</sup>Adjusted to include other fabricated wire products (product class 34819) and products not specified by kind.

<sup>2</sup>Not shown because comparable quantity data were not obtained for a significant portion of these products.

<sup>3</sup>Adjusted to include plumbing and heating valves and specialties (product class 34943) and other metal valves and fittings (product class 34944).

TABLE 6C. Product Classes—Value Shipped by All Manufacturing Establishments: 1947, 1954, 1958 to 1963

(In thousands of dollars)

Code	Product class	1963	1962 <sup>1</sup>	1961 <sup>1</sup>	1960 <sup>1</sup>	1959 <sup>1</sup>	1958	1954	1947

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Includes product class 33151, Noninsulated ferrous wire rope, cable, and strand produced from wire drawn, which is primary to industry 3315.

<sup>3</sup>Includes product class 33157, Wire cloth and other woven wire products made in wire drawing plants, which is primary to industry 3315.

<sup>4</sup>Includes product class 33575, Nonferrous wire cloth and other woven wire products made in nonferrous wire drawing plants, which is primary to industry 3357.

<sup>5</sup>Includes product class 33156, Fencing and fence gates made in wire drawing plants, which is primary to industry 3315.

<sup>6</sup>Includes product class 33159, Other fabricated ferrous wire products, except springs made in wire drawing plants, which is primary to industry 3315.

<sup>7</sup>Does not include pipe hangars and pipe supports, for which data is not available.

TABLE 6D. **Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than \$1 million. n.e.c. Not elsewhere classified.

<sup>1</sup>For the specified product classes shipment of \$1 million or more were reported for the States listed but the exact figures are withheld to avoid disclosure of individual company figures: 33151 and 34811, Massachusetts, Connecticut, Indiana, Illinois, Wisconsin, Missouri, Maryland, Virginia, Georgia, Florida, Colorado, Washington, and California; 34812, Massachusetts, Ohio, Kentucky, and California; 34813, Iowa, Maryland, Kentucky, Mississippi, Texas, and Colorado; 33157 and 34814, Connecticut, Indiana, Michigan, Missouri, Maryland, Kentucky, Colorado, Oregon, and California; 33575 and 34815, Connecticut, New York, Pennsylvania, Ohio, Wisconsin, Missouri, Alabama, Mississippi, and California; 33156 and 34816, Connecticut, Minnesota, Iowa, Missouri, Maryland, Florida, Alabama, Louisiana, Oklahoma, and Colorado; 33159 and 34819, Rhode Island, Delaware, Louisiana, Oklahoma, and Colorado; 34911, Massachusetts, New York, New Jersey, Wisconsin, Kansas, South Carolina, Alabama, Louisiana, Texas, and California; 34912, Connecticut, New York, Pennsylvania, Michigan, Kansas, West Virginia, Tennessee, Alabama, and California; 34913, New Jersey, Pennsylvania, Indiana, Illinois, Wisconsin, Minnesota, Missouri, Nebraska, and South Carolina; 34920, New York, Ohio, and Indiana; 34941, New Hampshire, Rhode Island, Minnesota, Iowa, Nebraska, Kansas, West Virginia, Kentucky, Tennessee, Alabama, Arkansas, Louisiana, Washington, and California; 34942, Michigan, Wisconsin, Missouri, Kansas, Delaware, Georgia, Kentucky, Arkansas, Oklahoma, Colorado, and California; 34943, Rhode Island, Connecticut, New York, New Jersey, Michigan, Wisconsin, Iowa, Oregon, and California; 34944, Vermont, Connecticut, Nebraska, Kansas, Virginia, Oklahoma, Colorado, and Arizona; 34970, Vermont, Massachusetts, Indiana, Wisconsin, Minnesota, Iowa, Missouri, Maryland, Virginia, North Carolina, Kentucky, Tennessee, Arkansas, and California; 34990, West Virginia, South Carolina, Alabama, Arkansas, Louisiana, Colorado, and Washington.

<sup>2</sup>Shipments of \$1 million or more were reported but exact figures are withheld to avoid disclosure of individual company figures.

<sup>3</sup>In 1958 these data are limited to laminated foil made from purchased aluminum foil.

TABLE 7A. Materials by Kind: 1963 and 1958

Code	Material	Unit of measure	1963		1958	
			Quantity	Delivered cost (\$1,000)	Quantity	Delivered cost (\$1,000)
			INDUSTRY 3481.—FABRICATED WIRE PRODUCTS, N.E.C.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Does not include tonnages of castings or forgings produced and consumed in the same establishment.

<sup>2</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not reported and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>3</sup>In 1963, 258,392 short tons of iron castings, 6,003 short tons of steel castings, and 122,917 thousand pounds of copper and copper-base alloy castings were produced and consumed in the same establishment. 1963 data for aluminum and aluminum-base alloy castings produced and consumed in the same establishment are not available. The comparable figure for copper and copper-base alloy castings in 1958 is 61,231 thousand pounds. Data for other types of castings produced and consumed in the same establishment are not available for 1958.

<sup>4</sup>3,934 short tons of forgings were produced and consumed in the same establishment in 1958. The comparable data for 1963 are not available.

<sup>5</sup>Data on total consumption of aluminum foil are available, by end use, in Current Industrial Reports Series M34P, Aluminum Foil Converted. The data in the Current Industrial Report include consumption by all establishments such as foil mills, foil converters, and others including food processing and other establishments converting foil for purposes of packaging a product. Data in this report are limited to establishments classified in the metal foil and leaf industry.

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Stamping, blanking, and forming of metals.....	277	125	110	42	22,862	237	1,054	21,571
Painting, lacquering, and enameling on metals.....	203	165	38	-	575	232	343	-

Note: Very small establishments were not requested to report their metalworking operations and in some instances a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production worker employment on the last line of the table below.

Item	Industry								
	3481	3491	3492	3493	3494	3496	3497	3498	3499
Total number of establishments in the industry.....	1,567	145	32	96	646	24	67	349	1,277
Number of establishments which reported one or more of the specified operations.....	487	94	13	52	414	17	17	112	435
Percent of industry production workers in these establishments	60-65	80-85	90-95	85-90	90-95	95-100	45-50	60-65	50-55
Number of establishments which reported "none" of the operations apply.....	176	9	-	7	33	1	17	67	67
Percent of industry production workers in these establishments	5-10	0-5	-	0-5	0-5	0-5	15-20	15-20	0-5
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	70-75	85-90	90-95	85-90	95-100	95-100	60-65	75-80	50-55

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of production workers in the specified operation. They are not based on total employment of the establishment.

## Machinery, Except Electrical

- 35A Engines and turbines and farm machinery and equipment
- 35B Construction, mining, and materials handling machinery and equipment
- 35C Metalworking machinery and equipment
- 35D Special industry machinery, except metalworking machinery
- 35E General industrial machinery and equipment
- 35F Office, computing, and accounting machines
- 35G Service industry machines and machine shops

This major group includes establishments primarily engaged in producing a wide variety of machinery and equipment items. The industries included in this major group encompass the whole range of industrial machinery, other than electrical. To a considerable extent, the products fall into the producers' heavy equipment category, are frequently of a complex character, and are produced both to individual order and as standard items. Industries in groups 351 to 358 are defined in terms of end products, and the parts, attachments, and accessories for these items are included in the industry of this end product unless specifically classified elsewhere in the Standard Industrial Classification. The volume of shipments of machinery parts and accessories in some industries constitutes a significant portion of total shipments. These parts producers are generally smaller establishments but there are a large number of them. Group 359, Machine Shops, includes plants producing a broad variety of miscellaneous parts made by job machine shops.

Group 352 includes farm machines and wheel-tractors, while group 353 comprises all types of earth-moving equipment, including tracklaying tractors and contractors' off-highway type tractors, mining machinery, and materials-handling equipment. The end products of plants in groups 351 to 356 are usually capital equipment, bought and used, not only by manufacturing companies but also at mines, farms, and in transportation, construction and commerce. Groups 357 and 358 include products for commercial and service use such as measuring and

dispensing pumps, office and store machines, and commercial refrigeration equipment.

Plants primarily engaged in rebuilding machinery or equipment on a factory basis were formerly included in this major group. However, such rebuilding activities are now classified according to the original industry classification of the product being rebuilt. Plants primarily rebuilding automotive parts are included in Major Group 37. Plants primarily rebuilding machine tools, metalworking machinery, and office and store machines are included in the industry of the plants producing the original equipment. Table 6A for each industry will show the industries in which rebuilding activities are included with the volume of such rebuilding.

The individual establishments within Major Group 35 frequently produce products falling into two or more SIC 4-digit industries. In fact, many of the larger establishments produce a significant amount of products secondary to the industry in which they are classified. These secondary products however, tend to be similar to the primary products of the establishment in the material used in their manufacture, type of labor employed to produce them, and nature of the processes involved in the production line.

Establishments in this group of industries typically maintain machine shops, tool and die rooms, and heat-treating facilities. Frequently the establishment, particularly if it is of some size, will also operate a pattern shop, screw-machine department, and stamping facility. With

greater variation depending upon the particular 4-digit industry, the physical plant may contain a foundry, forge shop, plate fabrication, electroplating, galvanizing, or other metal processing department. Data on the number of establishments engaged in a selected number of the more important of these operations and the number of employees working in the operations are shown in table 9 for each of the 4-digit industries in this major group. The metalworking operations shown in that table do not represent, of course, a complete list or, for many metal fabricating industries, even those which are most important. There are a number of significant activities such as assembly, subassembly, finishing, etc., which were covered only for selected industries.

Although the production processes in this area adhere to a general pattern of specified metalworking and metal fabricating operations, there is a substantial variation in the number and types of processes performed by an individual establishment as well as from industry to industry. Within a single 4-digit industry, certain establishments may be exclusively engaged in assembling component parts produced by other plants. Another group of plants may purchase rough castings or mill shapes and carry out the entire fabricating of the metal until it emerges as a finished product. In other instances, the casting of the metal will be performed by the establishment itself.

## MACHINERY, EXCEPT ELECTRICAL: MAJOR GROUP 35

Value Added by Manufacture by State: 1963

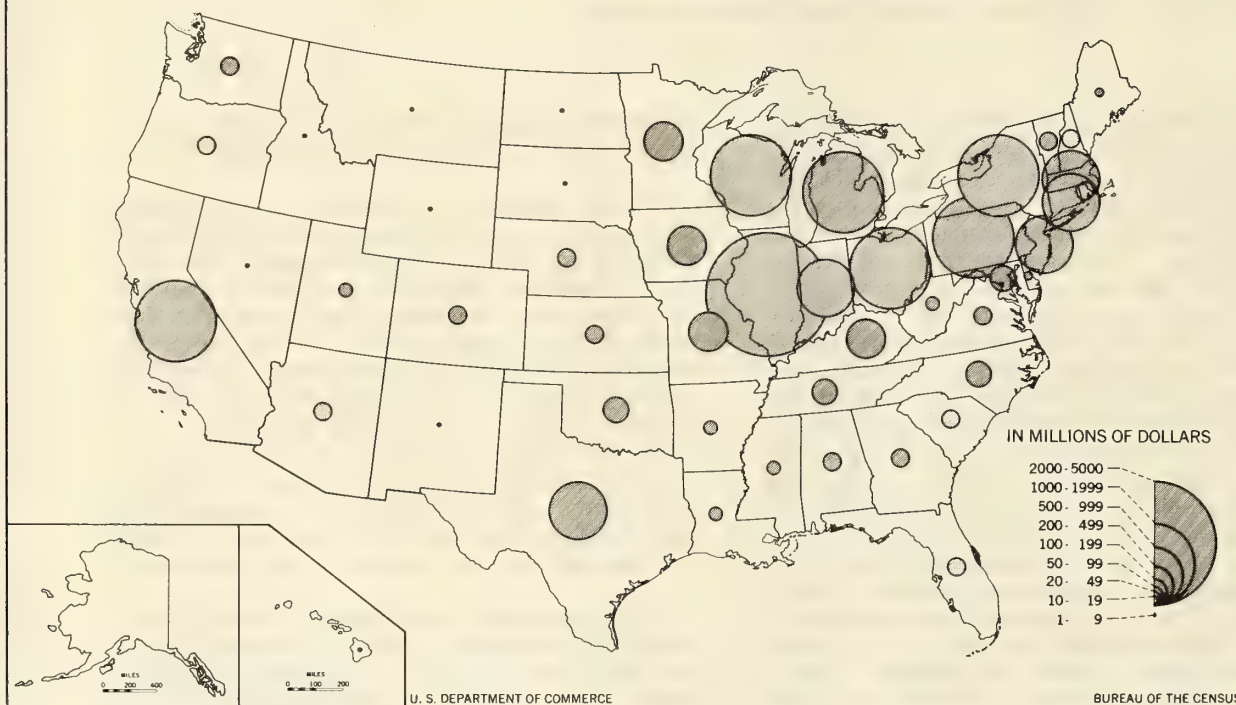

TABLE 1. General Statistics: 1963 and Earlier Years

Year and item	Establishments		All employees <sup>1</sup>		Production workers			Value added by manufacture, adjusted <sup>2</sup>	Cost of materials <sup>3</sup>	Value of shipments <sup>3</sup>	Capital expenditures, new <sup>4</sup>

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The figures for 1939 through 1963 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for 1937 is not known.

<sup>2</sup>For 1954 to 1958 represents adjusted value added. For 1953 and earlier years represents unadjusted value added. See text for more detailed explanation.

<sup>3</sup>The total value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry classification. For a more complete explanation, see Introduction.

<sup>4</sup>The figures for 1958 to 1963 include expenditures for plants under construction and not yet in operation.

<sup>5</sup>Data for number of employees at manufacturers' central administrative offices and auxiliary units are shown in this table for 1954, 1958, and 1963 and for 1949 to 1953 in annual survey of manufactures volumes. Data for such employees are not available for 1955 to 1957 and for the years prior to 1949.

<sup>6</sup>These figures represent estimates derived from a representative sample of manufac-

turing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>7</sup>The figures for 1939 to 1963 are not entirely comparable with those for 1937 because the 1937 figures (a) include data for establishments primarily engaged in the manufacture of thermostats and gauges, heat treating of steel, machine knives, and tackle blocks, and (b) exclude data for establishments primarily engaged in the manufacture of vacuum cleaners, turbo-generators and water-wheel generator sets, hair clippers for animal use, brooders, nonferrous bearings, certain industrial furnaces and ovens, time-stamps and time-recording machines, dictating machines, certain valves and fittings (except plumbers') and caulking guns. Value added by manufacture for 1939 on a basis strictly comparable with 1937 was \$1,989.6 million.

<sup>8</sup>The figures prior to 1937 are not sufficiently comparable to those for later years to be shown in this table principally because they include data for establishments primarily engaged in the manufacture of aircraft engines and in machine shop repairs.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958

Code	Industry group and geographic area	1963									1958

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

## ENGINES AND TURBINES AND FARM MACHINERY AND EQUIPMENT

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3511—Steam Engines; Steam, Gas, and Hydraulic Turbines; and Steam, Gas, and Hydraulic Turbine Generator Set Units
- 3519—Internal Combustion Engines, Not Elsewhere Classified
- 3522—Farm Machinery and Equipment

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3511—STEAM ENGINES; STEAM, GAS, AND HYDRAULIC TURBINES; AND STEAM, GAS AND HYDRAULIC TURBINE GENERATOR SET UNITS

This industry comprises establishments primarily engaged in manufacturing steam engines; steam turbines; hydraulic turbines; gas turbines, except aircraft; and complete steam, gas, and hydraulic turbine generator set units. Establishments primarily engaged in building or rebuilding locomotives are classified in industry 3741; and those manufacturing nonautomotive generators which are not part of a turbine generator set in industry 3621. For a detailed list of products of industry 3511, refer to table 6A, product codes 3511112 to 3511273.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Steam Engines and Turbines Industry totaled \$616 million. This amount included shipments of steam engines and turbines (primary products) valued at \$485 million, shipments of other products (secondary products) valued at \$88 million, and miscellaneous receipts (mainly products bought and resold) at \$43 million.

This industry's shipments of steam engines and turbines represented 85 percent of its total product shipments. The industry specialization ratio in 1958 was 78 percent. Secondary products shipped by this industry in 1963 include heat exchangers and steam condensers, over \$10 million, and speed changers, industrial high speed drives and gears, over \$5 million.

Shipments of steam engines and turbines by this industry represented 82 percent of all shipments of these products (\$589 million) by all industries. In 1958 the coverage ratio was 94 percent. Other industries shipping steam engines and turbines include industry 3722, Aircraft Engines and Parts, \$43 million; and industry 3561, Pumps and Compressors, over \$10 million.

A few of the establishments engaged in manufacturing steam engines and turbines also installed the steam engines and turbines they produced. For 1963, establishments in industry 3511 reported receipts for installation totaling \$3 million. The employment statistics for this industry include only employees attached to the manufacturing establishments and exclude local labor hired in the field for installation and erection work.

The production index for the primary products of the industry increased to 157 in 1963 from the 1958 level of 146. The unit value index for 1963 was 78 compared to 108 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3519—INTERNAL COMBUSTION ENGINES, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing diesel, semi-diesel, or other internal combustion engines, n.e.c., for stationary, marine, traction, and other uses. Establishments primarily engaged in manufacturing aircraft engines, including rocket engines, are classified in industry 3722; automotive engines except diesel in industry 3714; and engine generator sets in industry 3621. For a list of products of industry 3519, refer to table 6A, product codes 3519100 to 3519715.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Internal Combustion Engines Industry totaled \$1,474 million. This amount included shipments of internal combustion engines, n.e.c. (primary products) valued at \$1,210 million, shipments of other products (secondary products) valued at \$197 million, and miscellaneous receipts (mainly products bought and resold) at \$66 million.

This industry's shipments of internal combustion engines represented 86 percent of its total products shipments. The industry specialization ratio in 1958 was 90 percent. Secondary products shipped by this industry in 1963 include parts and accessories for passenger cars, trucks, and busses shipped to motor vehicle manufactures (\$40 million), and prime mover generator sets, except steam or hydraulic turbines (\$38 million).

Inasmuch as industry 3519 includes all establishments primarily engaged in manufacturing internal combustion engines (except automotive and aircraft), significantly different types of establishments are included. The most important difference concerns the type of engines produced. One distinct group comprises plants primarily manufacturing gasoline engines and another comprises those primarily manufacturing diesel engines. Within the first group another significant difference concerns the size of gasoline engines produced. Establishments producing small gasoline engines for power lawn mowers, garden tractors, small engine generators, pumps, etc., are included as well as plants principally producing large gasoline engines for industrial uses, large generator sets, tractors, farm equipment, etc. Establishments producing outboard motors are also included. For diesel engines, likewise, a difference exists as to size of engine produced. Certain plants produce only large diesel engines for locomotives, diesel-electric sets, etc.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent to this specialization is indicated in table 8. Approximately 48 percent of the total industry shipments are represented by plants specializing in diesel and semidiesel engines; and 18 percent in parts and attachments for internal combustion engines (except aircraft and automotive engines and gas turbines).

The coverage ratio for an individual product class may vary significantly from that for the 4-digit industry for the following product class of industry 3519, e.g., gas engines (except gas turbines), 47 percent.

Shipments of internal combustion engines by this industry represented 86 percent of all shipments of these products (\$1,414 million) by all industries. In 1958 the coverage ratio was 82 percent. Other industries shipping internal combustion engines include industry 3522, Farm Machinery and Equipment, over \$22 million; and industry 3717, Motor Vehicles and Parts, \$19 million.

Internal combustion engines are produced captively in significant quantities by establishments classified in other industries, which incorporate the engines into other products (tractors, lawn mowers, etc.) made in the same establishment. The product statistics shown in tables 6A-1 through 6A-6 include data for engines produced and incorporated into the establishments own end products as well as data for engines transferred to plants of the same company. Data on engines sold to other companies also are shown separately. These data were compiled from supplemental reports filed by manufacturers of end products incorporating engines of their own manufacture.

Product data similar to that shown in tables 6A-1 through 6A-6 have been collected and compiled annually since 1950 by the Bureau of the Census and published in Current Industrial Reports Series M35L, Internal Combustion Engines.

The production index for the primary products of the industry increased to 150 in 1963 from the 1958 level of 108. The unit value index for 1963 was 102 compared to 114 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3522—FARM MACHINERY AND EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing farm machinery, including equipment and wheel tractors, for use in the preparation and maintenance of the soil; planting and harvesting of the crop; preparing, on the farm, crops for market; or for use in performing other farm operations and processes. This industry includes wheel tractors except contractors' off-highway type which are classified in industry 3531. Establishments primarily engaged in manufacturing industrial trucks, tractors, and trailers used for handling materials in industrial plants, depots, and docks are classified in industry 3537; and farm handtools in group 342. For a detailed list of products of industry 3522, refer to table 6A, product codes 3522281 to 3522898.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Farm Machinery and Equipment Industry totaled \$2,842 million. This amount included shipments of farm machinery and equipment (primary products) valued at \$2,412 million, shipments of other products (secondary products) valued at \$308 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$122 million.

This industry's shipments of farm machinery and equipment represented 89 percent of its total product shipments. The industry specialization ratio in 1958 was 90 percent. Secondary products shipped by this industry in 1963 include scrapers, graders, rollers, and off-highway trucks, trailers, and wagons, excluding parts (\$26 million), and other transportation equipment (\$25 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the

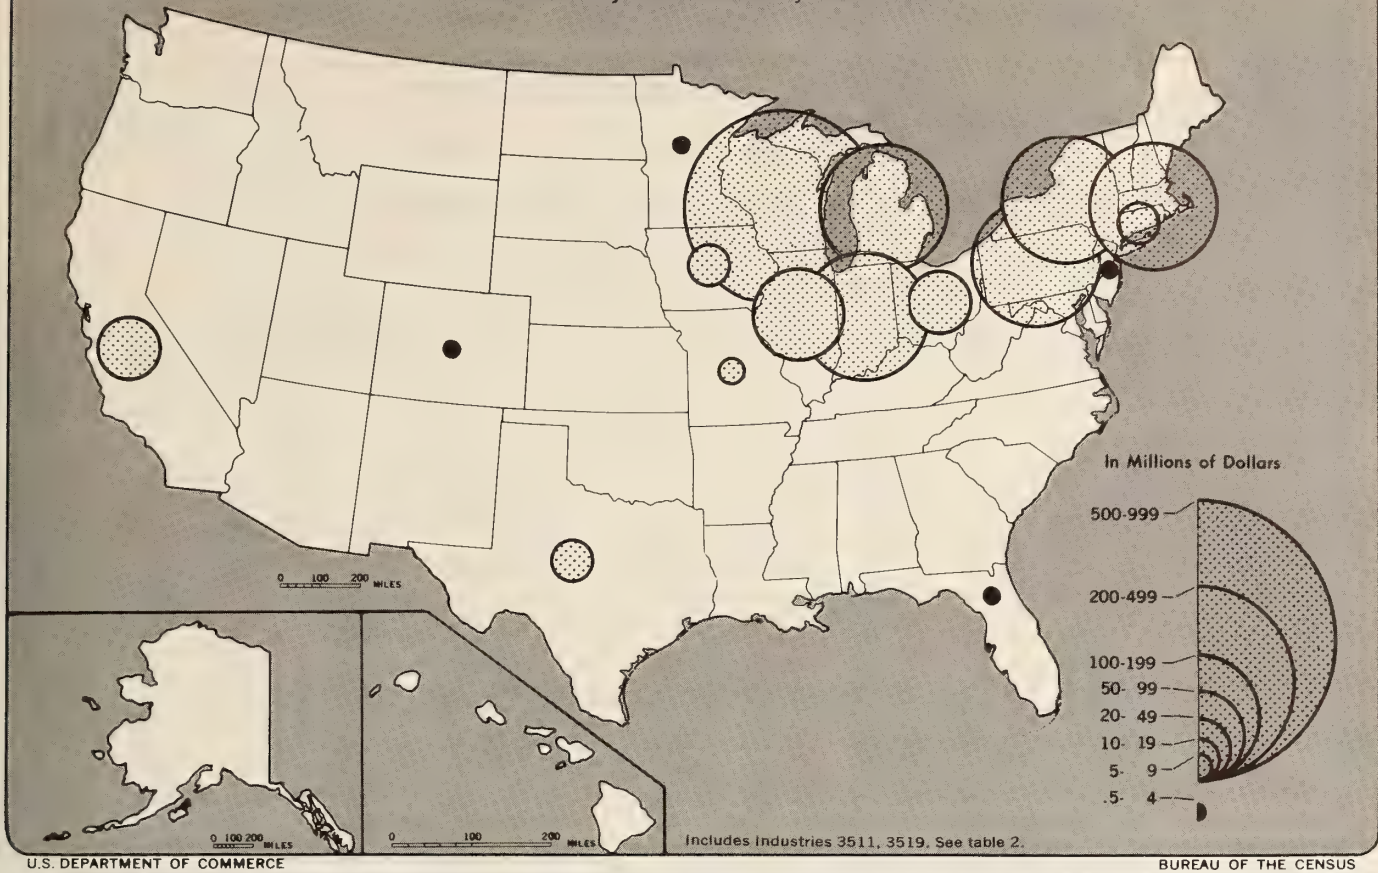

different product classes. The extent to this specialization is indicated in table 8. Approximately 32 percent of the total industry shipments are represented by plants specializing in wheel tractors and parts and attachments (except garden and contractors' off-highway); and 20 percent in harvesting machinery.

Shipments of farm machinery and equipment by this industry represented 95 percent of all shipments of these products (\$2,542 million) by all industries. In 1958 the coverage ratio was 94 percent. Other industries shipping farm machinery and equipment include industry 3717, Motor Vehicles and Parts, \$25 million; and industry 3531, Construction Machinery, over \$13 million.

Industry 3522 includes establishments producing a wide range of farm machinery and equipment including not only wheel tractors and equipment for raising and harvesting crops but also such other equipment as dairy equipment (milking machines, cream separators, etc.), poultry equipment (incubators, brooders, etc.), barn and barnyard equipment (barn cleaners, stock tanks, etc.), and machines for preparing crops for market (corn shellers, feed grinders, etc.).

Inasmuch as industry 3522 covers such a wide range of products, the operations of the plants classified in this industry differ in some respects. Those plants engaged in manufacturing wheel tractors and self-propelled equipment such as combines, corn pickers, hay balers, etc., and to a lesser extent those manufacturing equipment for mounting on tractors or to be drawn by tractors, include large assembly operations in addition to the processes and operations involved in manufacturing the component parts. Also included within this industry are plants whose operations are largely limited to metal fabricating such as those primarily engaged in producing cattle stalls, animal stock tanks, poultry brooders, etc.

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: **All employees:** For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. **Cost of materials:** Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. **Value of shipments:** Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>2</sup>A revision in the definition of this industry was made in the 1957 Standard Industrial Classification so that data for the industry are not available for earlier years.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State. SIC 351-, Engines and Turbines, total: New England—New Hampshire, 1 (1-19); Massachusetts, 6 (8,198); Rhode Island, 1 (1-19); Connecticut, 6 (1,000-2,499); Middle Atlantic—New York, 10 (7,551); Pennsylvania, 8 (16,078); East North Central—Ohio, 8 (2,282); Indiana, 6 (5,994); West North Central—Minnesota, 6 (693); Iowa, 5 (1,000-2,499); Missouri, 6 (250-499); South Atlantic—North Carolina, 1 (1-19); Georgia, 2 (1-19); Florida, 6 (20-99); East South Central—Tennessee, 1 (1-19); West South Central—Louisiana, 1 (20-99); Oklahoma, 1 (1-19); Texas, 4 (465); Mountain—Colorado, 1 (100-249); Pacific—Washington, 3 (20-99); Oregon, 1 (20-99); California, 21 (2,500-4,999).

SIC 3511, Steam Engines and Turbines: New England—Massachusetts, 4 (5,000-9,999); Middle Atlantic—New York, 3 (6,246); Pennsylvania, 6 (10,000 and over); East North Central—Ohio, 1 (20-99); Wisconsin, 1 (1,000-2,499); West North Central—Iowa, 1 (100-249); South Atlantic—Florida, 1 (20-99); Pacific—California, 2 (1,000-2,499);

SIC 3519, Internal Combustion Engines: New England—New Hampshire, 1 (1-19); Massachusetts, 2 (1,000-2,499); Rhode Island, 1 (1-19); Connecticut, 3 (1,000-2,499); Middle Atlantic—New York, 6 (1,305); Pennsylvania, 2 (1,000-2,499); East North Central—Ohio, 7 (1,000-2,499); Indiana, 6 (5,994); Wisconsin, 21 (10,000 and over); West North Central—Minnesota, 6 (693); Iowa, 4 (1,000-2,499); Missouri, 6 (250-499); South Atlantic—North Carolina, 1 (1-19); Georgia, 2 (1-19); Florida, 5 (20-99); East South Central—Tennessee, 1 (1-19); West South Central—Louisiana, 1 (20-99); Oklahoma, 1 (1-19); Texas, 4 (465); Mountain—Colorado, 1 (100-249); Pacific—Washington, 3 (20-99); Oregon, 1 (20-99).

SIC 3522, Farm Machinery and Equipment: New England—Maine, 8 (20-99); New Hampshire, 1 (1-19); Vermont, 4 (20-99); Massachusetts, 7 (20-99); Rhode Island, 1 (1-19); Connecticut, 7 (20-99); Middle Atlantic—New York, 36 (1,940); Pennsylvania, 35 (2,952); South Atlantic—Delaware, 2 (20-99); Maryland, 2 (20-99); West Virginia, 1 (250-499); South Carolina, 7 (100); East South Central—Kentucky, 11 (4,090); Mountain—Montana, 8 (20-99); New Mexico, 3 (1-19); Pacific—Oregon, 19 (250-499); Hawaii, 1 (20-99);

<sup>2</sup>This State or region was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

<sup>1</sup>Includes capital expenditures of approximately \$2-\$5 million for plants under construction but not in operation.

TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(D)	(D)	(D)	(D)	Col. B Col. A (percent)	(D)	(D)	(D)	Col. B Col. F (percent)
		A	B	C	D	E	F	G	H	I
3511	Steam engines and turbines.....1963..	616,416	485,475	87,703	43,238	85	589,101	485,475	103,626	82

Note: See Introduction for an explanation of terms used.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

<sup>1</sup>Of this total, 27 had a rated capacity of 24,999 hp. or under and 51 had a capacity of 25,000 hp. or over.

<sup>2</sup>For 1958, the 456 units shipped had a rated horsepower capacity as follows: 20-199 hp., 96; 200-499 hp., 59; 500-999 hp., 218; and 1,000 hp. and over, 83. Comparable data for 1963 are not available.

<sup>3</sup>Includes the value of gears.

<sup>4</sup>For these products, figures were also collected in the Bureau of the Census commodity survey program. In lieu of asking for detailed statistics on these products in the census of manufactures, respondents were asked to report only value of shipments for specified groups of products for which separate figures had previously been collected in the commodity survey. In most cases, the value figures reported in the census of manufactures for each group of products agreed closely with the corresponding figures reported in the commodity survey. However, there were minor differences between the census figures and the commodity survey figures. These variations were due primarily to the following reasons:

- Better coverage in census of manufactures program. Coverage in the annual surveys will be supplemented by adding respondents not currently in the survey but making the specified product according to their census of manufactures report.
- Use of different reporting periods (calendar year vs. fiscal year).
- Use of estimates in reporting figures on the commodity survey, whereas census of manufactures figures generally represent more exact shipment figures.

See tables 6A-1 to 6A-7 for more detailed product data.

<sup>5</sup>Dual-fuel engines shipped in 1958 were included with diesel and semidiesel (except automotive).

<sup>6</sup>Includes dual-fuel engines.

Source: Current Industrial Reports Series M35L, Internal Combustion Engines.

<sup>1</sup>Represents total number of engines shipped or produced and incorporated into products at the same establishment.

<sup>2</sup>These values are limited to engines shipped to other companies and therefore differ from values shown in table 1 which also include the values for engines shipped as interplant transfers.

<sup>3</sup>Includes number of engines transferred to other plants of the same company and the number of engines produced and incorporated (in the same plant) into products such as construction machinery, farm machinery, tractors, engine generator sets, and other products.

<sup>4</sup>It is likely that these figures are understated since shipments of gasoline-driven generator sets totaled 53,296 in 1963 and 51,383 in 1962. (See Current Industrial Reports Series M36H, Motors and Generators.) Some gasoline engines for eventual use in generator sets have apparently been reported as utilities, marine, government, or research.

<sup>5</sup>Over 95 percent of these engines produced were reported for use on farm machinery (agricultural tractors, combines, etc.).

<sup>6</sup>Over 90 percent of these engines were reported for general industrial use.

<sup>7</sup>Data for a few engines shipped as interplant transfers have been included with shipments to other companies to avoid disclosing figures for individual companies.

Note: The Census product codes shown in parentheses associated with product groups represent those codes used in the 1963 Census of Manufactures and correspond to those Census product codes in table 6A. Other 7-digit product codes represent those used in Current Industrial Reports M35A or M35S for 1963.

Source: Current Industrial Reports Series M35S, Tractors (product codes 3522203-23); and Current Industrial Reports Series M35A, Farm Machinery and Equipment (product codes 3522311-3522998).

Standard Notes: - Represents zero. (NA) Not available. (X) Not applicable.

(D) Withheld to avoid disclosing figures for individual companies. Data for these products for 1963 only are included in the totals. Where applicable both quantity and value of export shipments have been combined with domestic shipments.

(S) Pipeline milker units data suppressed due to incomplete coverage.

<sup>1</sup>The horsepower rating for these tractors are based on the corrected maximum belt or P.T.O. horsepower.

<sup>2</sup>Data are limited to attachments and parts shipped by companies manufacturing complete tractors.

<sup>3</sup>The total export figures for 1958 reflect only the sum of publishable products and, therefore, exclude data withheld to avoid disclosing figures of individual companies. Total domestic figures for 1958 include all domestic shipments and, also, include those export figures withheld to avoid disclosing figures of individual companies.

<sup>4</sup>Excludes pipeline milker units.

<sup>5</sup>Data for cream separators capacity 500 pounds or less per hour included with parts and attachments.

<sup>6</sup>Effective with 1963 respondents were requested to use the following definition for reporting: "Garden tractors are defined as tractors weighing less than 1,200 pounds (basic machine), typically powered by air-cooled engines with fewer than four cylinders and total piston displacement of under 45 cubic inches. Such tractors are further distinguished from farm tractors in that they usually carry an engine horsepower rating but not a belt horsepower rating." The 1958 reference list for Form MA35A carried no definition of garden tractors.

<sup>7</sup>Data for drawn corn and cotton type cultivators included with other cultivators and weedeers.

<sup>8</sup>Excludes value of stanchions shipped with stalls.

	.....1958..	179	116
352--	Farm machinery and equipment.....1963..	( <sup>3</sup> )	( <sup>3</sup> )
	.....1958..	( <sup>3</sup> )	( <sup>3</sup> )

<sup>1</sup>Indexes based on horsepower and kilowatt capacity quantities rather than on number of units. Marine steam turbines have been excluded from the computation of unit value but their shipments are reflected in the production index.

<sup>2</sup>These indexes are based on piston size (displacement) quantities rather than on number of engines. The 4-digit (industry) level of production for the products of 3519 has been adjusted to include product class 35197 (parts and accessories for internal combustion engines) as well as product class 35196 (other internal combustion engines).

<sup>3</sup>Indexes for this group (primary products of industry 3522) are not shown pending further review of quantity and related shipments data.

TABLE 6C. **Product Classes—Value Shipped by All Manufacturing Establishments:**  
1947, 1954, 1958 to 1963

(In thousands of dollars)

35220	Farm machinery and equipment, n.s.k.....	71,458	-	(3,339)	(2,456)	(2,010)	34,706	-	-

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>These figures represent the sum of 5-digit product class data obtained from Current Industrial Reports and from the census of manufactures or the annual survey of manufactures.

<sup>3</sup>Source for these data are as listed below:

35191 } Current Industrial Reports Series M35L  
35193 }

35223, }  
4, 5, } Current Industrial Reports Series M35A  
6 }

<sup>4</sup>Excludes value of parts sold to other plants producing wheel tractors.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

Other fuels.....do....	(S)	229	1,594
Electric energy:			
Purchased:			
Quantity.....million kw.-hrs..	315	430	682
Cost.....\$1,000..	3,291	5,523	9,524
Generated less sold.....million kw.-hrs..	377	66	255
Aggregate horsepower of prime movers and electric motors driven by purchased energy (December 31), total.....1,000 hp..	374	363	669
Prime movers, total.....do....	164	67	186
Driving generators.....do....	127	36	104
Not driving generators.....do....	37	31	82
Electric motors, total.....do....	276	366	607
Driven by purchased energy.....do....	209	296	483
Driven by energy generated at establishment.....do....	67	70	124
Aggregate horsepower per 100 production workers.....	1,772	912	867

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

TABLE 9. Establishments and Production Workers for Selected Metalworking Operations: 1963—Continued

Metalworking operations	Number of establishments				Employment in the specified operation			
	Total	Number of production workers <sup>1</sup>			Total	Number of production workers <sup>1</sup>		
		1 to 4	5 to 19	20 or more		1 to 4	5 to 19	20 or more
	INDUSTRY 3522.—FARM MACHINERY AND EQUIPMENT—Continued							
Plate or structural fabrication.....	263	113	110	40	2,741	225	1,049	1,467
Stamping, blanking and forming of metals.....	437	204	158	75	6,484	375	1,545	4,564
Painting, lacquering and enameling on metals.....	546	437	81	28	2,472	685	762	1,025
Assembly of product.....	545	216	184	145	15,696	394	1,707	13,595
Shipping department, including packing and crating...	538	388	112	38	3,822	695	968	2,159

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Industry		
	3511	3519	3522
Total number of establishments in the industry.....	22	143	1,568
Number of establishments which reported one or more of the specified operations.....	20	95	711
Percent of industry production workers in these establishments.....	90-95	90-95	85-90
Number of establishments which reported "none" of the operations apply.....	1	2	23
Percent of industry production workers in these establishments.....	0-5	0-5	0-5
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	95-100	95-100	90-95

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## CONSTRUCTION, MINING AND MATERIALS HANDLING MACHINERY AND EQUIPMENT

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3531—Construction Machinery and Equipment
- 3532—Mining Machinery and Equipment, Except Oil Field Machinery and Equipment
- 3533—Oil Field Machinery and Equipment
- 3534—Elevators and Moving Stairways
- 3535—Conveyors and Conveying Equipment
- 3536—Hoists, Industrial Cranes, and Monorail Systems
- 3537—Industrial Trucks, Tractors, Trailers, and Stackers

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3531—CONSTRUCTION MACHINERY AND EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing heavy machinery and equipment used by the construction industries, such as bulldozers; concrete mixers; cranes, except industrial plant; dredging machinery; pavers, and power shovels. Establishments primarily engaged in manufacturing mining equipment are classified in industry 3532, and well drilling machinery in industry 3533. For a detailed list of products of industry 3531, refer to table 6A, product codes 3531103 to 3531998.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Construction Machinery Industry totaled \$2,696 million. This amount included shipments of construction machinery (primary products) valued at \$2,332 million, shipments of other products (secondary products) valued at \$229 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$134 million.

This industry's shipments of construction machinery represented 91 percent of its total product shipments. The industry specialization ratio in 1958 was 89 percent. Secondary products shipped by this industry in 1963 include farm machinery and equipment (\$20 million) and motor vehicles and parts (\$15 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 21 percent of the total industry shipments are represented by plants specializing in scrapers, graders, rollers, and off-highway trucks, trailers, and wagons, excluding parts; and 20 percent in power cranes, draglines, shovels, and parts.

Shipments of construction machinery by this industry represented 89 percent of all shipments of these products (\$2,624 million) by all industries. In 1958 the coverage ratio was 90 percent.

The plants included in industry 3531 are, for the most part, typical of the heavy equipment industries. Their primary operations involve the fabricating of heavy materials (steel bars, plates and structural shapes) and the assembly of the complete machinery and equipment. Because of the wide range of construction equipment included within this industry, significantly different types of plants are involved. Those plants with a product line limited to the production of equipment for mounting on tractors or to the manufacture of draglines, buckets, and repair parts for construction machinery, etc., differ in at least one important respect from those plants producing complete machines, such as power cranes and shovels, motor graders, concrete mixers, pavers, and asphalt plants. In the first instance the operations are confined mostly to fabricating with only limited assembly operations being involved. The plants producing complete machines, however, involve extensive assembly operations in addition to such primary production activities as foundry, forging, and plate and structural fabricating operations.

An indication of the types of metalworking operations performed by all establishments classified in industry 3531 is shown in table 9. This table presents data on the number of plants performing selected metalworking operations and the approximate size of these operations based on employment.

#### 3532—MINING MACHINERY AND EQUIPMENT, EXCEPT OIL FIELD MACHINERY AND EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing heavy machinery and equipment used by the mining industries, such as coal breakers, mine cars, mineral cleaning machinery, concentration machinery, core drills, coal cutters, portable rock drills, and rock crushing machinery. Establishments primarily engaged in manufacturing construction machinery are classified in industry 3531, well drilling machinery in industry 3533, and coal and ore conveyors in industry 3535. For a detailed list of products of industry 3532, refer to table 6A, product codes 3532113 to 3532475.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Mining Machinery and Equipment Industry totaled \$418 million. This amount included shipments of mining machinery (primary products) valued at \$274 million, shipments of other products (secondary products) valued at \$92 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$51 million.

This industry's shipments of mining machinery represented 75 percent of its total product shipments. The industry specialization ratio in 1958 was 72 percent. Secondary products shipped by this industry in 1963 include conveyors and conveying equipment (\$6 million) and hoists (\$3 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 43 percent of total industry shipments are represented by plants specializing in parts and attachments for mining machinery, and 29 percent in underground mining machinery.

Shipments of mining machinery and equipment by this industry represented 82 percent of all shipments of these products (\$336 million) by all industries. In 1958 the coverage ratio was 78 percent. Industry 3545, Machine Tool Accessories, shipped \$8 million of mining machinery and equipment.

### 3533—OIL FIELD MACHINERY AND EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing machinery and equipment for use in oil and gas fields, or for drilling water wells. For a detailed list of products of industry 3533, refer to table 6A, product codes 3533111 to 3533431.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Oil Field Machinery Industry totaled \$667 million. This amount included shipments of oil field machinery (primary products) valued at \$519 million, shipments of other products (secondary products) valued at \$59 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$88 million.

This industry's shipments of oil field machinery represented 90 percent of its total product shipments. The industry specialization ratio in 1958 was 92 percent. Secondary products shipped by this industry in 1963 include pumps and compressors (\$11 million) and construction machinery (\$5 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 48 percent of the total industry shipments are represented by plants specializing in oil and gas field production machinery, and 37 percent in rotary oil and gas field drilling machines.

Shipments of oil field machinery by this industry represented 91 percent of all shipments of these products (\$573 million) by all industries. In 1958 the coverage ratio was 94 percent.

It should be noted that industry 3533 includes only manufacturing plants engaged in the production of oil field machinery and equipment. Establishments primarily engaged in exploration, drilling, and well operation and maintenance are covered in the 1963 Census of Mineral Industries. In those instances where manufacturing plants were operated by companies primarily engaged in such nonmanufacturing activities as servicing and supplying the petroleum industry, separate establishment reports were obtained covering their manufacturing activities and such activities are included in industry 3533.

As shown in table 2, the plants classified in this industry are concentrated in or near the petroleum producing areas. Of the 408 plants classified in this industry, 315 plants are located in Texas, California, and Oklahoma.

### 3534—ELEVATORS AND MOVING STAIRWAYS

This industry comprises establishments primarily engaged in manufacturing passenger or freight elevators, automobile lifts, dumb waiters, and moving stairways. Establishments primarily engaged in manufacturing commercial conveyors systems and equipment are classified in industry 3535, and farm elevators in industry 3522. For a detailed list of products of industry 3534, refer to table 6A, product codes 3534011 to 3534097.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Some establishments classified in industry 3534 installed elevators and escalators which they produced in 1963. When the product was installed or erected by the regular labor force operating out of the manufacturing plant, the employment and payroll as well as the receipts for installation services are included in the statistics. However, if this equipment was installed or erected by a labor force separate from the regular force attached to the manufacturing plant, the installation costs and the income from installation were excluded from the report. The data in such instances include the engineering and supervising personnel on the regular plant payroll who were engaged in installing or testing the products. Where the installation was performed by a separate company, even though the services of that separate company may have been contracted for by the manufacturing plant, the installation costs and the receipts for installation were excluded from the report of the manufacturing plant.

Value of shipments and other receipts of the Elevators and Moving Stairways Industry totaled \$319 million. This amount included shipments of elevators and moving stairways (primary products) valued at \$235 million, shipments of other products (secondary products) valued at \$8 million, and miscellaneous receipts (mainly receipts for installation) at \$75 million.

This industry's shipments of elevators and moving stairways represented 97 percent of its total product shipments. The industry specialization ratio in 1958 was also 97 percent.

Shipments of elevators and moving stairways by this industry represented 95 percent of all shipments of these products (\$248 million) by all industries. In 1958 the coverage ratio was 80 percent.

The production index for the primary products of the industry increased to 173 in 1963 from the 1958 level of 109. The unit value index for 1963 was 111 compared to 118 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3535—CONVEYORS AND CONVEYING EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing conveyors and conveying equipment for installation in factories, warehouses, mines, and other industrial and commercial establishments. Establishments primarily engaged in manufacturing passenger or freight elevators, dumb waiters, and moving stairways are classified in industry 3534, and overhead traveling cranes and monorail systems in industry 3536. For a detailed list of products of industry 3535, refer to table 6A, product codes 3535111 to 3535211.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Some establishments classified in industry 3535, installed conveyors and conveying equipment they produced in 1963. The procedure described above for industry 3534

concerning the reporting of installation employees and receipts was also followed for establishments producing conveyors and conveying equipment.

Value of shipments and other receipts of the Conveyors Industry totaled \$495 million. This amount included shipments of conveyors (primary products) valued at \$342 million, shipments of other products (secondary products) valued at \$78 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$74 million.

This industry's shipments of conveyors represented 82 percent of its total product shipments. The industry specialization ratio in 1958 was 81 percent. Secondary products shipped by this industry in 1963 include general industry machinery, n.e.c. (\$6 million), and special industry machinery (\$5 million).

Shipments of conveyors by this industry represented 83 percent of all shipments of these products (\$415 million) by all industries. In 1958 the coverage ratio was 78 percent. Other industries shipping conveyors include industry 3566, Power Transmission Equipment, \$17 million, and industry 3531, Construction Machinery, \$8 million.

### 3536—HOISTS, INDUSTRIAL CRANES, AND MONORAIL SYSTEMS

This industry comprises establishments primarily engaged in manufacturing overhead traveling cranes, hoists, and monorail systems for installation in factories, warehouses, and other industrial and commercial establishments. For a detailed list of products of industry 3536, refer to table 6A, product codes 3536112 to 3536255.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Some establishments classified in industry 3536 installed hoists, cranes, and monorail systems they produced in 1963. The procedure described above for industry 3534 concerning the reporting of installation employees and receipts was also followed for establishments producing hoists, cranes, and monorail systems.

Value of shipments and other receipts of the Hoists, Cranes, and Monorails Industry totaled \$220 million. This amount included shipments of hoists, cranes, and monorail systems (primary products) valued at \$157 million, shipments of other products (secondary products) valued at \$40 million, and miscellaneous receipts (mainly receipts for repair work) at \$23 million.

This industry's shipments of hoists, cranes, and monorail systems represented 80 percent of its total product shipments. The industry specialization ratio in 1958 was 79 percent. Secondary products shipped by this industry in 1963 include construction machinery (\$7 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 64 percent of the total industry shipments are represented by plants specializing in overhead traveling cranes and monorail systems, and 35 percent in hoists.

Shipments of hoists, cranes, and monorail systems by this industry represented 70 percent of all shipments of these products (\$224 million) by all industries. In 1958 the coverage ratio was 78 percent. Industry 3531, Construction Machinery, accounted for \$12 million of shipments of hoists.

The production index for the primary products of the industry increased to 142 in 1963 from the 1958 level of 84. The unit value index for 1963 was 97 compared to 124 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3537—INDUSTRIAL TRUCKS, TRACTORS, TRAILERS, AND STACKERS

This industry comprises establishments primarily engaged in manufacturing industrial trucks, tractors, trailers, stackers (truck type), and related equipment, used for handling materials on floors and paved surfaces in and around industrial and commercial plants, depots, docks, and terminals. Establishments primarily engaged in manufacturing motor vehicles and motor vehicle type trailers are classified in Group 371; farm type wheel tractors in industry 3522; wheel tractor shovel loaders, tracklaying tractors in industry 3531; and wood pallets and skids in industry 2499. For a detailed list of products of industry 3537, refer to table 6A, product codes 3537011 to 3537081.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Industrial Trucks and Tractors Industry totaled \$447 million. This amount included shipments of industrial trucks and tractors (primary products) valued at \$370 million, shipments of other products (secondary products) valued at \$43 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$33 million.

This industry's shipments of industrial trucks and tractors represented 90 percent of its total product shipments. The industry specialization ratio in 1958 was 93 percent. Secondary products shipped by this industry in 1963 include "other hardware" (\$6 million).

Shipments of industrial trucks and tractors by this industry represented 81 percent of all shipments of these products (\$459 million) by all industries. In 1958 the coverage ratio was 84 percent. Other industries shipping industrial trucks and tractors include industry 3717, Motor Vehicles and Parts, \$26 million, and industry 3531, Construction Machinery, \$8 million.

# CONSTRUCTION AND LIKE EQUIPMENT: SIC 353

## Value Added by Manufacture by State: 1963

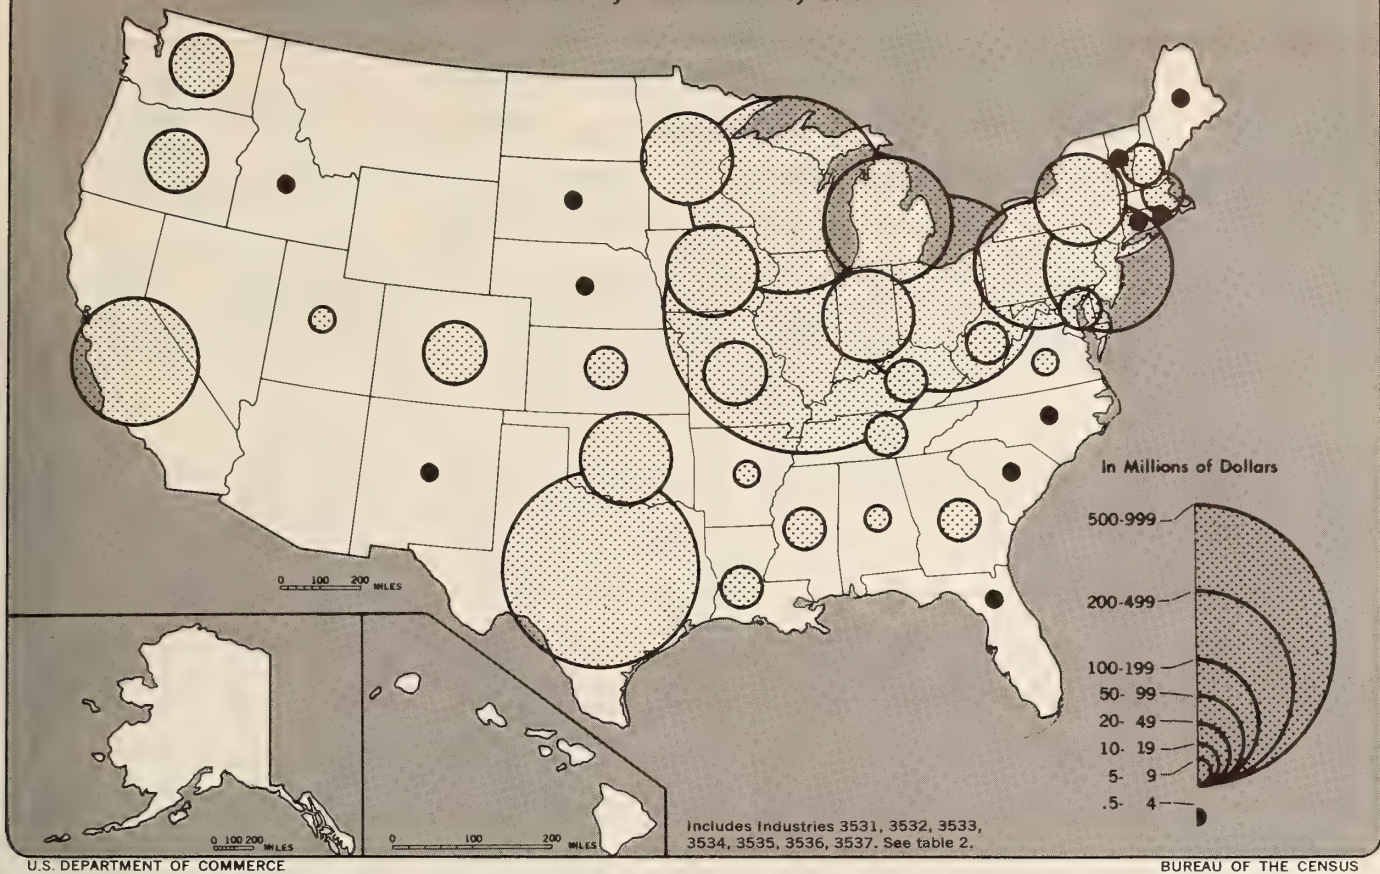

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies	Establishments		All employees		Production workers			Value added by manufacture, adjusted	Cost of materials	Value of shipments	Capital expend- itures, new	Spec- ial- ization ratio (per- cent)	Cov- erage ratio (per- cent)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: **All employees:** For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. **Cost of materials:** Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. **Value of shipments:** Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>No comparable figures are available for earlier years.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3531, Construction Machinery: New England—Maine, 3 (250-499); Vermont, 1 (20-99); Rhode Island, 2 (20-99); Connecticut, 4 (1-19); South Atlantic—Delaware, 2 (1-19); Maryland, 1 (100-249); Virginia, 6 (20-99); West Virginia, 2 (1-19); North Carolina, 5 (20-99); South Carolina, 2 (1-19); Georgia, 5 (749); Florida, 5 (20-99); East South Central—Kentucky, 2 (1-19); Tennessee, 5 (100-249); Alabama, 6 (379); Mississippi, 2 (100-249); West South Central—Arkansas, 1 (1-19); Louisiana, 2 (250-499); Oklahoma, 16 (1,397); Mountain—Montana, 1 (1-19); Idaho, 3 (20-99); Wyoming, 1 (1-19); Colorado, 9 (175); New Mexico, 1 (1-19); Utah, 3 (948); Nevada, 2 (1-19).

SIC 3532, Mining Machinery and Equipment: New England—Maine, 1 (20-99); New Hampshire, 1 (500-999); Massachusetts, 1 (1-19); Connecticut, 1 (20-99); Middle Atlantic—New York, 4 (20-99); New Jersey, 2 (500-999); East North Central—Indiana, 4 (155); Michigan, 6 (312); West North Central—Minnesota, 4 (100-249); Iowa, 4 (430); Kansas, 2 (250-499); South Atlantic—Virginia, 9 (100-249); North Carolina, 2 (20-99); East South Central—Kentucky, 5 (20-99); Tennessee, 1 (100-249); Alabama, 1 (20-99); West South Central—Oklahoma, 4 (20-99); Texas, 8 (20-99); Mountain—Idaho, 1 (1-19); New Mexico, 1 (1-19); Arizona, 1 (1-19); Utah, 3 (20-99); Pacific—Washington, 5 (20-99); Oregon, 4 (20-99).

SIC 3533, Oil Field Machinery: New England—Massachusetts, 2 (20-99); Connecticut, 1 (1-19); Middle Atlantic—New York, 2 (20-99); New Jersey, 2 (20-99); East North Central—Indiana, 4 (20-99); Illinois, 4 (174); Michigan, 3 (1-19); Wisconsin, 1 (20-99); West North Central—Minnesota, 2 (20-99); Iowa, 1 (1-19); Missouri, 1 (1-19); North Dakota, 1 (1-19); Kansas, 7 (399); South Atlantic—West Virginia, 4 (20-99); South Carolina, 1 (1-19); Florida, 1 (20-99); East South Central—Kentucky, 1 (1-19); Tennessee, 2 (1-19); Mississippi, 3 (250-499); West South Central—Arkansas, 3 (1-19); Mountain—Wyoming, 5 (1-19); Colorado, 2 (100-249); New Mexico, 4 (20-99); Utah, 2 (250-499); Pacific—Washington, 1 (20-99); California, 64 (2,500-4,999).

SIC 3534, Elevators and Moving Stairways: New England—Massachusetts, 6 (250-499); Rhode Island, 1 (1-19); Connecticut, 1 (20-99); Middle Atlantic—New York, 18 (2,500-4,999); New Jersey, 3 (2,500-4,999); East North Central—Illinois, 14 (727); Michigan, 5 (20-99); Wisconsin, 6 (197); West North Central—Iowa, 1 (1-19); Missouri, 4 (20-99); North Dakota, 1 (1-19); Kansas, 1 (1-19); South Atlantic—Maryland, 4 (359); Virginia, 2 (20-99); West Virginia, 1 (1-19); North Carolina, 1 (20-99); Georgia, 1 (100-249); Florida, 1 (20-99); East South Central—Kentucky, 3 (282); Tennessee, 1 (250-499); Alabama, 1 (1-19); Mississippi, 1 (20-99); West South Central—Texas, 2 (100-249); Mountain—Colorado, 1 (1-19); Arizona, 1 (1-19); Pacific—Washington, 3 (20-99); Oregon, 2 (20-99).

SIC 3535, Conveyors: New England—Rhode Island, 3 (20-99); Connecticut, 2 (1-19); West North Central—South Dakota, 2 (100-249); Nebraska, 5 (20-99); Kansas, 4 (373); South Atlantic—Maryland, 3 (20-99); Virginia, 3 (20-99); West Virginia, 3 (224); South Carolina, 3 (134); Georgia, 4 (232); Florida, 3 (20-99); East South Central—Tennessee, 4 (284); Alabama, 4 (100-249); Mississippi, 2 (100-249); West South Central—Arkansas, 5 (20-99); Oklahoma, 5 (20-99); Mountain—Idaho, 1 (20-99); Colorado, 8 (20-99); Utah, 1 (1-19); Pacific—Oregon, 5 (20-99).

SIC 3536, Hoists, Cranes and Monorails: New England—Massachusetts, 2 (20-99); Connecticut, 2 (20-99); East North Central—Indiana, 3 (20-99); Wisconsin, 5 (250-499); West North Central—Minnesota, 1 (100-249); Iowa, 5 (250-499); Kansas, 1 (1-19); South Atlantic—Florida, 1 (1-19); East South Central—Kentucky, 2 (20-99); Tennessee, 1 (100-249); Mississippi, 1 (1-19); West South Central—Arkansas, 1 (250-499); Oklahoma, 2 (20-99); Mountain—Colorado, 4 (20-99); Pacific—Oregon, 2 (20-99); California, 23 (250-499).

SIC 3537, Industrial Trucks and Tractors: New England—Massachusetts, 5 (769); Rhode Island, 1 (1-19); Connecticut, 4 (100-249); West North Central—Missouri, 9 (130); North Dakota, 1 (1-19); Kansas, 4 (20-99); South Atlantic—Maryland, 2 (1-19); Virginia, 1 (20-99); West Virginia, 1 (1-19); North Carolina, 3 (20-99); South Carolina, 2 (20-99); Florida, 6 (20-99); East South Central—Kentucky, 3 (20-99); Alabama, 5 (20-99); Mississippi, 1 (250-499); West South Central—Arkansas, 2 (1-19); Louisiana, 1 (1-19); Oklahoma, 2 (20-99); Mountain—Montana, 1 (1-19); Idaho, 1 (1-19); Colorado, 1 (1-19); Utah, 1 (1-19); Pacific—Washington, 1 (20-99); Hawaii, 1 (1-19).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

TABLE 3. Detailed Statistics: 1963

Item	Construction machinery (SIC 3531)	Mining machinery and equipment (SIC 3532)	Oil field machinery (SIC 3533)	Elevators and moving stairways (SIC 3534)	Conveyors (SIC 3535)	Hoists, cranes, and monorails (SIC 3536)	Industrial trucks and tractors (SIC 3537)

Salaries and wages/Adjusted value added.....	.53	.51	.46	.44	.52	.57	.47

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

<sup>1</sup>Includes capital expenditures for plants under construction but not in operation which constitute \$50-\$100 thousand of the total for the size class.<sup>2</sup>Includes capital expenditures for plants under construction but not in operation which constitute \$20-\$50 thousand of the total for the size class.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B+C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)

NOTE: See Introduction for an explanation of terms used.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Prod. class code	Class of products and miscellaneous receipts	All industries	Construction machinery (SIC 3531)	Other industries
<b>CONSTRUCTION MACHINERY INDUSTRY</b>

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Industry 3522, Farm Machinery and Equipment, had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies.

<sup>2</sup>Includes \$11.1 million shipped by industry 3522, Farm Machinery and Equipment, and \$5.7 million by industry 3537, Industrial Trucks and Tractors. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3321, Gray Iron Foundries; 3519, Internal Combustion Engines; and 3717, Motor Vehicles and Parts.

<sup>3</sup>Includes \$8.2 million shipped by industry 3731, Ship Building and Repairing. In addition, the following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3717, Motor Vehicles and Parts.

<sup>4</sup>Industry 3561, Pumps and Compressors, had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies.

<sup>5</sup>Includes \$26.1 million shipped by industry 3522, Farm Machinery and Equipment, and \$13.5 million by industry 3717, Motor Vehicles and Parts. In addition, the following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3537, Industrial Trucks and Tractors.

<sup>6</sup>Includes \$10.9 million shipped by industry 3522, Farm Machinery and Equipment; \$31.4 million by industry 3532, Mining Machinery and Equipment; \$4 million by industry 3533, Oil Field Machinery; \$5.1 million by industry 3536, Hoists, Cranes, and Monorails; \$2.9 million by industry 3561, Pumps and Compressors; and \$5.3 million by industry 3717, Motor Vehicles and Parts. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3537, Industrial Trucks and Tractors, and 3742, Railroad and Street Cars.

<sup>7</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing figures for individual companies: 33911, Drop, upset and press steel forgings (closed die); 34336, Other heating equipment (except electric) and parts for nonelectric heating equipment; 34493, Miscellaneous metal building materials and curtain wall; 35192, Diesel and semidiesel engines; 35197, Parts and accessories for internal combustion engines; 35333, Oil and gas field production machinery and equipment (except pumps); 35334, Other oil and gas field machinery and tools (except pumps), including water wells; 35419, Parts for metal cutting type machine tools sold separately, and rebuilt machine tools; 35522, Parts and attachments for textile machinery; 35531, Woodworking machinery (except machinery designed primarily for home workshops, garages, and service shops), including parts, attachments, and accessories; and 37150, Truck trailers.

<sup>8</sup>Includes \$8 million shipped by industry 3545, Machine Tool Accessories. In addition, the following industry has shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3533, Oil Field Machinery.

<sup>9</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing figures for individual companies: 34814, Ferrous wire cloth and other woven ferrous wire products not produced by wire drainers; 35197, Parts and accessories for internal combustion engines; 35362, Overhead traveling cranes and monorail systems; 35513, Other industrial food products machinery, including parts and attachments for all types of industrial food products machinery; 35595, Other special industry machinery and equipment; 35663, Other mechanical power transmission equipment; 35690, General industrial machinery, n.e.c.; 36214, Prime mover generator sets, except steam or hydraulic turbine.

<sup>10</sup>Includes shipments of \$2 million by industry 3561, Pumps and Compressors. In addition, industry 3494, Valves and Pipe Fittings had shipments of \$2 million or more but is withheld to avoid disclosing figures for individual companies.

<sup>11</sup>Includes \$7.2 million shipped by industry 3561, Pumps and Compressors. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3312, Blast Furnaces and Steel Mills; 3392, Nonferrous Forgings; 3531, Construction Machinery; and 3586, Measuring and Dispensing Pumps.

<sup>12</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing figures for individual companies: 19110, Guns, howitzers, and mortars and related equipment over 30 mm (or over 1.8 inches); 35324, Parts and attachments for mining machinery; 35662, Speed changers, industrial high speed drives and gears; and 37292, Guided missile components and subassemblies, n.e.c.

<sup>13</sup>Includes shipments of over \$2 million but is withheld to avoid disclosing figures for individual companies by industry 3442, Metal Doors, Sash, and Trim.

<sup>14</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing figures for individual companies: 35690, General industrial machinery, n.e.c.; and 39492, Other sporting and athletic goods.

<sup>15</sup>Includes \$2.5 million shipped by industry 2542, Metal Partitions and Fixtures; \$8.2 million by industry 3531, Construction Machinery; \$5.7 million by industry 3532, Mining Machinery and Equipment; and \$2.1 million by industry 3551, Food Products Machinery. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3562, Ball and Roller Bearings; 3566, Power Transmission Equipment; and 3713, Truck and Bus Bodies.

<sup>16</sup>Includes \$16.6 million shipped by industry 3566, Power Transmission and Equipment.

<sup>17</sup>Includes \$2 million or more of the following product classes but are withheld to avoid disclosing figures of individual companies: 34295, Other hardware; 34411, Fabricated structural iron and steel for buildings; and 34460, Architectural and ornamental metal work (except curtain wall and other exterior panels).

<sup>18</sup>Includes \$12.1 million shipped by industry 3531, Construction Machinery; \$3.2 million by industry 3532, Mining Machinery and Equipment. In addition, the following industries shipped \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3423, Hand and Edge Tools; 3441, Fabricated Structural Steel; 3548, Metalworking Machinery, N.E.C.; and 3621, Motors and Generators.

<sup>19</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3531, Construction Machinery, and 3532, Mining Machinery and Equipment.

<sup>20</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing figures for individual companies: 35370, Industrial trucks and tractors; 35591, Chemical manufacturing industries machinery and equipment; and 37292, Guided missile components and subassemblies, n.e.c.

<sup>21</sup>Includes \$7.8 million shipped by industry 3531, Construction Machinery, and \$25.8 million shipped by industry 3717, Motor Vehicles and Parts. In addition, the following industries shipped \$2 million or more but are withheld to avoid disclosing figures of individual companies: 3481, Fabricated Wire Products, N.E.C.; 3519, Internal Combustion Engines; 3522, Farm Machinery and Equipment; 3536, Hoists, Cranes, and Monorails; 3566, Power Transmission Equipment; and 3599, Miscellaneous Machinery.

<sup>22</sup>Includes the following product classes with shipments of \$2 million or more but are withheld to avoid disclosing figures of individual companies: 34313, Parts and attachments for tracklaying and contractors' off-highway wheel tractors; 35318, Scrapers, graders, rollers, and off-highway trucks, trailers, and wagons, excluding parts; 35319, Other construction machinery and equipment, including construction machinery parts, n.e.c.; 37130, Truck and bus bodies for sale separately (including those made on purchased chassis); and 37175, Parts and accessories for passenger cars, trucks, and buses shipped to motor vehicle manufacturers.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958

35311 --	Contractors' off-highway wheel tractors, except parts and attachments:				
	As reported in the census of manufactures <sup>1</sup> .....	(X)	102,660	(X)	89,956
	As reported on Census Annual Form MA-35D <sup>1</sup> .....	(X)	101,024	(X)	85,480
	Complete tractors:				
	By number of wheels: <sup>2</sup>				
	2-wheel:				
35311 03-07	Under 299 maximum engine hp.....	1,748	33,191	2,824	57,828
35311 09	300-399 maximum engine hp.....	132	4,108		
35311 11	400 maximum engine hp. and over.....	1,243	42,567		
	4-wheel:				
35311 13	Under 125 maximum engine hp.....	186	1,615	1,264	27,652
35311 15-21	125 maximum engine hp. and over.....	287	10,365		
	By horsepower rating: <sup>2</sup>				
35311 03, 13	Under 125 maximum engine hp.....	195	1,628	4,088	85,480
35311 05, 15	125-199 maximum engine hp.....	751	13,595		
35311 07, 17	200-299 maximum engine hp.....	1,086	22,326		
35311 09, 19	300-399 maximum engine hp.....	140	4,396		
35311 11, 21	400 maximum engine hp. and over.....	1,424	49,901		
35311 31	Rubber tired dozers (125 maximum engine hp. and over) <sup>3</sup> .....	254	9,178	(NA)	(NA)
35312 --	Tracklaying type tractors, except parts and attachments: <sup>4</sup>				
	As reported in the census of manufactures <sup>1</sup> .....	(X)	317,352	(X)	287,300
	As reported on Census Annual Form MA-35T <sup>1</sup> .....	(X)	314,075	(X)	266,570
	20-44 net engine hp.....	4,627	14,919	28,450	266,570
	45-59 net engine hp.....	1,974	9,988		
	60-89 net engine hp.....	3,337	26,552		
	90-129 net engine hp.....	4,748	62,650		
	130-199 net engine hp.....	3,370	65,320		
	200-299 net engine hp.....	4,511	98,949		
	300 net engine hp. and over.....	906	35,697		
35313 --	Parts and attachments for tracklaying and contractors' off-highway wheel tractors, total.....	(X)	302,732	(X)	272,072
35313 13	parts (for replacement and repair) and attachments for tracklaying tractors:				
	As reported in the census of manufactures <sup>1</sup> .....	(X)	216,950	(X)	(NA)
	As reported on Census Form MA-35T <sup>1</sup> .....	(X)	216,916	(X)	223,403
	Attachments.....	(X)	12,207	(X)	23,759
	Parts.....	(X)	204,709	(X)	199,644
35313 61	Parts sold to other plants producing tracklaying tractors and contractors' off-highway type wheel tractors.....	(X)	48,175	(X)	26,319
35313 65	Parts (for replacement and repair) and attachments for contractors' off-highway type wheel tractors:				
	As reported in the census of manufactures <sup>1</sup> .....	(X)	37,607	(X)	(NA)
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	(X)	(S)	(X)	35,360
	Attachments.....	(X)	(S)	(X)	2,595
	Parts.....	(X)	(S)	(X)	32,765
35314 --	Power cranes (including locomotive, full circle, revolving with booms), draglines, shovels and parts.....	(X)	464,757	(X)	361,068
35314 11	Cranes (except construction power cranes), locomotive, full circle revolving with booms, and other types:				
	As reported in the census of manufactures <sup>1</sup> .....	(X)	20,928	(X)	(NA)
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	453	19,187	(X)	<sup>5</sup> 23,982
35314 03	Locomotive (except wrecking).....	47	3,662	36	2,656
35314 05	Full circle revolving with booms (such as whirleys and hammerheads)	156	8,757	(X)	( <sup>5</sup> )
35314 07	Other cranes, including locomotive wrecking.....	250	6,768	(X)	( <sup>5</sup> )

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3531- --	CONSTRUCTION MACHINERY AND EQUIPMENT—Continued				
35314 --	Power cranes (including locomotive, full circle, revolving with booms) dragline, shovels and parts—Continued				
	Power cranes, draglines and shovels, including mine shovels, but not including equipment for mounting on tractors:				
35314 21	As reported in the census of manufactures <sup>1</sup> .....	(X)	307,273	(X)	(NA)
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	(X)	289,281	(X)	216,458
	Crawler mounted, rated shovel capacity:				
35314 11, 13, 15 }	Under 3/4 cubic yard.....	412	7,155	2,273	41,830
35314 17	3/4 cubic yard.....	714	18,794		
35314 18	1 cubic yard.....	507	18,203	708	22,456
35314 19	1-1/4 cubic yards.....	171	7,183	70	2,532
35314 20	1-1/2 cubic yards.....	230	12,282	309	13,922
35314 22	1-3/4 cubic yards.....	22	1,559	45	2,078
35314 24	2 cubic yards.....			67	3,451
35314 25	2-1/2 cubic yards.....	180	13,918	269	18,914
35314 27	Over 2-1/2 cubic yards up to and including 5-1/2 cubic yards.....	309	40,328	307	41,231
35314 28	Over 5-1/2 cubic yards up to and including 10 cubic yards.....	50	15,492		
35314 29	Over 10 cubic yards.....	18	18,580		
	Rubber tired cranes (truck or wheel mounted), maximum working load:				
35314 32	Up to and including 10 tons.....	1,577	14,316	1,224	10,220
35314 34	Over 10 up to and including 15 tons.....	1,050	21,552	313	7,333
35314 36	Over 15 up to and including 20 tons.....	156	4,325	516	18,622
35314 38	Over 20 up to and including 25 tons.....	255	8,484	200	7,062
35314 40	Over 25 up to and including 30 tons.....	256	10,531	78	3,502
35314 42	Over 30 up to and including 35 tons.....	178	8,870	154	8,176
35314 44	Over 35 up to and including 45 tons.....	182	11,090	52	2,890
35314 46	Over 45 up to and including 60 tons.....	167	11,835	18	1,487
35314 48, 50 }	Over 60 tons.....	156	16,240		
35314 51	Walking draglines and walking cranes.....	20	28,544	22	10,752
35314 81	Front end attachments, buckets, grapples, slings, etc., for power cranes, draglines, and shovels (sold separately).....	(X)	15,129	(X)	18,486
35314 85	Parts for power cranes, draglines, and shovels.....	(X)	116,801	(X)	95,391
35314 00	Power cranes, draglines, and shovels and parts, n.s.k.....	(X)	4,626	(X)	-
35316 --	Mixers, pavers, and related equipment, excluding parts, total.....	(X)	132,020	(X)	101,908
	Concrete:				
35316 12	Mixers, portable under 3-1/2 cubic feet capacity (except plaster and mortar), hand or power operated.....	23,569	1,347	18,680	1,403
	Mixers, portable, 3-1/2 cubic feet and over (except plaster and mortar):				
35316 22	As reported in the census of manufactures <sup>1</sup> .....	(X)	32,477	(X)	(X)
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	(X)	33,053	(X)	32,552
35316 31	Truck mixer or agitator.....	4,944	24,951	5,740	24,071
35316 35	Other.....	11,299	8,102	11,638	8,481
35316 31	Mixers, plaster and mortar.....	10,183	4,666	7,364	3,234
35316 34	Pavers, finishers and spreaders.....	10,162	19,913	1,510	8,451
	Batching plants, bin and batch (for concrete aggregate only and bulk cement:				
35316 37	As reported in the census of manufactures <sup>1</sup> .....	(X)	17,594	(X)	(NA)
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	940	16,041	1,086	15,025
35316 39	Concrete vibrators.....	22,287	4,595	(NA)	2,858
	Bituminous distributors, asphalt plants and other equipment:				
35316 40	As reported in the census of manufactures <sup>1</sup> .....	(X)	39,030	(X)	(NA)
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	(X)	38,683	(X)	43,494
35316 41	Distributors.....	942	5,757	785	3,403
35316 42	Bituminous asphalt plants:				
	Travel mix-type.....	32	517	(NA)	(NA)
	Central mixing plants (batch-type and continuous-type) (t.p.h. = tons per hour), total.....	282	23,688	431	35,778
35316 43	Less than 2,000 pound batch (less than 60 t.p.h.).....	88	1,498		
35316 44	2,000 pound-3,500 pound batch (60-119 t.p.h.).....	42	2,773		
35316 46	4,000 pound-5,500 pound batch (120-179 t.p.h.).....	82	9,300		
35316 48	6,000 pound batch and over (180 t.p.h. and over).....	70	10,117		
35316 49	Other (including portable mixers, heating kettles, heaters and circulators).....	3,185	8,721	3,305	4,313
35316 52	Other materials-aggregate spreaders and soil stabilization pavers.....	5,327	7,807	5,793	4,364
35316 00	Mixers, pavers and related equipment, n.s.k.....	(X)	4,591	(X)	3,767

See footnotes at end of table.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3531- --	CONSTRUCTION MACHINERY AND EQUIPMENT—Continued				
35317 --	Tractor-shovel loaders, total.....	(X)	387,988	(X)	<sup>6</sup> 142,890
	Wheel type:				
35317 10	As reported in the census of manufactures <sup>1</sup> .....	(X)	152,079	(X)	(NA)
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	(X)	153,310	(X)	69,977
	4-wheel drive:				
35317 04	1 cubic yard and under 1-1/2 cubic yards.....	2,542	21,446	6,657	69,977
35317 05	1-1/2 cubic yards and under 2 cubic yards.....	2,651	31,562		
35317 06	2 cubic yards and under 2-1/2 cubic yards.....	1,657	26,139		
35317 07	2-1/2 cubic yards and under 3-1/2 cubic yards.....	2,241	41,709		
35317 08	3-1/2 cubic yards and under 5 cubic yards.....	447	10,775		
35317 09	5 cubic yards and over.....	288	10,421		
35317 10, 12	2-wheel drive (all bucket capacities).....	2,354	11,258		
	Tracklaying type, 20 net engine hp. and over (including parts and attachments):				
35317 20	As reported in the census of manufactures <sup>1</sup> .....	(X)	217,664	(X)	(NA)
	As reported on Census Form MA-35T <sup>1</sup> .....	(X)	214,777	(X)	(NA)
	Complete tractors, total.....	11,503	140,155	7,741	87,912
35317 11	20-44 net engine hp.....	2,162	9,555	7,741	87,912
35317 13	45-59 net engine hp.....	2,733	22,511		
35317 15	60-89 net engine hp.....	1,626	19,533		
35317 17	90-129 net engine hp.....	3,415	53,663		
35317 19, 21	130-299 net engine hp.....	1,567	34,893		
	Attachments and parts, total.....	(X)	74,622	(X)	( <sup>6</sup> )
35317 51	Attachments.....	(X)	5,005	(X)	( <sup>6</sup> )
35317 61	Parts.....	(X)	69,617	(X)	( <sup>6</sup> )
35317 95	Parts and attachments for wheel-type tractor shovel loaders.....	(X)	18,245	(X)	( <sup>6</sup> )
35318 --	Scrapers, graders, compactors, rollers, and off-highway trucks, trailers, and wagons, and equipment for mounting on tracklaying or heavy duty wheel type tractors, excluding parts:				
	As reported in the census of manufactures <sup>1</sup> .....	(X)	479,986	(X)	326,002
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	(X)	450,999	(X)	(NA)
	Scrapers, dig, carrying, and hauling (2- and 4-wheel) standard struck capacity: <sup>7</sup>				
35318 12	Under 7 cubic yards.....	746	732	( <sup>5</sup> )	( <sup>5</sup> )
35318 13	7 cubic yards and under 12 cubic yards.....	1,615	10,934	1,182	7,242
35318 14	12 cubic yards and under 18 cubic yards.....	970	14,298	1,206	12,045
35318 15	18 cubic yards and under 30 cubic yards.....	1,275	25,155	1,582	26,949
35318 16	30 cubic yards and over.....	351	12,160		
	Motor graders and light maintainers, total.....	7,771	102,459	6,852	82,016
35318 22, 23	Under 75 brake hp.....	1,131	5,657	1,049	5,375
35318 24	75-114 brake hp.....	879	10,496	944	10,836
35318 25	115-144 brake hp.....	4,854	68,968	4,859	65,805
35318 26	145 brake hp. and over.....	907	17,338		
	Rollers, self-propelled type:				
	Steel wheeled:				
35318 32, 33	3-wheeled and segmented.....	405	3,961	9,299	32,292
	Tandem, 2- and 3-axle:				
35318 34	Under 3 tons.....	975	1,143		
35318 35	3 tons to and including 4-1/2 tons.....	523	2,134		
35318 36	Above 4-1/2 tons to and including 7-1/2 tons.....	450	2,344		
35318 37	Above 7-1/2 tons.....	447	3,162		
35318 38	Pneumatic tire.....	1,041	8,806	9,299	32,292
35318 39	Sheepsfoot.....	95	2,328		
35318 41	All other types, vibratory, trench, etc.....	768	3,212		
	Rollers, towed:				
35318 42	Pneumatic tire (including vibratory).....	344	873		
	Sheepsfoot and bar type:				
35318 43	50" drum diameter and under.....	325	595		
35318 44	Above 50" drum diameter.....	286	1,320		
35318 45, 46	Vibratory, single steel drum.....	444	2,793		
35318 47, 48	Vibratory compactors, other than rollers.....	326	997		

See footnotes at end of table.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3531- --	CONSTRUCTION MACHINERY AND EQUIPMENT—Continued				
35318 --	Scrapers, graders, compactors, rollers, and off-highway trucks, trailers, and wagons, and equipment for mounting on tracklaying heavy duty wheel type tractors, excluding parts—Continued				
	Off-highway equipment: <sup>8</sup>				
	Off-highway rear dump earth, rock and ore load on back haulers:				
35318 56	Under 20 tons capacity.....	232	4,929	1,706	39,068
35318 57	20 tons to and including 30 tons capacity.....	557	20,096		
35318 58	Over 30 tons capacity.....	545	33,738		
	Truck-tractor type haulers and all other trucks:				
35318 61, 63	Under 60,000 pounds gross vehicle weight.....	969	19,866	(5)	(5)
35318 62, 64	60,000 pounds and over gross vehicle weight.....	1,141	18,585		
	Off-highway trailers and wagons (end, side, and bottom dump):				
35318 66	Under 12 cubic yards standard struck capacity.....	90	775	424	5,161
35318 67	12 and up to 18 cubic yards standard struck capacity.....				
35318 68	18 cubic yards standard struck capacity and over.....	241	6,449		
	Construction machinery for mounting on tractors:				
35318 71, 72, 73	Sidebooms or pipehandlers (all sizes).....	812	2,793	450	2,457
	Dozers (6' blade length and over):				
	Hydraulically operated:				
35318 74	For wheel tractors.....	328	950	551	559
35318 75	For crawler tractors.....	13,503	26,329	11,766	16,347
35318 76, 77	Cable operated.....	4,300	11,842	6,297	14,570
35318 79	Backhoes for wheel or tracklaying tractors, including shovel loaders	15,922	32,202	10,031	18,873
35318 81	All other backhoes.....	1,115	8,866		
35318 82	Front-end loaders (3/8 cubic yards and over) <sup>9</sup> .....	28,877	30,347		
35318 83	Logging arches.....	145	740	72	200
35318 84	Cranes.....			(5)	(5)
35318 85	Cable power control units.....	4,281	7,881	17,173	18,220
35318 87	Hydraulic power control units.....	12,675	12,966		
35318 86	Rippers and rooters, heavy-rear mounted.....	5,980	11,198		
35318 88, 89	Continuous ditching and trenching attachments for mounting on tractors, shovel loaders, or other prime movers.....	349	1,041	(NA)	(NA)
35319 --	Other construction machinery and equipment, including construction machinery parts, n.e.c., total.....	(X)	403,511	(X)	368,091
	Excavating and road construction and maintenance machinery, except shovels and cranes:				
35319 11	Dredging machinery, hydraulic and other types.....	(X)	14,186	(X)	10,668
	Self-propelled ditchers and trenchers, including ladder and wheel types:				
35319 15	As reported in the census of manufactures <sup>1</sup> .....	(X)	16,849	(X)	(NA)
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	4,410	16,811	1,486	8,155
	Ladder type:				
35319 16	Under 5,000 pounds gross weight.....	3,761	6,503	1,210	4,019
35319 17	5,000 pounds gross weight and over.....	290	4,000		
35319 18	Wheel type.....	359	6,308	286	4,136
35319 21	Railway maintenance of way equipment (rail layers, ballast spreaders, etc.), except rail cars.....	(X)	22,459	(X)	19,965
	Water well and blast hole drills, portable churn-drill type:				
35319 27	As reported in the census of manufactures <sup>1</sup> .....	(X)	20,417	(X)	(NA)
	As reported on Census Form M35D or MA-35D <sup>1</sup> .....	591	16,671	(X)	(5)
35319 28	Churn-drill type.....	229	2,480	(5)	(5)
35319 29	Rotary-drill type.....	362	14,191		
35319 31	Pulverizers and grinders, portable.....	139	1,738	157	3,469
35319 52	Winches, except winches for mounting on wheel or tracklaying tractors.....	36,464	22,522	26,334	17,108

See footnotes at end of table.

Product code	Product	Total shipments including interplant transfers					
		1963		1958			
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)		
3531- --	CONSTRUCTION MACHINERY AND EQUIPMENT—Continued						
35319 --	Other construction machinery and equipment, including construction machinery parts, n.e.c.—Continued						
	Excavating and road construction and maintenance machinery, except shovels and cranes—Continued						
	Winches (towing, logging and oil-field types) for mounting on wheel or tracklaying tractors:						
35319 55	As reported in the census of manufactures <sup>1</sup> .....	(X)	20,024	(X)	(NA)		
	As reported on Census Form MB5D or MA-35D <sup>1</sup> .....	8,613	19,285	(X)	( <sup>5</sup> )		
35319 71	Derricks, except oil and gas well (including gallows, frames, ginpole, stiff legs, and guy).....	897	3,812	708	919		
	Portable crushing plants, screening plants, washing plants, and combination plants:						
35319 75	As reported in the census of manufactures <sup>1</sup> .....	(X)	23,138	(X)	(NA)		
	As reported on Census Form MB5D or MA-35D <sup>1</sup> .....	987	23,679	1,201	29,129		
35319 76	Under 50 tons per hour.....	365	2,627	1,201	29,129		
35319 77	50 tons per hour and over.....	622	21,052				
35319 81	Snow plows (for mounting on tractors or trucks) rotary, blowers, "V" and single blades and wings (attachments only).....	(X)	25,085	22,157	10,337		
35319 83	Other excavating and road construction machinery, including earth augers and power post-hole diggers drawn ditchers and trenchers, contractors' hand-held air tools, motor pick-up sweepers, graders (other than motor graders), drawn rollers as well as other types of excavating and earth moving equipment not specified above.....	(X)	41,360	(X)	39,370		
35319 85	Parts and attachments for construction machinery and equipment (sold separately) (except parts and attachments for power cranes, draglines and shovels).....	(X)	144,135	(X)	183,119		
35319 98	All other construction machinery and equipment.....	(X)	43,275	(X)	30,938		
35319 00	Other construction machinery and equipment, n.s.k.....	(X)	4,511	(X)	4,458		
35310 00	Construction machinery and equipment, n.s.k.....	(X)	33,165	(X)	32,036		
3532- --	MINING MACHINERY AND EQUIPMENT, TOTAL.....	(X)	336,213	(X)	275,289		
35321 --	Underground mining machinery and related mining equipment:						
	As reported in the census of manufactures <sup>1</sup> .....	(X)	73,573	(X)	64,667		
	As reported on Census Form MA-35F, total <sup>1</sup> .....	(X)	71,501	(X)	(X)		
35321 13, 15	Cutting machines.....	68	3,257	123	5,663		
35321 47		Coal recovery augers.....	28			2,238	
	Loading machines (underground mine):						
35321 33	Gathering arm type.....	127	4,386	609	9,210		
35321 35	Shovel type.....	449	3,915				
35321 37	Slusher hoists (scraper loaders).....						
	Continuous mining machines:						
35321 43	Borer type (including underground augering machines).....	158	16,714	116	10,736		
35321 45	Ripper type (including milling type).....						
35321 73	Shuttle cars—rubber tired, self-propelled.....	316	9,011	(NA)	8,547		
35321 75	Mine cars, track.....	2,816	5,020	(NA)	6,401		
	Mineral classifying, flotation, separating, concentrating, cleaning, clarifying and related equipment:						
35321 52	Flotation machines (quantity represents number of cells).....	1,697	2,335	(X)	19,223		
35321 54	Jigs.....	19	641				
35321 55	Concentrating tables.....	183	726				
35321 56	Classifiers—sizing, washing, and dewatering (excluding cyclones).....	799	6,289				
35321 57	Wet cyclones (including heavy medium cyclones).....	741	679				
35321 59	Centrifugal driers.....	123	3,250				
35321 61	Scrubbers (all types, including drums, log washers, attritioning machines, etc.).....	107	3,306				
35321 62	Thermal dryers.....	12	1,414				
35321 66	Feeders—apron, vibrating, and reciprocating.....	1,193	3,954				
35321 67	Magnetic separators (quantity represents number of drums).....	253	1,596				
35321 53, 58, 63, 64, 65	Other mineral classifying, flotation, separating, concentrating, cleaning, clarifying, and related equipment.....	(X)	102,770				
35321 00	Underground mining machinery, n.s.k.....	(X)	-	(X)	4,887		

See footnotes at end of table.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3532- --	MINING MACHINERY AND EQUIPMENT—Continued				
35322 --	Crushing, pulverizing, and screening machinery (stationary):				
	As reported in the census of manufactures <sup>1</sup> .....	(X)	58,012	(X)	67,818
	As reported on Census Form MA-35F, total <sup>1</sup> .....	(X)	54,578	(X)	(X)
	Crushers (including crushers on skids):				
35322 11	Gyratory.....	471	12,750	112,114	1134,504
35322 13	Impact.....	477	4,740		
35322 17	Jaw.....	264	3,046		
35322 19	Roll.....	245	3,579		
	Grinding mills:				
35322 33	Ball (including pebble mills).....	249	12,466	12585	1210,727
35322 37	Rod.....	17	1,278		
35322 55	Screens—vibrating, trommell, mine type.....	3,662	16,719	(NA)	1321,464
35322 00	Crushing, pulverizing, and screening plants, n.s.k.....	(X)	-	(X)	1,123
35323 --	All other mining machinery and equipment:				
	As reported in the census of manufactures <sup>1</sup> .....	(X)	39,331	(X)	22,287
	As reported on Census Form MA-35F, total <sup>1</sup> .....	(X)	38,446	(X)	(X)
	Drills:				
35323 23	Rock drills (percussion type).....	10,359	11,776	6,654	3,874
35323 13	Core drills for mineral exploration.....	546	3,569	(NA)	984
	Rotary drills:				
35323 43	Underground (coal and roof).....	137	2,014	(X)	16,904
35323 45	Surface (blast hole).....	133	5,453		
35323 98	Other mining machinery and equipment (complete units).....	(X)	15,634	(X)	525
35323 00	All other mining machinery and equipment, n.s.k.....	(X)	-	(X)	
35324 --	Parts and attachments for mining machinery and equipment, total.....	(X)	158,014	(X)	120,517
35324 25	Construction rock drills, portable, hand held or mounted.....	4,794	4,868	12,786	9,669
	Percussion rock drill bits:				
35324 31	Containing tungsten carbide.....	(X)	12,982	(X)	12,155
35324 35	Made entirely of steel.....	(X)	2,355	(X)	2,225
35324 41	Other drills, tools and supplies for drills (sold separately).....	(X)	16,167	(X)	22,743
35324 75	Other parts and attachments for mining machinery and equipment (sold separately).....	(X)	121,069	(X)	71,749
35324 00	Parts and attachments for mining machinery and equipment, n.s.k.....	(X)	573	(X)	1,976
35320 00	Mining machinery and equipment, n.s.k.....	(X)	7,283	(X)	-
3533- --	OIL FIELD MACHINERY AND EQUIPMENT, TOTAL.....	(X)	572,726	(X)	496,149
35331 --	Rotary oil and gas field drilling machinery and equipment, total.....	(X)	217,238	(X)	222,014
	Rotary drilling surface equipment:				
35331 11	Blocks, crown and traveling.....	355	1,801	(NA)	1,616
35331 12	Draw works and accessories.....	92	8,367	165	14,904
35331 14	Rotary tables.....	145	962	208	1,430
35331 15	Elevators, spiders, slips, hooks, links, and connectors.....	(X)	6,870	(X)	4,385
35331 16	Swivels and accessories.....	(X)	1,566	(X)	1,447
35331 17	Well control equipment (blow-out preventers, etc.).....	(X)	10,565	(X)	10,852
35331 19	Other rotary drilling surface machinery and equipment.....	(X)	23,490	(X)	11,768
	Rotary drilling subsurface equipment:				
35331 41	Bits.....	651,969	110,564	(NA)	123,482
35331 42	Reamers.....	(X)	5,953	(X)	6,456
35331 43	Coring equipment.....	(X)	1,153	(X)	4,658
35331 44	Tool joints, subs, and connectors.....	(X)	17,925	(X)	17,913
35331 45	Drill collars.....	11,707	8,136	10,325	9,169
35331 47	Fishing and cutting tools.....	(X)	6,374	(X)	7,025
35331 49	Other subsurface rotary driving equipment, including Kelly joints....	(X)	12,348	(X)	5,804
35331 00	Rotary oil and gas field drilling machinery and equipment, n.s.k.....	(X)	1,164	(X)	1,105
35332 --	Other oil and gas field drilling machinery and equipment, total.....	(X)	38,849	(X)	43,365
35332 31	Cable tool drilling machinery and equipment (including both surface and subsurface equipment).....	(X)	2,855	(X)	4,972

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3533- --	OIL FIELD MACHINERY AND EQUIPMENT—Continued				
35332 --	Other oil and gas field drilling machinery and equipment—Continued				
	Cementing, floating, guiding, and shoe equipment:				
35332 51	Guide shoes, float collars, and combination guide and float shoes...	(X)	6,831	(X)	5,621
35332 55	Other cementing equipment.....	(X)	6,969	(X)	18,873
35332 61	Parts for oil and gas field drilling equipment sold separately (except parts for portable drilling rigs).....	(X)	18,231	(X)	13,546
35332 98	Other oil and gas field drilling equipment, except portable.....	(X)	3,963	(X)	353
35333 --	Oil and gas field production machinery and equipment (except pumps), total.....	(X)	261,453	(X)	175,453
	Flowing well equipment, surface and subsurface:				
35333 11	Christmas tree assemblies.....	(X)	14,966	(X)	16,102
35333 13	Casing and tubing heads and supports.....	(X)	11,713	(X)	12,522
35333 15	Chokes, manifolds, and other accessories.....	(X)	16,830		
35333 19	Rodless oil lifting machinery and equipment (other than pumps).....	(X)	7,607	(X)	13,926
	Rod lifting machinery and equipment, surface (including pumps when they are components of a complete assembly):				
35333 53	Pumping units and accessories (include back crank equipment).....	9,138	41,433	11,962	39,432
35333 55	Other surface rod lifting machinery and equipment.....	(X)	2,011	(X)	1,748
35333 57	Rod lifting equipment, subsurface, except pumps (quantity represents number of sucker rods shipped).....	2,594,040	24,570	2,379,520	21,365
	Other production machinery and equipment:				
35333 61	Packers.....	(X)	17,280	(X)	9,895
35333 65	Screens, tubing, catchers, etc.....	(X)	8,543	(X)	4,959
35333 71	Oil and gas separating, metering, and treating equipment (quantity represents number of separators).....	16,312	13,911	(S)	11,472
35333 81	Parts for oil and gas field machinery and tools, sold separately, including parts for portable drilling rigs but excluding parts for other drilling equipment.....	(X)	19,535	(X)	10,102
35333 98	Other oil and gas field machinery and tools.....	(X)	78,482	(X)	33,930
35333 00	Oil and gas field production machinery and equipment (except pumps), n.s.k.....	(X)	4,572	(X)	-
35334 --	Other oil and gas field machinery and tools (except pumps) including water well drilling equipment and portable drilling rigs, total.....	(X)	43,290	(X)	40,715
	Portable drilling rigs—permanently mounted on truck or trailer:				
	Oil and gas field:				
35334 11	Cable tool.....	122	3,468	235	5,226
35334 13	Rotary rigs.....	298	14,568	275	11,837
	Water well and blast hole:				
35334 15	Cable tool.....	397	2,879	324	2,781
35334 17	Rotary rigs.....	209	6,672	234	6,006
35334 21	Derricks, oil and gas field, substructures, and accessories—regular and portable.....	(NA)	8,118	(S)	2,190
35334 31	Well surveying machinery and equipment.....	(X)	7,129	(X)	1,917
35334 00	Other oil and gas field machinery and tools, n.s.k.....	(X)	456	(X)	10,758
35330 00	Oil field machinery and equipment, n.s.k.....	(X)	11,896	(X)	14,602
3534- --	ELEVATORS AND MOVING STAIRWAYS, TOTAL.....	(X)	248,209	(X)	165,277
	Elevators (except farm and portable):				
35340 11	Electric passenger (except residence lifts).....	5,930	108,079	2,985	61,534
35340 12	Hydraulic passenger.....	2,184	13,332	1,029	5,270
35340 13	Electric freight.....	1,040	10,810	1,325	16,247
35340 15	Hydraulic freight.....	2,536	11,604	2,203	7,105
35340 31	Automobile lifts (service station and garage type).....	34,026	19,985	21,125	13,793
35340 51	Moving stairways and escalators.....	672	12,691	395	6,587
35340 96	Other nonfarm elevators (includes sidewalk elevators, dumbwaiters, man lifts, hand-operated freight elevators, residence lifts, etc.).....	(X)	9,944		
35340 97	Parts and attachments for elevators and moving stairways (sold separately).....	(X)	53,680	(X)	45,971
35340 00	Elevators and moving stairways, n.s.k.....	(X)	8,084	(X)	8,770

See footnotes at end of table.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Value of shipments including interplant transfers (\$1,000)			
		1963	1958		
3535- --	CONVEYORS AND CONVEYING EQUIPMENT, TOTAL.....	414,854	333,877		
35351 --	Conveyors and conveying equipment (except hoists and farm elevators).....	306,236	247,994		
35351 11	Gravity conveyors (skate, wheel, and roller).....	29,916	20,129		
35351 31	Overhead trolley conveyor systems.....	38,131	19,486		
35351 41	Pneumatic tube systems, including foot-power units.....	13,530	12,720		
35351 51	Portable conveyors (except farm).....	13,073	8,633		
35351 61	Underground mine conveyors and conveying systems.....	11,649	11,066		
	Other conveyors and conveying systems (includes specially engineered conveyor installations):				
35351 71	Bulk material conveyors.....	113,808	117,720		
35351 73	Package (unit) conveyors.....	81,245	47,730		
35351 00	Conveyors and conveying equipment (except hoists), n.s.k.....	4,884	10,510		
35352 11	Parts, attachments, and accessories for conveyors and conveying systems (sold separately).....	87,963	72,021		
35350 00	Conveyors and conveying equipment (including parts), n.s.k.....	20,655	13,862

35370 35	Tractors.....	1,659	6,625	3,221	12,810

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3537- --	INDUSTRIAL TRUCKS, TRACTORS, TRAILERS, AND STACKERS—Continued				
	Powered trucks and tractors—Continued				
	Trucks (operator riding) and tractors—Continued				
35370 41	All other trucks (operator riding) and tractors, including diesel, compressed-air powered, etc.....	(X)	14,433	(X)	5,901
35370 51	Portable elevators (stackers) excluding farm type.....	3,769	4,313	2,870	3,771
	Hand trucks and trailers, including dollies and platform trucks:				
35370 61	Hand lift.....	(X)	10,000	(X)	11,366
35370 65	Other hand trucks and trailers, including two wheel, four wheel, dollies, and platform trucks.....	(X)	32,177	(X)	30,395
35370 71	Metal pallets and skids (excluding wood and metal combination).....	(X)	12,098	(X)	6,786
35370 81	Parts and attachments and miscellaneous equipment (sold separately).....	(X)	91,737	(X)	44,752
35370 00	Industrial trucks and trailers, n.s.k.....	(X)	31,562	(X)	23,604

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

(S) Suppressed because the data did not meet publication standards.

<sup>1</sup>For these products, data were also collected in the census annual commodity survey program. In lieu of asking for detailed statistics on these products in the censuses of manufactures, respondents were asked to report only value of shipments for specified products or classes of products for which separate figures had previously been collected in the commodity survey. In most cases, the value figures reported in the censuses of manufactures for each product or class of products agreed closely with the corresponding figures reported in the commodity survey. However, there were some differences between the census figures and the commodity survey figures. These variations were due primarily to the following reasons:

- Use of different reporting periods (calendar year vs. fiscal year).
- Use of different base for reporting value (company sales vs. factory production).
- Use of estimates in reporting data on the commodity survey whereas census of manufactures figures generally represent more exact shipments figures.

<sup>2</sup>Represents wheeled tractors designed primarily to be used as towing units for scrapers, trailers, wagons, and similar types of towed equipment for use on natural terrain but restricted by State laws or regulations from operating on public highways.

<sup>3</sup>Machines shipped primarily as independent dozing or pushing units characterized with approximate equal weight fore and aft with all wheel drive as differentiated from machines designed for integral hook-up towing.

<sup>4</sup>Data exclude those crawler tractors produced as components of complete tractor-shovel-loaders. The 1958 horsepower ratings for these tractors are based on maximum corrected drawbar horsepower.

<sup>5</sup>For 1958, selected types of construction machinery for which figures were collected on Census Annual Form MA-35D or Quarterly Form MB5D but which could not be published are included with cranes except construction power cranes. These products include scrapers, 2- and 4-wheel, under 7 cubic yard standard struck capacity; winches (towing, logging and oil field types) for mounting on tractors; cranes for mounting on tractors; wheel tractors (truck type), off-highway type, 2 and 3 axle models; and portable drills, churn drill type, water well and blast hole.

<sup>6</sup>Parts and attachments for tracklaying type and wheel type tractor shovel loaders are included with parts and attachments for construction machinery and equipment (sold separately) (except parts and attachments for power cranes, draglines and shovels) (codes 3531985), for 1958.

<sup>7</sup>Tandem units are reported as two separate units.

<sup>8</sup>Represents vehicles normally operated off the public highway and specially designed to transport materials, property, or equipment on mining, construction, logging, petroleum development, and similar projects. These vehicles are of such size or weight as to be normally restricted by State laws or regulations from operating on public highways.

<sup>9</sup>Excludes front-end loaders shipped to producers of complete tractor-shovel loaders (integral units).

<sup>10</sup>Includes figures for dense medium vessels (3532153), centrifuges (3532158), concentrating spirals (3532163), thickeners (3531264) and filters (3532165).

<sup>11</sup>Represents crushers and crushing plants.

<sup>12</sup>Represents pulverizers and grinders.

<sup>13</sup>Represents screening plants, washing plants and combination washing and screening plants.

<sup>14</sup>Comparable data were also collected on Census Annual Form MA-35F, "Mining Machinery and Equipment." Data collected in the census of manufactures indicate a degree of undercoverage in the MA-35F Annual Commodity Survey.

<sup>15</sup>For 1958, this value includes parts and attachments for monorail systems.

TABLE 6B. **Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value
353	Construction, mining, and materials handling machinery and equipment construction and like equipment...1963..	( <sup>1</sup> )	( <sup>1</sup> )
	1958..	( <sup>1</sup> )	( <sup>1</sup> )
3534	Elevators and moving stairways.....1963..	173	111
	1958..	109	118
3536	Hoists, cranes, and monorail systems.....1963..	142	97
	1958..	84	124
35361	Hoists.....1963..	207	115
	1958..	88	125

<sup>1</sup>The indexes for this group and for the products of industries 3531, 3532, 3533, 3535, and 3537 are not shown because comparable quantity data were not obtained for a significant portion of these products.

**TABLE 6C. Product Classes—Value Shipped by All Manufacturing Establishments:  
1947, 1954, 1958 to 1963**

(In thousands of dollars)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Source: Current Industrial Reports Series M35D, Construction Machinery, and M35S, Tractors (Except Garden Tractors). These data exclude the value of parts and attachments for wheel type shovel loaders. In addition data for 1958 and 1959 exclude parts and attachments for tracklaying type shovel loaders.

<sup>3</sup>Includes the value of parts and attachments for wheel type shovel loaders. In addition data for 1958 and 1959 include parts and attachments for tracklaying type shovel loaders.

TABLE 6D. **Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

<sup>2</sup>Represents estimates published in MC58(1)-7 (Supplement), Selected Materials Consumed, from data collected in a supplemental survey on Form MA-131, Consumption of Materials, Parts, Containers and Supplies, During 1958. This survey was limited to large establishments in selected chemical, machinery, and equipment industries and resulted in estimate which are subject to greater error than are the figures on materials consumption collected as a regular part of the census of manufactures.

<sup>3</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" when separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962

Item	Construction machinery (SIC 3531)	Mining machinery and equipment (SIC 3532)	Oil field machinery (SIC 3533)	Elevators and moving stairways (SIC 3534)	Conveyors (SIC 3535)	Hoists, cranes, and monorails (SIC 3536)	Industrial trucks and tractors (SIC 3537)

Driven by purchased energy.....do....	844	202	268	51	102	73	58
Driven by energy generated at establishment.....do....	6	9	-	3	-	-	-
Aggregate horsepower per 100 production workers.....	1,308	1,865	1,603	1,039	897	1,595	674

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Painting, lacquering and enameling on metals.....	106	87	17	2	336	135	(D)	(D)

Note: Very small establishments were not requested to report their metalworking operations and in some instances a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production worker employment on the last line of the table below.

Item	INDUSTRY						
	3531	3532	3533	3534	3535	3536	3537
Total number of establishments in the industry.....	617	204	408	142	454	120	314
Number of establishments which reported one or more of the specified operations.....	353	114	217	84	242	74	142
Percent of industry production workers in these establishments.....	90-95	85-90	80-85	80-85	85-90	95-100	85-90
Number of establishments which reported "none" of the operations apply...	14	7	14	6	13	4	12
Percent of industry production workers in these establishments.....	0-5	0-5	0-5	0-5	0-5	0-5	0-5
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	90-95	85-90	80-85	80-85	90-95	95-100	90-95

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishments.

## METALWORKING MACHINERY AND EQUIPMENT

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3541—Machine Tools, Metal-Cutting Types
- 3542—Machine Tools, Metal-Forming Types
- 3544—Special Dies and Tools, Die Sets, Jigs, and Fixtures
- 3545—Machine Tool Accessories and Measuring Devices
- 3548—Metalworking Machinery, Except Machine Tools

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

These five industries include plants primarily engaged in the production of machines, tools, and equipment for use principally in fabricating metal products. The machinery and equipment included in these industries encompass the entire range of metalworking processes utilizing cutting and forming operations. Plants in industries 3541, 3542, and 3548 produce complete machines such as lathes, drilling machines, grinding and polishing machines, presses, die-casting machines, and rolling-mill equipment; plants in industries 3544 and 3545 manufacture equipment and tools for use with those machines, such as dies, jigs, fixtures, cutting tools, work holding devices, industrial molds, and precision measuring instruments.

As a means of providing for consistent reporting of machinery produced on a subcontract basis, machine tool and metalworking machinery manufacturers were instructed to include in their report all machines produced for them by others on a subcontract basis. Conversely, the plants producing such machines were instructed to exclude such products from their shipments reports and to show all receipts for subcontract work as "receipts for work done for others on their own materials."

### 3541—MACHINE TOOLS, METAL-CUTTING TYPES

This industry comprises establishments primarily engaged in manufacturing power-driven machines, not supported in the hands of an operator when in use, that shape metal by cutting or use of electrical techniques; the rebuilding of such machine tools, and the manufacture of replacement parts for them. Metalworking, or primarily metalworking machine tools designed primarily for home workshops are also included. Establishments primarily engaged in the manufacture of electric welding equipment are classified in industry 3623; and portable power-driven hand tools, machinery and gas welding and cutting equipment,

and automotive maintenance equipment in industry 3548. For a detailed list of products of industry 3541, refer to table 6A, product codes 3541111 to 3541941.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Metal-Cutting Machine Tools Industry totaled \$1,061 million. This amount included shipments of machine tools, metal-cutting types (primary products), valued at \$805 million, shipments of other products (secondary products) valued at \$188 million, and miscellaneous receipts (largely products bought and resold) at \$68 million.

This industry's shipments of metal-cutting machine tools represented 81 percent of its total product shipments. The industry specialization ratio in 1958 was 85 percent. Secondary products shipped by this industry in 1963 include small cutting tools for machine tools and metalworking machinery (\$30 million), and other attachments and accessories for machine tools and metalworking machinery (\$28 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 26 percent of the total industry shipments are represented by plants specializing in lathes; and 16 percent in milling machines.

Shipments of machine tools, metal-cutting types, by this industry represented 87 percent of all shipments of these products (\$925 million) by all industries. In 1958 the coverage ratio was 89 percent. Other industries shipping machine tools, metal-cutting type, include industry 3545, Machine Tool Accessories, \$29 million; and industry 3542, Metal-Forming Machine Tools, \$5 million.

While machine tools are usually built for industrial purposes, some types of small size, light construction, and low price are designed primarily for the home workshop, the laboratory, the service shop, or the like. Light machine tools, usually of more precise construction than the home workshop type, are also used in industrial plants, either in batteries to accomplish the same purpose as one or two heavier machine tools, as accessory equipment in the company's machine shop, as "standby machines," or for special types of work. In some industries where a light machine tool more adequately serves the purpose at hand, this type of tool is part of the main production line. Home workshop tools may be used incidentally in industrial establishments, but this is the exception rather than the rule. Home workshop machine tools (other than power-driven hand tools) which were designed primarily for metalworking or for use on metal and wood are classified in industry 3541. However, those that are designed primarily for woodworking are classified in industry 3553, Woodworking Machinery.

The product detail shown in table 6A is essentially the same as that published in Current Industrial Report Series M35W, Machine Tools. The Current Industrial Report does not include data on machines designed primarily for home workshops, garages, service shops, etc., nor does it include figures for rebuilt machine tools.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3541, e.g., lathes, 96 percent; other machine tools (including those designated primarily for home workshops, laboratories, etc.), 77 percent; boring machines, 94 percent; parts for metal-cutting type machine tools sold separately and rebuilt machine tools, 82 percent.

The production index for the primary products of the industry increased to 82 in 1963 from the 1958 level of 52. The unit value index for 1963 was 112 compared to 113 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3542—MACHINE TOOLS, METAL-FORMING TYPES

This industry comprises establishments primarily engaged in manufacturing power-driven machines, not supported in the hands of an operator while in use, for pressing, forging, hammering, extruding, shearing, bending, or die casting metal into shape. This industry also includes rebuilding such machine tools and manufacturing repair parts for them. Establishments primarily engaged in the manufacture of electric welding equipment are classified in industry 3623; portable power-driven hand tools, machinery and gas welding and cutting equipment, and automotive maintenance equipment in industry 3548. For a detailed list of products of industry 3842, refer to table 6A, product codes 3542411 to 3542475.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Metal-Forming Machine Tools Industry totaled \$441 million. This amount included shipments of machine tools, metal-forming types (primary products) valued at \$351 million, shipments of other products (secondary products) valued at \$58 million, and miscellaneous receipts at \$33 million.

This industry's shipments of metal-forming machine tools represented 86 percent of its total product shipments. The industry specialization ratio in 1958 was 82 percent. Secondary products shipped by this industry in 1963 include special dies and tools, die sets, jigs, and fixtures (\$20 million), and parts for metal-cutting type machine tools, sold separately, and rebuilt machine tools (\$3 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 39 percent of the total industry shipments are represented by plants specializing in presses, including forging presses; and 20 percent in punching, shearing, bending, and forming machines.

Shipments of machine tools, metal-forming types, by this industry in 1963 represented 79 percent of all shipments of these products (\$445 million) by all industries. In 1958 the coverage ratio was 80 percent. Other industries shipping machine tools, metal-forming types, include industry 3541, Metal-Cutting Machine Tools, \$17 million; and industry 3548, Metalworking Machinery, N.E.C., over \$12 million.

The product detail shown in table 6A is essentially the same as that collected by the Bureau of the Census each year since 1950 and published in the Current Industrial Report Series M35W, Metalworking Machinery. The Current Industrial Report does not include data on rebuilt machines.

### 3544—SPECIAL DIES AND TOOLS, DIE SETS, JIGS, AND FIXTURES

This industry comprises establishments primarily engaged in manufacturing, on a job or order basis, special tools and fixtures for use with machine tools, hammers, die casting machines, and presses. The products of establishments classified in this industry include a wide variety of special toolings, such as dies; punches; die sets and components, and subpresses; jigs and fixtures; and special checking devices. Establishments primarily engaged in manufacturing metal molds for use with foundry plaster working, rubber working, plastic working, glass working, and similar machinery are also included. For a detailed list of products of industry 3544, refer to table 6A, product codes 3544112 to 3544263.

This industry comprises establishments commonly known as contract tool and die shops; also included are captive tool and die shops of metal-products producers, where such shops were separately operated and separate reports were filed. However, the total value of shipments excludes the captive production of tool and die departments making these products for the exclusive use of the producing establishment.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Special Dies and Tools Industry totaled \$1,389 million. This amount included shipments of special dies and tools, die sets, jigs, and fixtures (primary products) valued at \$1,164 million, shipments of other products (secondary products) valued at \$85 million, and miscellaneous receipts (mainly contract work on materials owned by others) at \$139 million.

This industry's shipments of special dies and tools represented 93 percent of its total product shipments. The industry specialization ratio in 1958 was also 93 percent. Secondary products shipped by this industry in 1963 include carburetors, pistons, and other machine shop products (\$12 million), and job stampings, except automotive (\$11 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 66 percent of the total industry shipments are represented by plants specializing in special dies and tools, die sets, jigs, and fixtures; and 15 percent in industrial molds.

Shipments of special dies and tools, die sets, jigs, and fixtures by this industry represented 72 percent of all shipments of these products (\$1,608 million) by all industries. In 1958 the coverage ratio was 69 percent. Other industries shipping special dies and tools, die sets, jigs, and fixtures include industry 3461, Metal Stampings, \$66 million; and industry 3545, Machine Tool Accessories, \$22 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3544, e.g., industrial molds, 83 percent; and special dies and tools, die sets, jigs, and fixtures, 67 percent.

#### 3545—MACHINE TOOL ACCESSORIES AND MEASURING DEVICES

This industry comprises establishments primarily engaged in manufacturing cutting tools, machinists' precision measuring tools, and attachments and accessories for machine tools and for other metalworking machinery, n.e.c. For a detailed list of products of industry 3545, refer to table 6A, product codes 3545113 to 3545351.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Machine Tool Accessories Industry totaled \$787 million. This amount included shipments of machine tool accessories and measuring devices (primary products) valued at \$616 million, shipments of other products (secondary products) valued at \$122 million, and miscellaneous receipts (mainly products bought and resold) at \$50 million.

This industry's shipments of machine tool accessories represented 83 percent of its total product shipments. The industry specialization ratio in 1958 was 85 percent. Secondary products shipped by this industry in 1963 include special dies and tools, die sets, jigs, and fixtures (\$22 million), and other machine tools (including those designed primarily for home workshops, laboratories, etc.) (\$10 million).

While the primary products of the industry represent more than once class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent to this specialization is indicated in table 8. Approximately 71 percent of the total industry shipments are represented by plants specializing in small cutting tools for machine tools and metalworking machinery.

Shipments of machine tool accessories and measuring devices by this industry represented 84 percent of all shipments of these products (\$732 million) by all industries. In 1958 the coverage ratio was 85 percent. Another industry shipping machine tool accessories and measuring devices was industry 3541, Metal-Cutting Machine Tools, \$69 million.

#### 3548—METALWORKING MACHINERY, EXCEPT MACHINE TOOLS

This industry comprises establishments primarily engaged in manufacturing metalworking machinery such as rolling mill machinery and equipment, power-driven hand tools, welding equipment, wire fabricating machinery and equipment, and automotive maintenance machinery and equipment. Establishments primarily engaged in manufacturing machine tools, metal-cutting types, are classified in industry 3541, and those primarily engaged in manufacturing machine tools, metal-forming types, in industry 3542. For a detailed list of products of industry 3548, refer to table 6A, product codes 3548115 to 3548598.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Metalworking Machinery, N.E.C., Industry totaled \$796 million. This amount included shipments of metalworking machinery, except machine tools, and power-driven hand tools (primary products) valued at \$616 million, shipments of other products (secondary products) valued at \$109 million, and miscellaneous receipts (mainly products bought and resold) at \$72 million.

This industry's shipments of metalworking machinery, n.e.c., represented 85 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent. Secondary products shipped by this industry in 1963 include hoists (\$7 million), and fractional horsepower motors (\$7 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent to this specialization is indicated in table 8. Approximately 46 percent of the total industry shipments are represented by plants specializing in power-driven hand tools; and 35 percent in rolling mill machinery and equipment.

Shipments of metalworking machinery, except machine tools, and power-driven hand tools by this industry in 1963 represented 88 percent of all shipments of these products (\$702 million) by all industries. In 1958 the coverage ratio was 85 percent.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3548, e.g., automobile maintenance equipment, 73 percent; acetylene welding and cutting apparatus, 78 percent; and other metalworking machinery, 75 percent.

# METALWORKING MACHINERY: SIC 354 Value Added by Manufacture by State: 1963

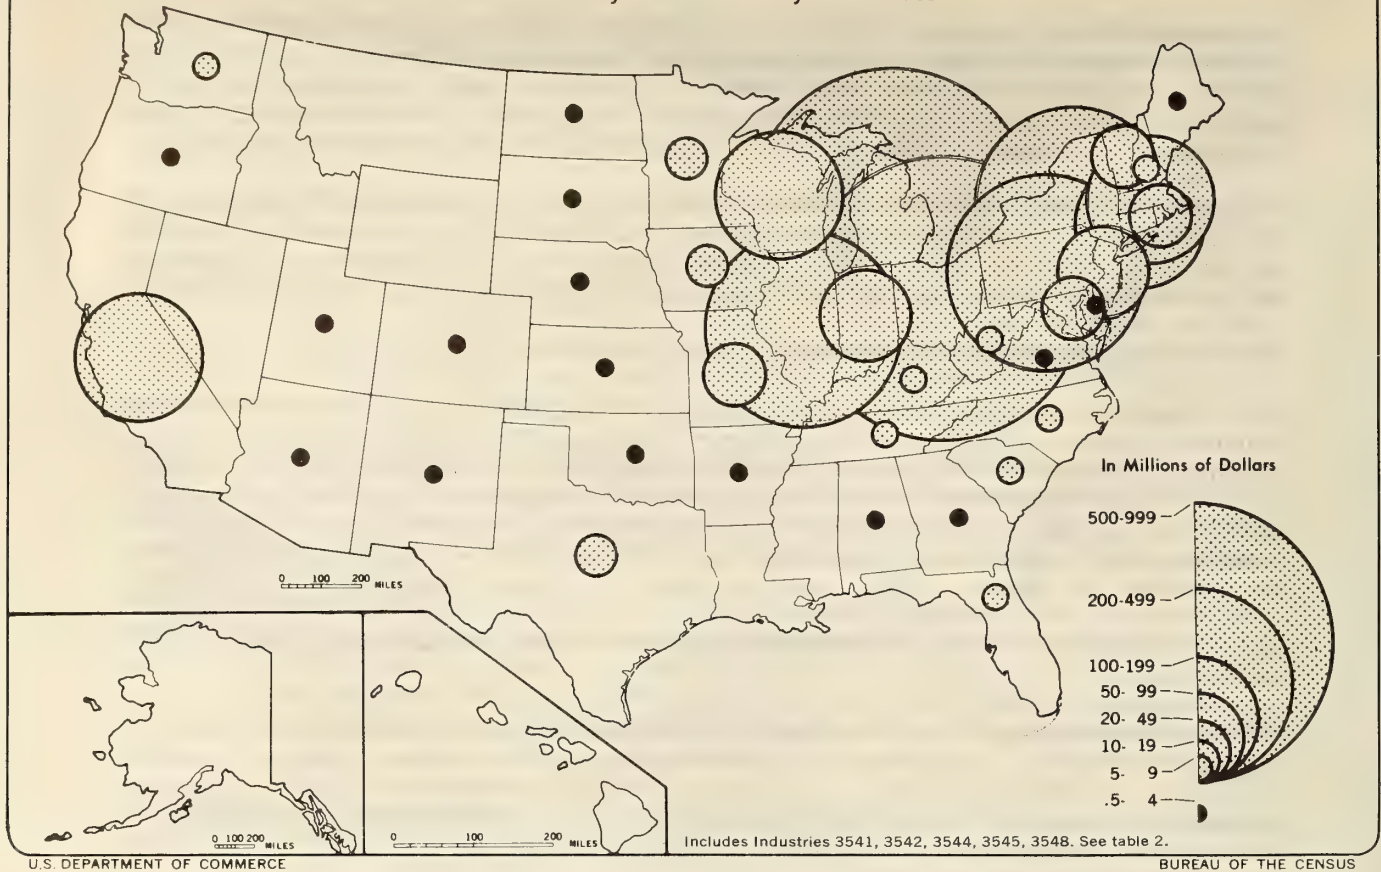

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted  (\$1,000)	Cost of materials  (\$1,000)	Value of shipments  (\$1,000)	Capital expend- itures, new (\$1,000)	Spec- ial- ization ratio (per- cent)	Cov- erage ratio (per- cent)
		Total  (number)	With 20 employ- ees or more (number)	Total  (number)	Payroll  (\$1,000)	Total  (number)	Man-hours  (1,000)	Wages  (\$1,000)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: **All employees:** For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. **Cost of materials:** Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. **Value of shipments:** Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>2</sup>Comparable data are not available for earlier years.

<sup>3</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification; therefore, the data for 1958-1963 are not comparable with those for earlier years.

<sup>1</sup> General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3541, Metal-cutting Machine tools: New England--Maine, 1 (1-19); New Hampshire, 1 (250-499); Massachusetts, 34 (3,738); Rhode Island, 10 (2,500-4,999); West North Central--Iowa, 1 (1-19); Missouri, 13 (223); South Dakota, 1 (100-249); Kansas, 2 (20-99); South Atlantic--Maryland, 1 (1-19); Virginia, 1 (1-19); North Carolina, 1 (1-19); South Carolina, 1 (1-19); Georgia, 1 (1-19); Florida, 3 (1-19); East South Central--Kentucky, 3 (166); Tennessee, 3 (20-99); Alabama, 1 (1-19); West South Central--Oklahoma, 1 (1-19); Mountain--Idaho, 1 (1-19); New Mexico, 2 (20-99); Arizona, 3 (20-99); Utah, 1 (1-19); Pacific--Washington, 3 (20-99); Oregon, 3 (20-99); Hawaii, 1 (1-19).

SIC 3542, Metal-forming Machine Tools: New England--Maine, 1 (20-99); New Hampshire, 1 (20-99); Rhode Island, 2 (1-19); South Atlantic--Maryland, 3 (135); North Carolina, 3 (184); South Carolina, 2 (20-99); Georgia, 2 (20-99); Florida, 3 (20-99); East South Central--Kentucky, 1 (20-99); Alabama, 1 (1-19); West South Central--Arkansas, 1 (1-19); Oklahoma, 1 (20-99); Texas, 4 (20-99); Mountain--Arizona, 1 (1-19); Pacific--Washington, 2 (250-499); Oregon, 1 (20-99); California, 36 (1408).

SIC 3544, Special Dies and Tools: New England--Maine, 7 (20-99); New Hampshire, 15 (161); Vermont, 4 (1-19); West North Central--North Dakota, 1 (1-19); Nebraska, 8 (20-99); South Atlantic--Delaware, 3 (20-99); Virginia, 8 (20-99); West Virginia, 5 (20-99); South Carolina, 9 (20-99); East South Central--Alabama, 11 (198); Mississippi, 2 (1-19); West South Central--Louisiana, 9 (20-99); Oklahoma, 8 (20-99); Mountain--Idaho, 1 (1-19); Colorado, 13 (100-249); New Mexico, 1 (20-99); Utah, 6 (100-249); Pacific--Washington, 11 (20-99); Oregon, 14 (20-99).

SIC 3545, Machine Tool Accessories: New England--Maine, 1 (1-19); New Hampshire, 4 (100-249); Rhode Island, 19 (1,099); West North Central--Minnesota, 8 (425); Iowa, 5 (20-99); Missouri, 6 (513); Nebraska, 1 (1-19); Kansas, 2 (20-99); South Atlantic--Maryland, 3 (20-99); Virginia, 2 (1-19); West Virginia, 2 (1-19); North Carolina, 6 (121); South Carolina, 1 (20-99); Florida, 10 (20-99); East South Central--Kentucky, 4 (245); Tennessee, 5 (250-499); Alabama, 4 (20-99); Mississippi, 1 (1-19); West South Central--Arkansas, 4 (176); Texas, 11 (20-99); Mountain--Colorado, 1 (1-19); Arizona, 3 (1-19); Utah, 1 (1-19); Pacific--Washington, 1 (1-19); Oregon, 3 (1-19).

SIC 3548, Metalworking Machinery, N.E.C.: New England--New Hampshire, 4 (1-19); Vermont, 2 (20-99); Massachusetts, 15 (1343); Rhode Island, 4 (20-99); West North Central--Minnesota, 6 (219); North Dakota, 1 (20-99); South Dakota, 1 (1-19); Nebraska, 2 (20-99); Kansas, 4 (20-99); South Atlantic--Delaware, 4 (203); Maryland, 3 (2500-4999); Virginia, 1 (1-19); West Virginia, 2 (500-999); North Carolina, 2 (1-19); South Carolina, 1 (1,000-2,499); Georgia, 2 (1-19); Florida, 3 (20-99); East South Central--Alabama, 3 (20-99); West South Central--Louisiana, 1 (1-19); Oklahoma, 2 (1-19); Mountain--New Mexico, 2 (20-99); Arizona, 1 (1-19); Pacific--Washington, 2 (1-19); Oregon, 1 (1-19); California, 48 (1,061); Hawaii, 1 (1-19).

<sup>2</sup> This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		( $\$1,000$ )	( $\$1,000$ )	( $\$1,000$ )	( $\$1,000$ )	Col. B Col. B+C (percent)	( $\$1,000$ )	( $\$1,000$ )	( $\$1,000$ )	Col. B Col. F (percent)

n.e.c. Not elsewhere classified.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Total shipments, including interplant transfers (\$1,000)	
		1963	1958
3545- --	MACHINE TOOL ACCESSORIES AND MEASURING DEVICES, TOTAL.....	731,716	470,197
35451 --	Small cutting tools for machine tools and metalworking machinery, total.....	464,432	301,209
	Broaches: (including replaceable blades sold separately; but excluding holders and burnishing bars):		
35451 13	High speed steel.....	19,659	13,385
35451 15	Carbide, solid and tipped (excluding tips and blanks sold separately).....	5,026	
	Twist drills (including combined drills and countersinks; excluding gun drills and masonry drills):		
35451 21	Carbon steel.....	2,785	4,219
	High-speed steel:		
35451 22	Taper shank.....	20,500	45,515
35451 24	Straight shank.....	52,299	
35451 26	Carbide, solid and tipped (excluding tips and blanks sold separately).....	6,992	5,631
35451 27	Countersinks (excluding combination drills and countersinks and interchangeable pilots).....	2,851	6,889
35451 29	Counter bores, including spot facers, etc. (excluding interchangeable pilots).....	6,452	
	Reamers, all types, including finished replaceable blades sold separately (excluding gunreamers):		
35451 31	Carbon steel.....	2,926	3,712
35451 33	High-speed steel.....	15,387	13,457
35451 36	Carbide, solid and tipped (excluding tips and blanks sold separately).....	5,570	275,042
	Hobs (gear, spline, serretion and sprocket):		
35451 41	Unground.....	7,374	3,758
35451 45	Ground.....	5,176	3,607
35451 53	Gear shaper cutters.....	6,562	11,908
35451 55	Gear shaving cutters.....	4,898	
	Milling cutters:		
35451 58	Form relieved cutters, high speed steel and carbide (including multiple thread milling cutters)....	10,274	3,235
	End mills, including solid or tipped, fishtail, die sinking, contour, router, tracer, hollow mill cutters and shell mill, etc. (excluding all inserted blade types):		
35451 61	High speed steel.....	21,207	2711,924
35451 62	Carbide, solid and tipped (excluding tips and blanks sold separately).....	4,219	
	Replaceable inserted blade milling cutters:		
35451 64	High speed steel.....	3,402	4,330
35451 65	Carbide, solid and tipped (excluding tips and blanks sold separately).....	4,812	18,569
35451 68	Slitting saws and screw slotting cutters.....	5,749	2712,320
	Milling cutters, n.e.c.		
35451 66	High-speed steel.....	8,735	
35451 69	Carbide, solid and tipped (excluding tips and blanks sold separately).....	3,785	
	Single-point tools (cutting tools with integral or bonded shank and cutting element):		
	Square, rectangular, round or other cross section, single or double end for turning, planing, shaping, forming, facing, cutting, cutting-off, etc. (excluding circular form tools):		
35451 71	High-speed steel.....	11,149	4,369
35451 74	Carbide, solid and tipped (excluding tips and blanks sold separately).....	24,101	2715,565
35451 75	Other materials (including diamond tipped).....	2,825	
35451 77	Circular form tools, including circular form tool blanks.....	5,133	273,480
	Threading tools:		
	Taps (excluding taps in threading sets and screw plates and inserted chaser types):		
35451 78	Ground thread (high-speed steel).....	35,855	23,114
35451 79	Cut thread (carbon steel and high speed steel).....	6,877	5,647
35451 84	Thread dies, cutting types (excluding inserted chaser-type and dies in threading sets and screw plates).....	10,851	7,381
35451 85	Chasers and blades for taps and dies of inserted blade or chaser-type (excluding die heads and insert or collapsible tap bodies).....	14,274	8,279
35451 89	Other threading tools, including threading sets and screw plates.....	4,278	5,508
	Tips, blanks and inserts (sold separately):		
35451 81	Tips and blanks <sup>28</sup> .....	23,047	33,526
	Inserts: <sup>28</sup>		
35451 82	Throw-away type.....	29,345	
35451 83	Other.....	6,286	
	Other types of cutting tools for machine tools, n.e.c. including gun drills and gunreamers:		
35451 91	Carbon steel.....	5,545	12,208
35451 93	High-speed steel.....	20,815	
35451 97	Carbide, solid and tipped (excluding tips and blanks sold separately).....	20,134	
35451 00	Small cutting tools for machine tools and metalworking machinery, n.s.k.....	17,277	24,631

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3548- --	METALWORKING MACHINERY, EXCEPT MACHINE TOOLS—Continued				
35482 --	Power-driven hand tools, including parts and attachments—Continued				
	Portable power-driven hand tools (power-driven hand tools which are controlled by hand and the position of which in operation need not be fixed, including high cycle):				
	Pneumatic:				
35482 51	Parts, attachments and accessories for pneumatic-powered hand tools (sold separately).....	(X)	43,855	(X)	26,133
35482 61	Powder-actuated hand tools.....	50,916	2,073	(S)	1,839
35482 00	Power-driven hand tools, including parts and attachments, n.s.k.....	(X)	2,699	(X)	12,094
35483 --	Acetylene welding and cutting apparatus.....	(X)	54,648	(X)	38,088
	Welding and cutting apparatus (except electric):				
35483 21	Oxygen-acetylene generating equipment.....	(X)	54,081	(X)	30,35,706
35483 31	All other acetylene welding and cutting apparatus, including machine, and hand-cutting and welding equipment.....				
35483 00	Acetylene welding and cutting apparatus, n.s.k.....	(X)	567	(X)	2,382
35484 11	Automotive maintenance equipment(such as motor analyzers, wheel balancers, spark plug cleaners, wheel spinners, frame straighteners, etc.).....	(X)	47,691	(X)	44,183
35485 --	Other metalworking machinery, except machine tools, n.e.c.....	(X)	36,564	(X)	17,627
35485 45	Drawing machines, draw benches, and machines for weaving and other wire fabricating:				
	As reported on the census of manufactures <sup>1</sup> .....	(X)	28,864	(X)	17,627
	As reported on Census Form M35W <sup>1</sup> .....	1,869	21,320	1,090	17,520
	Machines for weaving and other wire fabricating (barbed wire, poultry netting, woven wire fence machines, etc.).....	1,542	12,900	587	4,645
	Wire drawing machines and draw benches.....	327	8,420	503	12,875
35485 98	All other metalworking machinery, except machine tools.....	(X)	317,308	(X)	(NA)
35485 00	Other metalworking machinery, except machine tools, n.s.k.....	(X)	392	(X)	-
35480 00	Metalworking machinery, except machine tools, n.s.k.....	(X)	20,911	(X)	17,471

Note: The nomenclature used to describe products (Industries 3541 and 3542) included in Current Industrial Reports Series M35W "Metalworking Machinery" was revised for many products between 1958 and 1963, accordingly, these data may not be strictly comparable.

\*Includes some machines with an average value of under \$1,000.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>For these products, data were also collected on Census Quarterly Form M35W. In lieu of asking for detailed statistics on these products in the census of manufactures, respondents were asked to report only value of shipments for specified classes of products for which separate figures had previously been collected on the Quarterly Form M35W. In most cases, the value figures reported in the census of manufactures for each class of products agreed closely with the corresponding figures reported in the quarterly survey. However, there were some differences between the census figures and the quarterly survey figures. These variations were due primarily to the following reasons:

- Census of manufactures reports correctly including all accessories or attachments ordered and shipped with the machine. In some cases the quarterly survey represents only the value of the basic machine. This is the most significant factor for these differences.
- Use of different bases for reporting value (company sales vs. factory production).
- Use of estimates in reporting data on the quarterly survey, whereas census of manufactures figures generally represent more exact shipments figures.
- Better coverage in the census of manufactures program. Quarterly current commodity survey detail for 1963 in most instances have been revised to reflect data from respondents not previously included. For product code 3548545, coverage in the quarterly survey will be supplemented by adding respondents not currently in the survey but making the specified product according to their census of manufactures report.

<sup>2</sup>Some machines with an average value of under \$1,000 for codes 3541231, 3541253, and 3541261 are included with code 3541299.

<sup>3</sup>All machines with an average value of under \$1,000 for codes 3541433, 3541451 and 3541467 are included with "All other grinding machines."

<sup>4</sup>Product code 3541439 included with "All other grinding machines."

<sup>5</sup>Some machines with an average value of under \$1,000 for codes 3541533 and 3541551 are included with code 3541599.

<sup>6</sup>"All other manufacturing and toolroom lathes" included with "All other lathes." Also "All other lathes" includes brush and floor light duty type turret lathes with turret attachments.

<sup>7</sup>Data are limited to ram type turret lathes.

<sup>8</sup>Some machines with an average value of under \$1,000 for codes 3541626, 3541629 and 3541695 are included with code 3541699.

<sup>9</sup>Includes data for codes 3541711-3541799 and 3541811-3541891.

<sup>10</sup>"Vertical and other shapers and slotters" included with "All other metal-cutting machine tools."

<sup>11</sup>All machines with an average value of under \$1,000 for codes 3541763 and 3541767 are included with code 3541769. For 1958, code 3541767 included with code 3541769.

<sup>12</sup>All machines with an average value of under \$1,000 for code 3541772 are included with code 3541779.

<sup>13</sup>Bolt threading machines and all machines with an average value of under \$1,000 for code 3541777 are included with 3541778.

<sup>14</sup>Includes for 1963 reaming machines (including rifling machines); screw and nut slotting machines; electro-erosion machines; ultrasonic machines; and electrolytic machines.

<sup>15</sup>Includes data for product codes 3542411-98 and 3542511-37

<sup>16</sup>Manually operated punching and shearing machines valued at \$1,000 or over are included with other punching and shearing machines.

<sup>17</sup>Machines with an average value of under \$1,000 for codes 3542421 and 3542451 are included with product code 3542498.

<sup>18</sup>For 1963, power type bending and forming machines with an average value of under \$1,000 are included with manual machines.

**TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Footnotes for Table 6A—35C—Continued

<sup>19</sup>For 1963, all machines with an average value of under \$1,000 for codes 3542212, 3542213, 3542215, 3542241, and 3542257 are included with code 3542259, "All other mechanical presses."

<sup>20</sup>Figures for codes 3542255 and 3542258 are included in code 3542259.

<sup>21</sup>For 1963, all machines with an average value of under \$1,000 for codes 3542261, 3542268, and 3542274 are included with 3542279, "All other hydraulic presses."

<sup>22</sup>For 1963, figures for codes 3542271, 3542272, 3542273, and 3542281 are included in code 3542279. For 1958, figures for codes 3542273, and 3542281 are included with code 3542279.

<sup>23</sup>Includes data for product codes 3542311-98 and 3542811-59

<sup>24</sup>Some machines with an average value of under \$1,000 for code 3542811 are included with codes 3542855-59, "Spinning lathes."

<sup>25</sup>In 1958, product code 3544000 has been combined with product code 3544100.

<sup>26</sup>Excludes industrial molds made and used in the same establishment.

<sup>27</sup>For 1958, data for these products include tips sold separately but exclude blanks.

<sup>28</sup>For 1963, respondents were requested to use the following definitions of blanks, tips, and inserts:

Blanks are unground material, cast or formed, from which a solid tool or cutting tip can be made.

Tips are a finished or semifinished form ready to be brazed, soldered, or otherwise bonded to a shank to form a cutting tool.

Inserts are replaceable mechanically held cutting components of cutting tools, ground on all surfaces or on top and bottom.

The 1958 report form carried no definitions for these products.

<sup>29</sup>Data for product code 3548235 are limited to pneumatic drills. Pneumatic screwdrivers and nut-runners are included with "Other pneumatic-powered hand tools."

<sup>30</sup>The data published in the 1958 report for these products have been revised. As a result, it is not possible to publish separate data for these products without revealing the operation of individual companies.

<sup>31</sup>A major portion of this value represents metalworking assembly and automation equipment not elsewhere classified.

**TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value
354	Metalworking machinery.....1963..	( <sup>1</sup> )	( <sup>1</sup> )
	.....1958..	( <sup>1</sup> )	( <sup>1</sup> )

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>These figures represent the sum of 5-digit product class data obtained from Current Industrial Reports Series M35W "Metalworking Machinery" and from the census of manufactures or the annual survey of manufactures.

<sup>3</sup>Source: Current Industrial Reports Series M35W, "Metalworking Machinery."

<sup>4</sup>Product class 35440 included with product class 35441 for 1958-1962.

<sup>5</sup>Excludes industrial molds made and used in the same establishment.

**TABLE 6D Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

362115	Fractional horsepower electric motors (excluding timing motors)	..do.....	-	(NA)	(NA)	(D)	2,007,167
362120	Integral horsepower motors and generators (1 horsepower and over)	.....	-	(NA)	(NA)	(D)	(D)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>2</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual material consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "short forms".

<sup>3</sup>No data are available for 1963 on the quantities of castings, forgings or electric motors and generators produced and consumed in the same establishment.

<sup>4</sup>For 1958, carbon steel structural shapes are included with "All other carbon steel mill shapes and forms".

TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962

Item	Metal-cutting machine tools (SIC 3541)	Metal-forming machine tools (SIC 3542)	Special dies and tools (SIC 3544)	Machine tool accessories (SIC 3545)	Metalworking machinery, n.e.c. (SIC 3548)

Generated less sold.....million kw.-hrs..	8	-	-	(S)	(S)
Aggregate horsepower of prime movers and electric motors driven by purchased energy (December 31), total.....1,000 hp..	351	177	466	293	203
Prime movers, total.....do....	15	5	35	11	13
Driving generators.....do....	10	1	20	7	9
Not driving generators.....do....	5	4	15	4	4
Electric motors, total.....do....	340	172	431	285	193
Driven by purchased energy.....do....	337	172	431	282	190
Driven by energy generated at establishment.....do....	4	-	-	3	4
Aggregate horsepower per 100 production workers.....	894	961	554	821	771

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Stamping, blanking and forming of metals.....	42	34	2	6	344	(D)	(D)	278
Painting, lacquering and enameling on metals.....	84	77	5	2	204	114	(D)	(D)

Note: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	INDUSTRY				
	3541	3542	3544	3545	3548
Total number of establishments in the industry.....	801	366	5,896	1,038	435
Number of establishments which reported one or more of the specified operations.....	390	195	2,603	435	212
Percent of industry production workers in these establishments.....	90-95	85-90	75-80	80-85	85-90
Number of establishments which reported "none" of the operations apply.....	26	6	191	79	18
Percent of industry production workers in these establishments.....	0-5	0-5	0-5	5-10	0-5
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	95-100	85-90	75-80	85-90	90-95

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## SPECIAL INDUSTRY MACHINERY, EXCEPT METALWORKING MACHINERY

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

3551--Food Products Machinery  
3552--Textile Machinery  
3553--Woodworking Machinery  
3554--Paper Industries Machinery  
3555--Printing Trades Machinery and Equipment  
3559--Special Industry Machinery, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3551--FOOD PRODUCTS MACHINERY

This industry comprises establishments primarily engaged in manufacturing machinery for use by the food products and beverage manufacturing industries in the preparation, canning, or packaging of food products; and parts and attachments for such machinery. Establishments primarily engaged in manufacturing industrial refrigeration machinery are classified in Group 358. For a detailed list of products of industry 3551, refer to table 6A, product codes 3551111 to 3551381.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the food products machinery Industry in 1963 totaled \$641 million. This amount included shipments of food products machinery (primary products) valued at \$451 million, shipments of other products (secondary products) valued at \$72 million, and miscellaneous receipts (including significant sales of products bought and resold), at \$118 million.

This industry's shipments of food products machinery in 1963 represented 86 percent of its total product shipments. The industry specialization ratio in 1958 was 87 percent. Secondary products shipped by this industry in 1963 include Special Industry Machinery (\$20 million), and General Industrial Machinery, N.E.C. (\$11 million).

Shipments of food products machinery by this industry in 1963 represented 87 percent of all shipments of these products (\$517 million) by all industries. In 1958 the coverage ratio was 84 percent. Another industry shipping food products machinery was industry 3559, Special Industry Machinery, \$20 million.

#### 3552—TEXTILE MACHINERY

This industry comprises establishments primarily engaged in manufacturing machinery for the textile industries, and extra parts, attachments, and accessories. Establishments primarily engaged in manufacturing domestic or industrial sewing machines are classified in industry 3636. For a detailed list of products of industry 3552, refer to table 6A, product codes 3552113 to 3552298.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Textile Machinery Industry in 1963 totaled \$543 million. This amount included shipments of textile-industries machinery (primary products) valued at \$468 million, shipments of other products (secondary products) valued at \$38 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$37 million.

This industry's shipments of textile-industries machinery in 1963 represented 93 percent of its total product shipments. The industry specialization ratio in 1958 was 87 percent. Secondary products shipped by this industry in 1963 include all other gray iron castings \$4 million, metal stampings \$2 million, food products machinery \$3 million, printing trades machinery \$3 million and other special industry machinery \$5 million.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 55 percent of the total industry shipments are represented by plants specializing in textile machinery; and 40 percent in parts and attachments for textile machinery.

Shipments of textile-industries machinery by this industry in 1963 represented 94 percent of all shipments of these products (\$499 million) by all industries. In 1958 the coverage ratio was also 94 percent.

#### 3553—WOODWORKING MACHINERY

This industry comprises establishments primarily engaged in manufacturing machinery for sawmills, planing mills, cabinet and furniture makers, pattern makers, and veneer workers, establishments primarily engaged in manufacturing hand tools such as planes, axes, drawknives, and hand saws are classified in Group 342; and portable power driven hand tools in industry 3548. For a detailed list of products of industry 3553, refer to table 6A, product codes 3553112 to 3553298.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Woodworking Machinery Industry in 1963 totaled \$253 million. This amount included shipments of woodworking machinery (pri-

mary products), valued at \$179 million, shipments of other products (secondary products) valued at \$52 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$22 million.

This industry's shipments of woodworking machinery in 1963 represented 77 percent of its total product shipments. The industry specialization ratio in 1958 was 78 percent. Secondary products shipped by this industry in 1963 include farm machinery and equipment \$3 million, and grinding and polishing machines \$2 million.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 85 percent of the total industry shipments are represented by plants specializing in woodworking machines, except home workshops.

Shipments of woodworking machinery of this industry in 1963 represented 81 percent of all shipments of these products (\$221 million) by all industries. In 1958 the coverage ratio was 86 percent. Another industry shipping woodworking machinery (primary products) was industry 3541, Metal-Cutting Machine Tools, \$9 million.

The production index for the primary products of the industry increased to 111 in 1963 from the 1958 level of 99. The unit value index for 1963 was 119 compared to 108 in 1958. Both indexes were computed on a basis of 1954 - 100.

#### 3554--PAPER INDUSTRIES MACHINERY

This industry comprises establishments primarily engaged in manufacturing machinery for the paper-pulp, paper, and paper-product industries. Establishments primarily engaged in manufacturing printing trades machinery are classified in industry 3555. For a detailed list of products of industry 3554, refer to table 6A, product codes 3554011 to 3554081.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Paper Industries Machinery Industry in 1963 totaled \$404 million. This amount included shipments of paper industries machinery (primary products), valued at \$313 million, shipments of other products (secondary products) valued at \$42 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$49 million.

This industry's shipments of paper industries machinery in 1963 represented 88 percent of its total product shipments. The industry specialization ratio in 1958 was 93 percent. Secondary products shipped by this industry in 1963 includes special industry machinery n.e.c. (\$14 million), and all other gray iron castings (\$4 million).

Shipments of paper industries machinery of this industry in 1963 represented 90 percent of all shipments of these products (\$348 million) by all industries. In 1958 the coverage ratio was 91 percent. Another industry shipping paper industries machinery (primary products) was industry 3559, Special Industry Machines, N.E.C., \$11 million.

The production index for the primary products of the industry increased to 202 in 1963 from the 1958 level of 144. The unit value index for 1963 was 98 compared to 111 in 1958. Both indexes were computed on a basis of 1954 - 100.

### 3555—PRINTING TRADES MACHINERY AND EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing machinery and equipment used by the printing and bookbinding trades. Establishments primarily engaged in manufacturing textile printing machinery are classified in industry 3552. For a detailed list of products of industry 3555, refer to table 6A, product codes 3555111 to 3555298.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Printing Trades Machinery Industry in 1963 totaled \$448 million. This amount included shipments of printing trades machinery (primary products), valued at \$369 million, shipments of other products (secondary products) valued at \$18 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$61 million.

This industry's shipments of printing trades machinery in 1963 represented 95 percent of its total product shipments. The industry specialization ratio in 1958 was also 95 percent. Secondary products shipped by this industry in 1963 include fabricated rubber products, n.e.c. (\$4 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 40 percent of the total industry shipments are represented by plants specializing in printing presses and 55 percent in other printing trades machinery.

Shipments of printing trades machinery by this industry in 1963 represented 92 percent of all shipments of these products (\$403 million) by all industries. In 1958 the coverage ratio was 91 percent.

The production index for the primary products of the industry decreased to 141 in 1963 from the 1958 level of 118. The unit value index for 1963 was 123 compared to 100 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3559—SPECIAL INDUSTRY MACHINERY, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing special industry machinery, n.e.c., such as smelting and refining equipment, cement making, clay working, cotton ginning, glass making, hat making, incandescent lamp making, leather working, paint making, rubber working, cigar and cigarette making, tobacco working, shoe making, and stone working machinery. For a detailed list of products of industry 3559, refer to table 6A, product codes 3559111 to 3559593.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Special Industry Machinery, N.E.C., Industry in 1963 totaled \$1,015 million. This amount included shipments of special industry machinery (primary products) valued at \$734 million, shipments of other products (secondary products) valued at \$150 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$130 million.

This industry's shipments of special industry machinery, n.e.c., in 1963 represented 83 percent of its total product shipments. The industry specialization ratio in 1958 was also 83 percent. Secondary products shipped by this industry in 1963 include general industrial machinery, n.e.c., (\$16 million), other industrial food products machinery (\$13 million) and paper industries machinery (\$11 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 15 percent of the total industry shipments are represented by plants specializing in plastics-working machinery; 15 percent in chemical manufacturing industry machinery; and 48 percent in other special industrial machinery.

Shipments of special industry machinery, n.e.c., by this industry in 1963 represented 74 percent of all shipments of these products (\$988 million) by all industries. In 1958 the coverage ratio was 77 percent. Other industries shipping special industry machinery (primary products) includes industry 3551, Food Products Machinery, \$14 million; and industry 3541, Machine Tools, Metal Cutting Type, \$16 million.

### SPECIAL INDUSTRY MACHINERY: SIC 355 Value Added by Manufacture by State: 1963

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expend- itures, new (\$1,000)	Spe- cial- ization ratio (per- cent)	Cov- erage ratio (per- cent)
		Total  (number)	With 20 employ- ees or more (number)	Total  (number)	Payroll (\$1,000)	Total  (number)	Man-hours (1,000)	Wages (\$1,000)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: **All employees:** For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). **Production workers:** For 1947 and prior years figures represent an average of 12 monthly figures. **Value added:** Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. **Cost of materials:** Cost of materials prior to 1954 excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. **Value of shipments:** Value of shipments for years prior to 1954 excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available.  
(X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

n.e.c. Not elsewhere classified.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>The figures for 1939 are not entirely comparable with those for earlier years. Value added by manufacture for 1939 on a basis comparable with 1937 was \$58.9 million for "Food-products machinery." No comparable figures are available for "Woodworking machinery" prior to 1939.

<sup>3</sup>"Food-products machinery" and "Paper-industries machinery" were not shown as separate industries prior to 1937, but were included with the industry formerly designated "Machinery, n.e.c.".

<sup>4</sup>The figures for "Textile machinery" for 1937 and earlier years are not entirely comparable with those for later years because they include data for establishments reporting roll covering or re-covering as their major activity. Figures for 1937 include 44 such establishments having \$1.1 million total value of products.

<sup>5</sup>"Textile machinery" was not shown as a separate industry prior to 1919, but was included with the industry formerly designated "Foundry and machine shop products."

<sup>6</sup>Prior to 1935, "Printing-trades machinery" was included among the three discontinued industries "Printers' supplies," "Engravers' materials," and "Foundry and machine shop products." Separate figures are, therefore, not available for earlier years.

<sup>7</sup>The 1957 edition of the Standard Industrial Classification redefined industry 3559 to include establishments primarily engaged in manufacturing electric and fuel-fired nonmetallic processing industrial furnaces, ovens, kilns, and lehrs which were formerly classified in industry 3567, Industrial Furnaces and Ovens. The effect of this change in definition is negligible, amounting to less than one percent both in total number of employees and value of shipments for 1958.

(D) Withheld to avoid disclosing figures for individual companies.

n.e.c. Not elsewhere classified.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3551, Food Products Machinery: New England—Maine, 1 (1-19); Vermont, 2 (1-19); Rhode Island, 1 (1-19); Connecticut, 8 (645); Middle Atlantic—New Jersey, 24 (343); Pennsylvania, 36 (1737); West North Central—North Dakota, 1 (1-19); South Dakota, 1 (1-19); Nebraska, 3 (1-19); South Atlantic—Delaware, 1 (1-19); Virginia, 8 (394); North Carolina, 4 (250-499); East South Central—Tennessee, 2 (1-19); Alabama, 1 (1-19); Mississippi, 2 (1-19); West South Central—Arkansas, 4 (20-99); Oklahoma, 7 (104); Mountain—Idaho, 1 (1-19); Colorado, 3 (100-249); Arizona, 1 (1-19); Utah, 2 (100-249); Nevada, 1 (1-19); Pacific—Oregon, 6 (118); Hawaii, 1 (100-249).

SIC 3552, Textile Machinery: New England—Maine, 5 (450); New Hampshire, 5 (1,465); Connecticut, 7 (20-99); East North Central—Illinois, 7 (866); Michigan, 3 (1-19); Wisconsin, 4 (20-99); West North Central—Minnesota, 1 (1-19); Iowa, 2 (1-19); Missouri, 1 (20-99); Nebraska, 1 (1-19); South Atlantic—Delaware, 1 (20-99); Virginia, 3 (20-99); Florida, 4 (20-99); East South Central—Kentucky, 4 (100-249); Tennessee, 4 (399); Alabama, 4 (100); West South Central—Louisiana, 1 (1-19); Texas, 1 (1-19); Mountain—Utah, 1 (1-19); Pacific—Washington, 1 (1-19); Oregon, 1 (1-19); California, 6 (20-99).

SIC 3553, Woodworking Machinery: New England—Maine, 3 (1-19); New Hampshire, 3 (20-99); Massachusetts, 13 (397); Connecticut, 1 (1-19); Middle Atlantic—New Jersey, 3 (261); Pennsylvania, 9 (514); West North Central—Minnesota, 7 (873); Missouri, 5 (112); South Atlantic—Virginia, 1 (1-19); West Virginia, 1 (1-19); North Carolina, 10 (794); South Carolina, 1 (1-19); Georgia, 3 (185); East South Central—Kentucky, 3 (1-19); Alabama, 2 (100-249); Mississippi, 3 (250-499); West South Central—Arkansas, 3 (20-99); Louisiana, 1 (100-249); Texas, 7 (100-249); Mountain—Colorado, 1 (1-19); New Mexico, 1 (1-19); Utah, 1 (1-19).

SIC 3554, Paper Industries Machinery: New England—Maine, 3 (20-99); Rhode Island, 4 (473); Connecticut, 4 (1-19); East North Central—Indiana, 4 (109); Illinois, 4 (20-99); Michigan, 4 (20-99); West North Central—Minnesota, 3 (20-99); Missouri, 2 (1-19); Kansas, 2 (1-19); South Atlantic—Maryland, 4 (461); Virginia, 2 (100-249); West Virginia, 1 (1-19); South Carolina, 1 (1-19); Florida, 5 (20-99); East South Central—Kentucky, 1 (20-99); Alabama, 3 (20-99); West South Central—Arkansas, 1 (20-99); Louisiana, 2 (20-99); Oklahoma, 1 (1-19); Pacific—Washington, 1 (250-499); Oregon, 2 (20-99); California, 8 (196).

SIC 3555, Printing Trades Machinery: New England—New Hampshire, 4 (455); Vermont, 1 (1-19); Massachusetts, 21 (578); Rhode Island, 3 (1-19); East North Central—Indiana, 3 (20-99); Wisconsin, 8 (106); West North Central—Minnesota, 10 (108); Iowa, 5 (20-99); Nebraska, 3 (1-19); Kansas, 2 (100-249); South Atlantic—Maryland, 7 (20-99); District of Columbia, 1 (1-19); North Carolina, 5 (1-19); Georgia, 5 (20-99); Florida, 1 (1-19); East South Central—Tennessee, 3 (1-19); Alabama, 2 (1-19); West South Central—Louisiana, 1 (1-19); Oklahoma, 2 (20-99); Mountain—Colorado, 1 (1-19); New Mexico, 1 (20-99); Arizona, 2 (1-19); Pacific—Oregon, 1 (1-19).

SIC 3559, Special Industry Machines, N.E.C.: New England—Maine, 5 (20-99); New Hampshire, 3 (1-19); Vermont, 3 (128); West North Central—North Dakota, 2 (20-99); South Dakota, 1 (1-19); Kansas, 6 (197); South Atlantic—Delaware, 5 (500-999); Maryland, 7 (1,135); District of Columbia, 1 (1-19); West Virginia, 3 (20-99); South Carolina, 3 (20-99); East South Central—Kentucky, 9 (100-249); Mississippi, 2 (1-19); West South Central—Arkansas, 1 (20-99); Louisiana, 4 (100-249); Mountain—Idaho, 1 (20-99); Colorado, 5 (176); Arizona, 4 (20-99); Utah, 2 (20-99); Pacific—Washington, 13 (250-499); Hawaii, 1 (1-19).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

**TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

**TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963**

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

35423	Other metal forming machine tools.....	(X)	8,451	(X)					
35442	Industrial molds.....	(X)	2,859	(X)					

- Represents zero. (X) Not applicable.

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing individual company figures: 3443, Boiler Shop Products, and 3522, Farm Machinery and Equipment.<sup>2</sup>The following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing individual company figures: 3532, Mining Machinery and Equipment.<sup>3</sup>Includes chemical manufacturing industries machinery and equipment (product class 35591) valued at \$13,511 thousand.<sup>4</sup>Includes the following product class which totaled \$2 million or more but is withheld to avoid disclosing individual company figures: 3554, Paper Industries Machinery.<sup>5</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3541, Metal-Cutting Machine Tools, and 3559, Special Industry Machines, N.E.C.<sup>6</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3531, Construction Machinery, and 3717, Motor Vehicles and Parts.<sup>7</sup>Includes the following product classes which totaled \$2 million or more but are withheld to avoid disclosing individual company figures: 34990, Fabricated metal products, n.e.c., and 35790, Addressing, dictating, duplicating and other office machines, n.e.c.<sup>8</sup>Includes \$9,157 thousand shipped by industry 3541, Metal-Cutting Machine Tools. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3522, Farm Machinery and Equipment; 3531, Construction Machinery; and, 3542, Metal-Forming Machine Tools.<sup>9</sup>The following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: industry 3621, Motors and Generators.<sup>10</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 33214, All other gray iron castings; 35422, Special industrial fasteners; 35195, Outboard motors; 35197, Parts and accessories for internal combustion engines; and, 37176, Parts and accessories for passenger cars, trucks and busses shipped to other than motor vehicle manufacturers.<sup>11</sup>Includes \$11,217 thousand shipped by industry 3559, Special Industry Machines, N.E.C. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: industry 3315, Steel Wire Drawing, Etc.; industry 3551, Food Products Machinery; and, industry 3731, Ship Building and Repairing.<sup>12</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 34819, Other fabricated wire products, not produced by wire drawers; 35551, Printing presses; 35663, Other mechanical power-transmission equipment; and 35690, General industrial machinery, n.e.c.<sup>13</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3552, Textile Machinery, and 3554, Paper Industries Machinery.<sup>14</sup>Includes \$5,543 thousand shipped by industry 3069, Rubber Products, N.E.C. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3011, Tires and Inner Tubes, 3551, Copper Rolling and Drawing, and 3622, Industrial Controls, 3572, Typewriters.<sup>15</sup>Includes the following product classes which totaled \$2 million or more but are withheld to avoid disclosing individual company figures: 3552, Textile Machinery, and 35790, Office machines, n.e.c.<sup>16</sup>Includes shipments for the specified amounts (in thousands) for the following industries: \$2,996 by industry 3443, Boiler Shop Products; \$13,511 by industry 3551, Food Products Machinery. In addition, the following industries each shipped \$2 million or more, but are withheld to avoid disclosing figures for individual companies: 3536, Hoists, Cranes and Monorails; 3554, Paper Industries Machinery; 3567, Industrial Furnaces and Ovens; and 3742, Railroad and Street Cars.<sup>17</sup>Over \$2 million was shipped by industry 3541, Metal-Cutting Machine Tools. The exact figure is withheld to avoid disclosing data for individual companies.<sup>18</sup>Includes \$16,489 thousand from industry 3541, Metal-Cutting Machine Tools. In addition, over \$2 million was shipped by industry 3554, Paper Industries Machinery.<sup>19</sup>Over \$2 million was shipped by industry 3544, Special Dies and Tools. The exact figure is withheld to avoid disclosing data for individual companies.<sup>20</sup>Includes shipments for the specified amounts (in thousands) for the following industries: \$4,676 by industry 3443, Boiler Shop Products; \$5,227 by industry 3535, Elevators and Moving Stairways; \$4,040 by industry 3548, Metalworking Machinery; \$3,243 by industry 3551, Food Products Machinery; \$5,266 by industry 3552, Textile Machinery; \$2,461 by industry 3553, Woodworking Machinery; \$9,843 by industry 3567, Industrial Furnaces and Ovens; \$2,007 by industry 3569, General Industry Machines, N.E.C.; \$3,010 by industry 3599, Miscellaneous Machinery; and, \$3,984 by industry 3731, Ship Building and Repairing. In addition each of the following industries reported more than \$2 million: 1999, Ordnance and Accessories, N.E.C.; 3211, Flat Glass, 3356, Rolling and Drawing, N.E.C.; 3532, Mining Machinery and Equipment; 3545, Machine Tool Accessories; 3585, Refrigeration Machinery; 3586, Measuring and Dispensing Pumps; 3641, Electric Lamps; 3661, Telephone; Telegraph Apparatus; 3674, Semiconductors; 3861, Photographic Equipment.<sup>21</sup>Includes shipments of over \$2 million for each of the following product classes: 32914, Metal abrasives; 33220, Malleable iron castings; 35414, Grinding and polishing machines; 35422, Presses including forging presses; 35521, Textile machinery; 35642, Dust collection, air purification equipment and air washers; 37292, Guided missile components and subassemblies, n.e.c.; and, 38213, Industrial process instruments.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958	
			Quantity	Value (\$1,000)	Quantity	Value (\$1,000)
3551- --	FOOD PRODUCTS MACHINERY, TOTAL.....	.....	(X)	517,304	(X)	399,846
35511 --	Dairy and milk product plant machinery and equipment, including dairy bottling machines, total.....	.....	(X)	71,589	(X)	64,611
35511 11	Fluid milk bottling filling, packaging and capping machines (glass, paper and other materials).....	.....	(X)	13,166	(X)	9,154
35511 12	Butter, cheese, dry milk, and ice cream packaging machines.....	No. of units.	718	4,772	(X)	(1)
35511 13	Uncasers and casers.....	..do.....	347	4,685	(X)	(1)
35511 14, 16	Washing, sterilizing, capping, and other dairy bottling machines.....	.....	(X)	3,923	(X)	6,849
35511 43	Pasteurizers.....	No. of units.	497	3,921	(NA)	6,244
35511 51	Homogenizers.....	..do.....	288	1,842	398	2,613
35511 73	Ice cream freezers.....	..do.....	4,955	11,789	(NA)	2,947
35511 83	Butter and cheese processing plant machinery and equipment.....	..do.....	755	3,266	(NA)	1,966
35511 91	Dry milk processing plant machinery and equipment.....	..do.....	58	4,642	(X)	132,261
35511 98	Other dairy and milk products processing plants machinery and equipment, including cream separators (capacity over 1,500 pounds per hour).....	.....	(X)	18,193		
35511 00	Dairy and milk products plant machinery and equipment, including dairy bottling machines, n.s.k.....	.....	(X)	1,390	(X)	2,577

35594 51	Tire-building equipment (except tire molds).....		(X)	7,477	(X)	5,987
35594 71	Tire recapping and repairing machinery and equipment, including recapping vulcanizers.....		(X)	15,422	(X)	15,038
35594 98	Other rubber-working machinery including calendering machines and parts for rubber-working machinery, but excluding tire molds.....		(X)	21,621	(X)	6,255
35594 00	Rubber-working machinery and equipment, exeluding tire molds, n.s.k.....		(X)	1,119	(X)	4,410
35595 --	Other special industry machinery and equipment, total <sup>8</sup> .....		(X)	500,225	(X)	414,691
35595 11	Petroleum refinery machinery and equipment, including parts.....		(X)	36,466	(X)	20,672
	Tobacco manufacturing machinery and equipment:					
35595 31	Cigarette-making machines and cigar-making machines.....	No. of units... }	762	5,301	(X)	14,895
35595 33	Cigar, cigarette and tobacco packaging and wrapping machines..	...do.....				
35595 39	Other tobacco manufacturing machinery and equipment and parts.....		(X)	7,679		
35595 41	Clayworking machinery and equipment and parts (brick, tile, and ceramics).....		(X)	11,436	(X)	10,575
35595 43	Cement-making machinery and equipment and parts, other than cement kilns.....		(X)	8,537	(X)	3,827
	Concrete-products machinery and equipment:					
35595 45	Concrete-block machines.....	No. of units...	345	5,358	(NA)	6,660
35595 49	Other concrete-products machinery and equipment and parts, including concrete-pipe making machines.....		(X)	27,819	(X)	16,434
	Glass-making machinery and equipment:					
35595 51	Bottle-forming machines.....	No. of units...	229	10,760	(NA)	10,938
35595 55	Other glass-making machinery and equipment and parts except lehrs.....		(X)	25,159	(X)	10,504
35595 62	Shoemaking and repairing machinery and equipment and parts, including sole stitching machines.....		(X)	26,798	(X)	24,174
35595 73	Cotton-ginning machinery and equipment and parts.....		(X)	41,088	(X)	40,987
35595 81	Metal cleaning, degreasing, finishing, and drying machinery and equipment and parts.....		(X)	47,240	(X)	27,446
35595 85	Electronic tube-making machinery and equipment and parts.....		(X)	9,109	(X)	7,969
35595 89	Other special industrial machinery and equipment and parts (including incadescent lamp-making, paint making, stone-working, hatmaking, leatherworking, jewelers', pharmaceutical, ammunition and explosives loading machinery and equipment, etc.).....		(X)	171,280	(X)	187,636
35595 91	Electric nonmetallic processing industrial furnaces and ovens, including kilns and lehrs.....		(X)	8,980	(X)	2,485
35595 92	Fuel fired kilns (cement, wood, and chemical processing).....	No. of units...	380	21,949	(NA)	14,606
35595 93	Other nonmetallic processing industrial furnaces and ovens and parts, including kilns and lehrs.....		(X)	10,495	(X)	4,859
35595 00	Other special industry machinery and equipment, n.s.k.....		(X)	24,771	(X)	10,024
35590 00	Special industry machinery, n.s.k.....		(X)	32,349	(X)	35,736

- Represents zero. (NA) Not available. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

(X) Not applicable.

<sup>1</sup>Figures for "Butter, cheese, dry milk and ice cream packaging machines" and "Uncasers and casers" are included with "Other dairy and milk products processing plant machinery and equipment."

<sup>2</sup>Includes power-driven machines for use by hotels, restaurants, institutions, meat markets, butcher shops, food-product stores, and similar commercial organizations.

<sup>3</sup>For combination slicing and wrapping machines the number and value of slicing units are included with slicing machines and the number and value of wrapping units with wrapping machines.

<sup>4</sup>For 1958 "Labeling machines" are included with "Other food bottling machinery, except dairy."

<sup>5</sup>Figures for "Uncasers and casers" are included with "Carbonators and other food bottling machinery, except dairy."

<sup>6</sup>Data for combing machines (product code 3552132) are included with data for other fiber-to-fabric machinery (product code 3552155).

<sup>7</sup>Data for power looms (product codes 3552164 and 3552168) are included with data for other fabric machinery (product code 3552184).

<sup>8</sup>Some equipment in this product class may be leased rather than sold outright. For leased equipment, estimates of the value of products produced were reported. These estimates approximate the value of the products had they been sold outright and are based on market values of the products, tax or insurance valuations, etc.

TABLE 6B. **Product Classes—Indexes of Production and Unit Value for Primary Products, Shipped by All Producers: 1963 and 1958**

35590	Special industrial machinery, n.s.k.....	32,349	(S)	(S)	(S)	(S)	35,736	10,269	25,674

- Represents zero. n.s.k. Not specified by kind.

(S) Withheld because data did not meet publication standards on the basis of consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments		Product class and geographic area	Value of shipments

Driven by purchased energy.....do....	130	159	42	112	106	246
Driven by energy generated at establishment.....do....	(Z)	19	-	-	1	11
Aggregate horsepower per 100 production workers.....	636	660	484	920	659	809

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

-Represents zero. (Z) Less than 500 hp.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); cost of fuel less than \$50 thousand; quantity of electric energy less than 5 million kw.-hrs.; to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

n.e.c. Not elsewhere classified.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Note: Very small establishments were not requested to report their metalworking operations and in some instances a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production worker employment on the last line of the table below.

Item	Industry					
	3551	3552	3553	3554	3555	3559
Total number of establishments in the industry.....	681	561	249	217	490	1,092
Number of establishments which reported one or more of the specified operations.....	353	261	143	125	162	537
Percent of industry production workers in these establishments.....	80-85	80-85	90-95	90-95	80-85	85-90
Number of establishments which reported "none" of the operations apply.....	14	43	5	10	54	31
Percent of industry production workers in these establishments.....	0-5	0-5	0-5	0-5	0-5	0-5
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	80-85	80-85	90-95	95-100	85-90	85-90

- Represents zero. n.e.c. Not elsewhere classified.

(D) Withheld to avoid disclosing figures for individual companies.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## GENERAL INDUSTRIAL MACHINERY AND EQUIPMENT

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3561—Pumps, Air and Gas Compressors, and Pumping Equipment
- 3562—Ball and Roller Bearings
- 3564—Blowers, Exhaust and Ventilating Fans
- 3565—Industrial Patterns
- 3566—Mechanical Power Transmission Equipment, Except Ball and Roller Bearings
- 3567—Industrial Process Furnaces and Ovens
- 3569—General Industrial Machinery and Equipment, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3561—PUMPS, AIR AND GAS COMPRESSORS, AND PUMPING EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing pumps, compressors, and pumping equipment for general industrial use. Establishments primarily engaged in manufacturing measuring and dispensing pumps for gasoline service station use are classified in industry 3586; and ice making, refrigerating, and air conditioning units in industry 3585. For a detailed list of products of industry 3561, refer to table 6A, product codes 3561101 to 3561611.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Pumps and Compressors Industry totaled \$1,419 million. This amount included shipments of pumps and compressors (primary products) valued at \$1,070 million, shipments of other products (secondary products) valued at \$186 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$163 million.

This industry's shipments of pumps and compressors represented 85 percent of its total product shipments. The industry specialization ratio in 1958 was 87 percent. Secondary

products shipped by this industry in 1963 include other metal valves and fittings (\$22 million), and parts and accessories for internal combustion engines (\$12 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 29 percent of the total industry shipments are represented by plants specializing in industrial pumps, except fluid power; and 27 percent in air and gas compressors, except refrigeration.

Shipments of pumps and compressors by this industry represented 86 percent of all shipments of these products (\$1,249 million) by all industries. In 1958 the coverage ratio was 85 percent. Other industries shipping pumps and compressors (primary products) include industry 3519, Internal Combustion Engines, \$26 million; and industry 3494, Valves and Pipe Fittings, \$16 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3561, e.g., Domestic water systems and pumps, 93 percent; and Hydraulic fluid power pumps and motors, 76 percent.

The production index for the primary products of the industry increased to 147 in 1963 from the 1958 level of 101. The unit value index for 1963 was 95 compared to 113 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3562—BALL AND ROLLER BEARINGS

This industry comprises establishments primarily engaged in manufacturing ball and roller bearings and parts. Establishments primarily engaged in manufacturing bearings, except ball and roller, are classified in industry 3566. For a detailed list of products of industry 3562, refer to table 6A, product codes 3562111 to 3562451.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Ball and Roller Bearings Industry totaled \$999 million. This amount included shipments of ball and roller bearings (primary products) valued at \$946 million, shipments of other products (secondary products) valued at \$32 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$21 million.

This industry's shipments of ball and roller bearings represented 97 percent of its total product shipments. The industry specialization ratio in 1958 was 98 percent. Secondary products shipped by this industry in 1963 include power transmission equipment (\$5 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 48 percent of the total industry shipments are represented by plants specializing in roller bearings, complete; and 42 percent in ball bearings, complete.

Shipments of ball and roller bearings by this industry represented 98 percent of all shipments of these products (\$961 million) by all industries. In 1958 the coverage ratio was also 98 percent. Other industries shipping ball and roller bearings include industry 3566, Power Transmission Equipment, \$12 million.

### 3564—BLOWERS, EXHAUST AND VENTILATING FANS

This industry comprises establishments primarily engaged in manufacturing blowers, and exhaust and ventilating fans for general industrial, commercial, and household use. Establishments primarily engaged in manufacturing complete air conditioning units are classified in industry 3585, and free air circulating fans for use on desks, pedestals, or wall brackets in industry 3634. For a detailed list of products of industry 3564, refer to table 6A, product codes 3564111 to 3564255.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Blowers and Fans Industry totaled \$315 million. This amount included shipments of blowers and fans (primary products) valued at \$237 million, shipments of other products (secondary products) valued at \$51 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$28 million.

This industry's shipments of blowers and fans represented 83 percent of its total product shipments. The industry specialization ratio in 1958 was also 83 percent. Secondary products shipped by this industry in 1963 includes nonelectric heating equipment (\$9 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 69 percent of the total industry shipments are represented by plants specializing in industrial fans and blowers; and 24 percent in dust collection, air purification equipment, and air washers.

Shipments of blowers and fans by this industry represented 79 percent of all shipments of these products (\$299 million) by all industries. In 1958 the coverage ratio was also 79 percent. Other industries shipping blowers and fans include industry 3585, Refrigeration Machinery, \$12 million; and industry 3444, Sheet Metal Work, \$8 million.

### 3565—INDUSTRIAL PATTERNS

This industry comprises establishments primarily engaged in manufacturing industrial patterns. For a detailed list of products of industry 3565, refer to table 6A, product codes 3565011 to 3565098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Industrial Patterns Industry totaled \$141 million. This amount included shipments of industrial patterns (primary products) valued at \$128 million, shipments of other products (secondary products) valued at \$6 million, and miscellaneous receipts at \$7 million.

This industry's shipments of industrial patterns represented 96 percent of its total product shipments. The industry specialization ratio in 1958 was 95 percent.

Shipments of industrial patterns by this industry represented 80 percent of all shipments of these products (\$160 million) by all industries. In 1958 the coverage ratio was 74 percent. Other industries shipping industrial patterns (primary products) include industry 3321, Gray Iron Foundries, \$10 million; and industry 3323, Steel Foundries, \$6 million.

### 3566—MECHANICAL POWER TRANSMISSION EQUIPMENT, EXCEPT BALL AND ROLLER BEARINGS

This industry comprises establishments primarily engaged in manufacturing mechanical power transmission equipment and parts for industrial machinery. Establishments primarily engaged in manufacturing automotive, tank, and tractor power transmission equipment are classified in industry 3714 (census industry 3717); aircraft power transmission equipment in industry 3729; and ball and roller bearings in industry 3562. For a detailed list of products of industry 3566, refer to table 6A, product codes 3566115 to 3566398.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Power Transmission Equipment Industry totaled \$889 million. This amount included shipments of power transmission equipment (primary products) valued at \$696 million, shipments of other products (secondary products) valued at \$130 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$63 million.

This industry's shipments of mechanical power transmission equipment represented 84 percent of its total product shipments. The industry specialization ratio in 1958 was 83 percent. Secondary products shipped by this industry in 1963 include motor vehicles and parts (\$30 million), and conveyors (\$19 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 37 percent of the total industry shipments are represented by plants specializing in speed changers, industrial high-speed drives and gears.

Shipments of power transmission equipment by this industry represented 79 percent of all shipments of these products (\$883 million) by all industries. In 1958 the coverage ratio was also 79 percent. Other industries shipping mechanical power transmission equipment (primary products) include industry 3717, Motor Vehicles and Parts, \$34 million; and industry 3621, Motors and Generators, \$22 million.

### 3567—INDUSTRIAL PROCESS FURNACES AND OVENS

This industry comprises establishments primarily engaged in manufacturing industrial process furnaces, ovens, induction and dielectric heating equipment, and related devices. For a detailed list of products of industry 3567, refer to table 6A, product codes 3567111 to 3567391.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Industrial Furnaces and Ovens Industry totaled \$279 million. This amount included shipments of industrial furnaces and ovens (primary products) valued at \$202 million, shipments of other products (secondary products) valued at \$40 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$37 million.

This industry's shipments of industrial furnaces and ovens represented 83 percent of its total product shipments. The industry specialization ratio in 1958 was 85 percent. Secondary products shipped by this industry in 1963 include special industry machines, n.e.c. (\$15 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 41 percent of the total industry shipments are represented by plants specializing in high frequency induction and dielectric heating equipment and 34 percent in fuel-fired industrial furnaces and ovens, metal processing.

Shipments of industrial furnaces and ovens by this industry represented 85 percent of all shipments of these products (\$238 million) by all industries. In 1958 the coverage ratio was 83 percent.

The production index for the primary products of the industry increased to 126 in 1963 from the 1958 level of 91. The unit value index for 1963 was 111 compared to 114 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3569—GENERAL INDUSTRIAL MACHINERY AND EQUIPMENT, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing machinery, equipment, and components for general industrial use, and for which no special classification is provided. Machine shops primarily engaged in producing machine and equipment parts, usually on a job or order basis, are classified in industry 3599. For a detailed list of products of industry 3569, refer to table 6A, product codes 3569012 to 3569098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the General Industry Machines, N.E.C., Industry totaled \$691 million. This amount included shipments of general industry machines, n.e.c., (primary products) valued at \$463 million, shipments of other products (secondary products) valued at \$93 million, and miscellaneous receipts (mainly receipts for research and development) at \$136 million.

This industry's shipments of general industry machines, n.e.c., represented 83 percent of its total product shipments (primary and secondary). The industry specialization ratio in 1958 was 87 percent. Secondary products shipped by this industry in 1963 include nonelectric heating equipment (\$15 million) and metalworking machines, n.e.c. (\$8 million).

Shipments of general industry machines, n.e.c., by this industry represented 70 percent of all shipments of these products (\$664 million) by all industries. In 1958 the coverage ratio was 74 percent. Other industries shipping general industry machinery, n.e.c. (primary products) include industry 3559, Special Industry Machines, N.E.C., \$16 million; and industry 3599, Miscellaneous Machinery, \$13 million.

# GENERAL INDUSTRIAL MACHINERY: SIC 356 Value Added by Manufacture by State: 1963

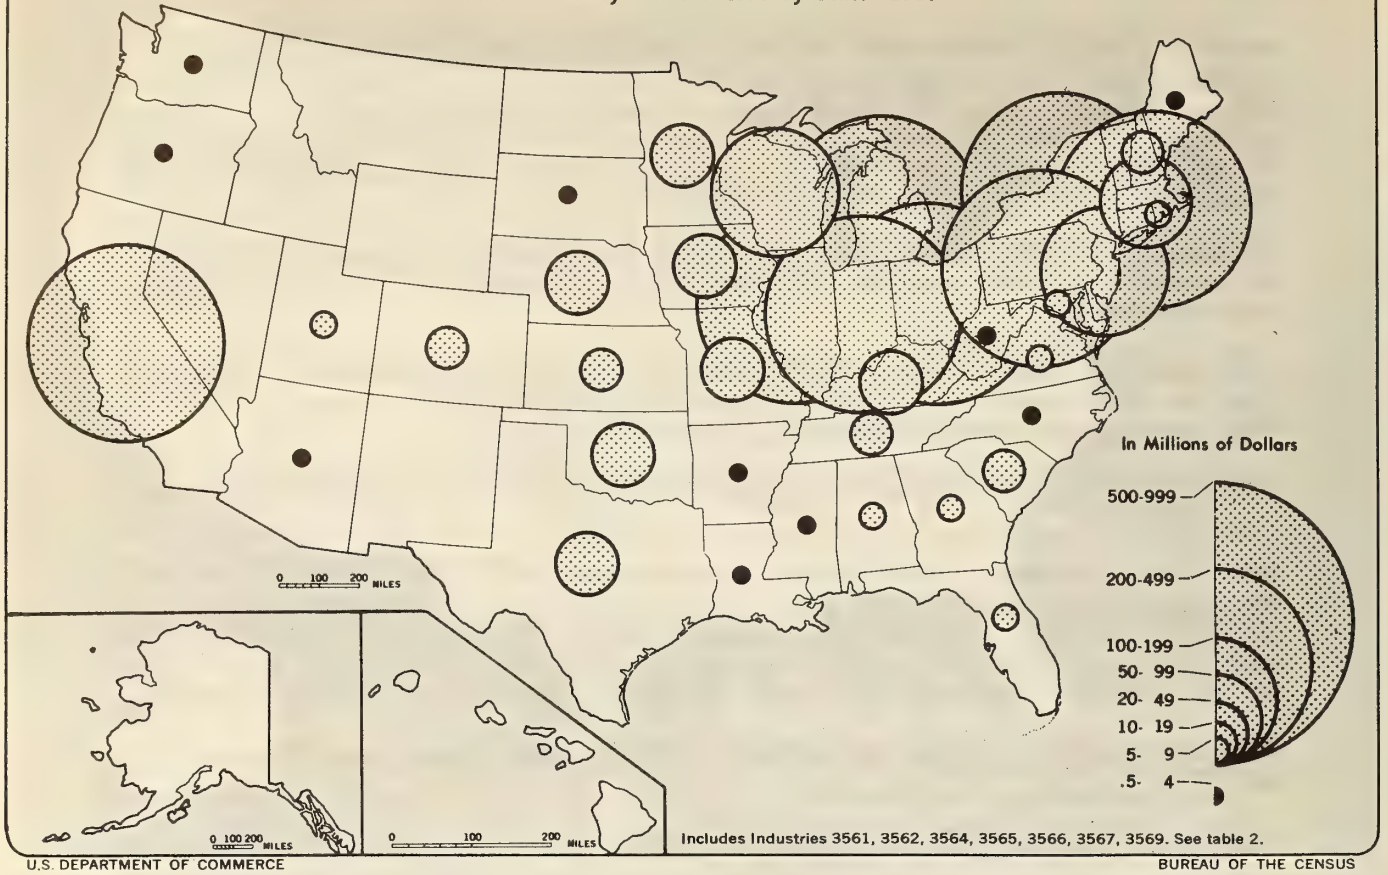

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted  (\$1,000)	Cost of materials  (\$1,000)	Value of shipments  (\$1,000)	Capital expend- itures, new  (\$1,000)	Spe- cial- ization ratio (per- cent)	Cov- erage ratio (per- cent)
		Total  (number)	With 20 employ- ees or more  (number)	Total  (number)	Payroll  (\$1,000)	Total  (number)	Man-hours  (1,000)	Wages  (\$1,000)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>"Pumps and Compressors" were formerly included with the discontinued classification "Pumps (hand and power), pumping equipment, and air compressors." Separate figures are, therefore, not available prior to 1937.

<sup>3</sup>No comparable figures are available for earlier years.

<sup>4</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification. Accordingly, the data for 1958-1963 are not comparable with those for earlier years.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958

n.e.c. Not elsewhere classified.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3561, Pumps and Compressors: New England—New Hampshire, 1 (20-99); Rhode Island, 4 (250-499); Connecticut, 7 (1,525); West North Central—Minnesota, 11 (454); South Dakota, 1 (1-19); Nebraska, 3 (873); Kansas, 9 (500-999); South Atlantic—Delaware, 1 (1-19); Maryland, 5 (20-99); Virginia, 2 (20-99); West Virginia, 2 (1-19); East South Central—Kentucky, 3 (20-99); Tennessee, 5 (310); Alabama, 1 (100-249); Mississippi, 3 (100-249); West South Central—Arkansas, 3 (261); Louisiana, 3 (1-19); Mountain—Wyoming, 1 (1-19); Colorado, 6 (196); New Mexico, 1 (1-19); Arizona, 2 (20-99); Utah, 2 (100-249); Nevada, 1 (1-19); Pacific—Washington, 3 (1-19); Oregon, 3 (20-99); Hawaii, 1 (1-19).

SIC 3562, Ball and Roller Bearings: New England—New Hampshire, 4 (1,000-2,499); Massachusetts, 4 (250-499); Middle Atlantic—New Jersey, 8 (3,959); Pennsylvania, 17 (5,127); East North Central—Ohio, 9 (10,700); Indiana, 8 (1,000-2,499); Wisconsin, 1 (20-99); West North Central—Missouri, 1 (1-19); Kansas, 1 (20-99); South Atlantic—Virginia, 2 (100-249); North Carolina, 1 (20-99); South Carolina, 4 (455); Florida, 1 (1-19); East South Central—Tennessee, 1 (100-249); West South Central—Oklahoma, 2 (250-499).

SIC 3564, Blowers and Fans: New England—Massachusetts, 10 (1,000-2,499); Connecticut, 6 (1,000-2,499); West North Central—Iowa, 1 (1-19); Missouri, 5 (20-99); Kansas, 2 (1-19); South Atlantic—Delaware, 3 (1-19); North Carolina, 2 (20-99); East South Central—Kentucky, 4 (911); Tennessee, 7 (20-99); Alabama, 2 (100-249); Mississippi, 1 (1-19); West South Central—Arkansas, 1 (20-99); Louisiana, 3 (20-99); Oklahoma, 1 (20-99); Mountain—Colorado, 3 (20-99); Arizona, 3 (1-19); Utah, 1 (1-19); Pacific—Washington, 4 (20-99); Oregon, 1 (1-19).

SIC 3565, Industrial Patterns: New England—Maine, 1 (1-19); New Hampshire, 5 (1-19); Vermont, 1 (1-19); Rhode Island, 9 (20-99); Middle Atlantic—New Jersey, 54 (185); Pennsylvania, 96 (646); East North Central—Ohio, 152 (1,157); Wisconsin, 80 (574); West North Central—Minnesota, 19 (102); Iowa, 8 (20-99); Nebraska, 3 (1-19); Kansas, 10 (20-99); South Atlantic—Delaware, 2 (1-19); Maryland, 4 (20-99); Virginia, 3 (20-99); West Virginia, 3 (20-99); North Carolina, 6 (20-99); South Carolina, 2 (1-19); Georgia, 3 (1-19); Florida, 2 (1-19); East South Central—Kentucky, 6 (1-19); Tennessee, 5 (20-99); West South Central—Louisiana, 2 (1-19); Oklahoma, 8 (20-99); Texas, 20 (1-99); Mountain—Colorado, 9 (20-99); Arizona, 2 (1-19); Utah, 1 (1-19); Pacific—Washington, 9 (20-99); Oregon, 10 (20-99).

SIC 3566, Power Transmission Equipment: New England—Maine, 1 (1-19); Vermont, 2 (20-99); Rhode Island, 2 (20-99); West North Central—Nebraska, 1 (20-99); Kansas, 3 (100-249); South Atlantic—Maryland, 3 (923); South Carolina, 2 (100-249); Georgia, 2 (1-19); Florida, 3 (1-19); East South Central—Kentucky, 2 (250-499); Tennessee, 1 (20-99); West South Central—Arkansas, 3 (20-99); Oklahoma, 3 (20-99); Mountain—Colorado, 5 (256); Pacific—Washington, 2 (20-99); Oregon, 5 (20-99).

SIC 3567, Industrial Furnaces and Ovens: New England—New Hampshire, 2 (100-249); Rhode Island, 3 (183); Connecticut, 4 (100-249); East North Central—Indiana, 5 (500-999); Wisconsin, 2 (250-499); West North Central—Iowa, 1 (1-19); Missouri, 3 (100-249); Kansas, 1 (1-19); South Atlantic—Maryland, 1 (1-19); West Virginia, 1 (1-19); North Carolina, 1 (1-19); Florida, 3 (1-19); East South Central—Alabama, 1 (20-99); West South Central—Oklahoma, 1 (1-19); Texas, 4 (20-99); Mountain—Colorado, 1 (100-249); Arizona, 1 (1-19); Utah, 1 (1-19); Pacific—Washington, 5 (20-99); Oregon, 1 (1-19).

SIC 3569, General Industry Machines, N.E.C.: New England—Maine, 1 (100-249); New Hampshire, 2 (250-499); Rhode Island, 3 (177); West North Central—North Dakota, 1 (1-19); South Dakota, 2 (100-249); Nebraska, 3 (149); South Atlantic—Delaware, 1 (1-19); Maryland, 7 (20-99); Virginia, 4 (20-99); West Virginia, 2 (20-99); South Carolina, 2 (20-99); Georgia, 3 (238); East South Central—Kentucky, 5 (250-499); Tennessee, 7 (579); Mississippi, 2 (20-99); West South Central—Arkansas, 3 (20-99); Louisiana, 2 (100-249); Oklahoma, 7 (276); Mountain—Colorado, 2 (20-99); Arizona, 1 (20-99); Utah, 4 (329); Pacific—Washington, 7 (166); Oregon, 6 (20-99).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

- Represents zero. n.e.c. Not elsewhere classified.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left.

<sup>1</sup>Includes capital expenditures for plants under construction but not in operation which constitute a small proportion of the total for the size class.

TABLE 5A. **Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B+C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)

NOTE: See Introduction for an explanation of terms used.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Includes \$3.9 million shipped by industry 3494, Valves and Pipe Fittings, \$2.5 million by industry 3531, Construction Machinery, and \$6.9 million by industry 3621, Motors and Generators. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3522, Farm Machinery and Equipment; 3561, Pumps and Compressors; 3541, Metal-Cutting Machine Tools; 3586, Measuring and Dispensing Pumps; 3589, Service Industry Machines, N.E.C.; and, 3731, Ship Building and Repairing.

<sup>2</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3494, Valves and Pipe Fittings; 3599, Miscellaneous Machinery; and, 3729, Aircraft Equipment, N.E.C.

<sup>3</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3443, Boiler Shop Products; 3511, Steam Engines and Turbines; and, 3519, Internal Combustion Engines.

<sup>4</sup>Includes \$2.1 million shipped by industry 3494, Valves and Pipe Fittings; and \$6.7 million by industry 3533, Oil Field Machinery.

<sup>5</sup>Includes \$3.8 million shipped by industry 3533, Oil Field Machinery. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3519, Internal Combustion Engines; 3621, Motors and Generators; 3644, Noncurrent Carrying Devices; and, 3729, Aircraft Equipment, N.E.C.

<sup>6</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 30692, Rubber hose and tubing; 33230, Steel castings; 34336, Other heating equipment (except electric) and parts for nonelectric heating equipment; 35112, Steam, gas, and hydraulic turbine and parts, steam engines and parts; and 35334, Other oil and gas field machinery and tools (except pumps), including water wells.

<sup>7</sup>Includes the following product classes which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 33620, Copper and copper-base alloy castings; 34990, Fabricated metal products, n.e.c.; 35351, Conveyors and conveying equipment (except hoists and farm elevators); and 37175, Parts and accessories for passenger cars, trucks, and busses, shipped to other than motor vehicle manufacturers.

<sup>8</sup>Includes \$6.8 million shipped by industry 3443, Boiler Shop Products, and \$8.9 million by industry 3585, Refrigeration Machinery. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3444, Sheet Metal Work; 3494, Valves and Pipe Fittings; 3599, Miscellaneous Machinery; and 3621, Motors and Generators.

<sup>9</sup>Includes \$4.9 million shipped by industry 3444, Sheet Metal Work, and \$2.9 million by industry 3585, Refrigeration Machinery. In addition, the following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3559, Special Industry Machines, N.E.C.

<sup>10</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 35663, Other mechanical power transmission equipment; 35851, Heat transfer equipment; 36430, Current carrying wiring devices, including lightning rods; and, 36992, Lamp bulb components (except glass flasks) and electrical products.

<sup>11</sup>Includes \$3.8 million shipped by industry 3362, Brass, Bronze, Copper Castings; \$3.8 million by industry 3562, Ball and Roller Bearings; and \$14.4 million by industry 3717, Motor Vehicles and Parts. In addition, the following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3722, Aircraft Engines and Parts.

<sup>12</sup>Includes \$3.4 million shipped by industry 3541, Metal-Cutting Machine Tools, and \$21.6 million by industry 3621, Motors and Generators. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3511, Steam Engines and Turbines; 3533, Oil Field Machinery; 3548, Metalworking Machinery, N.E.C.; 3561, Pumps and Compressors; 3717, Motor Vehicles and Parts; 3729, Aircraft Equipment, N.E.C.

<sup>13</sup>Includes \$17.2 million shipped by industry 3717, Motor Vehicles and Parts. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3431, Metal Plumbing Fixtures; 3532, Mining Machinery and Equipment; 3535, Conveyors; 3554, Paper Industries Machinery; 3564, Blowers and Fans; 3722, Aircraft Engines and Parts; and 3821, Mechanical Measuring Devices.

<sup>14</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 33230, Steel castings; 35370, Industrial trucks and tractors; and 35623, Mounted bearings.

<sup>15</sup>The following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3441, Fabricated Structural Steel.

<sup>16</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3446, Architectural Metal Work; 3693, X-Ray Apparatus and Tubes; and 3717, Motor Vehicles and Parts.

<sup>17</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 35322, Crushing, pulverizing, and screening plants, stationary, and 38213, Industrial process instruments.

<sup>18</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3079, Plastics Products, N.E.C.; 3296, Mineral Wool; 3444, Sheet Metal Work; 3498, Fabricated Pipe and Fittings; 3522, Farm Machinery and Equipment; 3531, Construction Machinery; 3532, Mining Machinery and Equipment; 3534, Elevators and Moving Stairways; 3541, Metal-Cutting Machine Tools; 3582, Commercial Laundry Equipment; 3585, Refrigeration Machinery; 3621, Motors and Generators; 3731, Ship Building and Repairing; and 3821, Mechanical Measuring Devices.

<sup>19</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 28993, Essential oils, fireworks, and pyrotechnics, chemicals and chemical preparations, n.e.c.; 34612, Job stampings, except automotive.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3561- --	PUMPS AND COMPRESSORS, TOTAL <sup>1</sup> .....	(X)	1,249,219	(X)	<sup>1</sup> 1,015,841
35611 --	Industrial pumps, except hydraulic fluid power:				
	As reported in the census of manufactures.....	(X)	<sup>2</sup> 321,896	(X)	295,373
	As reported on Census Annual Form MA-35P.....	(X)	<sup>2</sup> 320,795	(X)	(NA)
	Value of drivers (reported separately).....	(X)	<sup>3</sup> 71,822	(X)	(NA)
	Reciprocating pumps:				
35611 01	Direct acting steam driven.....	2,195	3,190	1,923	4,609
35611 03	Power operated, other than steam.....	58,794	20,147	45,485	16,716
35611 07	Turbine pumps, vertical (including deep well).....	21,239	31,214	18,217	36,310
	Centrifugal pumps:				
	Single stage, single suction, close coupled:				
35611 11	1/2" discharge outlet and under.....	35,372	1,443	166,882	10,575
35611 12	3/4" and 1" discharge outlet.....	136,200	6,169		
35611 14	1-1/4" and 1-1/2" discharge outlet.....	111,355	8,194	58,772	7,295
35611 15	2" and 2-1/2" discharge outlet.....	41,774	5,891	26,783	5,692
35611 16	3" and 4" discharge outlet.....	22,897	6,527	13,144	6,005
35611 19	Over 4" discharge outlet.....	4,212	2,800	2,614	2,308
	Single stage, single suction, frame mounted:				
35611 21	1/2" discharge outlet and under.....	13,567	495	129,573	7,180
35611 22	3/4" and 1" discharge outlet.....	142,070	7,184		
35611 23	1-1/4" and 1-1/2" discharge outlet.....	213,583	11,634	148,253	11,273
35611 24	2" and 2-1/2" discharge outlet.....	43,008	7,776	34,515	7,180
35611 25	3" discharge outlet.....	24,173	6,071	19,915	5,824
35611 26	4" to 6" discharge outlet.....	16,329	9,485	9,117	7,992
35611 29	Over 6" discharge outlet.....	2,072	4,819	1,244	2,515
	Single stage, double suction:				
35611 42	Under 4" discharge outlet.....	9,896	2,685	5,460	2,934
35611 44	4" and 5" discharge outlet.....	4,138	3,728	4,089	4,969
35611 46	6" and 7" discharge outlet.....	2,012	2,068	1,480	2,491
35611 48	8" and 12" discharge outlet.....	2,145	4,756	2,004	6,166
35611 49	Over 12" discharge outlet.....	431	3,160	525	5,289
	Multistage (single or double suction):				
35611 52	1-1/2" discharge outlet and under.....	9,495	1,546	8,273	4,692
35611 54	2" and 3" discharge outlet.....	3,992	5,614	2,581	7,685
35611 56	4" and 5" discharge outlet.....	1,455	4,585	829	4,909
35611 58	6" and 7" discharge outlet.....	978	4,757	535	5,234
35611 59	8" and over discharge outlet.....	535	11,449	222	5,098
	Propeller and mixed flow:				
35611 62	20" and under.....	1,577	3,925	1,649	5,910
35611 64	Over 20".....	538	7,023		
	All other centrifugal pumps (including can, etc.):				
35611 65	1-1/2" discharge outlet and under.....	136,906	3,668	(NA)	44,889
35611 66	2" to 6" discharge outlet.....	25,381	7,255		
35611 69	Over 6" discharge outlet.....	2,409	10,482		
	Rotary pumps:				
	100 p.s.i. and under, designed pressure:				
35611 72	10 g.p.m. and under, designed capacity.....	251,293	5,872	351,120	5,836
35611 73	11-299 g.p.m. designed capacity.....	93,893	8,413	122,712	9,041
35611 74	300 g.p.m. and over, designed capacity.....	4,226	1,315	1,616	1,279
35611 75	101-250 p.s.i. designed pressure.....	153,632	10,002	117,764	7,040
35611 76	251-500 p.s.i. designed pressure.....	72,524	4,301	27,000	3,100
35611 79	Over 500 p.s.i. designed pressure.....	7,754	1,197	6,759	1,641
35611 98	Other industrial pumps.....	42,371	8,133	(NA)	20,513

See footnotes at end of table.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Value of total shipments including interplant transfers (\$1,000)	
		1963	1958
3564--	BLOWERS AND FANS, TOTAL.....	299,385	252,899
35641--	Industrial fans and blowers, including blowers, industrial, exhaust, attic, and ventilating fans, and parts:		
35641 11	As reported in the census of manufactures <sup>2</sup> .....	191,235	170,636
	As reported on Census Quarterly Form M35H, total <sup>2</sup> .....	192,674	160,686
	Fans and blowers group.....	164,173	141,009
	Axial fans (vaneaxial and tubeaxial), total.....	19,450	11,150
35641 13	Directly connected to driver.....	15,852	7,930
35641 15	Belt driven.....	3,598	3,220
	Centrifugal fans and blowers, total.....	97,789	85,690
35641 17	Blower filter units.....	3,291	2,538
35641 19	Classes I and II fans.....	17,528	17,864
35641 21	Classes III and IV fans.....	9,294	13,772
35641 23	Furnaces and light weight air-conditioning blowers.....	9,412	13,075
35641 25	Industrial fans, excluding positive displacement blowers and turbo-blowers.....	26,087	10,132
35641 27	Positive displacement blowers (excluding turbo-blowers).....	10,370	15,783
35641 29	Turbo-blowers (single stage, single and double-inlet).....	11,033	
35641 31	Small housed blowers (utility sets).....	10,774	12,526
	Industrial propeller fans.....	21,793	21,639
35641 33	Directly connected to driver, excluding window-type household exhaust fans, built-in household and kitchen ventilating and exhaust fans, and all free-air circulating fans.....	8,611	11,357
35641 35	Belt driven.....	9,261	6,785
35641 37	Penthouses, shutter, guards, and other accessories for industrial propeller fans.....	3,921	3,497
35641 39	Parts for industrial fans and blowers.....	25,141	22,530
	Power roof ventilators group.....	28,501	19,677
35641 41	Axial and propeller type.....	14,344	7,408
35641 43	Centrifugal type.....	13,754	12,175
35641 45	Parts for power roof ventilators.....	403	94
35642--	Dust collection, and air purification equipment and air washers, total.....	94,952	70,064
	Air washers:		
35642 31	As reported in census of manufactures <sup>2</sup> .....	3,881	3,250
	As reported on Census Quarterly Form M35H <sup>2</sup> .....	3,605	2,368
	Dust collection and other air purification equipment:		
35642 53	Electrostatic precipitation equipment.....	21,755	66,814
35642 55	Other dust collection and other air purification equipment.....	66,540	
35642 00	Dust collection and air purification equipment and air washers, n.s.k.....	2,776	-
35640 00	Blowers and fans, n.s.k.....	13,198	12,199
3565--	INDUSTRIAL PATTERNS, TOTAL <sup>13</sup> .....	159,896	121,279
35650 11	Foundry patterns (wood, metal, etc.).....	105,572	94,225
35650 98	All other industrial patterns (wood, metal, etc.) (except shoe patterns).....	28,108	8,798
35650 00	Industrial patterns, n.s.k.....	26,216	18,256
		Total shipments including interplant transfers	
		1963	
		Quantity (number of units)	1958 value <sup>14</sup>
			(\$1,000)
3566--	MECHANICAL POWER TRANSMISSION EQUIPMENT, EXCEPT BALL AND ROLLER BEARINGS, TOTAL.....	(X)	883,382
35661--	Plain bearings.....	(X)	87,949
35661 15	Plain bearings and bushings, unmounted, machined, excluding carbon and graphite, all types, except automotive.....	(X)	77,360
35661 51	Mounted bearings, plain.....	(X)	10,169
35661 00	Plain bearings, n.s.k.....	(X)	420
			2,880

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3566- --	MECHANICAL POWER TRANSMISSION EQUIPMENT, EXCEPT BALL AND ROLLER BEARINGS--Continued				
35662 --	Speed changers, industrial high speed drives, and gears.....	(X)	333,331		234,151
	Gears, assembled and unassembled, speed reducers and increasers, mechanical power transmissions, except marine, automobile, truck, bus and aircraft (excludes aircraft, related engine and power take-off gears):				
35662 11	Variable speed changers.....	79,462	17,138		17,901
35662 21	Industrial high speed drives, fixed rates (pitch line velocity 4,000 feet per minute).....	(NA)	12,344		18,871
	Speed reducers, fixed rates, enclosed (except gear motors):				
	Worm gear speed reducers (except gear motors and shaft mounted speed reducers):				
35662 23	Above 3 inch center distance.....	(NA)	17,922	}	24,716
35662 24	3 inch center distance and below.....	161,813	12,045		
35662 26	Shaft mounted speed reducers (excludes shaft mounted gear motors but includes shaft mounted worm gear reducers).....	87,228	15,475	}	27,280
35662 27	Parallel, concentric shaft and level gear speed reducers:				
35662 28	Above 15 inch low speed centers.....	8,200	16,912		
	15 inch low speed centers and below.....	(NA)	17,228		
	Gear motor reducer elements, including shaft mounted gear motors:				
35662 34	Under 1/8 horsepower.....	(NA)	1515,732		158,237
35662 36	1/8 horsepower to but not including 3/4 horsepower.....	236,848	1514,955		1514,105
35662 37	3/4 horsepower to and including 5 horsepower.....	129,109	1518,750		1518,831
35662 39	Over 5 horsepower.....	77,383	1516,747		158,946
	Gears, pinions and racks, unmounted:				
35662 41	Fine pitch (20.00 diametral pitch and higher).....	(X)	34,030		27,166
35662 49	Other than fine pitch (19.99 diametral pitch and less) excluding aircraft and related engine and power take-off gears but including railway type pinions, and racks.....	(X)	113,004		47,191
35662 00	Speed changers, gears and industrial high speed drives, n.s.k.....	(X)	11,049		20,907
35663 --	Other mechanical power-transmission equipment.....	(X)	449,460		310,418
35663 11	Friction type clutches.....	(NA)	25,473		26,281
35663 13	Hydraulic type clutches including hydraulic couplings.....	(NA)	9,697		14,489
	Flexible couplings (1 inch nominal bore and over) (except hydraulic):				
35663 21	Gear type.....	68,883	10,285	}	22,553
35663 22	Other than gear type.....	542,544	14,581		
35663 24	Flexible couplings (less than 1 inch nominal bore) (except hydraulic)...	498,635	2,176		
35663 25	Universal joints.....	3,204,420	29,242		26,590
35663 31	Chains for sprocket drives.....	(X)	98,922		81,622
35663 41	Sprockets.....	(X)	29,019		22,308
35663 51	Pulleys.....	(NA)	17,563		7,787
	Sheaves:				
35663 61	Single drive.....	(NA)	5,562		4,289
35663 65	Multiple drive.....	(NA)	15,252		9,456
35663 87	Railroad car journal bearings.....	(NA)	8,694		10,856
35663 91	Marine gear transmissions (less than 600 horsepower) (includes reversing and speed changing gear drives).....	(X)	11,153	}	77,301
35663 98	Other mechanical power-transmission equipment (except aircraft, automobile, truck, and bus).....	(X)	163,418		
35663 00	Other mechanical power-transmission equipment, n.s.k.....	(X)	8,423		6,886
35660 00	Mechanical power-transmission equipment, including bearings, n.s.k.....	(X)	12,642		11,125
Total shipments including interplant transfers					
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3567- --	INDUSTRIAL PROCESS FURNACES AND OVENS, TOTAL <sup>16</sup> .....	(X)	17237,660	(X)	17184,845
35671 --	Electric industrial furnaces and ovens, metal processing, total.....	(X)	44,697	(X)	35,665
	Electric furnaces, excluding induction:				
35671 11	Metal melting.....	202	8,051	348	9,987
35671 21	Metal processing and heat treating (such as annealing, hardening, carburizing, and porcelain enameling furnaces).....	3,242	25,740	2,444	18,675
35671 43	Electric, including infrared industrial ovens.....	11,338	10,378	(NA)	6,019
35671 00	Electric industrial furnaces and ovens, metal processing, n.s.k.....	(X)	528	(X)	984

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>The value figure for each product line in 1958 included both the value of the pump or compressor and the value of the drivers when shipped with the driven unit. See footnote 3 for explanation of reporting such values in 1963.

<sup>2</sup>For these products, data were also collected in the Census Commodity Survey Program. In lieu of asking for detailed statistics on these products in the census of manufactures, respondents were asked to report only value of shipments for specified classes of products for which separate figures had previously been collected on the annual, quarterly, or monthly form. In most cases, the value figures reported in the census of manufactures for each class of product agreed closely with the corresponding figures reported in the commodity surveys. However, there were some differences between the census figures and the commodity survey figures. These variations were due primarily to the following reasons:

- Use of different reporting periods (calendar year vs. fiscal year).
- Use of different bases for reporting value (company sales vs. factory production).
- Use of estimates in reporting data on the commodity surveys, whereas census of manufactures figures generally represent more exact shipments figures.

Footnotes continued on next page.

TABLE 6A. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Footnotes for Table 6A--35E--Continued

<sup>3</sup>The value of drivers was reported only at the product class level. For each product line, value figures exclude, except as noted for codes 3561452-57, the value of drivers (electric motors or prime movers) shipped with that product. Separate data on the value of drivers are not available for product class 35613. See footnote 1 for explanation of reporting such values in 1958.

<sup>4</sup>Does not include hydraulic fluid power pumps for power steering units in passenger automobiles. In 1958 such data are included.

<sup>5</sup>Included with product code 3561596, Other pumps.

<sup>6</sup>Includes the value of drivers.

<sup>7</sup>Includes compressors for air brake systems used in transportation equipment and pneumatic (air) power compressors and motors.

<sup>8</sup>Data reported in the census of manufactures differ from comparable figures reported in Annual Survey MA-35P chiefly due to companies not included in the Annual Survey. In addition, there were minor differences between figures for a few companies reporting in the two surveys.

<sup>9</sup>Represents "Other pumps and compressors" and includes dry vacuum pumps. No separate figures are available for "Other pumps" compared with "Other compressors."

<sup>10</sup>Of these totals, the following figures (in millions of dollars) represent the value of shipments of ball and roller bearings transferred from one plant of a company to another plant of the same company:

Product code	1963	1958
3562-	108	86
35621	13	21
35622	95	65
35623		
35624		

<sup>11</sup>In 1963 represents 8,043 thousand units; for 1958 represents 4,911 thousand units.

<sup>12</sup>In 1963 represents 934 thousand units; for 1958 represents 771 thousand units.

<sup>13</sup>Excludes captive production of industrial patterns.

<sup>14</sup>No quantity data available for 1958.

<sup>15</sup>Represents the value of gear motor reducer elements only. Does not include the value of electric motors shipped as part of gear motor reducer elements.

<sup>16</sup>Represents shipments of industrial furnaces and ovens produced by manufacturing establishments only. Does not include industrial furnaces and ovens erected at the site by engineering and construction firms which purchase component parts for such furnaces and ovens.

<sup>17</sup>Establishments classified in industry 3567 reported a breakdown of shipments of industrial furnaces and ovens between "Field assembled" and "Factory assembled" installations. For 1963 the total of \$216 million of industrial furnaces and ovens and parts reported by establishments classified in industry 3567, "Field assembled" amounted to \$89 million and "Factory assembled" \$127 million. In 1958 the comparable figures were "Field assembled" \$66 million and "Factory assembled" \$73 million. "Field assembled" represents installations erected at the site by the manufacturer, either using his own labor force or utilizing local labor under the supervision of the manufacturer's factory personnel.

**TABLE 6B. Product Classes—Indexes of Production and  
Unit Value for Primary Products Shipped by  
All Producers: 1963 and 1958**

Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value
356	General industrial machinery.....1963.. 1958..	( <sup>1</sup> ) ( <sup>1</sup> )	( <sup>1</sup> ) ( <sup>1</sup> )

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>These totals represent the sum of 5-digit product class data obtained from the Current Industrial Reports Series and the census of manufactures or the annual survey of manufactures.

<sup>3</sup>Sources for the data in these product classes are listed below:

Product class	Current Industrial Reports Series
35611, 35612, 35614	M35P Pumps and compressors
35613	M35G Farm pumps
35641	M35H Fan blowers and unit heaters

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Aggregate horsepower per 100 production workers.....	1,158	959	854	373	968	648	678

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower. n.e.c Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Percent of industry production workers in these establishments...	0-5	0-5	(X)	10-15	0-5	5-10	0-5
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	80-85	95-100	80-85	75-80	85-90	90-95	70-75

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of employees in each specific operation. They are not based on total employment in the establishment.

## OFFICE, COMPUTING, AND ACCOUNTING MACHINES

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3571—Computing and Accounting Machines, Including Cash Registers
- 3572—Typewriters
- 3576—Scales and Balances, Except Laboratory
- 3579—Office Machines, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3571—COMPUTING AND ACCOUNTING MACHINES, INCLUDING CASH REGISTERS

This industry comprises establishments primarily engaged in manufacturing computing machines including electronic, accounting machines, and cash register. Establishments primarily engaged in manufacturing typewriters are classified in industry 3572, and office duplicating machines and devices and autographic registers in industry 3579. For a detailed list of products of industry 3571, refer to table 6A, product codes 3571101 to 3571297.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Computing and Related Machines Industry totaled \$2,020 million. This amount included shipments of computing and related machines (primary products) valued at \$1,752 million, shipments of other products (secondary products) valued at \$122 million, and miscellaneous receipts (largely sales of products bought and resold) at \$145 million.

This industry's shipments of computing and related machines represented 93 percent of its total product shipments. The industry specialization ratio in 1958 was 94 percent.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each

of the different product classes. The extent of this specialization is indicated in table 8. Approximately 54 percent of the total industry shipments are represented by plants specializing in computing and accounting machines, including cash registers; and 45 percent in electronic data processing machines and associated equipment, except typewriters.

Shipments of computing and related machines by this industry represented 94 percent of all shipments of these products (\$1,859 million) by all industries. In 1958 the coverage ratio was 91 percent. Other industries shipping computing and related machines include industry 3662, Radio, TV Communications Equipment, \$44 million; and industry 3572, Typewriters, over \$22 million.

#### 3572—TYPEWRITERS

This industry comprises establishments primarily engaged in manufacturing typewriters and parts. For a detailed list of products of industry 3572, refer to table 6A, product codes 3572001 to 3572098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Typewriters Industry totaled \$315 million. This amount included shipments of typewriters (primary products) valued at \$262 million, shipments of other products (secondary products) valued at \$45 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$8 million.

This industry's shipments of typewriters represented 85 percent of its total product shipments. The industry specialization ratio in 1958 was 82 percent. Secondary products shipped by this industry in 1963 include computing and related machines of over \$22 million.

Shipments of typewriters by this industry represented 99 percent of all shipments of these products (\$265 million) by all industries. In 1958 the coverage ratio was also 99 percent.

The production index for the primary products of the industry increased to 158 in 1963 from the 1958 level of 116. The unit value index for 1963 was 119 compared to 115 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3576—SCALES AND BALANCES, EXCEPT LABORATORY

This industry comprises establishments primarily engaged in manufacturing weighing and force measuring machines and devices of all types, except those regarded as scientific apparatus for laboratory and experimental work which are classified in industry 3811. For a detailed list of products of industry 3576, refer to table 6A, product codes 3576011 to 3576084.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Scales and Balances Industry totaled \$98 million. This amount included shipments of scales and balances (primary products) valued at \$87 million, shipments of other products (secondary products) valued at \$7 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$4 million.

This industry's shipments of scales and balances represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was 91 percent.

Shipments of scales and balances by this industry represented 97 percent of all shipments of these products (\$90 million) by all industries. In 1958 the coverage ratio was also 97 percent.

#### 3579—OFFICE MACHINES, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing office machines and devices, n.e.c. Establishments primarily engaged in manufacturing computing machines and cash registers are classified in industry 3571, typewriters in industry 3572, and photocopy and microfilm equipment in industry 3861. For a detailed list of products of industry 3579, refer to table 6A, product codes 3579010 to 3579091.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Office Machines, N.E.C., Industry totaled \$349 million. This amount included shipments of office machines, n.e.c. (primary products) valued at \$223 million, shipments of other products (secondary products) valued at \$51 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$76 million.

This industry's shipments of office machines, n.e.c., represented 81 percent of its total product shipments. The industry specialization ratio in 1958 was 84 percent. Secondary products shipped by this industry in 1963 included other fabricated wire products, not produced by wire drawers (\$7 million), and computing and related machines (over \$4 million).

Shipments of office machines, n.e.c., by this industry represented 81 percent of all shipments of these products (\$276 million) by all industries. In 1958, the coverage ratio was 85 percent. Another industry shipping office machines, n.e.c., was industry 3315, Steel Wire Drawing, \$7 million.

OFFICE MACHINES, N.E.C.: SIC 357  
Value Added by Manufacture by State: 1963

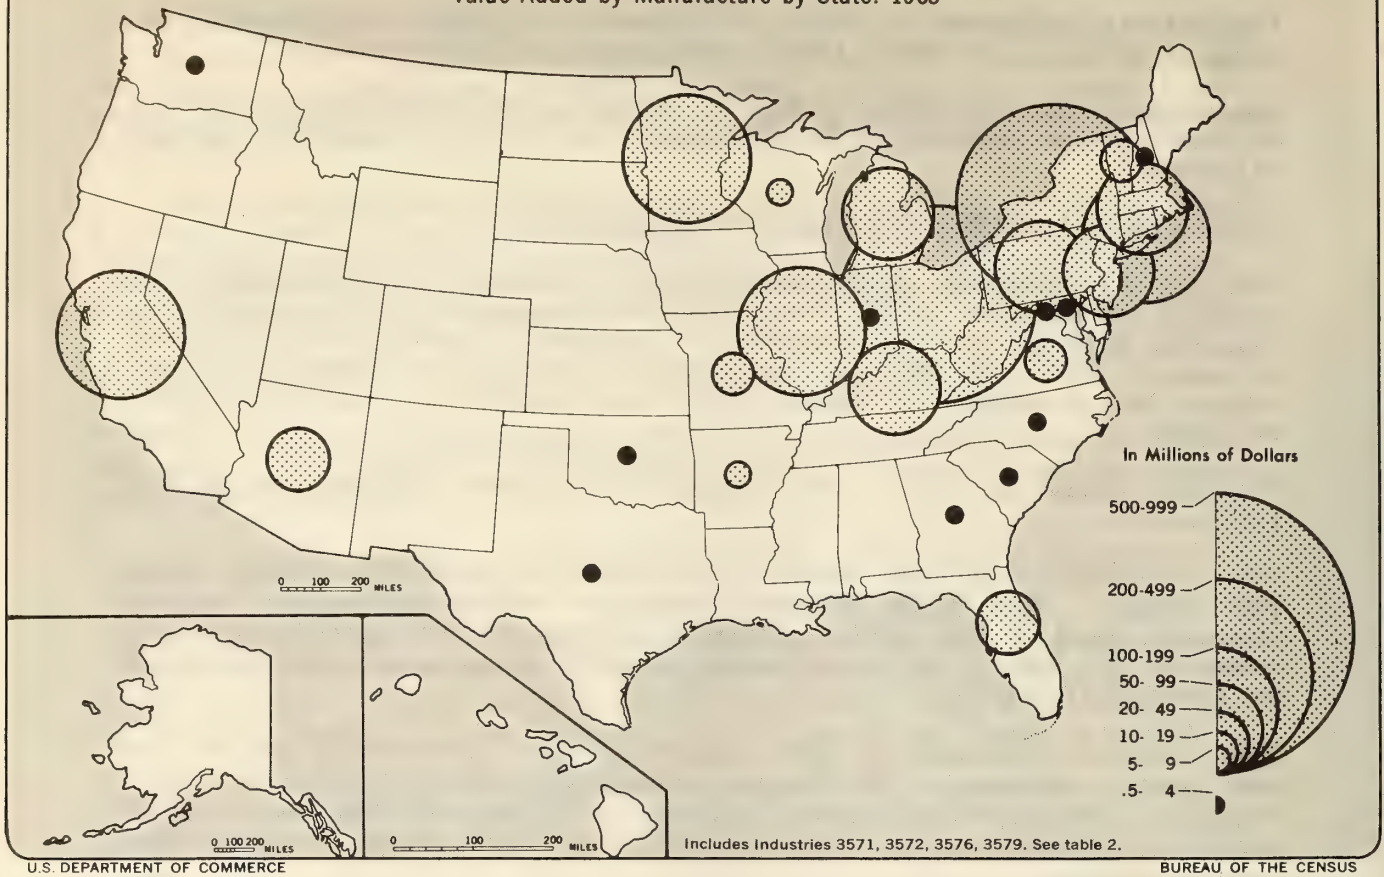

TABLE 1. General Statistics: 1963 and Earlier Years

Year	Com- panies  (number)	Establishments		All employees		Production workers			Value added by manufacture, adjusted  (\$1,000)	Cost of materials  (\$1,000)	Value of shipments  (\$1,000)	Capital expend- itures, new (\$1,000)	Spe- cial- ization ratio (per- cent)	Cov- erage ratio (per- cent)
		Total (number)	With 20 employ- ees or more (number)	Total (number)	Payroll (\$1,000)	Total (number)	Man-hours (1,000)	Wages (\$1,000)

NOTE: See Introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification so that the 1958 figures for this industry are not strictly comparable with those for earlier years. The 1957 and earlier years are based on the old SIC definition of the industry.

<sup>3</sup>Comparable figures are not available for prior years.

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left. n.e.c. Not elsewhere classified.

<sup>1</sup>Includes capital expenditures for plants under construction but not in operation of approximately \$200-\$500 thousand.

TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
						Col. B Col. B+C				Col. B Col. F
						(percent)				(percent)
						(\$1,000)				(\$1,000)

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>For these products, data were also collected on Annual Form MA-35R, "Office, Computing and Accounting Machines." In lieu of asking for detailed statistics on these products in the census of manufactures, respondents were asked to report only value of shipments for specified classes of products for which separate figures had previously been collected on the annual form. In most cases, the value figures reported in the census of manufactures for each class of products agreed closely with the corresponding figures reported in the annual survey. However, there were some differences between the census figures and the annual survey figures. These variations were due primarily to the following reasons:

- Use of different reporting periods (calendar year vs. fiscal year.)
- Use of different bases for reporting value (company sales vs. factory production.)
- Use of estimates in reporting data on the annual survey, whereas census of manufactures figures generally represent more exact shipments figures.

Footnotes continued on next page.

**TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Footnotes for Table 6A-35F—Continued

<sup>2</sup>Figures include in some cases leased machines as well as machines sold outright. For leased machines the value reported in most instances represents the value placed on such equipment for tax, insurance, or similar purposes.

<sup>3</sup>Represents the number of complete systems.

<sup>4</sup>Includes billing machines with accounting registers.

<sup>5</sup>The number of cash registers shipped during 1963 and 1958 totaled 87,606 and 81,021, respectively.

<sup>6</sup>Includes manual change makers, coin counting and sorting, currency counting, and payroll denominating machines.

<sup>7</sup>Computing and related machines not included on Census Annual Form MA-35R consist primarily of automatic voting booths, electronic toll collecting equipment, and pari-mutual computing devices for racetracks.

<sup>8</sup>Includes rebuilt typewriters for which separate data cannot be shown without disclosing figures of individual companies.

<sup>9</sup>Data on typewriters are also published monthly in Current Industrial Reports Series M35C "Typewriters."

<sup>10</sup>Includes coded (stored) media typewriters, continuous form handling machines, billing machines without accounting registers, office composing machines, stencil cutting typewriters, and reproduction typewriters.

<sup>11</sup>Includes dictating, transcribing and recording machines (disc, wire, and tape) designed as office machines (conference recording, combination dictating and telephone recording, etc.) but excludes wire and tape recorders.

<sup>12</sup>Includes cancelling, cutting, dating, endorsing, numbering, protecting, signing, sorting, and writing machines.

<sup>13</sup>Includes addressing and plate embossing machines; postage meters and postal permit mailing machines; shorthand writing machines; rebuilt office, computing, and accounting machines, n.e.c.; staplers; tape dispensers; envelope opening and sealing machines; label gummers; and price marking machines, etc.

**TABLE 6B. Product Classes—Indexes of Production and Unit Value for Primary Products Shipped by All Producers: 1963 and 1958**

Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>These figures represent the sum of 5-digit product class data obtained from Current Industrial Reports Series M35R and the census of manufactures or the annual survey of manufactures.

<sup>3</sup>Source: Current Industrial Reports Series M35R "Office Computing and Accounting Machines."

TABLE 6D. **Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>No data are available for castings, electric motors and generators, electron tubes or solid state semiconductors produced and consumed in the same establishment.

<sup>2</sup>Represents estimates published in MC58(1)-7 (Supplement), "Selected Materials Consumed," from data collected in a supplemental survey on Form MA-131, "Consumption of Materials, Parts, Containers and Supplies During 1958." This survey was limited to large establishments in selected chemical, machinery and equipment industries and resulted in estimates which are subject to greater error than are the figures on materials consumption collected as a regular part of the census of manufactures.

<sup>3</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

TABLE 7B. Fuels and Electric Energy Consumed and Horsepower Rating of Power Equipment: 1962

Item	Computing and related machines (SIC 3571)	Typewriters (SIC 3572)	Scales and balances (SIC 3576)	Office machines, n.e.c. (SIC 3579)
Total cost of purchased fuels and electric energy.....\$1,000..	10,281	2,319	577	2,077

Electric energy:				
Purchased:				
Quantity.....million kw.-hrs..	569	99	17	87
Cost.....\$1,000..	7,058	1,265	353	1,293
Generated less sold.....million kw.-hrs..	69	-	(S)	-
Aggregate horsepower of prime movers and electric motors driven by purchased energy (December 31), total.....1,000 hp..	202	38	15	53
Prime movers, total.....do....	34	9	1	5
Driving generators.....do....	28	(Z)	1	(Z)
Not driving generators.....do....	6	9	(Z)	5
Electric motors, total.....do....	198	29	14	48
Driven by purchased energy.....do....	168	29	14	48
Driven by energy generated at establishment.....do....	30	-	(Z)	-
Aggregate horsepower per 100 production workers.....	339	270	444	401

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower. n.e.c Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Introduction for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)
			Total (number)	Payroll (\$1,000)	Total (number)	Man-hours (1,000)	Wages (\$1,000)

Shipping department, including packing and crating..	52	34	16	2	299	51	(D)	(D)

NOTE: Very small establishments were not requested to report their metalworking operations and, in some instances, a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production-worker employment on the last line of the table below:

Item	Industry			
	3571	3572	3576	3579
Total number of establishments in the industry.....	248	21	85	161
Number of establishments which reported one or more of the specified operations.....	137	15	45	73
Percent of industry production workers in these establishments.....	95-100	95-100	80-85	75-80
Number of establishments which reported "none" of the operations apply.....	15	3	1	3
Percent of industry production workers in these establishments.....	0-5	0-5	0-5	0-5
Percent of industry production workers in establishments which completed the metalworking operations inquiry.....	95-100	95-100	80-85	80-85

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## SERVICE INDUSTRY MACHINES AND MACHINE SHOPS

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3581—Automatic Merchandising Machines
- 3582—Commercial Laundry, Dry Cleaning, and Pressing Machines
- 3585—Refrigerators; Refrigeration Machinery, Except Household; and Complete Air-Conditioning Units
- 3586—Measuring and Dispensing Pumps
- 3589—Service Industry Machines, Not Elsewhere Classified
- 3599—Miscellaneous Machinery, Except Electrical

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

### 3581—AUTOMATIC MERCHANDISING MACHINES

This industry comprises establishments primarily engaged in manufacturing automatic merchandising units; also referred to as vending machines (excluding music, amusement, or gaming machines), and coin operated mechanisms for such machines. For a detailed list of products of industry 3581, refer to table 6A, product codes 3581002 to 3581269.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Automatic Vending Machines Industry totaled \$238 million. This amount included shipments of automatic vending machines and parts (primary products) valued at \$187 million, shipments of other products (secondary products) valued at \$44 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$7 million.

This industry's shipments of automatic vending machines represented 81 percent of its total product shipments. The industry specialization ratio in 1958 was 92 percent. Secondary products shipped by this industry in 1963 included refrigeration machinery (\$7 million).

Shipments of automatic vending machines by this industry represented 90 percent of all shipments of these products (\$207 million) by all industries. In 1958 the coverage ratio

was 92 percent. Another industry shipping automatic vending machines was industry 3585, Refrigeration Machinery, \$4 million.

The production index for the primary products of the industry increased to 189 in 1963 from the 1958 level of 140. The unit value index for 1963 was 133 compared to 112 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3582—COMMERCIAL LAUNDRY, DRY CLEANING, AND PRESSING MACHINES

This industry comprises establishments primarily engaged in manufacturing laundry and dry cleaning equipment and pressing machines for commercial and industrial use. Establishments primarily engaged in manufacturing household laundry equipment are classified in industry 3633. Although the SIC classifies coin-operated household washing machines in industry 3582, data for these machines are included in the 1963 Census of Manufactures, as in 1958, in industry 3633. For a detailed list of products of industry 3582, refer to table 6A, product codes 3582021 to 3582091.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Commercial Laundry Equipment Industry totaled \$137 million. This amount included shipments of commercial laundry, dry cleaning, and pressing machines (primary products) valued at \$116 million, shipments of other products (secondary products) valued at \$12 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$9 million.

This industry's shipments of commercial laundry equipment represented 91 percent of its total product shipments. The industry specialization ratio in 1958 was 94 percent.

Shipments of commercial laundry, dry cleaning, and pressing machines by this industry represented 89 percent of all shipments of these products (\$130 million) by all industries. In 1958 the coverage ratio was 95 percent. Another industry shipping commercial laundry equipment was industry 3633, Household Laundry Equipment.

The production index for the primary products of the industry increased to 202 in 1963 from the 1958 level of 122. The unit value index for 1963 was 84 compared to 114 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3585—REFRIGERATORS; REFRIGERATION MACHINERY, EXCEPT HOUSEHOLD; AND COMPLETE AIR-CONDITIONING UNITS

This industry comprises establishments primarily engaged in manufacturing equipment and systems utilizing the basic refrigeration cycle, including mechanical and absorption refrigerators for commercial and industrial use; refrigeration machinery; and complete air-conditioning units for domestic, commercial, and industrial use. Establishments primarily engaged in manufacturing soda fountains and beer dispensing equipment are classified in this industry, and those primarily engaged in manufacturing household refrigerators and home and farm freezers in industry 3632. For a detailed list of products of industry 3585, refer to table 6A, product codes 3585101 to 3585798.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Refrigeration Machinery Industry totaled \$1,928 million. This amount include shipments of refrigeration machinery (primary products) valued at \$1,588 million, shipments of other products (secondary products) valued at \$194 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$146 million.

The specialization and coverage ratios have not been calculated for industry 3585 as the data from which these ratios are obtained include extensive duplication. This results from the fact that products of some establishments in the industry are consumed as materials by other establishments in the same industry. This is especially true of refrigeration and air-conditioning components which may be shipped to producers of complete refrigeration and air-conditioning equipment where they are again included in both the cost of materials and the value of shipments.

Industry 3585 comprises two major establishment types. One group of establishments specializes primarily in the manufacture of compressors, condensers, and other components for air-conditioning and commercial refrigeration. Many of these establishments also produce complete air-conditioning equipment as well as subassemblies for air-conditioning and commercial refrigeration equipment. These establishments also rely on other establishments for their motors and other electrical equipment.

The other major segment of industry 3585 covers the production of commercial refrigeration equipment such as walk-in and reach-in refrigerators, display cases for meat, dairy, and other food products, low temperature freezing and dispensing equipment, florist cabinets, etc. Although significant amounts of metal are consumed in the manufacture of these products, many of these items contain substantial amounts of wood, glass, and other nonmetallic materials. Some types of commercial refrigeration equipment are shipped from the factory without compressors, condensing units or refrigeration equipment. These "remote type units" are then installed at the site with the suitable refrigeration components.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 60 percent of the total industry shipments are represented by plants specializing in heat transfer equipment; and 15 percent in commercial refrigerations.

The production index for the primary products of the industry increased to 208 in 1963 from the 1958 level of 135. The unit value index for 1963 was 86 compared to 90 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3586—MEASURING AND DISPENSING PUMPS

This industry comprises establishments primarily engaged in manufacturing measuring and dispensing pumps commonly used in service and filling stations for dispensing gasoline, oil, and grease, including grease guns. Establishments primarily engaged in manufacturing pumps, compressors, and pumping equipment for general industrial use are classified in industry 3561. For a detailed list of products of industry 3586, refer to table 6A, product codes 3586011 to 3586098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Measuring and Dispensing Pumps Industry totaled \$159 million. This amount included shipments of measuring and dispensing pumps (primary products) valued at \$103 million, shipments of other products (secondary products) valued at \$38 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$19 million.

This industry's shipments of measuring and dispensing pumps represented 73 percent of its total product shipments. The industry specialization ratio in 1958 was 75 percent.

Secondary products shipped by this industry in 1963 included pumps and compressors (\$10 million).

Shipments of measuring and dispensing pumps by this industry represented 85 percent of all shipments of these products (\$121 million) by all industries. In 1958 the coverage ratio was 89 percent. Another industry shipping measuring and dispensing pumps was industry 3561, Pumps and Compressors, \$7 million.

The production index for the primary products of the industry increased to 113 in 1963 from the 1958 level of 79. The unit value index for 1963 was 133 compared to 138 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3589—SERVICE INDUSTRY MACHINES, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing machines and equipment, not elsewhere classified, for use in service industries, such as floor sanding machines, industrial vacuum cleaners, scrubbing machines, commercial cooking and food warming equipment, and commercial dishwashing machines. Establishments primarily engaged in manufacturing household electrical appliances are classified in group 363. For a detailed list of products of industry 3589, refer to table 6A, product codes 3589111 to 3589398.

The code number for this industry in the Standard Industrial Classification manual is unchanged, but the content of the industry has been slightly changed from the classification system used in 1958. Establishments primarily engaged in producing industrial vacuum cleaners are now classified in industry 3589. Such establishments were formerly classified in industry 3584.

Value of shipments and other receipts of the Service Industry Machines, N.E.C., Industry totaled \$378 million. This amount included shipments of service industry machines, n.e.c., (primary products) valued at \$288 million, shipments of other products (secondary products) valued at \$46 million, and miscellaneous receipts (mainly sales of products bought and resold) at \$44 million.

This industry's shipments of service industry machines, n.e.c., represented 86 percent of its total product shipments. The industry specialization ratio in 1958 was 85 percent.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 54 percent of the total industry shipments are represented by plants specializing in service industry machines and parts; and 34 percent in commercial cooking and food warming equipment.

Shipments of service industry machines, n.e.c., by this industry represented 84 percent of all shipments of these products (\$342 million) by all industries. In 1958 the coverage ratio was 81 percent.

The production index for the primary products of the industry increased to 202 in 1963 from the 1958 level of 143. The unit value index for 1963 was 116 compared to 112 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3599—MISCELLANEOUS MACHINERY, EXCEPT ELECTRICAL

This industry comprises establishments primarily engaged in manufacturing machinery and parts except electrical, not elsewhere classified, such as pistons and piston rings, carburetors, metallic packing, and amusement park equipment. This industry also

includes establishments primarily engaged in producing or repairing machine and equipment parts, not elsewhere classified, on a job or order basis for others. These establishments usually operate on a job or order basis and are equipped with machine tools and other power-driven metalworking machinery capable of manufacturing a wide range of machine and equipment parts. Machine shops classified in this industry are characterized by their method of operation rather than their product, and the fact that they may be primarily engaged in repair work does not exclude them from this classification; however, machine shops engaged exclusively in repair work are classified in repair industries.

Although generally characterized by method of operation rather than type of product, establishments primarily engaged in manufacturing the following products are classified in industry 3599: Metal bellows, bushings machined from purchased castings, carburetors, catapults, boiler-tube cleaners, valve cores, hydraulic cylinders, iron flasks, flexible metal hose and tubing, metallic packing (except asbestos-metallic), pistons and piston rings, and intake and exhaust valves for internal combustion engines. For a detailed list of products of industry 3599, refer to table 6A, product codes 3599011 to 3599098.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Miscellaneous Machinery Industry totaled \$2,036 million. This amount included shipments of machine shop products (primary products) valued at \$1,440 million, shipments of other products (secondary products) valued at \$157 million, and miscellaneous receipts (mainly contract work on materials owned by others) at \$439 million.

This industry's shipments of machine shop products represented 90 percent of its total product shipments. The industry specialization ratio in 1958 was 92 percent. Secondary products shipped by this industry in 1963 include parts and accessories for passenger cars, trucks, and busses shipped to other than motor vehicle manufactures (\$21 million), and general industrial machinery, n.e.c. (\$13 million).

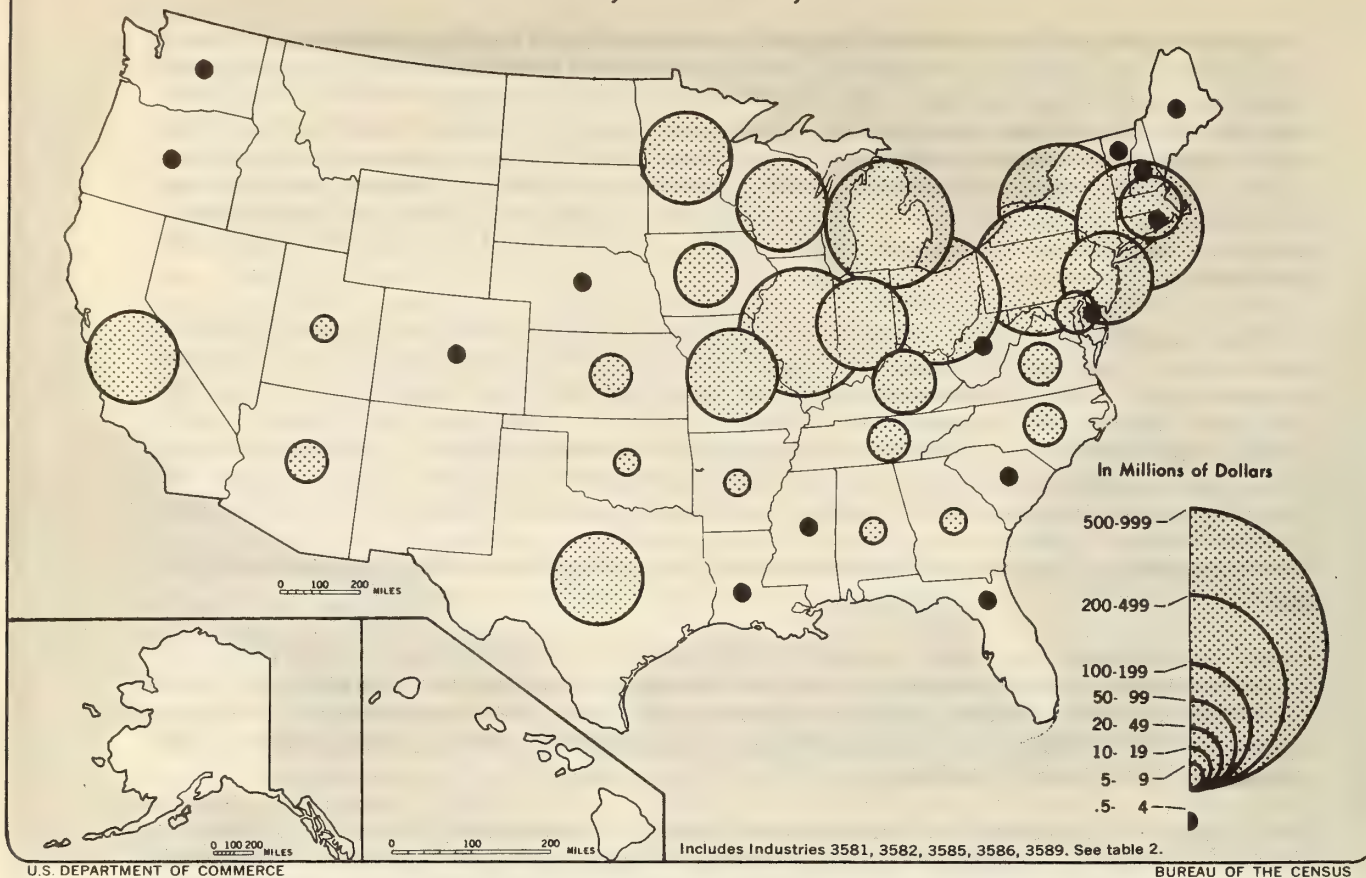

Shipments of machine shop products by this industry represented 90 percent of all shipments of these products (\$1,606 million) by all industries. In 1958 the coverage ratio was also 90 percent.

Since machining is a common operation in most of the establishments producing metal products, many of the metal products establishments classified in industries other than industry 3599 maintain machine shop departments for their own use. Data for captive machine shops appear in the metalworking operations table (table 9) for individual industries.

# SERVICE INDUSTRY MACHINES: SIC 358

## Value Added by Manufacture by State: 1963

# MISCELLANEOUS MACHINERY: SIC 359

## Value Added by Manufacture by State: 1963

Note: See appendix A for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1954 excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1954 excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Represents establishments specializing in producing automatic vending machines but excludes establishments producing coin-operated mechanisms for such machines. The former establishments accounted for an estimated 80-90 percent of the total value of shipments of all establishments primarily engaged in producing automatic vending machines and coin-operated mechanisms for such machines.

<sup>3</sup>No comparable figures are available for earlier years.

<sup>4</sup>The value of shipments and cost of materials for this industry includes extensive duplication arising from shipments between establishments in the same industry classification. Accordingly, the specialization ratios and coverage ratios are not shown. For further explanation see introductory text.

<sup>5</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification. Accordingly, the data for 1958-1963 are not comparable with those for earlier years.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies.. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3581, Automatic Vending Machines: New England—Massachusetts, 4 (1,000-2,499); Rhode Island, 1 (20-99); Connecticut, 1 (250-499); Middle Atlantic—New Jersey, 6 (697); East North Central—Ohio, 7 (157); Indiana, 6 (300); Michigan, 6 (547); Wisconsin, 4 (477); West North Central—Iowa, 4 (133); Nebraska, 1 (1-19); Kansas, 3 (100-249); South Atlantic—Maryland, 4 (250-499); District of Columbia, 1 (1-19); West Virginia, 1 (100-249); North Carolina, 1 (1-19); Georgia, 3 (20-99); Florida, 4 (20-99); East South Central—Tennessee, 3 (448); Alabama, 1 (1-19); West South Central—Arkansas, 1 (20-99); Oklahoma, 2 (1-19); Mountain—Arizona, 2 (1-19); Utah, 1 (1-19).

SIC 3582, Commercial Laundry Equipment: New England—Maine, 1 (100-249); Massachusetts, 1 (1-19); Connecticut, 4 (20-99); Middle Atlantic—New Jersey, 5 (100-249); Pennsylvania, 5 (20-99); East North Central—Indiana, 5 (20-99); Illinois, 17 (1,000-2,499); Michigan, 5 (124); Wisconsin, 2 (100-249); West North Central—Minnesota, 4 (612); Missouri, 3 (100-249); Nebraska, 1 (1-19); Kansas, 1 (100-249); South Atlantic—Maryland, 1 (1-19); Virginia, 1 (1-19); Georgia, 1 (20-99); Florida, 1 (1-19); East South Central—Kentucky, 2 (250-499); Tennessee, 2 (100-249); Alabama, 2 (1-19); West South Central—Arkansas, 2 (20-99); Louisiana, 1 (100-249); Oklahoma, 3 (20-99); Mountain—Colorado, 1 (1-19); Utah, 1 (250-499); Pacific—Washington, 1 (20-99); California, 10 (20-99).

SIC 3585, Refrigeration Machinery: New England—Massachusetts, 15 (764); Rhode Island, 5 (133); West North Central—Iowa, 6 (761); Nebraska, 2 (1-19); Kansas, 6 (250-499); South Atlantic—Delaware, 1 (100-249); Maryland, 5 (270); Virginia, 4 (966); West Virginia, 2 (20-99); South Carolina, 3 (20-99); East South Central—Kentucky, 4 (1,376); Alabama, 5 (717); Mississippi, 3 (493); West South Central—Louisiana, 4 (20-99); Mountain—Idaho, 1 (20-99); Colorado, 4 (20-99); New Mexico, 3 (20-99); Utah, 1 (100-249); Nevada, 1 (20-99); Pacific—Oregon, 13 (100-249); Hawaii, 1 (1-19).

SIC 3586, Measuring and Dispensing Pumps: New England—Vermont, 1 (100-249); Massachusetts, 3 (1,000-2,499); Middle Atlantic—New Jersey, 1 (1-19); Pennsylvania, 3 (500-999); East North Central—Ohio, 4 (227); Indiana, 3 (500-999); Illinois, 2 (500-999); Michigan, 3 (381); Wisconsin, 1 (20-99); West North Central—Minnesota, 3 (516); Iowa, 1 (100-249); Missouri, 1 (500-999); Nebraska, 1 (1-19); South Atlantic—Maryland, 1 (250-499); North Carolina, 1 (1-19); Florida, 1 (1-19); East South Central—Tennessee, 1 (250-499); West South Central—Oklahoma, 1 (1-19); Texas, 1 (100-249); Mountain—Colorado, 1 (1-19); Pacific—California, 4 (20-99).

SIC 3589, Service Industry Machines, N.E.C.: New England—New Hampshire, 2 (100-249); Vermont, 1 (20-99); Rhode Island, 2 (1-19); Connecticut, 6 (20-99); West North Central—Iowa, 2 (20-99); Nebraska, 3 (20-99); Kansas, 3 (238); South Atlantic—Maryland, 3 (255); Virginia, 2 (1-19); West Virginia, 1 (1-19); North Carolina, 6 (100-249); South Carolina, 1 (1-19); Georgia, 3 (1-19); East South Central—Kentucky, 2 (100-249); Tennessee, 1 (1-19); Alabama, 2 (1-19); West South Central—Louisiana, 8 (100-249); Oklahoma, 5 (1-19); Texas, 18 (100-249); Mountain—Colorado, 7 (20-99); New Mexico, 1 (1-19); Arizona, 1 (1-19); Utah, 2 (1-19); Pacific—Washington, 3 (20-99); Oregon, 2 (20-99); Hawaii, 1 (1-19).

SIC 3599, Miscellaneous Machinery: East North Central—Indiana, 279 (5,872); Michigan, 834 (13,896); Wisconsin, 315 (3,291); West North Central—North Dakota, 18 (20-99); South Dakota, 11 (209); Mountain—Montana, 24 (20-99); Wyoming, 16 (20-99); Arizona, 83 (1,023); Nevada, 11 (20-99); Pacific—Alaska, 8 (20-99); Hawaii, 15 (20-99).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

<sup>3</sup>Data for 1958 exclude those establishments primarily engaged in producing industrial vacuum cleaners. In 1958 there were 18 such establishments with 432 employees and a value added (adjusted) of \$4,256 thousand.

TABLE 3. Detailed Statistics: 1963

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See appendix A for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

<sup>3</sup>The specialization and coverage ratios are not shown for industry 3585 as the data from which these ratios are obtained include extensive duplication because the products of some establishments in the industry are consumed as materials by other establishments in the industry.

<sup>4</sup>For this industry respondents additionally reported the number of production workers in the pay period ended nearest the 15th of each month. This information is summarized below. The average number of production workers appearing above and in tables 1, 2, and 8 are computed on the basis of the average for the months of March, May, August and November.

Average number of production workers

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left. n.e.c Not elsewhere classified.

<sup>1</sup>Includes capital expenditures for plants under construction but not in operation which constitute a small proportion of the total for the size class.

TABLE 5A. **Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958**

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(\$1,000)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. B.C (percent)	(\$1,000)	(\$1,000)	(\$1,000)	Col. B Col. F (percent)
		A	B	C	D	E	F	G	H	I

Note: See appendix A for an explanation of terms used.

n.e.c. Not elsewhere classified.

<sup>1</sup>The total value of shipments of refrigeration machinery includes extensive duplication resulting from the use of products of certain establishments as materials by others within the same industry. Accordingly, the specialization and coverage ratios have not been calculated.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c)

miscellaneous receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>Includes \$3.9 million shipped by industry 3585, Refrigeration Machinery. In addition, the following industry had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3651, Radio and TV Receiving Sets.

<sup>2</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 36341, Electric fans, except industrial type; 36343, Other small household electric appliances; 36350, Household vacuum cleaners, including parts and attachments; 36393, Other household appliances and parts; and 36513, Recorders, audio amplifiers, phonographs, tuners, speaker systems, and other audio equipment and accessories.

<sup>3</sup>Includes \$7 million shipped by industry 3633, Household Laundry Equipment.

<sup>4</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 35690, General industrial machinery, n.e.c., and 38213, Industrial process instruments.

<sup>5</sup>The total value of shipments of the Refrigeration Machinery Industry includes extensive duplication resulting from the use of products of some establishments in the industry as materials by others within the same industry.

<sup>6</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3494, Valves and Pipe Fittings; 3564, Blowers and Fans; 3631, Household Cooking Equipment; 3639, Household Appliances, N.E.C.; 3651, Radio and TV Receiving Sets; 3717, Motor Vehicles and Parts; and 3729, Aircraft Equipment, N.E.C.

<sup>7</sup>Includes \$17.5 million shipped by industry 3632, Household Refrigerators. In addition, the following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3589, Service Industry Machines, N.E.C.

<sup>8</sup>The following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3631, Household Cooking Equipment.

<sup>9</sup>The following industry had shipments which totaled \$2 million or more but is withheld to avoid disclosing figures for individual companies: 3351, Copper Rolling and Drawing.

<sup>10</sup>Includes \$7.4 million shipped by industry 3433, Heating Equipment, Except Electric; \$12.3 million shipped by industry 3494, Valves and Pipe Fittings; and \$10.1 million shipped by industry 3632, Household Refrigerators. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3567, Industrial Furnaces and Ovens; 3569, General Industry Machines, N.E.C.; 3723, Aircraft Propellers and Parts; and 3729, Aircraft Equipment, N.E.C.

<sup>11</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 19310, Tanks and tank components; 19410, Sighting and fire-control equipment made from purchased lenses; 24331, Fabricated structural framing and wood laminates, ready-cut wood buildings; and panels or sections for prefabricated buildings; 33620, Copper and copper-base alloy castings; 34333, Cast iron heating boilers, radiators, and convectors, except parts; 34334, Domestic heating stoves (except electric), except parts; 34431, Heat exchangers and steam condensers; 34434, Gas cylinders; 35112, Steam, gas, and hydraulic turbine and parts; steam engines and parts; 35424, Parts for metal forming machine tools and rebuilt metal forming machinery; 35481, Rolling-mill machinery and equipment; 35595, Other special industry machinery, and equipment; 35690, General industrial machinery, n.e.c.; 36312, Household ovens and ranges, equipment and parts, except electric; 37175, Parts and accessories for passenger cars, trucks and busses, shipped to motor vehicle manufacturers; 37176, Parts and accessories for passenger cars, trucks, and busses shipped to other than motor vehicle manufacturers; and 37413, Parts for locomotives, for sale separately, and rebuilt locomotives.

<sup>12</sup>Includes \$6.9 million shipped by industry 3561, Pumps and Compressors. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3494, Valves and Pipe Fittings; and 3548, Metalworking Machinery, N.E.C.

<sup>13</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 34942, Metal fittings and unions for piping systems; 34944, Other metal valves and fittings, except plumbers' brass goods and fittings; 35333, Oil and gas field production machinery and equipment (except pumps); and 35595, Other special industry machinery and equipment.

<sup>14</sup>The following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3631, Household Cooking Equipment; and 3634, Electric Housewares and Fans.

Footnotes continued on next page.

**TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry:  
1963—Continued**

Footnotes for Table 5B--35G--Continued

<sup>15</sup>Includes \$3.8 million shipped by industry 3639, Household Appliances, N.E.C. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 2842, Polishes and Sanitation Goods, and 3535, Conveyors.

<sup>16</sup>Includes \$2.3 million shipped by industry 3548, Metalworking Machinery, N.E.C.

<sup>17</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 35482, Power-driven hand tools including parts and attachments; 35611, Industrial pumps except hydraulic fluid power; 35853, Commercial refrigeration equipment; and 38213, Industrial process instruments.

<sup>18</sup>Includes \$4.5 million shipped by industry 3323, Steel Foundries; \$2.2 million by industry 3361, Aluminum Castings; \$2.3 million by industry 3494, Valves and Pipe Fittings; \$3.8 million by industry 3541, Metal-Cutting Machine Tools; \$11.9 million by industry 3544, Special Dies and Tools; \$2.4 million by industry 3548, Metalworking Machinery, N.E.C.; \$3 million by industry 3559, Special Industry Machines, N.E.C.; \$6.9 million by industry 3561, Pumps and Compressors; \$6.1 million by industry 3569, General Industry Machines, N.E.C.; \$8.9 million by industry 3717, Motor Vehicles and Parts; and \$13.5 million by industry 3729, Aircraft Equipment, N.E.C. In addition, the following industries had shipments which totaled \$2 million or more but are withheld to avoid disclosing figures for individual companies: 3293, Gaskets and Insulations; 3312, Blast Furnaces and Steel Mills; 3352, Aluminum Rolling and Drawing; 3441, Fabricated Structural Steel; 3461, Metal Stampings; 3624, Carbon and Graphite Products; 3679, Electronic Components, N.E.C.; 3694, Engine Electrical Equipment; 3731, Ship Building and Repairing; and 3821, Mechanical Measuring Devices.

<sup>19</sup>Includes the following product classes which total \$2 million or more but are withheld to avoid disclosing individual company figures: 19293, Ammunition, n.e.c.; 19990, Ordnance and accessories, n.e.c.; 32933, Packing, except leather, rubber, and metal, and asbestos insulations; 34431, Heat exchangers and steam condensers; 34941, Metal valves for piping systems (except plumbing and heating valves); 34980, Fabricated pipe and fittings; 35370, Industrial trucks and tractors; 35641, Industrial fans and blowers; 36945, Other complete electrical equipment for internal combustion engines; 36946, Components and parts for engine electrical equipment; 37176, Parts and accessories for passenger cars, trucks and busses, shipped to other than motor vehicle manufacturers; and 38214, Motor vehicle instruments, except electric.

TABLE 6A. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958

Product code	Product	Total shipments including interplant transfers			
		1963		1958	
		Quantity (number of units)	Value (\$1,000)	Quantity (number of units)	Value (\$1,000)
3581- --	AUTOMATIC VENDING MACHINES AND PARTS, TOTAL.....	(X)	206,562	(X)	130,850
35811 --	Automatic vending machines (complete units):				
	As reported in the census of manufactures, total.....	(X)	164,338	(X)	<sup>1</sup> 110,548
	As reported on Census Annual Form MA-35U, total.....	(X)	163,521	(X)	<sup>1</sup> 108,400
	Vending machines for beverages:				
	Coffee: <sup>2</sup>				
35810 02	Instant or liquid concentrates.....	6,954	2,783	13,093	10,260
35810 03	Fresh brew (batch).....	4,133	4,991		
35810 04	Fresh brew (single cup).....	16,226	15,887		
35810 05	Canned beverages (refrigerated).....	4,103	2,575	( <sup>3</sup> )	( <sup>3</sup> )
	Soft drink:				
35810 07	Bottle.....	145,433	52,722	110,561	36,011
35810 08	Cup (postmix).....	13,055	18,237	5,445	4,528
35810 11	Cup (premix).....	5,088	4,467	8,146	4,971
35810 01, 06, 19 }	Other vending machines for beverages <sup>4</sup> .....	5,898	4,398	<sup>3</sup> 7,883	<sup>3</sup> 5,315
	Vending machines for confections and foods:				
35810 21	Bulk.....	113,295	1,812	77,423	1,414
35810 22	Candy bar.....	41,765	13,768	26,271	7,077
35810 23	Hot canned foods and soups.....	2,573	1,322	31,099	6,418
35810 25, 26 }	Multipurpose (refrigerated and nonrefrigerated).....	4,982	6,659		
35810 24, 27, 29 }	Other vending machines for confections and foods <sup>5</sup> .....	17,088	6,190		
	All other vending machines:				
35810 31	Cigarette.....	62,793	21,311	98,989	27,927
35810 33	Ice.....	854	2,793	609	1,541
35810 35	Postage stamp.....	13,382	706	11,105	505
35810 39	All other vending machines except for beverages, confections and foods <sup>6</sup> .....	149,043	2,900	83,706	2,433
35812 --	Coin-operated mechanisms and parts for automatic vending machines, total..	(X)	32,757	(X)	<sup>7</sup> 20,302
35812 51	Coin-operated mechanisms (for sale separately).....	1,120,997	19,129	800,419	15,624
35812 69	Parts for automatic vending machines (except coin-operated mechanisms)...	(X)	13,628	(X)	4,678
35810 00	Automatic vending machines and parts, n.s.k.....	(X)	9,467		
3582- --	COMMERCIAL LAUNDRY, DRY CLEANING, AND PRESSING MACHINES, TOTAL.....	(X)	129,613	(X)	106,590
	Commercial laundry equipment and laundry presses:				
35820 21	Washers only.....	5,653	8,750	6,056	11,262
35820 22	Extractors only.....	6,576	5,556	4,329	5,604
35820 23	Washer-extractor combinations.....	7,380	14,456	513	1,690

35990 98	Other machine shop products (including rebuilt carburetors).....	(X)	684,520		
35990 00	Carburetors, pistons, and other machine shop products, n.s.k.....	(X)	413,953	(X)	266,846

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.s.k. Not specified by kind.

<sup>1</sup>For these products, data were also collected in the census annual commodity survey program. In lieu of asking for detailed statistics on these products in the census of manufactures, respondents were asked to report only value of shipments for specified products or classes of products for which separate figures had previously been collected on the annual form. In most cases, the value figures reported in the census of manufactures for each product or class of products agreed closely with the corresponding figures reported in the annual survey. However, there were some differences between the census figures and the annual survey figures amounting generally to less than 1 percent at the industry level. These variations were due primarily to the following reasons:

- Use of different reporting periods (calendar year vs. fiscal year).
- Use of different bases for reporting value (company sales vs. factory production).
- Use of estimates in reporting data on the annual survey whereas census of manufactures figures generally represent more exact shipments figures.

<sup>2</sup>These products are primarily coffee vending machines though they may also vend hot chocolate and/or hot soup from the same cabinet.

<sup>3</sup>In 1958 data for canned beverages are included with other vending machines for beverages.

<sup>4</sup>Includes packaged milk (indoor and outdoor); milk (bulk or cup); beverage combination (hot and cold); hot beverages such as hot chocolate and/or hot soup (except canned soup) not sold in a combination machine with coffee; and package dry ingredients for mixing into beverages.

<sup>5</sup>Includes vending machines for such commodities as apples; cookies, crackers, and biscuits; popcorn, pastry; ice cream; and package chewing gum.

<sup>6</sup>Includes vending machines for such products as cosmetics and toiletries, novelties, detergents, newspapers, and stationery supplies.

<sup>7</sup>Includes automatic vending machines and parts, not specified by kind.

<sup>8</sup>Excludes coin-operated mechanisms.

<sup>9</sup>The total value of shipments of refrigeration machinery includes extensive duplication resulting from the use of products of some establishments in the industry as materials by others within the same industry.

<sup>10</sup>This product class includes on Census Form MA-35M products coded in the 35854 and 35852 groups.

<sup>11</sup>For 1963, a total of 68,631 units valued at \$33,935 thousand in the under 97,000 B.t.u./hr. category were shipped. A breakdown between "Horizontal" types and "Other" types was also obtained for units in this category. Of this total, 55,087 units valued at \$24,221 thousand represented "Horizontal" types. The corresponding figures for horizontal types under 97,999 B.t.u./hr. in 1958 were 44,809 units valued at \$17,348 thousand.

<sup>12</sup>Data for 1963 include units for household refrigerators. Such units are excluded from figures for 1958.

<sup>13</sup>Figures for compressor bodies 10 hp. and under hermetic-type motor compressors also include compressor bodies 10 hp. and under open-type compressors and (for 1958 only) 15 and 20 hp. open and hermetic types.

<sup>14</sup>Represents 20 hp. and under hermetic-type motor compressors.

<sup>15</sup>Excludes automotive air-conditioning compressors.

<sup>16</sup>No detail by horsepower is available for these units.

<sup>17</sup>Twin pumps are counted as one unit.

<sup>18</sup>Twin pumps are counted as two units.

<sup>19</sup>For 1963, data on noncomputing gasoline dispensing pumps are included with other measuring and dispensing pumps.

<sup>20</sup>Represents parts and accessories for commercial electric cooking equipment.

<sup>21</sup>The 1958 and 1963 figures are not directly comparable because of the apparent inclusion of some carburetors and valves in industry 3717, "Motor Vehicles and Parts" in 1958.

<sup>22</sup>This figure differs from comparable totals shown in other tables because of inclusion of corrections that were introduced too late for inclusion in those tables. The effect on total figures is less than 5 percent.

**TABLE 6B. Product Classes—Indexes of Production and  
Unit Value for Primary Products Shipped by  
All Producers: 1963 and 1958**

Product code	Product and year	Indexes (1954 = 100)	
		Production	Unit value

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>These data represent the sum of 5-digit product class data obtained from Current Industrial Reports and the census of manufactures or the annual survey of manufactures.

<sup>3</sup>Data for product class 35857 for 1959-1962 included an undeterminate amount for automobile air conditioners. Separate information for automotive air conditioners were collected on Form MA-35M beginning in 1960 and included with data for product class 35851. Accordingly the 4-digit total figures for 1960-1962 are overstated.

<sup>4</sup>Source: Current Industrial Reports Series M35M "Air Conditioning and Refrigeration Equipment."

<sup>5</sup>Excludes automotive air conditioners for which separate data are not available.

<sup>6</sup>Parts and accessories for commercial cooking and food warming equipment are included in product class 35892 for all years except 1958 and 1963.

**TABLE 6D. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1963 and 1958**

In thousands of dollars. Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. For each product class, States are

listed only if the value of shipments is more than \$1 million and the figure does not disclose individual company information. Additional States which had shipments of more than \$1 million of the individual product classes are listed in footnote 1.

976000	Materials, containers, and supplies, n.s.k. <sup>2</sup> .....	.....	(X)	190,584	(X)	128,603

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified. n.s.k. Not specified by kind.

<sup>1</sup>No data are available for the quantities of castings, electric motors and generators, iron and steel forgings, and gasoline engines produced and consumed in finished products in the same plant except for industry 3585 which produced for such consumption 5,477 short tons of iron castings in 1958.

<sup>2</sup>Represents (a) total cost of materials for small establishments reporting on "short forms" where separate figures for individual materials consumed were not requested and (b) total cost of materials reported for those establishments which failed to report costs of individual materials on "standard forms."

<sup>3</sup>Includes extensive duplication because the products of some establishments in the industry are consumed as materials by other establishments in the same industry.

Footnotes continued on next page.

TABLE 7A. **Materials by Kind: 1963 and 1958**—Continued

Footnotes for Table 7A-35G-Continued

<sup>4</sup>In addition the following quantities were produced and consumed into products at the same establishment:

Code	Item	Unit of measure	INDUSTRY			
			3586	3589	3599	
			1963	1963	1963	1958
	Castings (rough and semifinished):					
332011	Iron (gray and malleable).....	Short tons..	(NA)	1,002	7,723	7,628
332300	Steel.....	...do.....	(NA)	-	931	(NA)

Driven by energy generated at establishment.....do....	-	4	-	-	-	1
Aggregate horsepower per 100 production workers.....	443	578	760	731	423	749

Note: Detail may not add to totals because of independent rounding. Figures for fuels and electric energy for 1962 and horsepower of power equipment as of December 31, 1962 represent estimates derived from a representative sample of manufacturing establishments. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the reports "Fuels and Electric Energy Consumed in Manufacturing Industries in 1962," MC63(1)-7, and "Power Equipment in Manufacturing Industries, as of December 31, 1962," MC63(1)-6.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. (Z) Less than 500 horsepower.

(S) Withheld because the estimate did not meet publication standards for one or more of the following reasons: The standard error associated with the figure was too high (generally in excess of 25 percent); to avoid disclosing figures of individual companies; or on the basis of a general consistency review.

**TABLE 8. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1963**

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for

the establishment. See Appendix A for method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown for some industries, product classes, or specialization ratios for various reasons, e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture, adjusted (\$1,000)	Cost of materials (\$1,000)	Value of shipments (\$1,000)	Capital expenditures, new (\$1,000)

Painting, lacquering and enameling on metals.....	299	273	25	1	542	332	(D)	(D)

Note: Very small establishments were not requested to report their metalworking operations and in some instances a few larger establishments failed to report. The significance of this undercoverage is shown in terms of production worker employment on the last line of the table below.

Item	Industry					
	3581	3582	3585	3586	3589	3599
Total number of establishments in the industry.....	158	115	698	43	506	12,090
Number of establishments which reported one or more of the specified operations..	61	57	351	32	182	3,834
Percent of industry production workers in these establishments.....	85-90	85-90	90-95	95-100	75-80	70-75
Number of establishments which reported "none" of the operations apply.....	10	5	33	1	29	251
Percent of industry production workers in these establishments.....	0-5	0-5	0-5	0-5	0-5	0-5
Percent of industry production workers in establishments which completed metalworking operations inquiry.....	85-90	85-90	90-95	95-100	80-85	70-75

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

<sup>1</sup>These size groups are based on the number of employees engaged in each specific operation. They are not based on total employment in the establishment.

## Electrical Machinery

- 36A Electrical transmission, distribution, and industrial apparatus
- 36B Household appliances
- 36C Electric lighting and wiring equipment
- 36D Communication equipment, including radio and TV, and electron components and accessories
- 36E Miscellaneous electrical machinery, equipment and supplies

This major group covers establishments primarily engaged in manufacturing machinery, apparatus and supplies for the generation, storage, transmission, transformation, and utilization of electrical energy.

A number of products which are sometimes considered "as belonging" in electrical equipment are classified in other major groups in the 1957 edition of the Standard Industrial Classification Manual in use for 1963. For example, machinery or equipment powered by built-in or detachable electric motors, such as machine tools and other metalworking equipment, commercial laundry and dry cleaning equipment, industrial vacuum cleaners, and office and store machines are classified in Major Group 35, Machinery, Except Electrical. Establishments primarily engaged in producing glass insulators, glass blanks for bulbs, and porcelain electrical supplies are classified in Major Group 32; those producing electric furnaces and ovens, turbo-generators and gas welding apparatus in Major Group 35; and those making automatic temperature controls in Major Group 38.

Industries included in Major Group 36 are typically defined in terms of products and may include both electrical and electronic equipment. Industry groups 365, 366, and 367 include the bulk of electronic equipment in this major group, i.e., radios, television sets, electron tubes, etc., but they also encompass some communications equipment other than electronic. Both electrical and electronic testing equipment are included in industry 3611, Electric Measuring Instruments. Most of the other industries in

Major Group 36 include products generally defined as electrical rather than electronic. Electronic components are frequently produced and consumed at the same location by establishments classified in this major group. Thus, there are (1) plants, solely engaged in producing electronic components, (2) plants producing electronic components and assembling them into finished products, and (3) plants which assemble components produced elsewhere either in other plants of the same company or by other companies. Other types of components and equipment in Major Group 36 such as motors, generators, and motor-generator sets are not uncommonly produced for incorporation into other products made in the same plant.

Products included in Major Group 36 consist of equipment and apparatus for industrial or commercial use as well as goods for household consumption. For example, group 364 includes such consumer durable goods as electric lamps, lighting fixtures, and wiring devices and supplies, as well as similar products for commercial or industrial use. Group 363 consists of household electric appliances such as ranges, ovens, water heaters, fans and small electric appliances, household refrigerators and freezers, household laundry equipment, sewing machines, and vacuum cleaners.

Data on selected materials consumed (principally the metal items) by each of the 4-digit industries are shown in the respective table 7A's. The number of establishments engaged in some of the more important metalworking operations and the number of employees work-

ing in each operation are shown in table 9 for the 4-digit industries. The materials and metalworking operations shown in tables 7A and 9 do not represent, of course, a complete list or, for many industries in this group, even the most important ones. There are a number of significant activities such as assembly, sub-assembly, welding, etc., which are not covered in all instances. Although the production processes in this area adhere to a general pattern of metalworking and fabricating operations (e.g., machine shop, tool and die room, etc.), there are substantial variations in the numbers and types of processes performed by an individual establishment as well as from industry

to industry. Within many of these industries establishments typically purchase mill shapes and castings and carry out the entire fabricating of the metal until it emerges as a finished product. In other industries, however, such as radio and television receiving sets, establishments may be primarily engaged in assembling component parts products by other companies or other plants of the same company. Also, not all industries consume significant amounts of metals or engage in metalworking operations, e.g., Carbon and Graphite Products (industry 3624), Electric Lamps (industry 364 ), Phonograph Records (industry 3652), and Batteries (industries 369 and 3692).

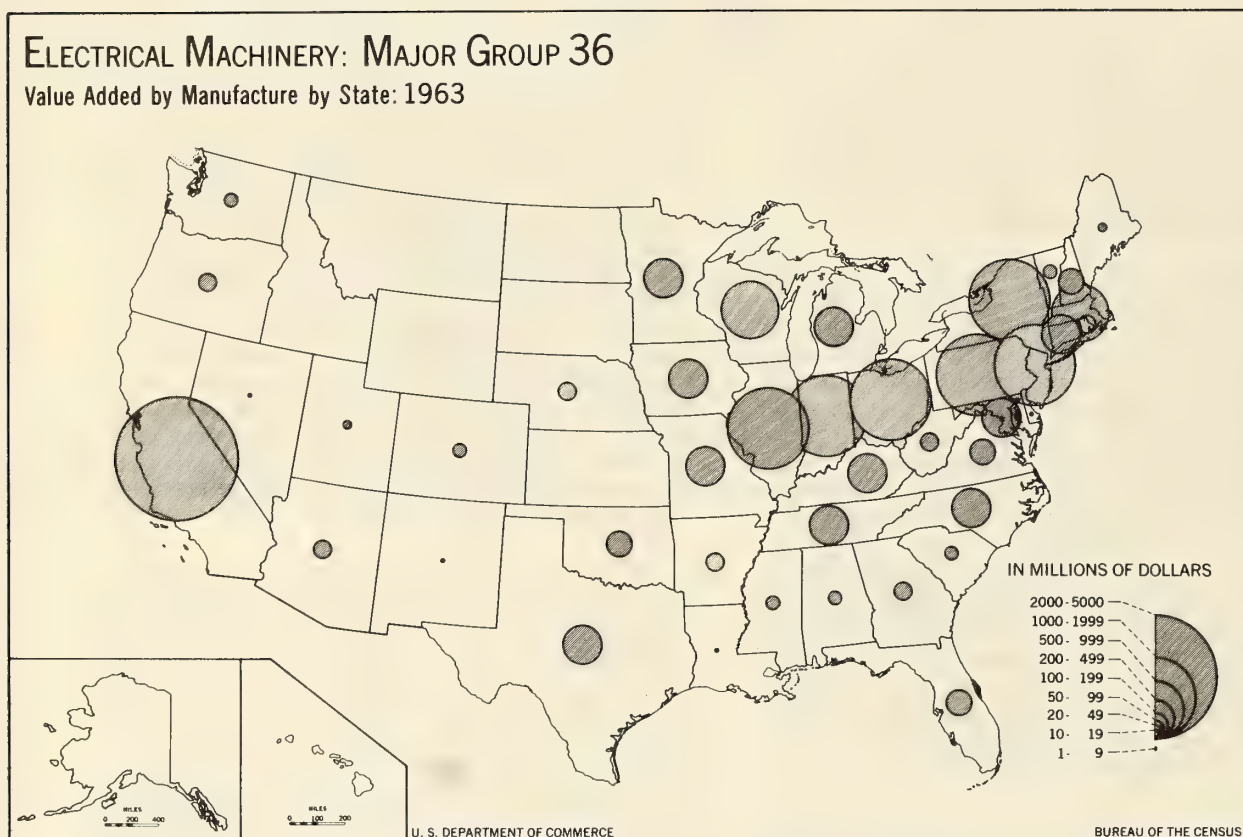

TABLE 1. General Statistics: 1963 and Earlier Years

Year and item	Establishments		All employees <sup>1</sup>		Production workers			Value added by manufacture, adjusted <sup>2</sup>	Cost of materials <sup>3</sup>	Value of shipments <sup>3</sup>	Capital expenditures, new <sup>4</sup>

Standard Notes: - Represents Zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The figures for 1939 through 1963 include data for employees of manufacturing establishments who are engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

<sup>2</sup>For the period 1954 to 1963, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. See Introduction, "Value Added by Manufacture."

<sup>3</sup>The total value of shipments and cost of materials for industry groups (2- and 3-digit) includes extensive duplication arising from shipments between establishments in the same industry classification. For a more complete explanation, see Introduction.

<sup>4</sup>The figures for 1958 to 1963 include expenditures for plants under construction and not yet in operation.

<sup>5</sup>Data for 1947, 1954, and later years, exclude establishments primarily engaged in the manufacture of automatic temperature controls, whereas data for 1949 to 1953 include these establishments.

<sup>6</sup>In addition to data for operating establishments, figures for employment and payroll for manufacturing central administrative offices and auxiliary units are shown for the years 1949 to 1953 in the annual survey of manufactures volumes. Data for these units are not available for the years 1955 to 1957, 1959 to 1962, and prior to 1949.

<sup>7</sup>Figures for 1958 to 1963, for operating manufacturing establishments are not strictly comparable with prior years due to revisions of the Standard Industrial Classification

System. Prior to 1958, data excludes establishments primarily engaged in the manufacture of household ranges and ovens; household refrigerators and home and farm freezers; household laundry equipment; household vacuum cleaners; sewing machines; water heaters, except electric; and other household appliances. Establishments primarily engaged in the manufacture of hearing aids; high frequency, induction, and dielectric heating apparatus; commercial food warming equipment; industrial electric heating units and devices; and insulated wire and cable made from purchased wire, are included in data prior to 1958.

<sup>8</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

<sup>9</sup>Data for 1939 and earlier years exclude establishments primarily engaged in the manufacture of electric (dry) shavers.

<sup>10</sup>Figures for 1937 and earlier years include data for establishments primarily engaged in the manufacture of vacuum cleaners, turbo-generators and water-wheel generator sets, dictating machines and electric industrial furnaces and ovens. Value added for 1939 and basis comparable with earlier years was \$1,000 million.

<sup>11</sup>The figures for 1933 and earlier years include data for establishments primarily engaged in the manufacture of certain types of beauty and barber-shop equipment classified for later years in the "Miscellaneous manufactures" industries.

<sup>12</sup>The figures for 1925 and earlier years include data for establishments primarily engaged in the manufacture of certain types of mechanical refrigerators, classified for later years in the machinery (except electrical) industries.

<sup>13</sup>The figures for 1899 and 1904 include data for establishments primarily engaged in the manufacture of signs and advertising novelties, classified for later years in the "Miscellaneous manufactures" industries.

TABLE 2. General Statistics, by Geographic Areas: 1963 and 1958

Code	Industry group and geographic area	1963									1958

<sup>1</sup>The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

## ELECTRICAL TRANSMISSION, DISTRIBUTION, AND INDUSTRIAL APPARATUS

This report shows 1963 Census of Manufactures statistics for establishments classified in each of the following industries:

### SIC Code and Title

- 3611—Electric Measuring Instruments and Test Equipment
- 3612—Power, Distribution, and Specialty Transformers
- 3613—Switchgear and Switchboard Apparatus
- 3621—Motors and Generators
- 3622—Industrial Controls
- 3623—Welding Apparatus
- 3624—Carbon and Graphite Products
- 3629—Electrical Industrial Apparatus, Not Elsewhere Classified

The general statistics (employment, payrolls, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and, for that matter, their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5A which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

In addition to the 1963 Census of Manufactures product statistics shown in table 6A, detail as published in the 1963 Current Industrial Reports Series are also shown.

### 3611—ELECTRIC MEASURING INSTRUMENTS AND TEST EQUIPMENT

This industry comprises establishments primarily engaged in manufacturing pocket, portable, panelboard, and graphic recording instruments for measuring electricity such as voltmeters, ammeters, watt meters, watthour meters, demand meters, and other meters and indicating instruments. This industry also includes establishments primarily engaged in manufacturing analyzers for testing the electrical characteristics of internal combustion engines, radio apparatus, etc. For a detailed list of products of industry 3611, refer to table 6A, product codes 3611110 to 3611385.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Electric Measuring Instruments Industry totaled \$749 million. This amount included shipments of electric measuring instruments (primary products) valued at \$588 million, shipments of other products (secondary products) valued at \$112 million, and miscellaneous receipts (mainly resales) at \$48 million.

This industry's shipments of electric measuring instruments represented 84 percent of its total product shipments. The industry specialization ratio in 1958 was 74 percent. Secondary products shipped by this industry in 1963 consisted mainly of other electronic components and accessories, n.e.c. (\$18 million), and electronic military, industrial, and commercial equipment, n.e.c. (\$10 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 45 percent of the total industry shipments are represented by plants specializing in product class 36112, Test equipment for testing electrical, radio, and communication circuits and motors.

Shipments of electric measuring instruments by this industry represented 78 percent of all shipments of these products (\$756 million) by all industries. In 1958 the coverage ratio was 81 percent. Other industries shipping electric measuring instruments consisted mainly of industry 3662, Radio, TV Communications Equipment, \$33 million; and industry 3821, Mechanical Measuring Devices, \$22 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3611, e.g., 36111, Integrating instruments, electrical, 96 percent; 36113, Other electrical measuring instruments, 71 percent; and 36110, Electrical measuring instruments, n.s.k., 97 percent.

#### 3612—POWER, DISTRIBUTION, AND SPECIALTY TRANSFORMERS

This industry comprises establishments primarily engaged in manufacturing power, distribution, and specialty transformers. Establishments primarily engaged in manufacturing radio frequency or voice frequency transformers, coils, or chokes are classified in industry 3679, and resistor welding transformers in industry 3623. For a detailed list of products of industry 3612, refer to table 6A, product codes 3612111 to 3612384.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Transformers Industry totaled \$723 million. This amount included shipments of power, distribution, and specialty transformers (primary products) valued at \$652 million, shipments of other products (secondary products) valued at \$58 million, and miscellaneous receipts (mainly resales) at \$12 million.

This industry's shipments of transformers represented 92 percent of its total product shipments. The industry specialization ratio in 1958 was 94 percent. Secondary products shipped by this industry in 1963 consisted mainly of other electrical measuring instruments (\$10 million), and coils, transformers, reactors, and chokes for electronic applications (\$4 million).

Shipments of transformers by this industry represented 94 percent of all shipments of these products (\$692 million) by all industries. In 1958 the coverage ratio was 93 percent. Other industries shipping transformers consisted mainly of industry 3642, Lighting Fixtures, \$6 million.

The production index for the primary products of the industry increased to 125 in 1963 from the 1958 level of 88. The unit value index for 1963 was 89 compared to 114 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3613—SWITCHGEAR AND SWITCHBOARD APPARATUS

This industry comprises establishments primarily engaged in manufacturing switchgear and switchboard apparatus. Important products of this industry include power switches, circuit breakers, power switching equipment, and similar switchgear for general industrial application; switchboards and cubicles, control and metering panels, power fuse mountings, and similar switchboard apparatus and supplies. Establishments primarily engaged in manufacturing industrial controls are classified in industry 3622, and those manufacturing current carrying wiring devices in industry 3643. For a detailed list of products of industry 3613, refer to table 6A, product codes 3613111 to 3613493.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Switchgear and Switchboards Industry totaled \$1,094 million. This amount included shipments of switchgear and switchboard apparatus (primary products) valued at \$897 million, shipments of other products (secondary products) valued at \$136 million, and miscellaneous receipts (mainly resales) at \$61 million.

This industry's shipments of switchgear and switchboard apparatus represented 87 percent of its total product shipments. The industry specialization ratio in 1958 was 80 percent. Secondary products shipped by this industry in 1963 consisted mainly of general industry power circuit devices and controls (\$67 million), current carrying wiring devices, including lightning rods and electric conduit and conduit fittings (\$6 million each).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 46 percent of the total industry shipments are represented by plants specializing in product class 36131, Switchgear, including power switchgear assemblies and other switching and interrupting devices 2300 volts and over; and 29 percent in product class 36133, Low voltage panelboards and distribution boards and switching and interrupting devices 750 volts and under.

Shipments of switchgear and switchboards by this industry represented 89 percent of all shipments of these products (\$1,008 million) by all industries. In 1958 the coverage ratio was 90 percent. Other industries shipping switchgear and switchboard apparatus consisted mainly of industry 3622, Industrial Controls, \$28 million; and industry 3643, Current Carrying Devices, \$10-\$20 million.

The production index for the primary products of the industry increased to 125 in 1963 from the 1958 level of 109. The unit value index for 1963 was 112 compared to 113 in 1958. Both indexes were computed on a basis of 1954 = 100.

### 3621—MOTORS AND GENERATORS

This industry comprises establishments primarily engaged in manufacturing electric motors (except starting motors) and power generators; motor generator sets; railway motors and control equipment; and motors, generators, and control equipment for gasoline electric and oil electric busses and trucks. Establishments primarily engaged in manufacturing turbo-generators are classified in industry 3611, and starting motors and battery charging generators for internal combustion engines in industry 3694. For a detailed list of products of industry 3621, refer to table 6A, product codes 3621101 to 3621611.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Motors and Generators Industry totaled \$1,710 million. This amount included shipments of motors and generators (primary products) valued at \$1,332 million, shipments of other products (secondary products) valued at \$308 million, and miscellaneous receipts (mainly resales) at \$70 million.

This industry's shipments of motors and generators represented 81 percent of its total product shipments. The industry specialization ratio in 1958 was 83 percent. Secondary products shipped by this industry in 1963 consisted mainly of speed changers, industrial high speed drivers, and gears (\$22 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 46 percent of the total industry shipments are represented by plants specializing in product class 36211, Fractional horsepower motors; and 32 percent in 36212, Integral horsepower motors and generators, except land transportation.

Shipments of motors and generators by this industry represented 84 percent of all shipments of these products (\$1,578 million) by all industries. In 1958 the coverage ratio was 85 percent.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3621, e.g., Fractional horsepower motors, 91 percent; Integral horsepower motors and generators, except land transportation, 92 percent; Land transportation motors, generators, and control equipment and parts, and Prime moving generator sets, except steam or hydraulic turbines, combined, 40 percent; and Motor generators and other rotating equipment, 92 percent.

#### 3622—INDUSTRIAL CONTROLS

This industry comprises establishments primarily engaged in manufacturing motor starters and controllers, control accessories, electronic controls, and other industrial controls. Establishments primarily engaged in manufacturing automatic temperature controls are classified in industry 3822. For a detailed list of products of industry 3622, refer to table 6A, product codes 3622012 to 3622099.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Industrial Controls Industry totaled \$649 million. This amount included shipments of industrial controls (primary products) valued at \$500 million, shipments of other products (secondary products) valued at \$129 million, and miscellaneous receipts (mainly resales) at \$19 million.

This industry's shipments of industrial controls represented 79 percent of its total product shipments. The industry specialization ratio in 1958 also was 79 percent. Secondary products shipped by this industry in 1963 consisted mainly of resistors for electronic application (\$57 million), and switchgear, including power switchgear assemblies and other switching and interrupting devices 2300 volts and over (\$23 million).

Shipments of industrial controls by this industry represented 79 percent of all shipments of these products (\$633 million) by all industries. In 1958 the coverage ratio was 70 percent. Other industries shipping industrial controls consisted mainly of industry

3613, Switchgear and Switchboards, \$67 million; and industry 3822, Automatic Temperature Controls, \$13 million.

#### 3623--WELDING APPARATUS

This industry comprises establishments primarily engaged in manufacturing welding apparatus and accessories. Establishments which coat only and those which draw the wire and coat it are also included. Establishments primarily engaged in manufacturing gas welding apparatus are classified in industry 3548. For a detailed list of products of industry 3623, refer to table 6A, product codes 3623111 to 3623381.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Electric Welding Apparatus Industry totaled \$330 million. This amount included shipments of electric welding apparatus (primary products) valued at \$288 million, shipments of other products (secondary products) valued at \$20 million, and miscellaneous receipts (mainly resales) at \$22 million.

This industry's shipments of electric welding apparatus represented 93 percent of its total product shipments. The industry specialization ratio in 1958 also was 93 percent. Secondary products shipped by this industry in 1963 consisted mainly of essential oils, fireworks, and pyrotechnics and chemicals and chemical preparations, n.e.c. (\$5-\$10 million).

While the primary products of the industry represent more than one class of products, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 53 percent of the total industry shipments are represented by plants specializing in product class 36232, Arc welding electrodes, metal.

Shipments of electric welding apparatus by this industry represented 89 percent of all shipments of these products (\$325 million) by all industries. In 1958 the coverage ratio was 92 percent. Other industries shipping electric welding apparatus consisted mainly of industry 3621, Motors and Generators, \$5-\$10 million.

The production index for the primary products of the industry increased to 154 in 1963 from the 1958 level of 113. The unit value index for 1963 was 132 compared to 129 in 1958. Both indexes were computed on a basis of 1954 = 100.

#### 3624--CARBON AND GRAPHITE PRODUCTS

This industry comprises establishments primarily engaged in manufacturing lighting carbons; carbon, graphite, and metal graphite brushes and brush stock; carbon or graphite electrodes for thermal and electrolytic uses; and other carbon, graphite, and metal graphite products for use in the electrical industries. For a detailed list of products of industry 3624, refer to table 6A, product codes 3624011 to 3624089.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Carbon and Graphite Products Industry totaled \$227 million. This amount included shipments of carbon and graphite products (primary products) valued at \$209 million, shipments of other products (secondary products) valued at \$16 million, and miscellaneous receipts (mainly resales) at \$2 million.

This industry's shipments of carbon and graphite products represented 93 percent of its total product shipments. The industry specialization ratio in 1958 was 97 percent. Secondary products shipped by this industry in 1963 consisted mainly of resistors for electronic applications (\$2-\$5 million).

Shipments of carbon and graphite products by this industry represented 96 percent of all shipments of these products (\$218 million) by all industries. In 1958 the coverage ratio was 95 percent. Other industries shipping carbon and graphite products consisted mainly of industry 3621, Motors and Generators (over \$2 million); and industry 3694, Engine Electrical Equipment (\$2-\$5 million).

#### 3629—ELECTRICAL INDUSTRIAL APPARATUS, NOT ELSEWHERE CLASSIFIED

This industry comprises establishments primarily engaged in manufacturing industrial and commercial electric apparatus and equipment, n.e.c., such as blasting machines, fixed and variable capacitors and condensers, and rectifiers for industrial applications. Establishments primarily engaged in manufacturing fixed and variable capacitors and condensers for electronic end products are classified in industry 3679 and rectifiers for electronic end products in industry 3674. For a detailed list of products of industry 3629, refer to table 6A, product codes 3629111 to 3629398.

The code number as well as the definition of this industry was unchanged between 1958 and 1963.

Value of shipments and other receipts of the Electric Industrial Goods, N.E.C., Industry totaled \$238 million. This amount included shipments of electric industrial goods, n.e.c. (primary products) valued at \$180 million, shipments of other products (secondary products) valued at \$46 million, and miscellaneous receipts (mainly resales) at \$12 million.

This industry's shipments of electric industrial goods, n.e.c., represented 80 percent of its total product shipments. The industry specialization ratio in 1958 was 71 percent. Secondary products shipped by this industry in 1963 consisted mainly of coils, transformers, reactors, and chokes for electronic applications (\$2 million).

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into subindustries represented by each of the different product classes. The extent of this specialization is indicated in table 8. Approximately 22 percent of the total industry shipments are represented by plants specializing in product class 36291, Capacitors for industrial use (except for electronic applications); 26 percent in 36292, Rectifying apparatus; and 48 percent in 36293, Other electrical equipment for industrial use.

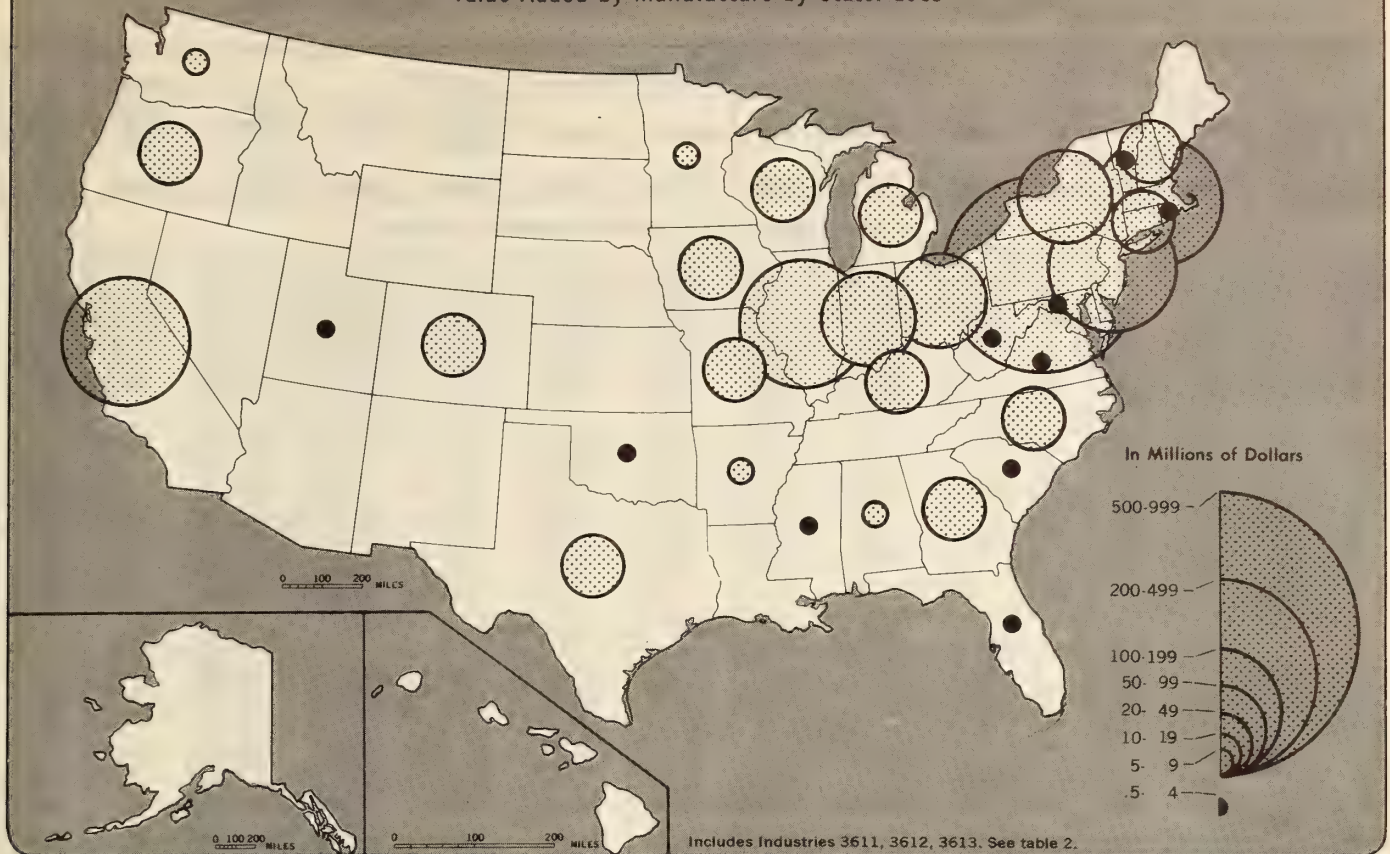

Shipments of electric industrial goods, n.e.c., by this industry represented 72 percent of all shipments of these products (\$250 million) by all industries. In 1958 the coverage ratio was 73 percent. Other industries shipping electrical industrial goods, n.e.c., consisted mainly of industry 3622, Industrial Controls, \$4 million.

The coverage ratio for individual product classes varies significantly from that for the 4-digit industry for the following product classes of industry 3629, e.g., product class 36292, Rectifying apparatus, 57 percent; and, product class 36293, Other electrical equipment for industrial use, 80 percent.

TABLE 1. General Statistics: 1963 and Earlier Years—Continued

## Footnotes for Table 1-36A—Continued

NOTE: See introduction for an explanation of terms used. The following variations in definition of terms should be considered in the use of this table: All employees: For 1949-1954 figures represent the average of all employees for the payroll period ended nearest the 15th of March, May, August, and November; for 1947 an average of 12 monthly figures for all employees; and for 1939 and prior years the average number of production workers based on 12 monthly figures plus the number of nonproduction workers for one payroll period (usually in October). Production workers: For 1947 and prior years figures represent an average of 12 monthly figures. Value added: Value added prior to 1954 is unadjusted value added which is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. Cost of materials: Cost of materials prior to 1958 (except 1954) excludes cost of products bought for resale without further manufacture, processing or assembly. In addition, figures prior to 1935 exclude cost of contract work. Value of shipments: Value of shipments for years prior to 1958 (except 1954) excludes value of products bought for resale without further manufacture, processing or assembly. For 1939 and prior years, except 1929, the figures represent value of production rather than shipments.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

(S) Withheld because the estimate did not meet publication standards, either on the basis of the associated standard error of estimate or on the basis of a consistency review.

<sup>1</sup>These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period. The figures shown in parentheses either have associated standard errors exceeding 15 percent or are not consistent with other census series and related data.

<sup>2</sup>Data for Alaska and Hawaii are not included.

<sup>3</sup>Industries 3613 and 3622 were single industry 3616 (old SIC) prior to 1958.

<sup>4</sup>A revision in the definition of this industry was introduced in the 1957 Standard Industrial Classification so that the industry is not comparable. The 1957 and earlier figures are on the old SIC definition of the industry.

<sup>1</sup>General statistics for some producing States have been withheld to avoid disclosing figures for individual companies. Such States are shown below with the number of establishments in each State and, in parentheses, the number of employees or the employment-size range for that State.

SIC 3611, Electric Measuring Instruments: New England—New Hampshire, 10 (1,000-2,499); Vermont, 1 (1-19); Middle Atlantic—New Jersey, 62 (3,723); East North Central—Indiana, 9 (883); Michigan, 19 (660); West North Central—Minnesota, 6 (500-999); Iowa, 5 (20-99); Missouri, 1 (100-249); Nebraska, 1 (1-19); Kansas, 4 (20-99); South Atlantic—Maryland, 9 (100-249); Virginia, 4 (20-99); North Carolina, 2 (500-999); South Carolina, 1 (500-999); Georgia, 2 (250-499); Florida, 5 (20-99); East South Central—Kentucky, 1 (1-19); Tennessee, 5 (20-99); Alabama, 4 (20-99); Mississippi, 1 (250-499); West South Central—Louisiana, 2 (1-19); Oklahoma, 6 (500-999); Texas, 25 (500-999); Mountain—Colorado, 10 (1,677); Arizona, 1 (1-19); Utah, 1 (1-19); Nevada, 1 (1-19); Pacific—Washington, 2 (250-499); Oregon, 5 (4,812).

SIC 3612, Transformers: New England—New Hampshire, 1 (1-19); Massachusetts, 5 (5,208); Rhode Island, 1 (1-19); Connecticut, 4 (100-249); Middle Atlantic—New Jersey, 16 (1,346); East North Central—Indiana, 4 (2,031); Michigan, 6 (342); West North Central—Minnesota, 2 (1-19); Missouri, 7 (1,000-2,499); South Atlantic—Maryland, 2 (1-19); Virginia, 1 (20-99); West Virginia, 1 (20-99); North Carolina, 2 (500-999); South Carolina, 1 (1-19); Georgia, 3 (1,000-2,499); Florida, 2 (100-249); East South Central—Kentucky, 1 (20-99); Alabama, 2 (250-499); Mississippi, 3 (100-249); West South Central—Arkansas, 1 (100-249); Texas, 7 (100-249); Mountain—Colorado, 1 (1-19); Arizona, 1 (1-19); Pacific—Oregon, 4 (100-249).

SIC 3613, Switchgear and Switchboards: New England—New Hampshire, 4 (250-499); Vermont, 1 (20-99); Massachusetts, 14 (2,112); Rhode Island, 1 (100-249); West North Central—Iowa, 3 (500-999); Missouri, 7 (2,503); Kansas, 1 (1-19); South Atlantic—Delaware, 1 (1-19); Virginia, 2 (20-99); West Virginia, 1 (1-19); North Carolina, 4 (500-999); Florida, 2 (20-99); East South Central—Kentucky, 5 (1,000-2,499); Tennessee, 1 (1-19); Alabama, 2 (20-99); Mississippi, 1 (1-19); West South Central—Arkansas, 1 (100-249); Louisiana, 1 (1-19); Mountain—Colorado, 5 (100-249); New Mexico, 1 (1-19); Arizona, 2 (1-19); Utah, 2 (100-249); Nevada, 2 (1-19); Pacific—Washington, 6 (100-249); Oregon, 5 (100-249); Hawaii, 1 (1-19).

SIC 3621, Motors and Generators: New England—New Hampshire, 2 (250-499); Massachusetts, 7 (500-999); West North Central—Iowa, 3 (100-249); Missouri, 8 (4,667); Nebraska, 2 (20-99); South Atlantic—Maryland, 2 (250-499); West Virginia, 1 (20-99); North Carolina, 2 (1,000-2,499); South Carolina, 2 (1,000-2,499); Florida, 6 (20-99); East South Central—Kentucky, 2 (500-999); Tennessee, 7 (1,640); Mississippi, 1 (100-249); West South Central—Louisiana, 2 (20-99); Oklahoma, 2 (100-249); Texas, 6 (20-99); Mountain—Colorado, 5 (683); New Mexico, 1 (1-19); Arizona, 3 (1-19); Nevada, 1 (1-19); Pacific—Oregon, 1 (20-99); California, 54 (4,507).

SIC 3622, Industrial Controls: New England—New Hampshire, 1 (1-19); Rhode Island, 2 (1-19); East North Central—Indiana, 3 (1,057); Michigan, 29 (1,089); West North Central—Minnesota, 7 (250-499); Iowa, 1 (1-19); Missouri, 4 (500-999); Nebraska, 1 (1-19); South Atlantic—Maryland, 6 (250-499); District of Columbia, 2 (20-99); Virginia, 2 (2,500-4,999); West Virginia, 1 (1-19); North Carolina, 2 (250-499); Georgia, 2 (20-99); Florida, 1 (20-99); East South Central—Kentucky, 2 (20-99); Tennessee, 2 (1-19); Alabama, 1 (1-19); Mississippi, 1 (1-19); West South Central—Oklahoma, 2 (250-499); Texas, 15 (250-499); Mountain—Colorado, 3 (1-19); Arizona, 2 (20-99); Utah, 2 (20-99); Nevada, 1 (1-19); Pacific—Washington, 5 (20-99); Oregon, 9 (20-99).

SIC 3623, Electric Welding Apparatus: New England—Massachusetts, 6 (20-99); Connecticut, 5 (100-249); Middle Atlantic—New Jersey, 7 (100-249); East North Central—Indiana, 1 (1-19); Illinois, 10 (500-999); West North Central—Minnesota, 6 (100-249); Kansas, 1 (20-99); South Atlantic—Maryland, 2 (250-499); Virginia, 1 (1-19); West Virginia, 1 (1-19); Florida, 1 (1-19); East South Central—Alabama, 1 (20-99); West South Central—Arkansas, 1 (1-19); Oklahoma, 2 (20-99); Mountain—Colorado, 2 (100-249); Pacific—Washington, 1 (20-99); Oregon, 1 (1-19); California, 13 (509).

SIC 3624, Carbon and Graphite Products: New England—Massachusetts, 1 (20-99); Connecticut, 2 (1-19); Middle Atlantic—New Jersey, 2 (100-249); East North Central—Ohio, 8 (1,939); Illinois, 3 (250-499); Michigan, 3 (687); Wisconsin, 2 (100-249); South Atlantic—West Virginia, 2 (100-249); North Carolina, 1 (500-999); East South Central—Tennessee, 1 (500-999); Alabama, 1 (20-99); Pacific—California, 5 (131).

SIC 3629, Electric Industrial Goods, N.E.C.: New England—Maine, 1 (100-249); New Hampshire, 2 (20-99); Rhode Island, 3 (20-99); East North Central—Ohio, 16 (1,823); Indiana, 14 (1,000-2,499); Wisconsin, 3 (250-499); West North Central—Missouri, 3 (20-99); Nebraska, 2 (1-19); South Atlantic—Virginia, 2 (20-99); West Virginia, 2 (100-249); Georgia, 2 (1-19); Florida, 1 (1-19); East South Central—Kentucky, 1 (20-99); Mississippi, 1 (20-99); West South Central—Oklahoma, 1 (1-19); Texas, 1 (250-499); Mountain—Wyoming, 1 (20-99); Colorado, 1 (1-19); Arizona, 1 (20-99); Nevada, 1 (1-19); Pacific—Washington, 2 (20-99).

<sup>2</sup>This State or division was not shown as a separate line in table 2 in the 1958 report for this industry. A footnote to table 2 in the 1958 report showed the number of establishments and total employment (either actual or in size ranges) for such States.

TABLE 3. Detailed Statistics: 1963

Item	Electric measuring instruments (SIC 3611)	Transformers (SIC 3612)	Switchgear and switchboards (SIC 3613)	Motors and generators (SIC 3621)	Industrial controls (SIC 3622)	Electric welding apparatus (SIC 3623)	Carbon and graphite products (SIC 3624)	Electric industrial goods, n.e.c. (SIC 3629)

Note: Detailed figures may not add to totals because of independent rounding or independent dropping of fractions of thousands rather than rounding in computer operations. See Introduction for an explanation of terms used.

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.

<sup>1</sup>The proportion of product shipments (both primary and secondary) of the industry represented by primary products.

<sup>2</sup>The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

TABLE 4. Selected Statistics, by Employment Size of Establishments: 1963

Item	Establishments, total	Establishments with an average of—

- Represents zero.

(D) Withheld to avoid disclosure. Data for this item are included in the underscored figures at the left. n.e.c. Not elsewhere classified.

<sup>1</sup>Includes capital expenditures of approximately \$1-\$2 million for plants under construction but not in operation.<sup>2</sup>Includes capital expenditures of approximately \$100-\$200 thousand for plants under construction but not in operation.

TABLE 5A. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1963 and 1958

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry) and receipts for activities such

as merchandising or contract work. This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

Ind. code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
						Col. B Col. B+C (percent)				Col. B Col. F (percent)
						(\$1,000)				(\$1,000)

Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable. n.e.c. Not elsewhere classified.

TABLE 5B. Industry-Product Analysis—Shipments by Product Class and Industry: 1963

In thousands of dollars except for ranges (shown in parentheses) which are expressed in millions of dollars. The "All industries" column shows the total value of shipments of the primary products of the industry by all manufacturing industries. The next column(s) shows the total value of shipments of the specified industry divided among (a) products classified in the industry (primary products), (b) products classified in other industries (secondary products), and (c) miscellaneous

receipts. The value of shipments of the primary products of the specified industry reported by establishments not classified in that industry is shown under the caption "Other industries." Industries accounting for significant amounts of the primary products listed are shown in separate columns provided that the figures for individual companies are not thereby disclosed.

34331	Oil burners, residential and industrial, (sold separately), except parts.....	(X)	(over 2)	(X)
34332	Warm air furnaces (except floor and wall), except parts.....	(X)	(over 2)	(X)
35111	Steam, gas, and hydraulic turbine generator sets units and parts.....	(X)	(over 2)	(X)
35112	Steam, gas, and hydraulic turbine and parts; steam engines and parts.....	(X)	(10-20)	(X)
35191	Gasoline engines, except outboard, aircraft, and automotive engines.....	(X)	(2-5)	(X)
35195	Outboard motors.....	(X)	(over 2)	(X)
35361	Hoists.....	(X)	(2-5)	(X)
35532	Woodworking machinery (designed primarily for home workshops, garages, and service shops) (excluding power-driven hand tools).....	(X)	(over 2)	(X)
35616	Parts and attachments for pumps, air and gas compressors, and pumping equipment.....	(X)	(5-10)	(X)
35641	Industrial fans and blowers.....	(X)	(5-10)	(X)
35690	General industry machinery, n.e.c.....	(X)	(10-20)	(X)
36123	Power regulators, boosters, and reactors, other transformers and transformer parts.....	(X)	(2-5)	(X)
36231	Arc welding machines, components, and accessories, except electrodes.....	(X)	(5-10)	(X)
36240	Carbon and graphite products.....	(X)	(over 2)	(X)
36292	Rectifying apparatus.....	(X)	(2-5)	(X)
36293	Other electrical equipment for industrial use.....	(X)	(5-10)	(X)
36341	Electric fans, except industrial types.....	(X)	(2-5)	(X)
36626	Electronic, military, industrial, and commercial equipment, n.e.c.....	(X)	(2-5)	(X)
36942	Battery charging generators.....	(X)	(10-20)	(X)
36943	Cranking motors.....	(X)	(2-5)	(X)
36945	Other complete electrical equipment for internal combustion engines.....	(X)	(2-5)	(X)
37175	Parts and accessories for passenger cars, trucks, and busses, shipped to motor vehicle manufacturers.....	(X)	(over 2)	(X)

See footnotes at end of table.

TABLE 5B. **Industry-Product Analysis—Shipments by Product Class and Industry:**

TABLE 6A-1. Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued

	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958	
			Quantity	Value (\$1,000)	Quantity	Value (\$1,000)
3623- --	ELECTRIC WELDING APPARATUS, TOTAL.....		(X)	324,895	(X)	233,235
36231 --	Arc welding machines, components, and accessories, except electrodes.....		(X)	104,508	(X)	65,797
	Arc welding machines:					
	Alternating current transformer arc welders:					
36231 11	180 amp. and below.....	Number.....	72,508	7,771	64,824	7,314
36231 15	Over 180 amp.....	..do.....	55,103	9,482	(NA)	4,739
	Direct current arc welders:					
36231 31	Generators only.....	..do.....	7,809	3,884	(NA)	1,788
36231 32	Rectifier types, including a.c.-d.c.....	..do.....	16,117	12,592	8,443	7,191
	Complete units only:					
36231 33	Engine driven.....	..do.....	34,604	30,529	23,125	14,072
36231 35	Motor driven.....	..do.....				5,679
36231 98	Accessories for arc welding machinery (including electrode holders, ground clamps, arc torches, automatic welding heads, semi-automatic welding guns, standard positioners, etc., but excluding welding rods)...		(X)	36,524	(X)	21,512
36231 00	Arc welding machines, components, and electrodes, n.s.k.....		(X)	3,726	(X)	3,502
36232 --	Arc welding electrodes, metal.....		(X)	148,328	(X)	116,438
	Cut lengths:					
36232 11	Mild steel.....	1,000 lbs...	465,106	68,827	390,363	58,556
36232 23	Low alloy steel, except hard surfacing.....	..do.....	42,795	12,888	28,559	6,442
36232 25	Stainless steel (chromium 4 percent or more).....	..do.....	13,827	17,770	13,794	16,573
36232 31	Nonferrous, except hard surfacing.....	..do.....	9,483	10,264	3,301	6,482
36232 41	Hard surfacing, all types (including tool steel).....	..do.....	15,082	15,880	16,272	14,622
36232 53	Coils and spools, all metals, for automatic arc welding and inert gas shielded arc welding (including electrodes for submerged arc welding)....	..do.....	98,566	22,492	67,273	12,275
36232 00	Metal arc welding electrodes, n.s.k.....		(X)	207	(X)	1,488
36233 --	Resistance welders, components, accessories and electrodes.....		(X)	68,300	(X)	47,760
36233 11	Spot welders (including single electrode, multi-electrode, and gun types)..	Number.....	8,502	20,380	4,887	10,834
36233 21	Projection welders.....	..do.....	430	3,440	332	2,622
36233 31	Seam welders.....	..do.....	172	4,151	450	3,727
36233 41	Flash, upset and butt welders.....	..do.....	942	3,033	569	1,776
36233 51	Other resistance welders.....	..do.....	(X)	15,442	(X)	8,335
36233 61	Resistance welder transformers (sold separately).....	Number.....	7,757	2,251	4,521	1,039
36233 71	Resistance welder electrodes.....	1,000 lbs...	1,732	4,252	2,824	5,293
36233 81	Resistance welder accessories, including electrode holders, etc.....		(X)	12,448	(X)	9,176
36233 00	Resistance welders, parts, components, accessories and electrodes, n.s.k...		(X)	2,903	(X)	4,958
36230 00	Electric welding apparatus, n.s.k.....		(X)	3,759	(X)	3,240
			Value of shipments including interplant transfers (\$1,000)			
			1963		1958	
3624- --	CARBON AND GRAPHITE PRODUCTS, TOTAL.....		217,817		156,818	
	Contacts and brush plates (carbon, carbon-graphite, electro-graphite, graphite, metal graphite, and metal impregnated):					
36240 11	Automotive (starter and generator) brushes, including replacement brushes (automotive and light truck type - 6 to 12 volts, inclusive, excluding automobile accessory brushes).....		11,419		7,804	
36240 13	Other fractional horsepower brushes and contacts, including replacement brushes (brushes 1/4 square inch or less in cross section for 1-1/2 inches long or less) and automobile accessory brushes.....		7,187		5,997	
36240 15	Other industrial brushes and contacts (brushes over 1/4 square inch in cross section and over 1-1/2 inches long).....		18,834		15,139	
36240 17	Brush plates.....		1,930		2,239	
	Electrodes (carbon, carbon graphite, electro-graphite, graphite, metal graphite, and metal impregnated):					
	Electrodes for electric furnaces and electrolytic cell use, including paste for self-bake electrodes:					
36240 52	Carbon.....		25,175		75,343	
36240 56	Graphite.....		78,424			
	All other carbon and graphite products:					
36240 81	For electrical uses, including welding products -- rods, plates, paste brazing and soldering tips; illuminating carbons; pile and rheostat resistance discs, plugs, plates and rods; power tube and rectifier parts and plates or rods; spectroscopic products; battery; electronic graphite; telephone components; resistance elements; etc., excluding silver or other metal contacts.....		25,971		17,302	
36240 83	For mechanical uses, including one-piece seals, bushings and bearings, packing rings for steam seal, rotor vanes, etc., excluding metallic oilless bearings.....		11,743		6,725	
36240 86	For aerospace uses, including unmachined stock and machined items.....	}	35,950		25,358	
36240 87	For nuclear uses, including unmachined stock and machined parts for use in nuclear reactors and for in processing nuclear materials.....					
36240 89	For all other uses, including chemical, metallurgical, refractory, etc...					
36240 00	Carbon and graphite products, n.s.k.....		1,184		911	

See footnotes at end of table.

TABLE 6A-1. **Products and Product Classes—Quantity and Value Shipped by All Manufacturing Establishments: 1963 and 1958—Continued**

Product code	Product	Unit of measure	Total shipments including interplant transfers			
			1963		1958	
			Quantity	Value (\$1,000)	Quantity	Value (\$1,000)
3629--	ELECTRICAL INDUSTRIAL APPARATUS, N.E.C., TOTAL.....		(X)	250,474	(X)	213,073

TABLE 6A-3. Switchgear, Switchboard Apparatus and Relays--Quantity and Value of Shipments: 1963 and 1958

Product code	Product <sup>1</sup>	Value of shipments including interplant transfers (\$1,000)	
		1963	1958
36131 --	Switchgear, including power switchgear assemblies and other switching and interrupting devices, 2,300 volts and over, total.....	416,950	419,932
36131 11	Automatic and manual panels (generator, transformers, feed-control, etc.).....	14,769	32,081
36131 15	Metal enclosed switchgear (using power-circuit breakers, oil and oilless, and low voltage air-circuit breakers).....	97,290	136,517
36131 17	Metal enclosed bus bar structures, over 750 volts (for sale separately).....	4,421	14,941
36131 31	Relays (except instrument and circuit), regulators, and miscellaneous switchboard devices (for sale separately).....	39,950	47,589
	Power switching equipment (including attachments, auxiliaries, bus supports and fittings, and accessories, but excluding power fuses sold separately):		
36131 41	Outdoor.....	43,091	36,276
36131 45	Indoor.....	6,323	7,908
36131 51	Power and distribution fuses and fuse links for 2,300 volts and over, a.c. service (excluding distribution cut-outs).....	29,726	8,994
36131 81	Power connectors (excluding connectors used under National Electrical applications).....		9,902
36131 83	Distribution cut-outs.....		16,050
	Duct, including plug-in units and accessories (not exceeding 750 volts consisting of enclosed sectionalized prefabricated bus bars rated 20 amperes or more and associated structures and fittings):		
36131 86	Busways.....	31,003	23,182
36131 88	Trolley-type.....	1,829	
	Relays, circuit:		
36131 91	A.c. and d.c. magnetic control circuit relays, excluding overload relays.....	119,366	81,601
36131 94	Overload relays.....	9,574	4,891
36132 --	Circuit breakers, total.....	211,629	200,990
36132 43	Power circuit breakers (all voltage).....	99,112	81,596
36132 52	Molded case circuit breakers assembled as complete units in supporting and enclosing housings of insulating materials; with or without accessories or attachments.....	88,040	50,559
36132 56	Individually enclosed molded case circuit breakers (excluding panelboards and busway plugs, but including a group of such breakers in a single cabinet intended to function as service equipment) (750 volts and under).....	13,964	40,447
36132 98	Other circuit breakers.....	10,513	28,388
36133 --	Low voltage panelboards and distribution boards and other switching and interrupting devices, 750 volts and under, total.....	282,435	224,223
	Panelboards and distribution boards:		
	Panelboards (including enclosing cabinets):		
36133 11	Fusible (including combination switch and fuse).....	31,215	16,628
36135 12	Circuit breaker.....	45,243	35,629
	Distribution switchboards:		
36133 15	Fusible.....	15,037	9,904
36133 17	Circuit breaker.....	36,314	18,545
36133 19	Other (including theater switchboards).....	9,027	8,403
	Switches (except switches commonly known as snap, toggle, and rotary switches; and switch devices intended primarily to be used with electric motor controls):		
	Knife switches, open and enclosed:		
36133 21	Open knife switches, parts and switch interiors.....	6,674	4,134
36133 23	Enclosed safety switches (including pull out types).....	35,786	49,057
	Load centers:		
36133 24	Enclosed fusible, service entrance, and branch circuit cut-outs.....	14,829	14,213
36133 26	Circuit breaker type.....	26,748	
36133 27	Time switches (repetitive with respect to fixed time of day).....	10,681	7,065
36133 29	Other switches (excluding snap, toggle, push, etc., but including meter service equipment, other than meter mounting and test devices).....	12,502	19,797
36133 98	Other switchgear and switchboard apparatus.....	38,379	22,941
36133 00	Low voltage panelboards and distribution boards and other switching and interrupting devices, 750 volts and under, n.s.k.....	-	17,907
36134 --	Fuses and fuse equipment, under 2,300 volts (except power distribution cut-outs), total.....	39,972	30,675
36134 31	Nonrenewable plug fuses <sup>1</sup> .....	7,270	7,785
36134 51	Nonrenewable cartridge fuses <sup>2</sup> .....	13,247	9,274
36134 71	Renewable plug and cartridge fuses (including renewal links).....	4,215	5,626
36134 93	Other fuses and open fuse material (including cut-outs, clips, bases, etc.).....	15,240	6,886
36134 00	Fuses and fuse equipment, under 2,300 volts, n.s.k.....	-	1,104

Source: Current Industrial Reports Series M36A, "Switchgear, Switchboard Apparatus, Relays, and Industrial Controls."

- Represents zero.

n.s.k. Not specified by kind.

<sup>1</sup>For 1963, quantity reported totaled 140,905.<sup>2</sup>For 1963, quantity reported totaled 46,284.

TABLE 6A-4. Motors and Generators: 1963 and 1958

Product code	Product	Total shipments including interplant transfers	
		Quantity	Value (\$1,000)
		1963	
		(1,000 units)	
36211 --	Fractional horsepower motors (excluding hermetics), total.....	99,035	592,363
36211 01	Automobile accessory motors (including all accessory motors, such as heater, convertible top, automatic windows, etc.; excluding starting motors and generators).....	28,876	120,685
	Aircraft and space motors (excluding generators):		
36211 03	A.c.....	147	13,773
36211 04	D.c.....	140	12,878
36211 05	Toy motors (all sizes) (including those for advertising displays, etc.)....	1,365	1,821
36211 07	Clock-type synchronous and subsynchronous timing motors.....	12,240	15,294
	Universal:		
	Cased motors (punching diameter):		
36211 08	Less than 2-1/8" in diameter.....	266	1,216
36211 09	2-1/8" in diameter and over but less than 2-7/16" in diameter.....	1,042	3,387
36211 10	2-7/16" in diameter and over but less than 2-7/8" in diameter.....	1,017	5,287
36211 11	2-7/8" in diameter and over but less than 3-3/16" in diameter.....	1,240	9,116
36211 12	3-3/16" in diameter and over but less than 3-11/16" in diameter.....	436	5,049
36211 13	3-11/16" in diameter and over but less than 4-3/8" in diameter.....	96	3,246
36211 14	4-3/8" in diameter and over.....	19	598
	Uncased motors (punching diameter) (consisting of stator, rotor, and brush holder mechanisms, without end shields, bearings, or conventional frame, usually called "motor parts"):		
36211 15	Less than 2-1/8" in diameter.....	247	2,471
36211 16	2-1/8" in diameter and over but less than 2-7/16" in diameter.....		
36211 17	2-7/16" in diameter and over but less than 2-7/8" in diameter.....	256	966
36211 18	2-7/8" in diameter and over but less than 3-3/16" in diameter.....	194	800
36211 19	3-3/16" in diameter and over but less than 3-11/16" in diameter.....	595	2,620
36211 20	3-11/16" in diameter and over but less than 4-3/8" in diameter.....	225	1,713
36211 21	4-3/8" in diameter and over.....	27	501
	Direct current motors and generators (case diameter) (excluding automotive starting motors, generators, and accessory motors):		
36211 22	Less than 3" in diameter (up to 1/70 hp.).....	611	9,522
36211 23	3" in diameter and over but less than 4-5/8" in diameter (1/70 hp. and over but less than 1/20 hp.).....	111	2,315
36211 24	4-5/8" in diameter and over but less than 6" in diameter (1/20 hp. and over but less than 1/6 hp.).....	355	6,429
36211 25	6" in diameter and over but less than 7-1/8" in diameter (1/6 hp. and over but less than 1 hp.).....	789	13,975
36211 26	7-1/8" in diameter and over but less than 9" in diameter (1/6 hp. and over but less than 1 hp.).....	25	3,253
	Alternating current:		
	Skeleton type shaded pole motors:		
	Less than 2-3/4" in diameter:		
36211 31	Less than 5 mhp.....	3,916	9,746
36211 33	Over 5 mhp.....	481	1,178
	2-3/4" in diameter and over:		
36211 35	Less than 5 mhp.....	1,523	4,215
36211 37	5 mhp. and over but less than 35 mhp.....	3,609	5,480
36211 39	35 mhp. and over.....	1,341	4,396
	Conventional type shaded pole motors (case diameters):		
36211 41	Less than 1-1/2" in diameter, all horsepower ratings built in this diameter.....	203	676
	1-1/2" in diameter and over but less than 2-1/2" in diameter:		
36211 42	Less than 5 mhp.....	1,752	2,222
36211 43	5 mhp. and over but less than 16 mhp.....	1,413	5,530
36211 44	16 mhp. and over.....	819	1,528
	2-1/2" in diameter and over but less than 3-3/4" in diameter:		
36211 45	Less than 16 mhp.....	3,741	13,350
36211 46	16 mhp. and over but less than 1/20 hp.....	6,439	19,626
36211 47	1/20 hp. and over but less than 1/10 hp.....		
36211 48	1/10 hp. and over.....	300	1,289
	3-3/4" in diameter and over but less than 4-1/2" in diameter:		
36211 49	Less than 16 mhp.....	41	300
36211 51	16 mhp. and over but less than 1/20 hp.....	239	1,874
36211 52	1/20 hp. and over but less than 1/10 hp.....	471	4,118
36211 53	1/10 hp. and over.....	135	1,090
	4-1/2" in diameter and over but less than 5-1/4" in diameter:		
36211 54	Less than 1/20 hp.....	131	694
36211 55	1/20 hp. and over but less than 1/10 hp.....	1,023	6,657
36211 56-58	1/10 hp. and over.....	584	6,075

See footnotes at end of table.

TABLE 6A-4. Motors and Generators: 1963 and 1958--Continued

Product code	Product	Total shipments including interplant transfers	
		Quantity	Value (\$1,000)
		1963	
		(1,000 units)	
36211 --	Fractional horsepower motors (excluding hermetics)—Continued		
	Alternating current—Continued		
	Conventional type shaded pole motors (case diameters)—Continued		
36211 59	5-1/4" in diameter but less than 9" in diameter (all hp. ratings).....	1,782	17,561
